Recall No.** Structure No.	Facility Carried	Feature Crossed	Structure Type	Year Built	Owner	Within/Adjacent to Known Historic District
061410 62532690402801	LA0442	NAT. RIVER RELIEF	Concrete Slab	1963	State of Louisiana	N/A
No evidence was found during research or data collection activities to indicate that this post-1945 concrete or steel beam, girder or culvert bridge exhibits exceptional design, engineering, or construction or that it possesses a direct and important association with historical events or trends of exceptional importance. This bridge does not possess significance under the National Register Criteria for Evaluation and is not eligible for listing under Criteria A and C.						
061420 62532690402891	LA0442	NATALBANY RIVER	Concrete Deck & Bents w/ Steel I-Beam	1963	State of Louisiana	N/A
No evidence was found during research or data collection activities to indicate that this post-1945 concrete or steel beam, girder or culvert bridge exhibits exceptional design, engineering, or construction or that it possesses a direct and important association with historical events or trends of exceptional importance. This bridge does not possess significance under the National Register Criteria for Evaluation and is not eligible for listing under Criteria A and C.						
061430 62532690403671	LA0442	LA 442 OVER I-55	Concrete Prestressed Girders	1967	State of Louisiana	N/A
No evidence was found during research or data collection activities to indicate that this post-1945 concrete or steel beam, girder or culvert bridge exhibits exceptional design, engineering, or construction or that it possesses a direct and important association with historical events or trends of exceptional importance. This bridge does not possess significance under the National Register Criteria for Evaluation and is not eligible for listing under Criteria A and C.						
061450 62532690500131	LA0442	LA 1080	Concrete Slab	1955	State of Louisiana	N/A
No evidence was found during research or data collection activities to indicate that this post-1945 concrete or steel beam, girder or culvert bridge exhibits exceptional design, engineering, or construction or that it possesses a direct and important association with historical events or trends of exceptional importance. This bridge does not possess significance under the National Register Criteria for Evaluation and is not eligible for listing under Criteria A and C.						
061460 62532690503381	LA0442	TANG RIVER RELIEF	Concrete Slab	1963	State of Louisiana	N/A
No evidence was found during research or data collection activities to indicate that this post-1945 concrete or steel beam, girder or culvert bridge exhibits exceptional design, engineering, or construction or that it possesses a direct and important association with historical events or trends of exceptional importance. This bridge does not possess significance under the National Register Criteria for Evaluation and is not eligible for listing under Criteria A and C.						
061470 62532690503471	LA0442	TANGIPAHOA RIVER	Concrete Deck & Bents w/ Steel I-Beam	1963	State of Louisiana	N/A
No evidence was found during research or data collection activities to indicate that this post-1945 concrete or steel beam, girder or culvert bridge exhibits exceptional design, engineering, or construction or that it possesses a direct and important association with historical events or trends of exceptional importance. This bridge does not possess significance under the National Register Criteria for Evaluation and is not eligible for listing under Criteria A and C.						
061480 62532690506851	LA0040	BRUSHY BRANCH	Concrete Slab	1957	State of Louisiana	N/A
No evidence was found during research or data collection activities to indicate that this post-1945 concrete or steel beam, girder or culvert bridge exhibits exceptional design, engineering, or construction or that it possesses a direct and important association with historical events or trends of exceptional importance. This bridge does not possess significance under the National Register Criteria for Evaluation and is not eligible for listing under Criteria A and C.						

*The not eligible determination is for the bridge only. Consideration of the bridge as part a potential historic district and impacts to archeological properties still need to be addressed as part of Section 106 review. Bridges located within a previously determined eligible or listed historic district are identified to assist with project planning.
**Structure number only is shown for federally-owned bridges without a LADOTD recall number; off-system bridges not owned by LADOTD or a federal agency are assigned a number beginning with “XXXX.”
