# **DOTD FORM: 24-102**

(Revised March 1, 2022)

#### PROPOSAL TO PROVIDE CONSULTANT SERVICES

Prime consultant shall complete the DOTD Form 24-102 without altering the Form's text; however, the instruction and/or guidance for Sections 12 through 23 can be removed but do not remove Section title and number.

ANY CONSULTANT FAILING TO SUBMIT ANY OF THE INFORMATION REQUIRED ON THE DOTD FORM 24-102, OR PROVIDING INACCURATE INFORMATION ON THE DOTD FORM 24-102, MAY BE CONSIDERED NON-RESPONSIVE.

Prime consultant should enter the firm name in the footer at the bottom of this page. (It will carry over to subsequent pages.)

1.	Contract title as shown in the advertisement	Contract for Off System Highway Bridge Program
		Hales Road Bridges
		Richland Parish
2.	Contract number(s) as shown in the advertisement	4400025036
3.	State Project Number(s), if shown in the advertisement	H.014986.5
4.	Prime consultant name (as registered with the Louisiana Secretary of State	
	where such registration is required by law)	Morgan Goudeau & Associates, Inc.
5.	Prime consultant license number (as registered with the Louisiana	
	Professional Engineering and Land Surveying Board (LAPELS) if registration	Engineering: EF.0001118
	is required under Louisiana law)	Surveying: VF.0000183
6.	Prime consultant mailing address	1703 West Landry Street
		Opelousas, LA 70570
7.	Prime consultant physical address (existing or to be established, if location	1703 West Landry Street
	is used as an evaluation criteria)	Opelousas, LA 70570
8.	Name, title, phone number, and email address of prime consultant's contract	Kenneth Boagni, III, P.E., P.L.S., President
	point of contact	(337) 948-4222   kenny@morgangoudeau.com
9.	Name, title, phone number, and email address of the official with signing	Kenneth Boagni, III, P.E., P.L.S., President
	authority for this proposal	(337) 948-4222   kenny@morgangoudeau.com
10.	This is to certify that all information contained herein is accurate and true,	
	and that the team presently has sufficient staff to perform these services	
	within the designated time frame. By submitting this proposal, proposer	
	certifies that it is not engaged in a boycott of Israel and it will, for the	

duration of its contract obligations, refrain from a boycott of Israel. Proposer also certifies and agrees that the following information is correct: In preparing its response, the proposer has considered all proposals submitted from qualified, potential subcontractors and suppliers, and has not, in the solicitation, selection, or commercial treatment of any subcontractor or supplier, refused to transact or terminated business activities, or taken other actions intended to limit commercial relations, with a person or entity that is engaging in commercial transactions in Israel or Israeli-controlled territories, with the specific intent to accomplish a boycott or divestment of Israel. The proposer also has not retaliated against any person or other entity for reporting such refusal, termination, or commercially limiting actions. DOTD reserves the right to reject the response of the bidder or proposer if this certification is subsequently determined to be false, and to terminate any contract awarded based on Signature (shall be the same person as #9): such a false response. Date: December 6, 2022 Firm(s)' %: 11. If a Disadvantaged Business Enterprise (DBE) goal has been set for this Firm(s): advertisement, indicate which firm(s) will be used to meet the DBE goal and each firm(s)' percentage. N/A N/A

### 12. Past Performance Evaluation Discipline Table:

As indicated in the advertisement, insert the completed table here. The percentages for the prime and sub-consultants must total 100% for **each past performance evaluation discipline**, as well as the overall total percent of the contract.

Sub-consultants are allowed to be used for this proposal. Fill in the table by identifying only those evaluation disciplines consistent with the approach and methodology proposed in Section 18 of the DOTD Form 24-102\*, the name of each firm that is part of the proposal, and the percentage of work in each past performance evaluation discipline to be performed by that firm. The percentage estimated for each evaluation discipline is for evaluation purposes only and will not control the actual performance or payment of the work. The percentages for the prime and sub-consultants must total 100% for each past performance evaluation discipline, as well as the overall total percent of the contract.

Evaluation Discipline(s)	% of Overall Contract	MGA	Providence	Each Discipline must total to 100%			
Bridge	70%	100%	0%	100%			
Environmental	5%	20%	80%	100%			
Survey	25%	100%	0%	100%			
Identify the percentage of work for the overall contract to be performed by the prime consultant and each sub-consultant.							
Percent of Contract	100%	96%	4%				

<sup>\*</sup>The past performance evaluation disciplines are: Road, Bridge, Traffic, CE&I/OV, Geotech, Survey, Environmental, Data Collection, Planning, Right-of-Way, CPM, ITS, Appraiser and/or Other.

If sub-consultants are used, the prime consultant must perform greater than 50% of the work for the overall contract.

### 13. Firm Size:

For all firms that are part of this team, indicate the approximate number of personnel to be committed to this contract, by DOTD Job Classification and the total number of personnel within the firm that could provide support, if needed. If a specialized job classification is required and not included on the DOTD job classification list, specify "Other (xxxx)" and include the classification title inside the parentheses. The DOTD Job Classification(s) to be used can be found at the following link:

 $http://www.sp.dotd.la.gov/Inside\_LaDOTD/Divisions/Engineering/CCS/Job\_Qualification/Job\%20 Classifications\%20 with\%20 Descriptions.pdf$ 

Firm name	DOTD Job Classification	Number of personnel committed to this contract	Total number of personnel available in this DOTD Job Classification (if needed)

01/20-On	ngoing			Bridge and Tunnel Replacement, Plaquemines Parish, LA. The						
		Comprehensive Environmental Protection	Plan (CEPP) f	or the implementation of a LA DOTD transportation project. This first in	n the state plan requested					
		by the LA DOTD involved the preparation of	of a master o	locument designed to ensure commitments made in project's Environm	ental Assessment and					
		permits as well as other applicable enviro	nmental reg	ulatory requirements would be met before, during, and immediately af	iter project construction.					
		Multiple individual plans and training mod	lules were d	eveloped to be housed within the CEPP with the goal of having no viola	tions of environmental					
		permits, mitigations, commitments, or reg	julations. <b>R</b> e	esponsibilities: Development of the plan format and content, prepar	ation of multiple sections					
		and training materials, consistency review, and quality review. The plan was completed and accepted by the client and LA DOTD in May 2021 with								
				rsight and inspection that will continue through completion of construct						
01/17-On	ngoing	Environmental Project Manager: Mississippi River Bridge GBR: LA 1 to LA 30 Connector, EBR, WBR, Ascension, Iberville, LA. A								
		reevaluation of an existing EA for a LA $1/L$	LA 415 Conne	ector involving a new bridge over the Gulf Intracoastal Waterway, nece	ssary to consider a change					
		in bridge height and possible relocation of	f approved ri	ight-of-way. Efforts include a vessel study and reevaluation of traffic d	lata to assess design					
		modifications and potential right-of-way n	nodifications	. Responsibilities: Management of project schedule, NEPA process of	and NEPA document					
		revision, including revision of supporting t	technical stu	dies, coordination with state agencies, environmental, analyses, organ	ization of agency					
		meetings, and development of public infor	mation and	agency involvement plans.						
09/11-On	ngoing	Environmental Project Manager: 1-4	19 Inner Co	nnector Stage 1 Environmental Impact Statement, Shrevepo	rt, Caddo Parish, LA.					
		Environmental Impact Statement (EIS) and	interchange	reports for the proposed I-49 Inner City Connector. Project involves al	I necessary engineering					
		and environmental investigations to obtai	n environme	ntal clearance on construction of a connector linking the existing I-49 t	o future I-49 North around					
		Shreveport. Responsibilities: Manager	ment of proje	ect schedule, NEPA process and NEPA document development, developm	nent of the purpose and					
		need statement, environmental and altern	natives analy	rses, environmental justice analysis, organization of agency meeting, p	oublic outreach,					
		involvement meetings and materials, development of public information and agency involvement plans, and coordination of public events,								
		development of relocation plan, preparation	•		•					
01/17-02	2/21			Study: LA 415 to Essen on I-10 and I-12, Stage 1 Environme	ental Assessment, East					
. ,	•			Interstate 10 (I-10) through Baton Rouge to develop feasible improvem						
				o I-10 and I-12 from the LA 415 interchange to the I-10 and I-12 interch						
				g I-10 along with implementation of various concepts to recommend a p	•					
		,g		v v i i i i i i i i i i i i i i i i i i						

Various concepts include widening existing infrastructure and revising interchanges. Extensive public outreach efforts are also included in this project to ensure public input is received throughout the process. **Responsibilities:** Management of project schedule, NEPA process and NEPA document development, coordination of all work with six sub-consultants, environmental and alternatives analyses, environmental justice analysis, organization of agency meetings, public outreach/involvement meetings and materials, development of public information and agency involvement plans, and coordination of public events, development of relocation plan, preparation of decision documents.

Kerry Oriol has over 32 years of multidisciplinary experience in the environmental field. She has expertise in project management, NEPA documents and public outreach requirements, including Environmental Impact Statements (EIS), Environmental Assessments (EA), and mitigation planning and implementation for project specific impacts. Ms. Oriol's pre-consulting experience involved working in the former Water Pollution Control Division of the Louisiana Department of Environmental Quality's (LDEQ) Office of Water Resources and as a research associate with Louisiana State University (LSU). Kerry is certified in NEPA and Transportation and Decision-Making Process (NHI Course #142005)

02/17-04/17	Wetlands/Permitting: East Baton Rouge Parish Department of Public Works, Nicholson Drive Improvements, East Baton Rouge
	Parish, LA. Conducted a wetland delineation project for the extension of Nicholson Drive in Baton Rouge, LA. Prepared a wetland data report/request
	for preliminary jurisdictional determination for submittal to the USACE New Orleans District.
05/16-06/16	Wetlands/Permitting: 1-49 Inner Connector Stage 1 Environmental Impact Statement, Shreveport, Caddo Parish, LA. Conducted a
	wetland delineation and completed a wetland summary of findings for submittal to the North Louisiana Council of Governments to advise them on
	regulatory compliance associated with an interstate connection project in Shreveport, LA.
07/16-12/16	Wetlands/Permitting: West Feliciana Parish, Department of Public Works, West Feliciana Parish, LA. Participated in a wetland
	delineation project for the replacement of the Jacock Road Bridge near St. Francisville, LA. Prepared a wetland data report/request for preliminary
	jurisdictional determination for submittal to the USACE.
10/16-12/16	Wetlands/Permitting: St. James Parish Government, Barras Road Extension, St. James Parish, LA. Participated in a wetland
	delineation project for the extension of Barras Road near St. James, LA. Prepared a wetland data report/request for preliminary jurisdictional
	determination for submittal to the USACE.

Taylor Simoneaux, CWB, PWS has worked as an Environmental Scientist with Providence since February 2016. His areas of focus are wetlands, coastal, and ecological regulatory permitting/compliance, threatened and endangered species, wetland delineations, environmental inspections, and project management. His experience in environmental and ecological compliance assistance includes: wetland delineations and reporting; U.S. Army Corp of Engineers (USACE) Section 10/404/408 permitting, Louisiana Department of Natural Resources (DNR) Office of Coastal Management (OCM) Coastal Use Permitting; FEMA Floodplain Permitting; U.S. Fish and Wildlife Service (USFWS) Section 7 consultations; State Historic Preservation Office (SHPO) Section 106 consultations; Environmental Inspections per standard Best Management Practices (BMPs) and Federal Energy Regulatory Committee (FERC) Plans and Procedures, and many local/Parish/municipal permitting requirements. He is actively involved in all phases of environmental permitting/compliance and project management for clients in industrial, commercial, governmental, and private sectors. Taylor has also completed Richard Chinn Environmental Training, 38-Hour USACE Wetland Delineation Training Program.

Tanner Jones is a GIS Manager/Specialist with sever years of experience. Since joining Providence in 2017, Mr. Jones has assisted with the data collection and spatial components of projects across all Providence service lines, ranging from basic data collection and figure production for permit applications to custom GIS-based solutions for automated business processes. Mr. Jones is proficient with a variety of GIS solutions, including mapping, data management, online and mobile based application development for data communication or collection, and geospatial analysis or desktop surveys. In addition to supporting the GIS needs to Providence and its clients, Mr. Jones also holds a small unmanned aerial vehicle operator certification with the Federal Aviation Administration. He has flown drone missions for a variety of projects including structural inspections, site mapping, environmental surveys, project documentation, permit compliance, and site monitoring. Tanner has completed the Richard Chinn Environmental Training, 38-Hour USACE Wetland Delineation Training Program.

#### 17. Firm Experience:

Identify the team's project experience most relevant to the scope in the advertisement. The projects should be limited to a total of 20, with no more than 5 projects being represented by the prime consultant and with no more than 3 projects represented by each sub-consultant on the team. If more than 5 projects are identified for the prime consultant, all projects identified after the first 5 will not be evaluated. If more than 3 projects are identified for a single sub-consultant, all projects identified after the first 3 from that sub-consultant will not be evaluated. Include no more than one page per project. Projects identified shall only include work performed by firms on the team. The projects identified do not necessarily need to have been DOTD projects.

In 2015, Morgan Goudeau and Associates, Inc. became the prime consultant for the replacement of three (3) bridges in St. Landry Parish and provided all the required engineering and land surveying services in the contract. The existing four (4) span, 61.33' X 17.86', timber bridge on Rozena Road crossing Bayou Mallet was replaced with a three (3) span, 120' X 24' (clear roadway), concrete slab bridge (Quad Beam). The existing three (3) span, 48.76' X 22.51', timber bridge on Billeaux Road over Bayou Carencro was replaced with 3 — 10' X 10' X 55' reinforced concrete box culverts with a 24' clear roadway. The existing two (2) span, 37.83' X 37.61', concrete bridge on Judson Walsh Drive crossing a Drainage Bayou was replaced with 4 — 10' X 10' X 54' reinforced concrete box culverts with a 24' clear roadway. MGA performed and developed the following for this project: topographic survey, drainage map, hydraulic studies, preliminary and final design plans (inclusive of plan/profile, general bridge plan, typical sections and details, cross-sections, and summary of estimated quantities), right-of-way and servitude sketches and descriptions, solicitation of views and environmental review record. Wetland studies were completed by a sub-consultant coordinated by MGA.

The Louisiana Highway 70 (LA 70) project was the prepare the Stage 1 documents necessary to implement the construction of a proposed bypass and an emergency runaround of LA 70 near is intersection with LA 69 in Assumption Parish, LA. The LA 70 Bypass was proposed due to public safety concerns that have resulted in the closure of LA 70 numberous times in the last decade. These safety concerns are associated with failures of the Napoleonville Salt Dome, which has caused surface instabilitiy and the formation of a sinkhole south of the highway. While a long-term solution was being developed, further failure of the integrity of the Napoleonville Salt Dome could result in need to close LA 70. An Emergency Runaround would allow traffic to resume on this important route until a more permanent solution is implemented. For this reason, two Environmental Assessment (EA) documents were to be prepared under this project: one for the LA 70 Bypass and one for the Emergency Runaround. **Providence staff conducted** wetland delineation, analysis, and data report, threatened and endangered species survey and report, and permitting assistance for the construction of the detour route of LA 70. Prepared wetland and jurisdictional determination request- USACE New Orleans District. A finding of No Significant Impact (FONSI) was issued following the Environmental Assessment (EA).

The Fort Buhlow Bridge project was part of a retainer contract that included environmental and permitting services for 62 road and bridge projects throughout the state, involving coordination with all relevant federal, state, and local agencies. The proposed bridge and approaches project included replacement of the 0.6-mile-long O.K. Allen Bridge over Lake Buhlow and the widening and reconstruction of 1.3 miles of roadway approaches/additional travel lanes. Neither the bridge nor the approach roadways had sufficient width to accommodate existing or projected traffic demand; the project intended to provide accommodations for anticipated traffic increases, reduce accidents, and meet current safety standards.

Providence staff completed wetland delineations, analysis, and data reports. Staff prepared and submitted Section 10/404 permit application to the U.S. Army Corps of Engineers (USACE) and filed the U.S. Coast Guard (USCG) bridge permit and Red River, Atchafalaya, and Bayou Boeuf Levee District permit applications. Upon the start of construction, the LA DOTD requested additional workspace associated with the construction of the new bridge. A wetland delineation was done on the additional area and permit amendments were filed with all relevant state and federal agencies.

The Louisiana Department of Transportation and Development requested a Wetland Findings Report for an existing bridge in Caddo Parish, Louisiana as part of a larger off-system bridge replacement project. As a subconsultant to Morgan Goudeau and Associates, Providence was contracted to conduct a wetland delineation and provide a wetlands report for the bridge replacement project. Providence biologists documented existence of potential jurisdictional wetlands and regulated other waters of the United States at all sites, including access points and temporary workspaces. Providence biologists delineated the areas in accordance with the 1987 Corps of Engineers Wetland Manual and guidance from the Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Atlantic and Gulf Coastal Plain Region (U.S. Army Corps of Engineers, Wetland Regulatory Assistance Program 2010). After the wetlands assessments, Providence staff prepared Wetland Findings Reports which included discussions of existing wetlands, vegetation communities, and soils based on published soil surveys and soil sampling. Data sheets, photographs, and wetland mapping were included in the Wetland Findings Reports. Wetland impact areas quantified by type were also reported. Providence staff completed a similar scop e of work for other bridge replacements included in the Off-System Bridge Replacements project, including bridges in Ouachita (H.014232), St. Martin (H.014226), and Tangipahoa (H.014262, H.014263) Parishes.

Key Staff Members Highlighted in this project: Paul Clifton, PWS, Taylor Simoneaux, PWS, CWB

#### 18. Approach and Methodology:

#### Introduction - Morgan Goudeau and Associates Resources

The staff of Morgan Goudeau and Associates, Inc. (MGA) offers over 34 years of Off-System Bridge (OSBR) experience invested across the State of Louisiana making this firm one of the state's oldest and most experienced in DOTD Federal-Aid program Off-System Bridge (OSBR) Program, crediting direct involvement with the OSBR program since 1988. MGA has an extensive track record for designing and overseeing DOTD projects, having delivered engineering and surveying-related services in over 30 parishes and municipalities on over 120 OSBR sites.

MGA is one of the state's oldest engineering and land surveying firms bringing over 120 years of professional engineering and land surveying experience. The MGA Team includes the key management, surveying, design, and graphics personnel referenced on the staffing plan and included within Section 15.

Over the past 34 years MGA has performed a range of engineering and OSBR services including topographic surveys, hydraulic analysis, preliminary and final plans for 120 structures in 30 parishes (Acadia, Allen, Ascension, Avoyelles, Beauregard, Bienville, Caddo, Caldwell, Calcasieu, Caldwell, Cameron, Claiborne, Catahoula, DeSoto, East Baton Rouge, Evangeline, Franklin, Grant, Jackson, Lafourche, LaSalle, Madison, Natchitoches, Ouachita, Rapides, Richland, St. Landry, St. Martin, Sabine, Tangipahoa, Tensas, Vernon, Webster, West Carrol). Design services included multi-barrel culverts and box culverts, standard slab spans, standard quad beam girder bridges, and moderate special detail slab spans.

MGA key staff members have gained the experience required to implement this project accurately and efficiently for the DOTD Off-System Bridge Replacement Program and staff. MGA maintains an excellent team representing staff experience to assist the DOTD Off-System Bridge Replacement Program effectively and efficiently with implementation of bridge replacement projects. MGA has been involved in this program since 1988 and has worked closely with DOTD project managers to maintain program quality and integrity.

The Morgan Goudeau and Associates, Inc. team ensures all services provided will be performed in strict adherence with the DOTD OSBR Program Guidelines Manual. MGA will utilize the valuable resources of a staff extremely experienced with the OSBR program in conjunction with the DOTD OSBR guideline manual, to produce high-quality deliverables throughout the project plan development process. MGA team's collective experience with the DOTD OSBR program includes surveying and preparing plans for both standard and non-standard structures in accordance with all DOTD procedures and manuals for roadway and bridge design.

### Methodology

The general scope of work for the project will consist of performing topographic surveys, hydraulic analysis and design, preliminary roadway and bridge design, solicitation of views and categorical exclusion clearance documentation required for environmental clearance, wetlands studies, wetlands permitting, right-of-way sketches and agreements for Parish acquisition, and final roadway and bridge design. Detailed descriptions of how the various tasks will be performed and their schedules are described below.

Morgan Goudeau and Associates manages project delivery with a philosophy that is built on strong communication and ensuring team understanding of work scope resulting in timely submission of reports, schedules, and deliverables as well as QA/QC of deliverables. Kenny Boagni, PE will be the principal-in-charge of this project. MGA will immediately reach out to the DOTD project manager (PM) upon contract execution to schedule a project kickoff meeting with lead MGA staff members to briefly review contract management policy and procedures and establish an understanding of management procedural preferences from the DOTD PM. This meeting will also serve to address strategies to address possible unique site and project challenges with consideration for the project needs and timeline. As such, MGA will submit a proposed project schedule to DOTD PM for consideration with a timeline beginning with the anticipated Notice to Proceed [NTP) date. Quality and Assurance (Q&A) will include the DOTD PM in correspondence with any other DOTD Section. All invoices shall be submitted to DOTD in accordance with the Standard Operating Procedure Consultant Contract Invoice Processing.

#### **Topographic Survey**

Upon execution of the contract and issuance of the Notice to Proceed (NTP), the principal-in-charge, project manager, land surveyor and design engineer will review aerial images and perform a desktop and initial field survey of the bridge site, while collecting project information (location map, project number request from, traffic counts, and survey field books) from DOTD OSBR staff.

The project PLS and PLS staff will ensure field supervision & Quality Control and Quality Assurance (QC/QA) according to specifications of the OSBR (Off-System Bridge Replacement) program manual. PLS will provide field supervision and QA/QC of survey procedures and data collection throughout the topographic survey process.

MGA will submit the DOTTIE (One Call) request to identify all buried utility locations and markings for the property/area to be surveyed. The process will likely include MGA survey crew duplicating utilities and location markings to ensure thorough communication and enhanced data collection within the limits of the surveyed area.

On the same day that the topographic survey is initiated, MGA will meet with a Parish roadways representative at the bridge site to confirm correct bridge identification for the replacement project. Bridge identification will match stenciled bridge number with structure number listed in the contract and on the replacement schedule. Desktop review will include available aerial imagery, street view imagery, property maps and data, topographic maps, elevation data (Light Detection and Ranging LiDAR and Digital Elevation Models [DEM]), and Natural Resource Conservation Service (NRCS) parish soil data. The information will be used to identify potential questions to discuss with Parish personnel and residents familiar with drainage at the bridge sites. Fieldwork will also include a centerline survey. Upon completion of the data collection and desktop review, the MGA survey team will provide the topographic survey for the project. The topographic survey will be based on the surveyed centerline. The information gathered will be used to define drainage areas and flow patterns to identify potential issues for review with Parish personnel and residents familiar with the bridge site.

DOTD OSBR Manual will guide the survey limits and data acquisition parameters, which will be gathered with strict adherence. The horizontal survey will be based on the Louisiana State Plane Coordinate System in North American Datum (NAD-83). The vertical control survey will be tied to the North American Vertical Datum (NAVD-88). GPS Rover and Total Station options are available to provide updated topographic data collection, depending on actual terrain. Upon completion of the survey field work, MGA CAD staff will prepare an existing plan profile sheet and existing drainage map under the direction of MGA project design engineer.

MGA will review all drawings and reports in strict accordance with the Off-System Highway Bridge Program Guidelines and submit them to the DOTD Off-System Bridge staff for review and approval. It is anticipated the topographic survey work will be completed within 30 days of receipt of the NTP from DOTD.

### **Hydraulic Analysis**

Upon notice of approval of the topographic survey and receipt of NTP, MGA will issue Notice of Inquiry Letters and Maps to the NRCS (Soil Conservation Service), U.S. Army Corps of Engineers, the Parish Department of Public Works Office, and the Parish Floodplain Administrator to rule out any potential timeline or project conflicts such as pending projects or developments by other agencies that could affect the proposed bridge replacement project. In strict adherence with the DOTD hydraulics manual and OSBR program manual, MGA will perform hydraulic analysis to determine viable structural and drainage replacement alternatives. Analysis will include a careful review of existing soil data, storm water discharge rate calculations and existing stream water surface modeling in consideration of viable alternative replacement structures such as a bridge reinforced concrete box, or large diameter culvert cross drain utilizing methods. MGA will collect high water marks and other data and reports from recent events and storms from residents, Parish roadways personnel and site-specific FEMA base flood elevations to calibrate existing stream water surface modeling. In addition to the collected data, MGA will perform hydraulic calculations using the DOTD HYDRWIN Hydraulics Programs and the U.S. Army Corps of

Engineers HEC-RAS program to model the water surface profiles along the channel and bridge structures. The hydraulic results along with the specific measurements of viable structures analyzed as well as the recommended replacement structure, size, type, and location with justification of alternatives declined and recommended will be reflected in the resulting report. Pile scour calculations will be performed and included in the Report during final plans should the recommended replacement structure be a bridge. The estimated completion time for the hydraulics study work and submission to DOTD Hydraulic section and OSBR staff will be 45 days from receipt of NTP.

### Preliminary Plan Development

Upon receipt of the approved hydraulics report from DOTD, MGA will develop preliminary plans and design criteria for the bridge site following strict adherence with DOTD local road design criteria for the assigned roadway classification as required within the OSBR program manual. Any deviation from the DOTD design criteria will require preparation of a design exception by MGA for submittal to the DOTD PM for presentation for consideration of approval by the DOTD chief engineer.

MGA will provide preliminary plan-in-hand plans for review and comment as a 90% submittal to the DOTD PM. Upon implementation of the pre plan-in-hand comments, MGA will then issue plan-in-hand print deliverables to the DOTD PM for the scheduling of an on-site, plan-in-hand review with DOTD, Parish and MGA staff. The plan-in-hand comments will be incorporated into the preparation of final preliminary plans by MGA.

### Servitude and ROW Sketch and Agreement

From the limits of construction established from the cross sections of the final preliminary plans, the required right-of-way, limits shall be determined and developed. The MGA PLS will then prepare any required right-of-way or servitude sketch and agreement in accordance with the provisions outlined in the OSBR manual.

#### **GEOTECHNICAL INVESTIGATION & REPORT**

Upon completion of final preliminary plans, MGA will prepare and submit a boring request form to the DOTD PM for the relative replacement structure.

Following completion of the subsurface investigation and with strict compliance under the direction of the OSBR program manual for geotechnical investigation and design, MGA will prepare and submit the pile design, sheet pile wall design, and embankment settlement request forms to the DOTD PM.

#### WETLAND DELINEATION

MGA will engage Providence to conduct an onsite wetland delineation and complete wetland findings report to accompany the required USACE sketches, SOV packet and environmental checklist.

### Solicitation of Views and Categorical Exclusion Clearance Documentation Required for Environmental Clearance

Immediately following approval of the approved replacement structure within the hydraulic report, MGA shall obtain an appropriate SOV mailing list for the appropriate parish from the DOTD environmental section. MGA will prepare relative project descriptions and location maps to be submitted with the SOB letter mail outs to each entity listed on the SOV mailing list. MGA will assemble responses received from the SOV requests along with right-of-way sketch, wetland delineation, Corps of Engineers permit sketches, and any other related environmental information gathered or created into a hard and digital copy to be submitted to the DOTD PM for further processing.

### Final Roadway and Bridge Design

Upon receipt of the environmental clearance for this project, the Morgan Goudeau and Associates Professional Land Surveying and Engineering team will prepare the final plans for the project, to include the summary of estimated quantities and standard plans

### **Quality Control and Quality Assurance (QC/QA)**

Throughout each phase of this project, Morgan Goudeau and Associates will perform a Quality Control and Quality Assurance (QC/QA) review of each submittal in accordance with the OSBR program included in this proposal, Section 21.

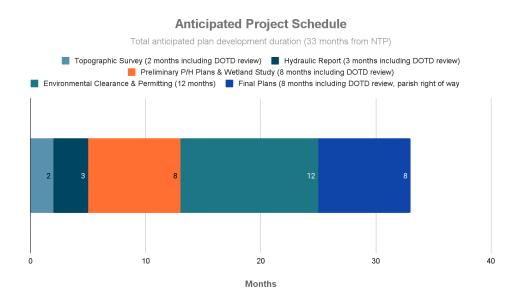

#### **FINAL PLAN DEVELOPMENT**

Upon receipt of environmental clearance, the DOTD PM shall issue an NTP date for final plan preparation. MGA will prepare Pre ACP and ACP plans in strict adherence with directions provided in the OSBR program manual.

### **Final Tracings**

Upon completion of the above-described services, MGA will prepare the final plan tracings in accordance with DOTD OSBR guidelines. Final tracings will be sealed, signed, and dated by the MGA engineer and surveyor of record.

#### **Anticipated Project Schedule**

### 19. Workload:

For all contracts where a firm on the team is a prime consultant or sub-consultant and where a) the consultant selection was made by DOTD, and b) a contract was executed by the consultant and the contracting entity by the date the advertisement for this proposal was posted, list all work meeting the following criteria:

- 1) one of the team's firms is responsible for the performance of the work;
- 2) authorization to perform the work has been provided, as provided in the contract between the consultant and the contracting entity;
- 3) the work has not yet been performed and invoiced; and
- 4) the work is not currently suspended for an indefinite period of time.

 $For indefinite \ delivery/indefinite \ quantity \ (IDIQ) \ contracts, \ list \ open \ Task \ Orders \ individually.$ 

List only the portion of the fees attributable to firms on the team.

(Add rows as needed) DO NOT SUM

<sup>\*</sup> The only past performance evaluation disciplines to be used are: Road, Bridge, Traffic, CE&I/OV, Geotech, Survey, Environmental, Data Collection, Planning, Right-of-Way, CPM, ITS, Appraiser and Other. If a firm has more than one past performance evaluation discipline for any single project, the firm can use multiple rows to express the remaining unpaid balance per evaluation discipline.

<sup>\*\*</sup> Round to the nearest dollar. **Do not** round to the nearest thousands. If there are no active contracts with a remaining unpaid balance, place N/A in the Remaining Unpaid Balance column. LEAVING THE "REMAINING UNPAID BALANCE" COLUMN BLANK IS NOT ACCEPTABLE.

#### 21. QA/QC Plan and/or Work Plan:

#### **QUALITY ASSURANCE/QUALITY CONTROL PLAN**

In order to continue this agenda, this Quality Assurance/Quality Control Plan is being developed to ensure that the highest quality design and standards are achieved for the benefit of the public and its safety. This plan will address procedures for checking the accuracy and consistency of the calculations and drawings, detecting and correcting design deficiencies and errors in order to produce a set of plans and specifications that are adequate to construct the designed structures and assure that the design is safe and adequate for service and operation that it has been designed for. The phases of work that are being requested for engineering and surveying will be addressed in this plan.

#### **REQUEST FOR QUALIFICATION STATEMENTS**

The work anticipated from the engineering firm is outlined in the Request for Qualification Statements (RFQ) as outlined and advertised by the Department of Transportation and Development (DOTD) specific for this project. The major items of work are the Topographic Survey, Preliminary Plans, Final Plans, Construction Support (if required), and Shop Drawings (if required). The complete work outlined above is to be performed by the engineering and surveying firm and be the responsibility of the Engineer of Record for this project who is Kenny Boagni, III, a registered professional engineer and Jacob Jarrell, who is a registered professional land surveyor. The proposed work plan for this project will be outlined in this report. The Engineer of Record and Surveyor of Record shall sign, date, and seal all project documentation. The work will be performed in accordance with Louisiana Revised Statute (LRS) 37:681 through 37:703 and Title 46:Part LXI relating to Professional Engineering and Professional Surveying requirements.

Services to be performed by the DOTD for this project and are the responsibility of the DOTD are as follows:

- 1. All traffic assignments required for determination of design of the Project.
- 2. All information which it has in its files as to location of route, tentative locations of intersections and bridges, boring and test data if any, plans and studies within the area of the Project which may be useful to the Consultant in carrying out this work and assistance in securing similar data from others to the extent available.
- 3. Numbered field survey books as needed, as only field books furnished by the DOTD shall be acceptable for the recording of field data. These books shall be furnished at the request of the Consultant through the Project Manager.
- 4. Standard plan prints of bridges, culverts and incidental drainage structures prepared by the DOTD. It is the intent of this Contract that standard plans be used insofar as these plans are available in the design of all structures required for the Project and that the Consultant, under the stipulated contract compensation, shall prepare complete designs for structures required on the Project for which the DOTD=s standard plans are not available.
- 5. Prepare construction proposals for the project from the plans prepared by the Consultant and handle all bidding procedures applying thereto.
- 6. Provide the Consultant with mailing lists for the Solicitation of Views.
- 7. Provide PH and resistivity reports.
- 8. Provide Channel Probings (if needed).

Services to be performed by the Parish for this project and are the responsibility of the Parish are as follows:

- 1. Acquire all required right-of-way for the Project.
- 2. Relocate all utilities in the way of construction.
- 3. Obtain all required permits on the Project and pay associated fees.

- 4. Perform biological and cultural resource surveys if required.
- 5. Prepare permit applications

#### **DESIGN STANDARDS AND CONTROL**

The design and work for this project will be in accordance with the contract as executed between the DOTD and the Engineering firm. In addition, design criteria and guidelines will also be in accordance with the following manuals and references.

- 1. AASHTO Standards, ASTM Standards or DOTD Test Procedures
- 2. DOTD Location and Survey Manual
- 3. DOTD Roadway Design Procedures and Details
- 4. DOTD Resign Guidelines
- 5. DOTD Hydraulics Manual
- 6. DOTD Standard Specifications for Roads and Bridges most recent publication
- 7. Manual of Uniform Traffic Control Devices
- 8. DOTD Traffic Signal Design Manual
- 9. National Environmental Pol
- 10. National Electric Safety Code (NESC)
- 11. National Electric Code (NFPA 70)
- 12. DOTD Environmental Impact Procedures (Vols. I-III)
- 13. A Policy on Geometric Design of Highways and Streets (AASHTO)
- 14. DOTD Construction Contract Administration Manual
- 15. DOTD Materials Sampling Manual
- 16. DOTD Bridge Design Manual
- 17. Consultant Contract Services Manual
- 18. Geotechnical Engineering Services Document
- 19. Bridge Inspectors
- 20. DOTD Stage 1 Planning/Environmental Manual of Standard Practice
- 21. Code of Federal Regulations 29 CFR 1926 (OSHA)
