| <p>10. This is to certify that all information contained herein is accurate and true, and that the team presently has sufficient staff to perform these services within the designated time frame. By submitting this proposal, proposer certifies that it is not engaged in a boycott of Israel and it will, for the duration of its contract obligations, refrain from a boycott of Israel. Proposer also certifies and agrees that the following information is correct: In preparing its response, the proposer has considered all proposals submitted from qualified, potential subcontractors and suppliers, and has not, in the solicitation, selection, or commercial treatment of any subcontractor or supplier, refused to transact or terminated business activities, or taken other actions intended to limit commercial relations, with a person or entity that is engaging in commercial transactions in Israel or Israeli-controlled territories, with the specific intent to accomplish a boycott or divestment of Israel. The proposer also has not retaliated against any person or other entity for reporting such refusal, termination, or commercially limiting actions. DOTD reserves the right to reject the response of the bidder or proposer if this certification is subsequently determined to be false, and to terminate any contract awarded based on such a false response.</p> | <p>Signature (shall be the same person as #9):</p>  <p>Date: 3/14/2022</p> | |
| <p>11. If a Disadvantaged Business Enterprise (DBE) goal has been set for this advertisement, indicate which firm(s) will be used to meet the DBE goal and each firm(s)' percentage.</p> | <p><u>Firm(s):</u> N/A</p> | <p><u>Firm(s)' %:</u> N/A</p> |

12. Overall Contract Percentage(s):

| | | | | | | | |
|---|---------------------------------|--------|--------|--------|--------|--------|--------------------------------------|
| Sub-consultants are allowed to be used for this proposal. The percentages for the prime and sub-consultants must total 100% for the overall total percent of the contract. | | | | | | | |
| Prime | Firm B | Firm C | Firm D | Firm E | Firm F | Firm G | Percent of Work for Overall Contract |
| Rostan Solutions, LLC 85% | Meyer & Associates, Inc. 15% | | | | | | 100% |
| Identify the percentage of work for the <u>overall contract</u> to be performed by the prime consultant and each sub-consultant. | | | | | | | |

13. Firm Size:

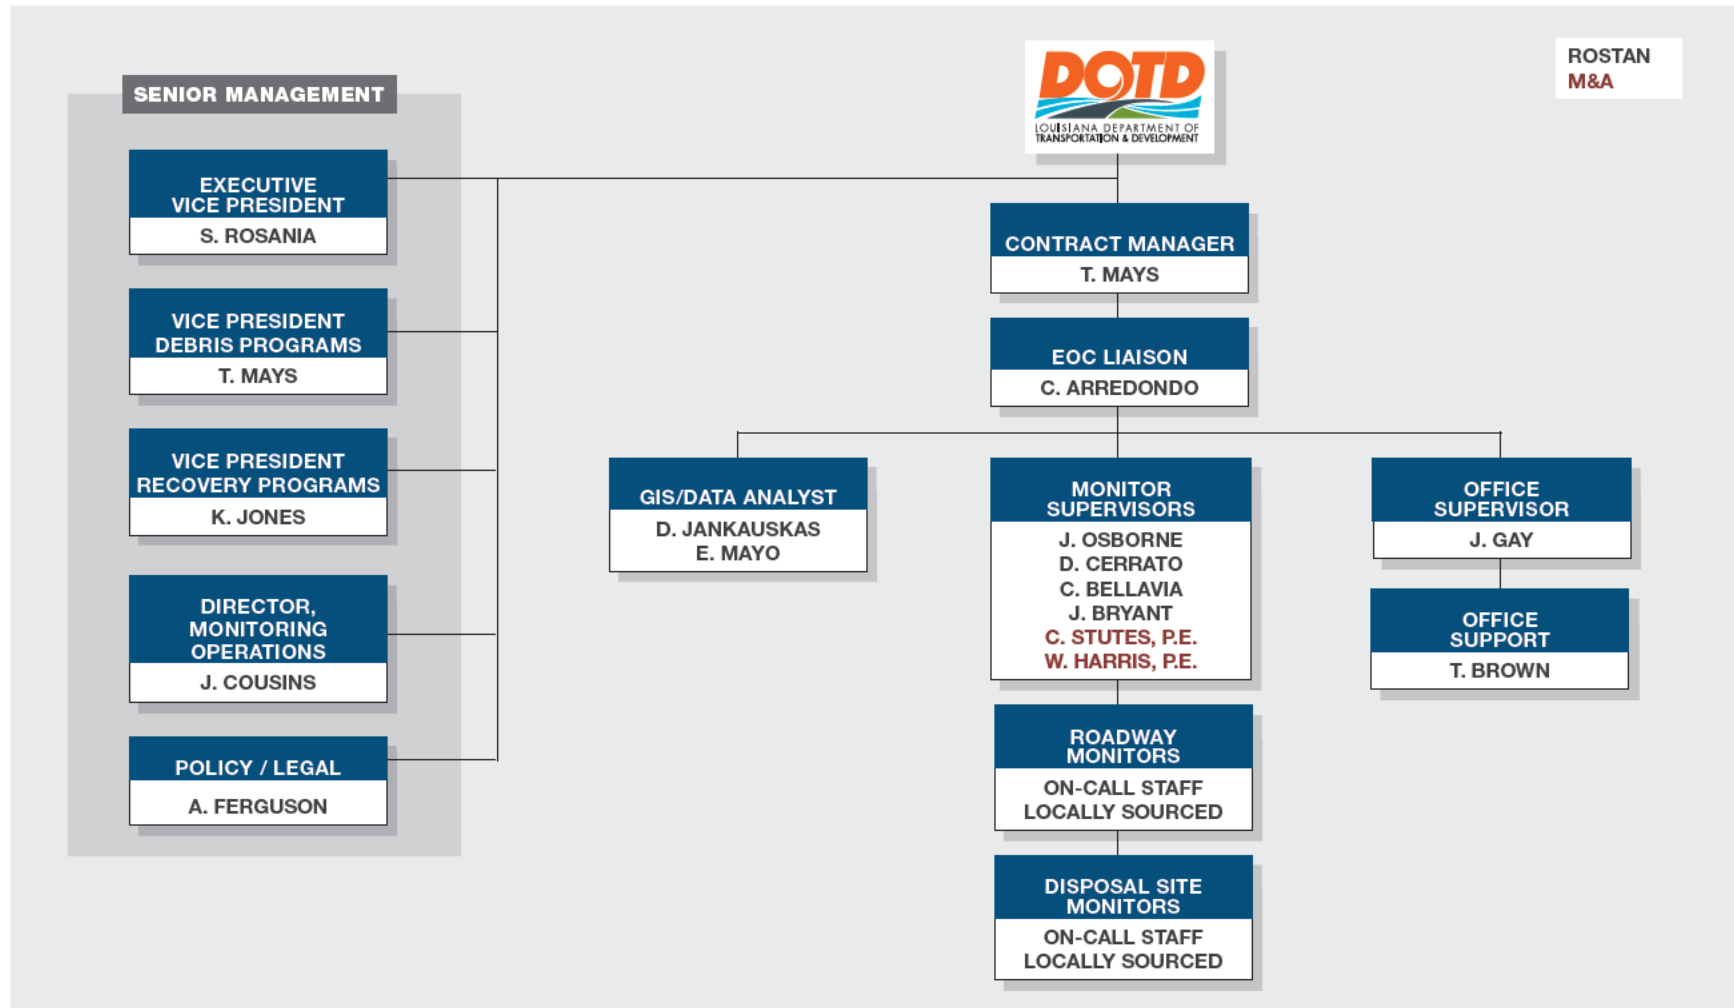

For all firms that are part of this team, indicate the approximate number of personnel to be committed to this contract, by Job Classification and the total number of personnel within the firm that could provide support, if needed. The Job Classification(s) to be used for this contract(s) are: **Contract Manager, EOC Liaison, Monitor Supervisor, Disposal Site Monitor, Roadway Monitor, Office Supervisor, GIS/Data Analyst and Office Support.**

| Firm name | Job Classification | Number of personnel committed to this contract | Total number of personnel available in this Job Classification (if needed) |
|--------------------------|-----------------------|--|--|
| Rostan Solutions, LLC | Contract Manager | 1 | 4 |
| Rostan Solutions, LLC | EOC Liaison | 1 | 4 |
| Rostan Solutions, LLC | Monitor Supervisor | 4 | 20 |
| Rostan Solutions, LLC | Disposal Site Monitor | 0 | 75+ can be sourced locally after an event |
| Rostan Solutions, LLC | Roadway Monitor | 0 | 250+ can be sourced locally after an event |
| Rostan Solutions, LLC | Office Supervisor | 1 | 2 |
| Rostan Solutions, LLC | GIS/Data Analyst | 1 | 2 |
| Rostan Solutions, LLC | Office Support | 1 | 2 |
| Meyer & Associates, Inc. | Engineer | 2 | 5 |

(Add rows as needed)

14. Organizational Chart:

Provide an organizational chart showing ALL **relevant** prime consultant and sub-consultant (if applicable) personnel assigned to the contract, area of project responsibility for each, and reporting lines for the purposes of this contract. An individual's role does not necessarily have to match their job classification identified in Section 13. It is acceptable to use an 11x17 format for Section 14.

15. Minimum Personnel Requirements:

Use the table below to identify both prime consultant and sub-consultant staff designated to work on this contract meeting the Minimum Personnel Requirements (MPRs) specified in the advertisement. Ensure the résumé reflects the required experience stated in the MPR.

| MPR No. Do not insert wording from ad | Personnel being used to meet the MPR (Individual(s) may not satisfy more than one MPR unless specifically allowed by Attachment B of the advertisement) | Firm employed by | Type of license / certification & number | State of license | License / certification expiration date |

17. Firm Experience:

Identify the team's project experience **most relevant** to the scope in the advertisement. The projects should be limited to a total of 20, with no more than 5 projects being represented by the prime consultant and with no more than 3 projects represented by each sub-consultant on the team. If more than 5 projects are identified for the prime consultant, all projects identified after the first 5 will not be evaluated. If more than 3 projects are identified for a single sub-consultant, all projects identified after the first 3 from that sub-consultant will not be evaluated. Include no more than one page per project. Projects identified shall only include work performed by firms on the team. The projects identified do not necessarily need to have been DOTD projects.

On August 27, 2020, Hurricane Laura made landfall in Cameron Parish near peak intensity as a Category 4, tying a record for the strongest hurricane ever to make landfall in Louisiana. It was the 10th strongest hurricane landfall by windspeed in US history. At approximately 1,937 square miles, Cameron is the third-largest Parish in Louisiana by land area. The impacts were devastating. The entire Parish was without power for weeks, months in some areas, and traditional communications were limited.

Rostan was selected as the Parish's debris monitoring firm in a competitive procurement in August 2020, just a month prior Hurricane Laura. Thus far, Rostan has monitored more than 32,000 truckloads of debris totaling over 1,400,000 cubic yards (CY) collected from the ROW and hauled to 6 disposal facilities. Rostan has monitored the removal of nearly 2,000 hazardous trees and tree limbs, over 4,000 white goods, over 3,000 units of electronic waste, over 46,000 pounds of household hazardous waste, over 300 small engines, nearly 2,000 tires, and 6 vessels.

Rostan is currently developing the Parish PPDR program. This is an ongoing project.

Hurricane Ida was a destructive Category 4 storm that tore through Louisiana in August of 2021. The city of Slidell which is home to nearly 30,000 people was one of the places that was unfortunately affected by this major storm. Many trees were down, and houses saw some flooding throughout the city.

Rostan was contracted to provide the debris monitoring services for the City of Slidell. Within days of the storm hitting, Rostan personnel was on the ground hiring local monitors and meeting with the city and contractors to begin work. Nearly 110,000 cubic yards of vegetative debris and nearly 20,000 cubic yards of construction and demolition debris have been collected from the right of way and hauled to a disposal site. In addition to the debris collected from the right of way, over 500 hazardous hanging limbs and over 60 hazardous leaning trees were removed from the right of way.

For the fourth time in 5 years, Charleston County suffered the devastating effects of weather. Following Hurricane Dorian in September 2019, disaster debris recovery efforts were underway yet again. The Rostan team was on the ground prior to storm impact to implement the County's disaster debris management plan as soon as possible. Over the course of 90 days, over 625,000 CY of vegetative debris, over 5,100 hanging limbs, nearly 100 leaning trees, and 40,000 CY of mulched vegetative debris were disposed of.

FDOT assumed administrative and financial responsibility for Liberty County following Hurricane Michael. Located in the Florida Panhandle and comprised of more than 840 square miles, the County is the least densely populated county in the State with slightly more than 8,000 residents. This, coupled with an extensive road network of nearly 1000 center-line miles, created a unique set of challenges. Within days of Hurricane Michael Rostan's management team was on the ground hiring monitors and certifying haul trucks. Nearly 100 local monitors were hired and trained, more than 525,000 cubic yards of debris collected, and more than 32,000 hazardous trees and limbs removed.

In September of 2017, Hurricane Maria severely impacted the US Territory of Puerto Rico. Maria was the most devastating natural disaster to impact the island in recent record. The entire island was left without power, traditional communications were limited, and available water resources were scarce. Rostan was contracted to provide debris monitoring services for the Department of Transportation and Public Works (DTOP) Puerto Rico in a partnership with Xpert's, Inc. Rostan was tasked with overseeing debris monitoring operations for 19 different prime contractors operating simultaneously in 24 subregions across the island of Puerto Rico. More than 600 equipment certifications were completed, and more than 13,000 truckloads totaling over 215,000 cubic meters of landslide debris was collected and hauled to more than 20 temporary and final disposal facilities. Rostan also individually tracked and photographed the reduction and removal of over 2,300 hazardous boulders created by landslides. Rostan and Xpert's successfully trained and managed more than 150 debris monitors with Rostan's proprietary HaulPass® ADMS equipment.

The scope of this contract consists of assisting the disaster recovery efforts for the Parish throughout Sabine Parish.

Staff involved: Wayne Harris

18. Approach and Methodology:

Provide a description of how the work will be performed. Include any additional information or description of unique resources that are planned to be used to produce the deliverables. Include any proprietary technologies, methods or approaches that will be used on this project to improve quality or efficiency. If the proposal is for an IDIQ contract, the consultant should review the scope of services in Attachment A to the advertisement to obtain a general understanding of what a typical task order would entail. Based upon that understanding, the consultant should provide a sample schedule that identifies the major milestones, deliverables, tasks, etc., to demonstrate sufficient understanding of a typical task order. The duration of the task order is not required. This section shall be limited to four pages. If more than four pages are included, all pages after the fourth page will not be evaluated.

If the consultant has information it believes is proprietary, label it accordingly.

Over the past 20 years Rostan has developed a tried-and-true method for managing and implementing debris monitoring projects. Our work plan is founded on a thorough understanding of the required services and incorporates substantial experience and cutting-edge digital platforms to deliver a responsive and comprehensive effort in support of project goals.

Rostan's approach to debris monitoring projects is grounded by five key principles. Focusing on these principles ensures a safe, cost effective, and efficient recovery project. These principles are identified below:

| | | |
|----------|-------------------|---|
| 1 | SAFETY | Safety is paramount and tops the list of Rostan's project management principles. Focusing on the public's safety and well-being first ensures that the primary project goals always remain in focus. This extends to the recovery effort itself requiring project employees to place personal safety at the forefront. |
| 2 | LISTEN | Listening requires empathy and a desire to understand each client's unique situation and project goals. Active communication guards against misinterpretation and makes certain a project stakeholders are working toward the same objectives. |
| 3 | REINVEST | One of the key goals of any disaster recovery project is to ensure the economic survivability of the community. Rostan uses locally hired residents, resources, and businesses to support our project efforts. This approach guarantees considerable portions of project revenue are reinvested back into the community either directly or through subcontractor participation. |
| 4 | RESPONSIVE | An efficient, focused response is critical when communities are dependent on your efforts to recover from devastating disasters. Confidence in the reliability of project partners provides a sense of ease knowing resources will be available during a time of need. |
| 5 | FUNDING | Post-disaster grant funding when available is a critical pursuit. Federal funding programs can be onerous and managing the administrative burden time consuming. Our work products developed to meet the requirements of the applicable funding agencies that administer available post-disaster grants to ensure reimbursement funding opportunities are maximized. |

1. UNDERSTANDING THE PROJECT

UNDERSTANDING THE CLIENT

Louisiana Department of Transportation and Development is a state-level entity responsible for the development, management, and maintenance of transportation-based infrastructure statewide. The LADOTD has nine regional districts and is led by a governor-appointed secretary. The LADOTD is represented by more than 5,000 employees and consists of an administration branch and an engineering and operations branch. The total annual operating budget has increased more than \$100 million in the past 10 years and is nearing \$650 million annually. Part of LADOTD's responsibilities include dealing with the aftermath of natural disasters and the impact these types of events have on transportation infrastructure. Louisiana, geographically, is one of the most vulnerable states in the country. As such, the LADOTD has responded to several major disaster events in the past two years alone including infamously Hurricane's Laura and Ida.

UNDERSTANDING THE REQUEST FOR PROPOSALS (RFP)

Rostan understands that the purpose of the LADOTD's RFP is to secure services necessary to augment the LADOTD's recovery efforts should a disaster occur. Based on the RFP and the provided scope of services we anticipate the scope of work to include, but not be limited to the following components:

Seasonal Planning and Training
Project/Operations Management
Community Relations Support Services
Debris Evaluations/Assessments
Permitting Support for DMS Operations
Coordination with the Debris Removal Contractor and LADOTD Representatives
Debris Removal Vehicle Certification
Right-of-Way Debris Collection Monitoring
Debris Management Site and Disposal Site Monitoring
Private Property and Demolition Program Management and Monitoring
Providing an Automated Debris Management System
Data Compilation, Processing, and Document Management
Operational Progress and Project Reporting
Administrative Support Services
Contractor Payment Monitoring and Reconciliation
Cost Recovery and Grant Management Services
Appeals and Policy Support
Compliance and Coordination with State and Federal Agencies

It is anticipated that Rostan employees will perform their dedicated functions on behalf of and at the direction of the LADOTD. Tasks will be delineated through task orders and required work will be performed within negotiated not to exceed budgets.

CAPACITY

As a nimble, client-focused firm, Rostan understands the importance of resource management. We never over-commit our resources ensuring our clients always have timely access to the valued expertise and support they would expect. Our strategy is to selectively pursue, develop, and maintain client relationships that we believe to be beneficial to both parties. We have always limited the number of pursuits we undertake by both geography and population served while considering our current standby obligations in those areas. *We can ensure a technically skilled and seasoned team will always be available to the LADOTD without compromise.*

RESPONSE GUARANTEE

Rostan confirms our commitment to the LADOTD that we are able and willing to respond within 24 hours of issuance of notice to proceed. This includes appropriate personnel and equipment necessary to implement an equipment certification site, conduct a preliminary damage assessment necessary to develop a debris collection plan, and debris monitors to properly document the debris collection effort. Depending on the results of the preliminary damage assessment, Rostan can ensure that complete staffing needs will be met to facilitate the operation to completion within 72 hours of activation.

| TASK | GUARANTEED RESPONSE TIME |
|--|--------------------------|
| Pre-Landfall Coordination and Planning | 96 Hours prior to event |
| Remote Staging of Equipment and Personnel | 48 Hours prior to event |
| **Deploy Forward Team to LADOTD | 12 Hours after the event |
| Mobilize Project Resources to Begin Operations | 24 Hours after the event |
| Full Operations | 72 Hours after the event |
| **In the case of an unpredictable event, our guaranteed response time is within 24-hours of notification | |

KNOWLEDGE OF MANAGEMENT AND STAFF

Rostan's team has experience in federal, state, and local disaster debris management and recovery projects stemming from presidentially declared disaster events and have assisted state and local governments throughout all disaster recovery phases contemplated by the LADOTD's RFP. Rostan's key disaster debris management team members have more than 150 years of combined experience in disaster debris management operations and Public Assistance support services resulting from earthquakes, floods, tornadoes, snow/ice storms, fires, and hurricanes.

2. DEBRIS MONITORING OPERATIONS AND MANAGEMENT

Working in coordination with the industry's most prominent debris hauling companies to achieve client goals, Rostan provides a professional, well managed, and responsive operation coupled with quality project deliverables that support funding reimbursement pursuits. This section identifies our role in providing these services, the tasks associated, and the data management and collection platforms we have developed to support these efforts. HaulPass® has become an integral component of nearly every debris monitoring task Rostan performs and as such will be mentioned frequently throughout this section. For greater detail on the HaulPass® system, please refer to section 4 *Automated Debris Management Systems (ADMS)*.

Rostan's approach to providing debris monitoring services has been honed through our response efforts in support of clients following dozens of major disasters and is consistent and compliant with FEMA guidance and program policy (e.g., *Public Assistance Program & Policy Guide FP-104-009-2 / June 2020, Public Assistance Debris Monitoring Guide / March 2021*, and supplementals).

PLANNING AND SEASONAL TRAINING

Rostan encourages off-season engagement to prepare and plan for future potential events. Part of this planning process incorporates annual review of operating plans, service contracts, and DMS site availability and permitting. This value-added service is intended to bring project stakeholders together and define recovery strategies.

Disaster Debris Management Plans (DDMP) are typically reviewed during offseason planning sessions, amended as needed, and appended to Comprehensive Emergency Management Plans. Rostan can review the LADOTD DDMP and would welcome the opportunity to conduct a thorough review and update the components as necessary.

Included in the following Table is a sample Debris Monitoring Plan. Rostan will develop a similar plan through coordination with the LADOTD to flesh out details and responsibilities with the goal of ensuring that all support functions have accountable resources.

| PRELIMINARY DEBRIS MONITORING PLAN | | |
|---------------------------------------|--|--|
| DEBRIS MONITORING TASKS | ACTION ITEM | TIMELINE |
| PRE-EVENT TASKS | | |
| PLANNING AND COORDINATION | Summarize operations and communications plan, DMS locations, and logistics and staging areas | During off season and 72 hours prior to mobilization |
| INITIAL PRE EVENT COORDINATION | Telecommunications and/or in person contact with client | 72 hours prior to mobilization |
| DEBRIS CONTRACTOR COORDINATION | Place debris contractor on stand by | 72 hours prior to mobilization |
| OEM AND FEMA COMMUNICATION | Coordinate OEM and FEMA client public assistance conference calls | As requested |
| LOGISTICS AND OPERATIONS COORDINATION | Implement preliminary mobilization of Rostan Reserves | 72 hours prior to field operations launch |
| | Preliminary staging of feed trucks | 72 hours prior to field operations launch |
| | Integrate Event Manager/HaulPass® data and GIS database | 72 hours prior to field operations launch |

CONFIDENTIAL**19. Workload:**

For all contracts where a firm on the team is a prime consultant or sub-consultant and a contract was executed by the consultant and the contracting entity by the date the advertisement for this proposal was posted, list all work meeting the following criteria:

- 1) one of the team's firms is responsible for the performance of the work;
- 2) authorization to perform the work has been provided, as provided in the contract between the consultant and the contracting entity;
- 3) the work has not yet been performed and invoiced; and
- 4) the work is not currently suspended for an indefinite period of time.

For indefinite delivery/indefinite quantity (IDIQ) contracts, list open Task Orders individually.

List only the portion of the fees attributable to firms on the team.
