# Annual Report

Highway Priority Program  
Project Delivery

October 2026

Submitted in accordance with LA R.S. 48:229.1(D), (E), (F), and (H)  
and LA R.S. 48:231(5)

In the 2025 Louisiana Regular Legislative Session, the legislature enacted Act 380 which set forth changes to Louisiana Revised Statute 48:229.1 in order to provide transparency to the legislature and public the processes in which projects are selected and the successful delivery of the annual Highway Priority Program.

In December 2025, the Louisiana Department of Transportation and Development (DOTD) facilitated Legislative Public Hearings held throughout the state in each of the nine DOTD Districts in order to collect public comments on the preliminary State Fiscal Year 2026-2027 Highway Priority Program. All projects submitted for inclusion in the Highway Priority Program during the December 2025 hearings, as well as any projects submitted during the year by email, phone call or any other means, were screened in accordance with the requirements of LA R.S. 48:229.1(D) and considered for inclusion in the State Fiscal Year 2027-2028 Highway Priority program. Any projects that are not included in the preliminary State Fiscal Year 2027-2028 Highway Priority Program, as presented on DOTD's website in accordance with LA R.S. 48:229.1(E), are provided as Appendix A to this report. The State Fiscal Year 2026-2027 Highway Priority Program was subsequently approved by the legislature in March 2026 and in accordance with LA R.S. 48:229.1(H) the current status is provided in Appendix C. This process will begin again at the legislative public hearings for the preliminary State Fiscal Year 2027-2028 Highway Priority Program, which are scheduled to be held on October 20, 21 and 27 through 29, 2026. The preliminary State Fiscal Year 2027-2028 Highway Priority Program can be accessed [here](#).

Louisiana R.S. 48:229.1(F) requires the DOTD to include in its annual submission of the Highway Priority Program a detailed list of changes to the previous year's program, along with an explanation of the reasons such changes were made. In accordance with this requirement, a list of changes made to projects scheduled to let in the most recently completed State Fiscal Year's Highway Priority Program (2025-2026) is provided as Appendix B to this report.

Additionally, the statute requires DOTD to ensure that at least ninety percent of projects progress as provided for in the previous year's Highway Priority Program. The DOTD defines "progress" as the development, delivery and letting/public bid opening of these projects, on or before the end of the subject state fiscal year. DOTD has demonstrated great improvement over previous years' performance in the delivery of projects included as scheduled to let in State Fiscal Year 2025-2026. See below for a summary of the included projects and the methodology used to determine the percent of projects that were progressed during the year.

## **State Fiscal Year 2025-2026 Highway Priority Program Project Summary**

In the approved State Fiscal Year 2025-2026 Highway Priority Program (FY25-26 HPP), a total of 323 projects were included as "scheduled for letting" in the fiscal year:

- 253 DOTD projects
- 70 Local Public Agency (LPA) projects

After the FY25-26 HPP was approved, a total of 35 projects were removed, as follows:

- 9 projects were cancelled
- 4 projects were completed in other projects
- 7 projects were completed prior to letting
- 15 Railroad related projects that will be completed by the railroad owner

The new project total was then recalculated to remove these 35 projects, which resulted in a new total of 288 projects that were scheduled to let in FY25-26.

- 222 DOTD projects
- 66 LPA projects

Of these 288 projects, the total number of FY25-26 HPP projects that progressed were 202 projects, as follows:

- DOTD progressed projects: 166 out of 222 or 74.8%
- LPA progressed projects: 36 out of 66 or 54.5%
- Total number of progressed projects: 202 out of 288 or 70.1%

In addition to the projects approved as scheduled to let in the FY25-26 HPP, a total of 157 supplemental projects, which were not listed in the original approved FY25-26 HPP as scheduled to let in the fiscal year were progressed as follows:

- 133 supplemental DOTD progressed projects
- 24 supplemental LPA progressed projects

Accounting for the total number of 157 supplemental projects, along with the 202 of 288 projects approved in the FY25-26 HPP, the grand total of progressed projects is calculated as follows:

- DOTD progressed projects: 299 out of 355 or 84.2%
- LPA progressed projects: 60 out of 90 or 66.7%
- Total number of progressed projects: 359 out of 445 or 80.7%

This report is being provided in accordance with LA R.S. 48:229.1(D), (E), (F), and (H).

| 02-2627-000003 | 2        | Timothy Kerner<br>Louisiana House of Representatives - District 84 | Jean Lafitte evacuation route from the bridge to the levee system, Jefferson Parish                                          | Extend the Lafitte evacuation route the remaining approximately two thousand feet so that it connects to the levee system rather than ending short of high ground.                                                                                                                                                               | PROJECT REQUEST | NEW REQUEST      | N/A                                              | NO                          | HB-2/Act-4 (2026 RS) appropriates \$3,000,000 in Priority 5 General Obligation Bonds for the LA 45 Roadway Raising line item in Jefferson Parish. DOTD will request a fall 2026 NCLOC from the Bond Commission. Once a NCLOC is issued, we will include the project in the Highway Program. The Department will review funding needs when preparing DOTD's 11/1/2026 capital outlay requests. |

Two resolutions were adopted by the Program and given project numbers. The third resolution dealt with installing new lighting at the interchange. The Program Manager contacted the entity and stated the program is unable to fund the lighting project at I-49 @ Southern Loop interchange because this interchange does not have existing lighting. Any interchange without existing lighting cannot be funded by the Program at this time. |

| 08-2627-000023 | 8        | Deborah Randolph<br>Central Louisiana Regional Chamber of Commerce | Louisiana Highway 28 East at Cottingham Expressway, Alexandria, Rapides Parish                                                               | Fund a flyover ramp providing access to Cottingham Expressway southbound from westbound Louisiana Highway 28 East, allowing continuous flow where traffic currently stops at at grade intersections, as identified in the United States Highway 165 Monroe Highway corridor study.                                                                                                | PROJECT REQUEST       | NEW REQUEST      | N/A                                                | NO                          | Additional funding would need to be identified for this capacity improvement.                                                                                                                                                                                                                                                                                                 |
| 08-2627-000024 | 8        | Deborah Randolph<br>Central Louisiana Regional Chamber of Commerce | Louisiana Highway 28 West from MacArthur Drive (United States Highway 167) to Vandenberg Drive, Alexandria, Rapides Parish                   | Fund improvements on Louisiana Highway 28 West from MacArthur Drive to Vandenberg Drive to serve the commercial growth along that corridor. The intersection of Louisiana Highway 28 West and MacArthur Drive cannot meet existing traffic demand, causing significant user delay and safety concerns, and the alternative designs under study will require construction funding. | PROJECT REQUEST       | NEW REQUEST      | N/A                                                | NO                          | The Department has reviewed crash data at this location compared to other similar locations statewide. As a result, this location would not qualify as a high potential for highway safety improvement location, and therefore is not a priority for the statewide safety program at this time. Additional funding would need to be identified for this capacity improvement. |
| 08-2627-000026 | 8        | Deborah Randolph<br>Central Louisiana Regional Chamber of Commerce | Louisiana Highway 28, United States Highway 165 Business, and United States Highway 167 Business, Rapides Parish                             | Provide preservation funding to maintain a state of good repair on the four lane corridors delivered through the Transportation Infrastructure Model for Economic Development program.                                                                                                                                                                                            | PROJECT REQUEST       | NEW REQUEST      | N/A                                                | NO                          | These projects were analyzed under the objective prioritization factors set forth in La. R.S. 48:229.1(C), but were not included in the SFY 2027-2028 Highway Priority Program because the anticipated revenues to be appropriated for the program period were fully committed to higher-ranked projects. The projects will be reconsidered for the SFY 2028-2029 program.    |

| 08-2627-000039 | 8        | Deborah Randolph<br>Central Louisiana Regional Chamber of Commerce | Off system bridge at Perkins Creek, Rapides Parish       | Replace the off system bridge at Perkins Creek.       | PROJECT REQUEST | NEW REQUEST     | N/A               | NO                          | The Off-system Bridge Program's purpose is to supplement existing Parish funds by facilitating limited Federal and State dollars to Let projects in the participating Parishes. This Program is approximately \$13 million per year and spread across 62 participating Parishes. The money is allocated based on the percentage of poor bridges in the Parishes compared to the total poor condition bridges in the state. Rapides currently has five off-system projects programmed and did not have enough allocation to program a bridge replacement on this most recent programming cycle. Their current allocation amount is \$46,953. Any additional bridges to be programmed would need additional funds or otherwise be repaired or replaced by Rapides Parish. Ultimately, maintenance and replacement of these off-system bridges are the responsibility of the Parish. |

This Program is approximately \$13 million per year and spread across 62 participating Parishes. The money is allocated based on the percentage of poor bridges in the Parishes compared to the total poor condition bridges in the state. Rapides currently has five off-system projects programmed and did not have enough allocation to program a bridge replacement on this most recent programming cycle. Their current allocation amount is \$46,953. Any additional bridges to be programmed would need additional funds or otherwise be repaired or replaced by Rapides Parish. Ultimately, maintenance and replacement of these off-system bridges are the responsibility of the Parish. |

| 62-2627-000010 | 62       | Robby Miller<br>Tangipahoa Parish President                | Interstate 12 through Tangipahoa Parish                           | Design the Interstate 12 widening through Tangipahoa Parish to convey substantially more water from north to south, so the reconstructed facility does not act as a larger dam and repeat the flooding that a court found resulted from the original design and that the Legislature recently settled. Continue the Interstate 12 and Interstate 55 interchange work and the corridor widening addressing this choke point for international commerce. | PROJECT REQUEST | EXISTING PROJECT | N/A                          | NO                          | DOTD is currently performing a feasibility study for the I-55 interchange currently with a corridor master plan for all of I-12. The intention of these two planning level studies is to identify proposed improvements along I-12 to address issues such as choke points, capacity needs and safety concerns such as the I-12/I-55 interchange.        |
| 62-2627-000011 | 62       | Dean Coates<br>District 8 Councilman for Livingston Parish | Louisiana Highway 44 at Louisiana Highway 63, Livingston Parish   | Evaluate a roundabout at Louisiana Highway 44 and Louisiana Highway 63, a rural intersection with at least two to three fatal crashes in the past year, and identify funding when available.                                                                                                                                                                                                                                                           | PROJECT REQUEST | NEW REQUEST      | N/A                          | NO                          | LA 44 and LA 63 do not intersect.                                                                                                                                                                                                                                                                                                                       |
| 62-2627-000012 | 62       | Dean Coates<br>District 8 Councilman for Livingston Parish | Louisiana Highway 444 at Louisiana Highway 16, Livingston Parish  | Deliver capacity improvements at Louisiana Highway 444 and Louisiana Highway 16, a choke point that backs up for miles during refinery shift changes for workers traveling between Ascension and Livingston parishes and affects the Diversion Canal and Head of Island communities.                                                                                                                                                                   | PROJECT REQUEST | NEW REQUEST      | N/A                          | NO                          | Additional funding would need to be identified for this capacity improvement.                                                                                                                                                                                                                                                                           |
| 62-2627-000013 | 62       | Dean Coates<br>District 8 Councilman for Livingston Parish | Louisiana Highway 42 at Louisiana Highway 63, Livingston Parish   | Correct the uneven pavement at Louisiana Highway 42 and Louisiana Highway 63, which presents a potential safety concern.                                                                                                                                                                                                                                                                                                                               | PROJECT REQUEST | NEW REQUEST      | N/A                          | NO                          | This is a maintenance issue that will be addressed by district forces.                                                                                                                                                                                                                                                                                  |
| 62-2627-000014 | 62       | Dean Coates<br>District 8 Councilman for Livingston Parish | Louisiana Highway 42 at South Satsuma Road, Livingston Parish     | Correct the embankment grade change where South Satsuma Road meets Louisiana Highway 42, where eighteen wheelers bottom out on the transition from the lower road to the elevated highway. This location carries diverted traffic whenever crashes close Interstate 12.                                                                                                                                                                                | PROJECT REQUEST | NEW REQUEST      | N/A                          | NO                          | S.Satsuma Road connects to LA 42 in a superelevated curve so the grade break may be difficult for a WB-67 to overcome. There are signs saying to "proceed with caution" and "low clearance vehicles right turn only". There is a Parish ordinance that prevents commercial vehicles from using the route as a throughway. This is an enforcement issue. |
| 62-2627-000015 | 62       | Dean Coates<br>District 8 Councilman for Livingston Parish | Louisiana Highway 42 at the Palmer Road bridge, Livingston Parish | Inspect and repair the deteriorated bridge on Louisiana Highway 42 at Palmer Road, which has caused multiple flat tires.                                                                                                                                                                                                                                                                                                                               | PROJECT REQUEST | NEW REQUEST      | N/A                          | NO                          | District 62 staff performed maintenance at the site in July 2026 and plan to perform additional work within the calendar year.                                                                                                                                                                                                                          |
| 62-2627-000016 | 62       | Mike Cooper<br>St. Tammany Parish President                | Interstate 12 in St. Tammany Parish                               | Deliver the requested improvements along the Interstate 12 corridor serving St. Tammany Parish, the fourth largest and one of the three fastest growing parishes in the state.                                                                                                                                                                                                                                                                         | PROJECT REQUEST | EXISTING PROJECT | N/A                          | NO                          | DOTD is currently performing a feasibility study for the I-55 interchange currently with a corridor master plan for all of I-12. The intention of these two planning level studies is to identify proposed improvements along I-12 to address issues such as choke points, capacity needs and safety concerns such as the I-12/I-55 interchange.        |
| 62-2627-000020 | 62       | Alex Sumrall                                               | Louisiana Highway 60 drainage bridge, Washington Parish           | Begin and complete the Louisiana Highway 60 drainage bridge project as soon as possible, since trucks are routing through neighborhoods and damaging parish maintained roads.                                                                                                                                                                                                                                                                          | PROJECT REQUEST | EXISTING PROJECT | H.012072 LA 60: DRAIN BRIDGE | NO                          | LA 60 Drain Bridge Replacement was done as an emergency project and has been completed.                                                                                                                                                                                                                                                                 |

JAMES CANAL BRIDGE  | Project moved due to programming based on district priorities and available funding. It is on a list of projects we anticipate receiving Priority 2 CLOC. Project must remain on hold until the Bond Commission meets this fall, at which time it may be funded.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| St. Landry       | H.013811       | 26-27                                       | LA 104: 2.6 MI NW US 190 - US 190        | An update to the lane closure restrictions in the proposal is required. Restrictions were not included at two locations where large drainage structures are required to be replaced. Without the restrictions the traveling public could be exposed to undesirable maintenance to traffic conditions. This issue was discovered by way of a Falcon question. Project subsequently let on 7/8/2026.                                                                                                                                                                                                                                                                                                                                                                                                        |
| St. Martin       | H.012618       | 28-29                                       | LA 347 DRAINAGE IMPROVEMENTS             | The consultant on this project is running significantly behind schedule due to plan quality and design issues as a result of inadequate resources being allocated to the project. Multiple deadlines have been missed and submittals have been rejected due to these issues. In recent discussions with the firm, it was decided that the best path forward would be to take a step back and resubmit preliminary plans with a new design team being placed on the project. The consultant has also notified the Department that additional right of way or servitudes will be needed in order to alleviate flooding concerns and to help the system work as designed. The new timeline incorporates restarting from preliminary plans and going through the right of way map and acquisitions processes. |

**Appendix B - Projects Moved from FY25-26 HPP**

## LOUISIANA DEPARTMENT OF TRANSPORTATION AND DEVELOPMENT

**FY 2026-2027 Highway Priority Program**

Status as of September 30, 2026

**Summary**

The FY 2026-2027 Stage 4 letting list contains 302 projects. As of September 30, 2026, 51 of them are no longer pending on the FY 2026-2027 schedule for one of three reasons: 46 have already let, 2 are being completed within another project in the same state fiscal year, and 3 have been cancelled. Another 23 active projects now carry letting dates outside FY 2026-2027: 12 in FY 2027-2028 and 11 beyond FY 2027-2028. The remaining 228 active projects are still scheduled to let between July 2026 and June 2027.

**1. Projects Already Let (46)**

| Parish                   | Project Number | Project Description                     | Project Status Description | Letting Date |

| ST. JOHN, ST. CHARLES, JEFFERSON | H.015137       | BONNET CARRE ITS UPGRADES                | ACTIVE                     | The scope of this project was originally split into 3 phases, and this was just going to be the first phase; However, the project will now be combined into one single project, and all 3 phases will be let as one project under the same project number. To do so, the consultant will deliver the entire project, which will move the letting SFY 27-28. This will reduce the overall cost of the project since the contractor will only need to mobilize one time, it simplifies the construction plans into one set of plans, and it eliminates the risk of having multiple contractors because it will be let as a single project instead of 3 separate projects. |

| ST. TAMMANY | H.015204       | TOWN CENTER PKWY SIDEPATH (SLIDELL) | ACTIVE                     | At the Plan-in-Hand (5/7/2026) the Entity requested a change in the project scope. The project construction cost has grown passed what the local entity is comfortable with at this time. The project is on hold while the City of Slidell has requested the MPO assist in helping fund the project. If they cannot secure additional funding, the expected path forward is to rescope some aspects of the project to address the budget short fall. |
