# CONTRACT FOR OFF-SYSTEM HIGHWAY BRIDGE PROGRAM

JOHN LEWIS RD OVER LITTLE VALLEY BAYOU AND COULEE RD OVER PEEBLES COULEE

IBERIA PARISH | CONTRACT NO. 4400033946 | H.016277.5 AND H.016369.5

# DOTD FORM: 24-102

## PROPOSAL TO PROVIDE CONSULTANT SERVICES

(Revised August 11, 2025)

Prime consultant shall complete the DOTD Form 24-102 without altering the Form's text; however, the instruction and/or guidance for Sections 12 through 23 can be removed but do not remove Section title and number.

ANY CONSULTANT FAILING TO SUBMIT ANY OF THE INFORMATION REQUIRED ON THE DOTD FORM 24-102, OR PROVIDING INACCURATE INFORMATION ON THE DOTD FORM 24-102, MAY BE CONSIDERED NON-RESPONSIVE.

|                                                                                                                                                                                                                                              |                                                                                                                                             |

| <p><b>10.</b> This is to certify that all information contained herein is accurate and true, and that the team presently has sufficient staff to perform these services within the designated time frame. By submitting this proposal, proposer certifies that it is not engaged in a boycott of Israel and it will, for the duration of its contract obligations, refrain from a boycott of Israel. Proposer also certifies and agrees that the following information is correct: In preparing its response, the proposer has considered all proposals submitted from qualified, potential subcontractors and suppliers, and has not, in the solicitation, selection, or commercial treatment of any subcontractor or supplier, refused to transact or terminated business activities, or taken other actions intended to limit commercial relations, with a person or entity that is engaging in commercial transactions in Israel or Israeli-controlled territories, with the specific intent to accomplish a boycott or divestment of Israel. The proposer also has not retaliated against any person or other entity for reporting such refusal, termination, or commercially limiting actions. DOTD reserves the right to reject the response of the bidder or proposer if this certification is subsequently determined to be false, and to terminate any contract awarded based on such a false response.</p> <p><b>Pursuant to Act No. 581 of the 2024 Louisiana Legislature Regular Session, proposer further certifies that it does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association based solely on the entity's or association's status as a firearm entity or firearm trade association. In addition, proposer certifies it will not discriminate against a firearm entity or firearm trade association during the term of the contract based solely on the entity's or association's status as a firearm entity or firearm trade association.</b></p> | <div style="text-align: center;">  </div> <hr/> <p>Signature above shall be the same person listed in Section 9:</p> <hr/> <p>Date: November 20, 2025</p>          |                 |                    |     |     |
| <p><b>11.</b> If a Disadvantaged Business Enterprise (DBE) goal has been set for this advertisement, indicate which firm(s) will be used to meet the DBE goal and each firm(s)' percentage.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <table border="1" style="width: 100%;"> <tr> <td style="width: 50%;"><u>Firm(s):</u></td> <td style="width: 50%;"><u>Firm(s)' %:</u></td> </tr> <tr> <td style="text-align: center;">N/A</td> <td style="text-align: center;">N/A</td> </tr> </table> | <u>Firm(s):</u> | <u>Firm(s)' %:</u> | N/A | N/A |

**12. Discipline Table:**

As indicated in the advertisement, insert a completed table here. The percentages for the prime and sub-consultants must total 100% for each discipline, as well as the overall total percent of the contract.

The **only** disciplines to be used are listed in the drop down in each row (Appraiser, Bridge, CE&I/OV, CPM, Data Collection, Environmental, Geotech, ITS, Other (must specify), Planning, Right-of-Way, Road, Survey, and Traffic). **Remove rows as needed.**

| Discipline(s)                                                                                                                    | % of Overall Contract | Prime Consultant MGA | Sub-Consultant Providence | Firm C | Firm D | Firm E | Each Discipline must total to 100% |

### 13. Team Size:

For all firms that are part of this team, indicate the approximate number of personnel to be committed to this contract, by DOTD Job Classification and the total number of personnel within the firm that could provide support, if needed. If a specialized job classification is required and not included on the DOTD job classification list, specify "Other (must specify)" and include the classification title inside the parentheses.

The DOTD Job Classification(s) to be used can be found at the following link: <https://bit.ly/DOTDJobClassifications>

| Firm name                                                                           | DOTD Job Classification | Number of personnel committed to this contract * | Total number of personnel available in this DOTD Job Classification (if needed) |
|-------------------------------------------------------------------------------------|-------------------------|--------------------------------------------------|---------------------------------------------------------------------------------|
|    | Principal               | 1                                                | 4                                                                               |
|                                                                                     | Supervisor Engineer     | 1                                                | 2                                                                               |

|                                                                                     | Biologist/Wetlands      | 2                                                | 4                                                                               |

\*For evaluation purposes only, and as referenced in the Scope of Services on page 2 of IDIQ advertisements only, the consultant shall assume the number of concurrently active task orders specified in the advertisement and shall identify the number of **committed** personnel accordingly.

#### 14. Organizational Chart:

Provide an organizational chart showing ALL **relevant** prime consultant and sub-consultant (if applicable) personnel assigned to the contract, area of project responsibility for each, and reporting lines for the purposes of this contract. An individual's role does not necessarily have to match their DOTD job classification identified in Section 13. **If applicable, identify all personnel performing traffic engineering analysis and/or QC of traffic engineering analysis by placing an asterisk next to their name. Include the certificates required by the Traffic Engineering Process and Report Training Requirements article of the Advertisement in Section 20.** It is acceptable to use an 11x17 format for Section 14.

\* ATSSA Certifie

**15. Minimum Personnel Requirements:**

Use the table below to identify both prime consultant and sub-consultant staff designated to work on this contract meeting the Minimum Personnel Requirements (MPRs) specified in the advertisement. Ensure the résumé reflects the required experience stated in the MPR. Make sure the P.E. discipline is also listed (highlighted in table) that is meeting the MPR; e.g. professional civil engineer should show the discipline of the license as civil if meeting that MPR.

| MPR No.<br>Do not insert<br>wording<br>from ad | Personnel being used<br>to meet the MPR<br>(Individual(s) may not satisfy more than one MPR unless<br>specifically allowed by Attachment B of the advertisement) | Firm employed by                                                                   | Type of license /<br>certification<br>& number                                    | State of<br>license | License /<br>certification<br>expiration date |

### 16. Staff Experience:

Résumés shall be provided for all prime and sub-consultant personnel listed in Sections 14 and/or 15 of the proposal. Résumés of personnel not identified in Section 14 or Section 15 of the proposal should not be included and will not be evaluated. Résumés are **limited to 2 pages per person**. Any certificates required by the advertisement are to be placed in Section 20.

| Contract role(s) / brief description of responsibilities |                           |                                                                                                                                                                                                                                                                                                                                                                                                                  | Professional Engineer   William will serve this project primarily in an administration capacity to ensure DOTD contractual obligations are followed, and in QA/QC reviews. |    |
| Experience dates (mm/yy–mm/yy)                           |                           | Experience and qualifications relevant to the proposed contract; i.e., “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).                                                                                                                                                                                         |                                                                                                                                                                            |    |
| 05/82-Present                                            |                           | William brings over forty-three (43) years of overall civil engineering experience to the project. Although limited in experience with the OSBR program, William has designed several bridge replacement structures for the City of Opelousas in St. Landry Parish. Specifically for this project William’s skill as a project administrator and QA/QC review engineer of project deliverables will be utilized. |                                                                                                                                                                            |    |

Additionally, prepared and submitted a Joint Permit Application to the Louisiana Department of Energy and Natural Resources and the U.S. Army Corps of Engineers.                                                                              |
| (05/24-12/24)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <b>Field Biologist: <i>Atlas Technical Consultants LLC, MRB South GBR: LA 1 to LA 30 Connector SPN H.013284</i></b><br>Providence provided NEPA, wetlands, Phase I ESA, and public outreach compliance assistance for the proposed new bridge crossing of the Mississippi River in Iberville Parish, LA. Role in the project included conducting wetland delineations on 3 alignment alternatives covering approximately 1,716 acres, subsequent wetland data reporting, and assisting with Phase I Environmental Site Assessment field surveys. |
| <b>CHRIS COYNE</b> has worked as a Biologist with Providence since May 2021. Prior to joining Providence, Mr. Coyne worked as a Biotechnician for the USFWS where he was responsible for Red-cockaded Woodpecker banding/monitoring, rocket-netting and banding of Wood Ducks, mobile acoustical bat monitoring, Gulf Sturgeon sampling, Dusky Gopher Frog monitoring, feral swine control, and wetlands restoration. Mr. Coyne earned a bachelor's degree in Natural Resource Ecology and Management with concentrations in Wildlife Ecology and Management and Fisheries from the School of Renewable Natural Resources at Louisiana State University in May 2020. Mr. Coyne's education and professional experience have exposed him to wetland ecology and management, ecosystem restoration, coastal management and restoration, plant identification, invasive species control, and wildlife biology. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

His areas of work include wetland delineation, analysis, and reporting; U.S. Army Corp of Engineers (USACE) Section 10/404 permitting and compliance assistance (Galveston, Fort Worth, Memphis, Mobile, New Orleans, and Vicksburg Districts); LDENR, Office of Coastal Management Coastal Use Permitting; Louisiana Department of Wildlife and Fisheries (LDWF) Scenic Rivers System Permitting; U.S. Fish and Wildlife Service (USFWS) consultation, State Historic Preservation Office (SHPO) consultation; mitigation bank consulting, and threatened/endangered species and vegetation surveys and reporting. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

### 17. Firm Experience:

Identify the team's project experience **most relevant** to the scope in the advertisement. The projects\*\*\* should be limited to a total of 20, with no more than 5 projects being represented by the prime consultant and with no more than 3 projects represented by each sub-consultant on the team. If more than 5 projects are identified for the prime consultant, all projects identified after the first 5 will not be evaluated. If more than 3 projects are identified for a single sub-consultant, all projects identified after the first 3 from that sub-consultant will not be evaluated. Include no more than one page per project. Projects identified shall only include work performed by firms on the team. The projects identified do not necessarily need to have been DOTD projects.

In 2019, Morgan Goudeau and Associates, Inc. became the prime consultant for the replacement of two (2) bridges in Ascension Parish and provided all the required engineering and land surveying services on the contract. The existing two (2) span, 25.84' X 18.62', timber bridge on H.H. Wilson Road over a drainage bayou was replaced with 3 — 8' x 6' x 44' reinforced concrete box culverts (22' clear roadway.) H.H. Wilson Road is a dead-end road, so it will remain open during construction, and a low-profile runaround is to be put in place by the project contractor. The existing two (2) span, 37.53' X 24.26', concrete bridge on Manchac Acres Road over a drain to Muddy Creek was designed to be replaced with 4 — 9' x 9' x 50' reinforced concrete box culverts (22' clear roadway). MGA performed and developed the following for this project: topographic surveys, drainage maps, hydraulic studies, preliminary and final design plans (inclusive of plan/profile, general bridge plan, typical sections and details, cross-sections, and summary of estimated quantities), right-of-way and servitude sketches and descriptions, solicitation of views and environmental review record. Wetland studies were completed by a sub-consultant, Providence Engineering and Environmental Group, coordinated by MGA.

Key Staff Members Highlighted in this project: **Kenny Boagni, David Jarrell, Jacob Jarrell, and Jared Meche**

Key Sub-Consultant Highlighted in this project: **Providence Engineering & Environmental Group, LLC**

In 2015, Morgan Goudeau and Associates, Inc. became the prime consultant for the replacement of three (3) bridges in St. Landry Parish and provided all the required engineering and land surveying services in the contract. The existing four (4) span, 61.33' X 17.86', timber bridge on Rozena Road crossing Bayou Mallet was designed to be replaced with a three (3) span, 120' X 24' (clear roadway), concrete slab bridge (Quad Beam). The existing three (3) span, 48.76' X 22.51', timber bridge on Billeaux Road over Bayou Carencro was designed to be replaced with 3 — 10' X 10' X 55' reinforced concrete box culverts with a 24' clear roadway. The existing two (2) span, 37.83' X 37.61', concrete bridge on Judson Walsh Drive crossing a Drainage Bayou was designed to be replaced with 4 — 10' X 10' X 54' reinforced concrete box culverts with a 24' clear roadway. MGA performed and developed the following for this project: topographic surveys, drainage maps, hydraulic studies, preliminary and final design plans (inclusive of plan/profile, general bridge plan, typical sections and details, cross-sections, and summary of estimated quantities), right-of-way and servitude sketches and descriptions, solicitation of views and environmental review record. Wetland studies were completed by a sub-consultant coordinated by MGA.

In 2015, Morgan Goudeau and Associates, Inc. became the prime consultant for the replacement of a bridge on Sneed Road over Toro Creek in Sabine Parish. MGA provided all the required engineering and land surveying services in the contract for the replacement of the existing two (2) span, 32.08' X 18.38', timber bridge, with a three (3) span, 60' X 24' (clear roadway), concrete slab span bridge. MGA performed and developed the following for this project: topographic survey, drainage map, hydraulic studies, preliminary and final design plans (inclusive of plan/profile, general bridge plan, typical sections and details, cross-sections, and summary of estimated quantities), right-of-way and servitude sketches and descriptions, solicitation of views and environmental review record. Wetland studies were completed by a sub-consultant coordinated by MGA.

Key Staff Members Highlighted in this project: **Kenny Boagni, David Jarrell, Jacob Jarrell, and Jared Meche**

The Louisiana Department of Transportation and Development requested a Wetland Findings Report for two existing bridges in Richland Parish, Louisiana as part of a larger off-system bridge replacement project. As a subconsultant to Morgan and Goudeau & Associates, Inc., **Providence conducted a wetland delineation and provided a Wetland Findings Report** for the bridge replacement project. Providence biologists documented existence of potential jurisdictional wetlands and non-wetland waters at the sites in accordance with the **1987 Corps of Engineers Wetland Manual** and guidance from the **Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Atlantic and Gulf Coastal Plain Region** (U.S. Army Corps of Engineers [USACE], Wetland Regulatory Assistance Program 2010). After the wetland delineations, Providence prepared a Wetland Findings Report which included discussions of existing wetlands, vegetation communities, and soils based on published soil surveys and soil sampling. The report showed evidence of all three diagnostic characteristics for jurisdictional wetlands at three of the seven sample locations established by Providence. Evidence of poor drainage found in association with hydric soils and predominantly hydrophytic vegetation was considered sufficient to confirm the presence of potential jurisdictional wetlands. Data sheets, photographs, and wetland mapping were included in the Wetland Findings Report.

Providence staff completed a similar scope of work for Morgan and Goudeau Associates, Inc., for other bridge replacements included in the Off-System Bridge Replacements program, including bridges in Ascension (H.013458), Caddo (H.014229), Acadia (H.014220), Lasalle (H.015015), Ouachita (H.014232), St. Martin (H.014226), and Tangipahoa (H.014262, H.014263) Parishes. Providence possesses a strong understanding of desired deliverables, timelines, and tasks for any proposed off system bridge replacement projects.

A supplemental agreement was issued by **DOTD** to Atlas to obtain environmental approvals based on the findings of the complete Enhanced Planning investigation for the proposed new Mississippi River bridge construction. Atlas contracted Providence to assist with this overall project management, environmental documentation support, and related environmental services. Providence's specific scope of work including ensuring overall NEPA compliance, conducting **wetland delineations**, and conducting a Phase I Environmental Site Assessment. Providence will also continue to provide agency, stakeholder, and public outreach support during all pre-NEPA phases of the project. Providence anticipates providing more environmental services as the project progresses and potentially during construction.

The **wetland delineation** encompassed approximately 1,716 acres of forests, agricultural fields/pastures, residential properties, pipeline/utility rights-of-way, highway/railroad rights-of-way, industrial facilities, and Mississippi River levee and batture. Multiple teams of Providence biologists conducted surveys from July to August 2024, collecting field data, habitat descriptions, and other pertinent information in accordance with the **1987 Corps of Engineers Wetland Manual** and guidance from the **Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Atlantic and Gulf Coastal Plain Region** (USACE, Wetland Regulatory Assistance Program 2010). The resulting Wetland Findings Report documented 364 acres of Section 404 wetlands and 26.78 acres of Section 10/404 wetlands, including bottomland hardwoods, baldcypress/water tupelo swamps, and baldcypress swamps. Additionally, Providence conducted habitat evaluations according to the USACE Louisiana Rapid Assessment Method (LRAM) Habitat Condition factor. Each wetland was classified on the three condition levels by habitat (low, medium, and high) and documented in the Wetland Findings Report.

The Louisiana Department of Transportation and Development requested a Wetland Findings Report for two existing bridges in Lafourche Parish, Louisiana as part of a larger off-system bridge replacement project. As a subconsultant to Aucoin & Associates, **Providence conducted a wetland delineation and provided a Wetland Findings Report** for the bridge replacement project. Providence biologists documented existence of potential jurisdictional wetlands and non-wetland waters at the sites in accordance with the **1987 Corps of Engineers Wetland Manual** and guidance from the **Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Atlantic and Gulf Coastal Plain Region** (USACE, Wetland Regulatory Assistance Program 2010). After the wetland delineations, Providence prepared a Wetland Findings Report which included discussions of existing wetlands, vegetation communities, and soils based on published soil surveys and soil sampling. The report indicated that evidence of all three diagnostic characteristics for jurisdictional wetlands was not found at any sample location, and the presence of two diagnostic characteristics was not sufficient to confirm the presence of potential jurisdictional wetlands. Data sheets, photographs, and wetland mapping were also included in the Wetland Findings Reports. Providence also prepared and submitted a USACE/Louisiana Department of Energy and Natural Resources (LDENR) Joint Permit Application, as well as coordinated necessary Solicitation of Views (SOV) and clearance documentation for this project.

Providence staff completed a similar scope of work for Aucoin and Associates, Inc. on other bridge replacements including bridges in Calcasieu (SPN 700-10-0164), St. Mary (SPN 700-51-0111), St. Helena (SPN P46-30419-90470-1), and Tangipahoa (H.014262, H.014263) Parishes. As reflected in both the On- and Off-System bridge projects included, Providence possesses a strong understanding of desired deliverables, timelines, and tasks for projects of this structure, size, and desired outcomes. Successfully adhering to both DOTD and the Prime Contractors' standards was an area of success for these projects.

**RELEVANT TEAM MEMBERS:** Chad Turner, Christopher Coyne, Kenneth McKenzie

## **18. Approach and Methodology:**

### **I. Introduction - Morgan Goudeau and Associates Resources**

The firm of Morgan Goudeau and Associates, Inc. (MGA) offers over **37** years of Off-System Bridge Replacement (OSBR) Program experience invested across the State of Louisiana, making this firm one of the state's oldest and most experienced in the LA DOTD Federal-Aid program OSBR Program, crediting direct involvement with the program since 1988. MGA has an extensive track record in the OSBR Program as the Prime Consultant, having worked closely with DOTD Program Managers (PM) to deliver quality engineering and land surveying-related services on over **130** bridge structure replacements (single/multi-barrel culverts and reinforced concrete box culverts, standard and quad beam concrete slab span bridges, and special detail slab span bridges) in **36** Parishes (Acadia, Allen, Ascension, Avoyelles, Beauregard, Bienville, Caddo, Calcasieu, Caldwell, Cameron, Catahoula, Claiborne, DeSoto, East Baton Rouge, Evangeline, Franklin, Grant, Jackson, Jeff Davis, Lafourche, LaSalle, Madison, Natchitoches, Ouachita, Plaquemines, Rapides, Richland, St. Bernard, St. Landry, St. Martin, Sabine, Tangipahoa, Tensas, Vernon, Webster and West Carroll).

The current staff of MGA includes the key administrative, project management, surveying, engineering, and graphics personnel with the collective experience in the OSBR Program to effectively produce high-quality deliverables throughout the project, and in strict adherence with the DOTD OSBR Program Guidelines Manual and the DOTD Location and Survey Manual, including Addendum "A". The MGA team for this project will be headed by Kenneth Boagni, III, PE, PLS, as the principal and supervisor engineer, and supported with David Jarrell, PLS, PE, as the project manager, Aaron Fontenot, PE, as a design engineer, and Jacob Jarrell, PLS, EI, as the professional land surveyor of record, along with additional critical staff (reference project specific staffing plan in Section 15). For the completion of Wetland Studies on this project, MGA will engage the services of Providence Engineering and Environmental Group, led by the qualified leadership of Chad Turner, to perform this work, and MGA has had a good working relationship with them on past OSBR projects (reference Section 17).

### **II. Project Approach**

MGA manages OSBR projects with an approach that is built on strong communication, and ensuring team understanding of work scope, resulting in timely submission of reports, schedules, and deliverables in accordance with the firm's QA/QC plan (reference Section 21). Following the negotiated contract phase, MGA will immediately reach out to the DOTD Project Manager (PM), upon contract execution, to schedule a project kickoff meeting with lead MGA staff members to briefly review contract management policy and procedures, and to establish an understanding of management procedural preferences. This meeting will also serve to address strategies to discuss possible unique project site challenges with consideration for the project needs and timeline. As such, MGA will submit a proposed project schedule to DOTD PM for consideration with a timeline beginning with the anticipated Notice to Proceed [NTP] date. This communication approach with the PM will be implemented throughout each phase of the project contract from the original Topographic Survey (Stage 3, Part Ia), Property Surveys (Stage 3, Part Ic), Base ROW Maps (Stage 3, Part Ic), Title Take-Offs (Stage 3, Part If) and Preliminary Plans (Stage 3, Part III) agreement, to any required supplementary agreements for Final Plans (Stage 3, Part IV) or Extra Work Letters. Throughout the contract timeline, the required project deliverables and invoices (in hard copy and electronic formats) shall be submitted in accordance with current LA DOTD standards and procedures, and further outlined in the OSBR Program Guidelines.

### **III. Project Methodology**

Specifically, this project consists of the replacement of two (2) existing bridges within **Iberia Parish**, and MGA has the engineering and land surveying experience with the OSBR Program and the means to complete these bridge replacements effectively, as the scope is similar to many OSBR projects done by the firm over the years throughout Louisiana. Based upon an initial desktop review of the project, the two (2) bridge sites are summarized as follows:

(1) The existing bridge on **John Lewis Road over Little Valley Bayou** is a 2-span (38' length, 28' wide clear roadway) pre-cast concrete slab bridge with timber piles at a 90 degree crossing and vertical timber abutments with no posted weight limit. John Lewis Road is an existing 20' wide asphalt roadway with roadside ditches, apparent 60' right-of-way, and posted speed limit of 35 mph. This structure will likely need to be replaced with a standard concrete 4-span bridge (80' in length) at a 75 degree crossing with the bayou, 28' wide clear roadway and 10' approach slabs. It appears that no detour bridge will be required to replace this structure, as John Lewis Road can be closed, and an appropriate detour route established. With the

selection of a bridge at this location, vibration monitoring will be required as there are (2) residences located within the 200' preferred limit for pile driving. There are existing side drains for driveways at each corner of the bridge, which will require replacement and the possible installation of tapered barrier rails, in lieu of standard guard rails. With respect to utilities, there is overhead electric and telecommunications parallel to the roadway along the north right-of-way that should not require relocation, however, there is an overhead electric service line crossing the roadway on the east side, which will require relocation for construction. Any additional utilities will be identified in the survey and design of the project. There are no trees located within the construction limits at the bridge that will require removal, and the drainage lateral will require some excavation at each end of the proposed structure. Adjacent to the bridge, the NW and SE property owners do have some chain link fencing, which may require removal and replacement. In examining the FIRM panel, the bridge is located in Zone AE, which is designated as a 100 year Flood Hazard Area with base flood elevation of 10.00', and coordination with Floodplain Administrator will be required.

(2) The existing bridge on **Coulee Road over Peebles Coulee** is a 2-span (38' length, 24' wide clear roadway) pre-cast concrete slab bridge with timber piles at a 90 degree crossing and vertical timber abutments with posted weight limit of 15/25 tons. Coulee Road is an existing 17'/18" wide asphalt roadway with roadside ditches, apparent 60' right-of-way, and posted speed limit of 25/35 mph. This structure will likely need to be replaced with a standard concrete 3-span bridge (60' in length) at a 75 degree crossing with the bayou, 24' wide clear roadway and 10' approach slabs. It appears that no detour bridge will be required to replace this structure, as Coulee Road can be closed, and an appropriate detour route established. With the selection of a bridge at this location, vibration monitoring will be required as there are (2) residences located within the 200' preferred limit for pile driving. There are existing side drains for driveways at three (3) corners of the bridge, which will require replacement and the possible installation of tapered barrier rails, in lieu of standard guard rails. With respect to utilities, there is overhead electric and telecommunications parallel to the roadway along the north right-of-way that will likely require relocation at the bridge. Any additional utilities will be identified in the survey and design of the project. There are trees located within the construction limits at the bridge that may require removal, and the drainage lateral will require some excavation at each end of the proposed structure. In examining the FIRM panel, the bridge is located in a regulatory floodway and in Zone AE, which is designated as a 100 year Flood Hazard Area with base flood elevation of 9.00', and coordination with Floodplain Administrator will be required.

The general scope of work for the project will consist of performing topographic survey, hydraulic analysis, preliminary roadway and bridge plans, solicitation of views and categorical exclusion documentation for environmental clearance, wetlands findings report, property surveys, right of way maps, title take-offs, and final roadway and bridge plans, and the overall project methodology is outlined in detail by the specific contract tasks as follows:

#### **A. Topographic Survey — Stage 3, Part I(a)**

Upon execution of the contract and issuance of the Notice to Proceed (NTP), the principal-in-charge, project manager, land surveyor and design engineer will review aerial images and perform a desktop and initial field survey of the bridge site, while collecting project information (location map, project number request form, traffic counts, and survey field books) from DOTD OSBR staff. The desktop review will include available aerial imagery, street view imagery, property maps and data, topographic maps, elevation data (using LIDAR), and Natural Resource Conservation Service (NRCS) parish soil data. The information will be used to identify potential questions to discuss with Parish personnel and residents familiar with drainage at the bridge sites. Through prior experience in the OSBR Program, the MGA PLS staff finds it helpful to also research adjacent property owner records and maps in the local courthouse to assist in affirming existing roadway right-of-ways (ROW) and property boundaries, as this information can be helpful in the development of the project plans and any required ROW/servitude(s). Before or on the same day that the topographic survey is initiated, MGA will meet with a Parish roadways representative at the bridge site to confirm correct bridge identification for the replacement project. Bridge identification will match stenciled bridge number with structure number listed in the contract and on the replacement schedule.

DOTD OSBR Manual and DOTD Location and Survey Manual will guide the survey limits and data acquisition parameters. The horizontal survey will be based on the Louisiana State Plane Coordinate System in North American Datum (NAD-83). The vertical control survey will be tied to the North American Vertical Datum (NAVD-88). GPS Rover and Total Station options are available to provide updated topographic data collection, depending on actual terrain. Upon completion of the survey field work, MGA CAD staff will prepare an existing plan profile sheet and

existing drainage map under the direction of MGA project design engineer. The information gathered will be used to define drainage areas and flow patterns to identify potential issues for review with Parish personnel and residents familiar with the bridge site.

The project PLS, project manager and staff of MGA will ensure field supervision and Quality Control and Quality Assurance (QC/QA) according to specifications of the OSBR Program Manual. The PLS and project manager will provide field supervision and QA/QC of survey procedures, data collection and appropriate traffic control measures throughout the topographic survey process. MGA will submit the DOTTIE (One Call) request to identify all buried utility locations and markings for the property/area to be surveyed. MGA will review the topographic survey(s), existing plan-profile(s), cross-sections and drainage map(s) in strict accordance with the OSBR Guidelines and submit them to the PM for review and approval. It is anticipated that the topographic survey work will be completed within 30 days of receipt of the NTP from DOTD.

**B. Hydraulic Analysis & 50% Drawings – Stage 3, Part III**

Upon notice of approval of the topographic survey and receipt of NTP, if deemed necessary by the project team, MGA will issue Notice of Inquiry Letters and Maps to the NRCS, USACE, the Parish Public Works Office, and the Parish Floodplain Administrator to rule out any potential timeline or project conflicts, such as pending projects or developments by other agencies that could affect the proposed bridge replacement project. In strict adherence with the DOTD hydraulics manual and OSBR program manual, MGA will perform hydraulic analysis to determine viable structure replacement alternatives. Analysis will include a careful review of existing soil data, storm water discharge rate calculations and existing stream water surface modeling in consideration of viable alternative replacement structures. MGA will collect high water marks and other data and reports from recent events and storms from residents, Parish roadways personnel and site-specific FEMA base flood elevations to calibrate existing stream water surface modeling. In addition to the collected data, MGA will perform hydraulic calculations using the DOTD HYDRWIN Hydraulics Programs and the USACE HEC-RAS program to model the water surface profiles along the channel and bridge structures. The compiled hydraulic analysis/report, along with supportive calculations and data, will outline the recommended replacement structure and any viable alternative structure(s). Pile scour calculations will be performed and included in the Report during final plans, should the recommended replacement structure be a bridge. The hydraulic analysis, along with 50% drawings, will be submitted to PM within 45 days of NTP.

**C. Preliminary Plan Development (Pre-PIH/PIH) - Stage 3, Part III**

Upon receipt of the approved hydraulics report from DOTD, MGA will confer with PM on the requirement of Preliminary Plan-In-Hand (Pre-PIH) submittal for this project. Typically in the OSBR Program, the PM will decide to move the project forward to Plan-In-Hand (PIH) directly, depending on the project complexity, and forego the Pre-PIH and issue a NTP for PIH submittal. For this project, it is anticipated that it will move directly into PIH phase. As the replacement structure for the project has been approved, MGA will immediately begin work on the project plans, and simultaneously prepare and send out Solicitation of Views (SOVs) packets, with specific project information, to appropriate Federal, State, Parish and local agencies from the DOTD mailing list, to begin the environmental clearance process. The complete 90% submittal of the PIH project plans and Constructability/Biddability forms will be submitted to PM within 45 days of NTP.

**D. R/W Services – Property Surveys (Stage 3, Part Ic), Base R/W Maps (Stage 3, Part Ie) and Title Take-Offs (Stage 3, Part If)**

Following PIH development and if property surveys and R/W maps were identified in the initial services as necessary based on anticipated additional right of way, MGA will begin the Title Take-Offs on the individual parcels involved in the project area. Once information is gathered on the parcels, the field Property Surveys will be completed based on the same control as the Topographic Survey, and the survey plat will depict all property lines and roadway right-of-way in relation to the project centerline. All info from the Title Take-Off and Property Survey phases will be submitted to the PM and DOTD Location and Survey Administrator. A Base R/W Map will then be prepared in accordance with the DOTD Location and Survey Manual Addendum A and submitted to DOTD for review. In the event that no additional right-of-way is required when initially anticipated in the project, Property Surveys and Base R/W Maps will still be provided. The Final R/W maps will be provided during the Final Plans phase of the project.

**E. PIH Coordination and Field Review - Stage 3, Part III**

After submittal of PIH, the PM will coordinate with MGA, DOTD Geotechnical, District DOTD and Parish officials about coordinating a field review (Plan-In-Hand meeting) of the project to discuss the project in detail. This review of the project plans is a critical stage in the entire OSBR process, as it effectively clarifies the project scope and enriches the accuracy of the project design. Following review of field PIH comments and notes by PM, the NTP for Revised Post Plan-In-Hand, Property Surveys and Base Right of Way Maps is issued to MGA. If required, the PM also notifies DOTD Pavement and Geotechnical Services Section, at this time, to complete geotechnical subsurface investigation (boring request).

### **F. Post Plan-In-Hand (RPPIH) - Stage 3, Part III**

Upon receipt of NTP for Post Plan-In-Hand (RPPIH) deliverables, MGA will then prepare the RRPIH from the PIH and PM comments, in accordance with DOTD OSBR guidelines. The RPPIH will be submitted along with the appropriate information detailed below within 45 days of NTP.

### a. Wetland Studies

Following PIH meeting, MGA will provide the appropriate project information to our subconsultant, Providence Engineering and Environmental, to conduct an onsite wetland delineation of the project, and complete a wetland findings report to accompany the required USACE sketches, SOV packet and environmental checklist.

**b. Solicitation of Views (SOV), CE Checklist and USACE Drawings**

MGA will prepare a CE checklist from the responses received from the mailed SOV requests, along with the wetland findings report, USACE permit sketches, and any other related environmental information gathered or created, into a hard and digital copy to be submitted to the DOTD PM for further processing.

c. **Design Report and Exception(s)**

Any deviation from the DOTD design criteria will require preparation of a design exception by MGA for submittal to the DOTD PM for presentation to the DOTD chief engineer for consideration of approval. The project design report and exception(s) will be submitted to the DOTD PM.

### **G. Final Plans (Pre-ACP/ACP and Final Tracings) – Stage 3, Part IV**

Upon receipt of the environmental clearance for this project, MGA will confer with PM on the requirement of Preliminary Advance Check Print (Pre-ACP) submittal for this project. Typically in the OSBR program, the PM will decide to move the project forward to Advance Check Print (ACP) directly, depending on the project complexity, and forego the Pre-ACPs. For this project, it is anticipated that it will move directly into ACP phase. Additionally at this stage in the project, and if the selected structure is a bridge, MGA will confer with PM on status of the geotechnical investigation, and if completed, a Geotechnical Design Request (Pile Design Request) will be submitted by MGA, along with appropriate information, to the DOTD Pavement and Geotechnical Services Section. Additionally, if required, additional design request(s) for Sheet Pile Wall(s) or Embankment Settlement will be made at this time. Upon receipt of NTP for ACP deliverables, MGA will then complete required scour analysis (bridge replacements only) and incorporate into the final hydraulic report. MGA will develop plans and quantities from the RPIH submittal comments, in accordance with DOTD OSBR guidelines, and submit to DOTD PM within 60 days of NTP. Upon receipt of NTP for Final Tracing deliverables, MGA will then prepare the Final Tracings from the ACP submittal comments, in accordance with DOTD OSBR guidelines. If required, Final R/W Maps will be submitted at this time as well. Final tracings will be sealed, signed, and dated by the MGA engineer and surveyor of record, and submitted to PM, along with bound calculations of quantities, hydraulic analysis and field books within 30 days of NTP.

#### **IV. Anticipated Project Schedule**

### 19. Workload:

For all contracts where a firm on the team is a prime consultant or sub-consultant and where **a)** the consultant selection was made by DOTD, and **b)** a contract was executed by the consultant and the contracting entity by the date the advertisement for this proposal was posted, list all work meeting the following criteria:

- 1) one of the team's firms is responsible for the performance of the work;
- 2) authorization to perform the work has been provided, as provided in the contract between the consultant and the contracting entity;
- 3) the work has not yet been performed and invoiced; and
- 4) the work is not currently suspended for an indefinite period of time.

For indefinite delivery/indefinite quantity (IDIQ) contracts, list open Task Orders individually.

List only the portion of the fees attributable to firms on the team.

| Firm(s)<br><b>ALL FIRMS</b> MUST BE REPRESENTED IN<br>THIS TABLE                 | Discipline(s) * | Contract Number and State Project<br>Number | Project Name                                                                                                                                                                                    | Remaining Unpaid<br>Balance** |

## **21. QA/QC Plan:**

If the advertisement requires submission of a QA/QC plan, include it here. **Otherwise, leave this section blank. If a QA/QC plan is included in this section and was not required by the advertisement, it will be redacted.**

## **QUALITY ASSURANCE/QUALITY CONTROL PLAN**

In order to continue this agenda, this Quality Assurance/Quality Control Plan is being developed to ensure that the highest quality design and standards are achieved for the benefit of the public and its safety. This plan will address procedures for checking the accuracy and consistency of the calculations and drawings, detecting and correcting design deficiencies and errors in order to produce a set of plans and specifications that are adequate to construct the designed structures and assure that the design is safe and adequate for service and operation that it has been designed for. The phases of work that are being requested for engineering and surveying will be addressed in this plan.

## **REQUEST FOR QUALIFICATION STATEMENTS**

The work anticipated from the engineering firm is outlined in the Request for Qualification Statements (RFQ) as outlined and advertised by the Department of Transportation and Development (DOTD) specific for this project. The major items of work are the Topographic Survey, Property Survey(s), Base R/W maps, Title Take-Off(s), Preliminary Plans, Final Plans, Construction Support (if required), and Shop Drawings (if required). The complete work outlined above is to be performed by the engineering and surveying firm and be the responsibility of the Engineer of Record for this project who is Kenny Boagni, III, a registered professional engineer and Jacob Jarrell, who is a registered professional land surveyor. The proposed work plan for this project will be outlined in this report. The Engineer of Record and Surveyor of Record shall sign, date, and seal all project documentation. The work will be performed in accordance with Louisiana Revised Statute (LRS) 37:681 through 37:703 and Title 46:Part LXI relating to Professional Engineering and Professional Surveying requirements.

Services to be performed by the DOTD for this project and are the responsibility of the DOTD are as follows:

1. All traffic assignments required for determination of design of the Project.
2. All information which it has in its files as to location of route, tentative locations of intersections and bridges, boring and test data if any, plans and studies within the area of the Project which may be useful to the Consultant in carrying out this work and assistance in securing similar data from others to the extent available.
3. Numbered field survey books as needed, as only field books furnished by the DOTD shall be acceptable for the recording of field data. These books shall be furnished at the request of the Consultant through the Project Manager.
4. Standard plan prints of bridges, culverts and incidental drainage structures prepared by the DOTD. It is the intent of this Contract that standard plans be used insofar as these plans are available in the design of all structures required for the Project and that the Consultant, under the stipulated contract compensation, shall prepare complete designs for structures required on the Project for which the DOTD's standard plans are not available.
5. Prepare construction proposals for the project from the plans prepared by the Consultant and handle all bidding procedures applying thereto.
6. Provide the Consultant with mailing lists for the Solicitation of Views.
7. Provide PH and resistivity reports.
8. Provide Channel Probing (if needed).

Services to be performed by the Parish for this project and are the responsibility of the Parish are as follows:

1. Acquire all required right-of-way for the Project.
2. Relocate all utilities in the way of construction.
3. Obtain all required permits on the Project and pay associated fees.
4. Perform biological and cultural resource surveys if required.
5. Prepare permit applications

## DESIGN STANDARDS AND CONTROL

The design and work for this project will be in accordance with the contract as executed between the DOTD and the Engineering firm. In addition, design criteria and guidelines will also be in accordance with the following manuals and references.

- |                                                                                 |                                                                     |

**APPENDIX "A"**  
**WORK PLAN CHECKLIST**

**A. INITIAL WORK PHASE**

Negotiate contract with DOTD based on project work hours  
Contract executed and received Notice to Proceed  
Received Data from DOTD  
Acknowledge receipt from data and notified DOTD  
Researched property owners, deeds and maps  
Made on-site visit with Parish to identify correct location  
Obtained Photographs for Hydraulic Reports  
Obtained Utility Information for the site  
Contacted LA One Call before Survey

**B. TOPOGRAPHIC AND PROPERTY SURVEYS**

Surveyor on Site for Data Collection  
Minimum of 4 TBMs (one at each end of project & at each bridge end)  
Project number shown correctly  
North Arrow  
Scale shown - Horizontal and Vertical  
Name of Roadway  
Width of Roadway

## **Topo Notes**

**Centerline Elevations - 2 decimal places (asphalt or concrete roadway) or 1 decimal place (gravel roadway)**

**Bearings**

**Curve Data**

**Elevations & plus stations of channel @ centerline of roadway**

**Stream traverse shown & stationed where it ties to the survey line**

**Structure Number**

**Description of existing structure: W x L**

**# of Spans**

**Type of Bridge**

**Description of existing structure shown in upper right corner of field roll**

**Existing structure dashed & spans shown in the Plan View**

**Existing structure dashed & spans shown in the Profile View**

**All existing pipe dashed**

**Pipe diameters shown**

**All cross drains shown in profile (dashed) with flow lines**

**Name of waterway**

**Flow arrows in stream shown**

**Type of fence spelled out. # of strands of B/W shown**

**Utilities in plan & profile (if buried) shown**

**Utility Owners**

**Existing, Apparent or Assumed R/W**

**Reference Points**

**Low Chord Elevation shown on existing structure**

**Drainage Map with drainage area delineated**

**All lettering and symbols correct size and weight. Symbols correct.**

**Will all be legible when reduced to half-size?**

**State Plane coordinates shown on at least 2 points on field roll**

**State Project number and Parish name on all field books in permanent ink**

**Certification in all field books**

**Large trees located and shown**

**Statement of horizontal and vertical control**

**Tie to roadways on each end of project**

**C. HYDRAULIC REPORT**

**Project Description**

**Drainage area above 2000 acres - USGS Method**

**Drainage area below 2000 acres - Soil Conservation Method**

**Runoff Calculation**

**Frequency - Discharge Plot**

**Photographs of Bridge Site**

**Stage - Discharge Plot**

**Stage Elevation Calculations**

**Evaluation of Existing Structure**

**Evaluation of Proposed Alternates**

**Scour Analysis**

**D. TITLE SHEET**

**No Hand Lettering**

**Caption for Project - Include FAP & State Project No., Project Name, Structure Number and Parish Name in this order**

**Vicinity Map**

**Index - Indicate which sheets are not included for Submittals**

**Type of Construction**

**Project Name, Project No., Sheet No. in Title Block**

**Length of Project**

**Traffic Data**

**Signature Lines**

**Title Block Information**

**E. LAYOUT MAP**

**Scanned Parish Map provided by DOTD**

**Proposed Construction Labeled**

**Scale**

**North Arrow**

**Project Name, Project No., Sheet No., etc. in Title Block**

**F. TYPICAL SECTION**

**Design Data. Pavement thickness wearing & binder**

**Correct Section for roadway**

**Dimensions and Stations**

**Transitions**

**Title Block Information**

**G. PLAN - PROFILE SHEET**

**Survey - centerline shown with bearings and/or curves**

**Name of roadway**

**Name of stream/channel**

**Existing/assumed/apparent Right-of-way**

**Existing roadway width**

**Type of existing roadway**

**Structure number**

**Description of existing structure(s) - (length x width; number of spans; material)**

**Description of proposed structure - (length x width; number of spans; material) placed in the upper right-hand corner of the plan-profile sheet below existing structure**

**Stream traverse line (upstream and downstream) Tie stream traverse line to roadway**

**Channel elevations and plus stations (in profile)**

**Curve data**

**Temporary bench marks (four minimum) with stations and offsets. Verify with Field Book Notes.**

**Existing utilities and depth (if buried)**

**Utility owners/companies/addresses**

**North arrow and scale**

**Dash existing cross drains in profile**

**Show flow lines of existing cross drains in profile**

**Existing structure in both the plan and profile shall be dashed. The spans should be shown in both views. Elevation of low chord is to be noted.**

**Centerline elevations - 2 decimal places**

**Reference points and three-point ties**

**State Plane coordinates to be shown on at least 2 points on field roll**

**Hydraulic Data Table**

**Traffic count and road classification**

**PH - Resistivity Chart**

**Bases for coordinates and elevation datums**

**Title Block Information**

**Notes - Clearing and grubbing, salvageable material, unsalvageable material, etc.**

**H. SUMMARY SHEET**

**Guard Rail requirements and stations**

**Seeding**

**Fertilizer**

**Area**

**Vegetative mulch**

**Earthwork quantities**

**Stations for Transitions**

**Stations for full roadway width**

**Surface quantities**

**Base quantities**

**Title Block Information**

**I. SUMMARY OF ESTIMATED QUANTITIES**

**Correct item numbers and descriptions**

**Title Block Information**

**J. EROSION CONTROL PLAN**

**Silt fencing**

**Scale shown**

**North arrow**

**Hay bales**

**Slope drains**

**Title Block Information**

**K. DRAINAGE MAP**

**Drainage area boundaries**

**Note concerning backwater**

**Drainage area shown**

**North arrow**

**Drainage flow arrows**

**Stations for beginning and end of project**

**Title Block Information**

**L. SUMMARY OF DRAINAGE STRUCTURES**

**Correct Project shown**

**Description and stations of drainage structures**

**Lengths of drainage structures**

**Notes for pipe cover**

**Abbreviation legend**

**Title Block Information**

**M. CONSTRUCTION SIGNING LAYOUT**

**Structure location shown**

**Stations shown Project beginning and end**

**Signing shown**

**Ties to intersecting roads on each end**

**Title Block Information**

**N. GENERAL BRIDGE PLAN**

**Survey - centerline shown with bearings and/or curves**

**Name of roadway**

**Name of stream/channel**

**Existing/assumed/apparent Right-of-way**

**Existing roadway width**

**Type of existing roadway**

**Structure number**

**Description of existing structure(s) - (length x width; number of spans; material)**

**Description of proposed structure - (length x width; number of spans; material) placed in the upper right-hand corner of the plan-profile sheet below existing structure**

**Stream traverse line (upstream and downstream) Tie stream traverse line to roadway**

**Channel elevations and plus stations (in profile)**

**Curve data**

**Temporary benchmarks (four minimum) with stations and offsets. Verify with Field Book Notes.**

**Existing utilities and depth (if buried)**

**Utility owners/companies/addresses**

**North arrow and scale**

**Dash existing cross drains in profile**

**Show flow lines of existing cross drains in profile**

**Existing structure in both the plan and profile shall be dashed. The spans should be shown in both views. Elevation of low chord is to be noted.**

**Centerline elevations - 2 decimal places**

**Reference points and three-point ties**

**State Plane coordinates to be shown on at least 2 points on field roll**

**Hydraulic Data Table**

**Traffic count and road classification**

**PH - Resistivity Chart**

**Bases for coordinates and elevation datums**

**Title Block Information**

**Notes - Clear & grubbing, salvageable material, unsalvageable material, etc.**

**Plan-Profile plotted at 1" = 20' horizontal and 1" = 5' vertical**

**Pile Data Table and loading design**

**Pile diagram**

**Low chord elevation on proposed structure**

**New Piles indicated**

**Hydraulic Table shown**

**Excavation Area**

**Flexible Revetment**

**Elevation table**

**Title Block Information**

**High water design denoted**

**O. CROSS SECTIONS**

**Plotted at 1" = 5' horizontal and vertical**

**Stations shown**

**Centerline shown**

**Right-of-way shown**

**Title Block Information**

**P. SOLICITATION OF VIEWS AND CATEGORICAL EXCLUSIONS**

**Prepared Project Description**

**Prepared vicinity map**

**Prepared information package**

**Mailed out Solicitation Packages**

**Providence Categorical Exclusion Documents and Related Appendices (Preliminary and Final)**

**Q. WETLAND STUDIES**
