

Statewide Transportation Improvement Program (STIP)

Federal Fiscal Years
2023-2026

Prepared by the
Louisiana Department of
Transportation and Development
Office of Planning

In cooperation with the
U.S. Department of Transportation
Federal Highway Administration

**STATEWIDE TRANSPORTATION IMPROVEMENT PROGRAM
(STIP)
FEDERAL FISCAL YEARS
2023 THROUGH 2026**

PREPARED BY THE
LOUISIANA DEPARTMENT OF TRANSPORTATION & DEVELOPMENT
OFFICE OF PLANNING
1201 CAPITOL ACCESS ROAD
BATON ROUGE, LA, 70802
(225) 379-1232
<http://wwwsp.dotd.la.gov/>

IN COOPERATION WITH THE
U.S. DEPARTMENT OF TRANSPORTATION
FEDERAL HIGHWAY ADMINISTRATION

APPROVED ON NOVEMBER 28, 2022
REVISED ON DECEMBER 12, 2024

CERTIFICATION

On behalf of the State of Louisiana I hereby certify that the Statewide Transportation Improvement Program is based on a transportation planning process being carried out in accordance with all applicable requirements of:

- (1) 23 U.S.C. 134 and 135, 49 U.S.C. 5303 and 5304, and this part;
- (2) Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- (3) 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- (4) Section 1101(b) of the FAST Act (Pub. L. 114-357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
- (5) 23 CFR part 230, regarding implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- (6) The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;
- (7) In States containing nonattainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93;
- (8) The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- (9) Section 324 of title 23 U.S.C., regarding the prohibition of discrimination based on gender; and
- (10) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

INTRODUCTION

As an agency, the Louisiana Department of Transportation and Development (DOTD) has established a mission to plan, design, build and sustain a safe and reliable multimodal transportation and infrastructure system that enhances mobility and economic opportunity. In support of that mission, the Office of Planning is tasked with providing short- and long-range planning for Louisiana's transportation system and the administration of the highway planning and programming functions of the Department.

Performance-based transportation plans and programs are developed in accordance with state and federal requirements, but more importantly they are developed to ensure that the DOTD is a good steward of taxpayer dollars by making data driven investment decisions. The fundamental concepts that drive the Statewide Transportation Improvement Program (STIP) supports this practice.

STIP OVERVIEW

The STIP is the transportation planning document developed by the Louisiana DOTD in accordance with 23 CFR 450.218. The STIP is a four-year fiscally constrained financial plan that lists all projects expected to be funded with federal dollars over the same period. All regionally significant projects regardless of funding source are included in the STIP directly or by reference to the appropriate MPO TIP. DOTD is not aware of any regionally significant transportation projects to be funded with other federal funds or with non-federal funds. Because the STIP shows planned transportation investment in the near future, it is a good marker of the state's transportation infrastructure spending priorities.

Authorization for the listed projects may be requested for any phase of development (e.g., environmental, right-of-way, utilities, design or construction) during Federal Fiscal Years (FFY) 2023 through 2026. Authorization for pre-construction phases can be requested in advance of the year a project is scheduled for construction in order to ensure the project can be advertised and let to contract as scheduled in this STIP.

Projects are initially placed in the STIP with cost and scheduling information based on planning level analysis. A project becomes more defined as it moves through the project development process potentially requiring changes to scope, termini, cost estimate and schedule or a project may be removed completely if it is no longer deemed feasible.

METROPOLITAN PLANNING ORGANIZATIONS

OVERVIEW

Federal transportation laws require the establishment of a Metropolitan Planning Organization (MPO) in every urbanized area of the United States with a population over 50,000 individuals, as determined by the Bureau of the Census. An MPO in an urbanized area with a population over 200,000 are further designated as a Transportation Management Area (TMA).

The purpose of the MPO is, in part, to carry out a continuing, cooperative and comprehensive multimodal transportation planning process which includes the development of a Transportation Improvement Program (TIP).

In Louisiana there are eleven MPOs, four of which are TMAs. A list of all MPOs can be found on **Tables 1 and 2**.

To ensure that the statewide and metropolitan planning processes are being carried out cooperatively, the responsibilities of each are identified in written agreements between each MPO, the DOTD and the public transportation operators serving within the boundaries of the respective metropolitan planning area (MPA). These agreements define the mutually agreed upon roles of each party and include specific provisions for cooperatively developing and sharing information related to the development of financial plans that support the MPOs long-range transportation plan or Metropolitan Transportation Plan (MTP), their TIP and the development of the required annual listing of obligated projects.

TIP DEVELOPMENT

Each MPO is required to develop a TIP which consists of a list of projects eligible for funding under 23 U.S.C and 49 U.S.C. Chapter 53. The TIP is developed and formally adopted by an MPO as part of the metropolitan planning process. Once a TIP has been approved by the MPO it must be included in the STIP without modification, either directly or by reference.

Locally funded projects listed in MPO areas are included in the individual MPO TIPs. These projects are included in the STIP by reference to the MPO TIPs which can be found at the websites listed in **Tables 1 and 2.**

In nonattainment and maintenance areas, a conformity finding on the TIP must be made by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) before it is included in the STIP. Transportation conformity analysis is performed during the development and amendment processes of the MTP.

Regardless of a MPO's air quality attainment status, each project or project phase included in the TIP must be consistent with the approved MTP.

FIGURE 1: MAP OF METROPOLITAN PLANNING ORGANIZATIONS

As of 9/30/2022 the 4 TMAs had the following unbobligated balances of STP>200k funds.

Baton Rouge	\$38,314,180.02
Lafayette	\$21,734,023.59
New Orleans	\$16,296,264.00
Shreveport	\$42,809,353.49

SUMMARY OF THE CRPC AIR QUALITY CONFORMITY ANALYSIS

This executive summary report explains the results of the air quality analysis for the five (5) Parish maintenance area comprised of Ascension, East Baton Rouge, Iberville, Livingston, and West Baton Rouge parishes. It also describes the methodology used by the Capital Region Planning Commission (CRPC), DOTD and Neel-Schaffer, Inc. to demonstrate transportation conformity under the air quality standards/goals of the Clean Air Act Amendments of 1990. This process is required for the purpose of adopting a new MTP and TIP since the five (5) Parishes are designated Attainment with a Maintenance Plan for the 2008 Ozone National Ambient Air Quality Standards.

The conformity analysis uses the latest emissions model, MOVES3, the most recent planning assumptions from DOTD and the MPO's Travel Demand Model (TDM) and the incorporation of the

projects listed in the MTP. The Motor Vehicle Emissions Budgets (MVEBs), as approved by EPA, were reaffirmed by the Interagency Consultation (IAC) group and used to determine the region's air quality conformity.

Tables 3 and 4 display a summary of the MVEB results for the planning region. The MTP complies with the Clean Air Act Amendments of 1990, the Transportation Conformity Regulation, the Statewide and Metropolitan Planning Regulation and other applicable federal and state requirements.

Based on the conformity analysis conducted for MOVE 2046, it can be concluded that:

- The MPO finds no factors in the TIP or MTP that would cause or contribute to a new air quality violation or exacerbate an existing violation.
- The MPO finds that no goals, directives, recommendations or projects within the TIP or MTP contradict any specific requirements or commitments of the Louisiana State Implementation Plan (SIP).
- The MOVE 2046 staged program projects do not interfere with any Transportation Control Measures (TCM) or their timely implementation.
 - The current SIP in Louisiana does not contain any TCMs.
 - However, the region does employ TCMs, including travel demand management strategies, public transit improvements (green buses, route optimization etc.), expanding bicycle and pedestrian access (through Regional Bicycle and Pedestrian Plan, City specific Bike/Pedestrian Plan), ridesharing programs (Commuter Krewe), traffic signal coordination programs, bridge/roadway pavement preservation (Pavement and Asset Data Collection), a new HOV lane on I-12, expansion of the existing Intelligent Transportation Systems, expanding existing incident management efforts and laying the foundation for Transportation Systems Management and Operations (TSMO) efforts in the immediate future.
 - The VOC and NO_x emissions in the planning area do not exceed the established MVEBs.

TABLE 3: SUMMARY OF NO_x ON-ROAD MOBILE SOURCE EMISSIONS BY YEAR IN TONS/DAY

PARISH	ASCENSION	EAST BATON ROUGE	IBERVILLE	LIVINGSTON	WEST BATON ROUGE	REGION WIDE TOTAL
2022 MVEB	2.6	6.4	1.1	3.1	1.1	14.3
2022 Tons/Day	1.9	5.5	1.0	2.7	1.1	12.3
2027 MVEB*	2.2	4.6	0.7	2.6	0.9	11.0
2027 Tons/Day	1.0	3.0	0.7	1.4	0.6	6.7
2036 Tons/Day	0.7	2.3	0.5	1.0	0.4	4.9
2046 Tons/Day	0.8	2.4	0.6	1.1	0.6	5.4

* 2027 MVEB applies to years 2036 and 2046 as well.

Source: NSI, 2022; CRPC, 2022

TABLE 4: SUMMARY OF VOC ON-ROAD MOBILE SOURCE EMISSIONS BY YEAR IN TONS/DAY

PARISH	ASCENSION	EAST BATON ROUGE	IBERVILLE	LIVINGSTON	WEST BATON ROUGE	REGION WIDE TOTAL
2022 MVEB	2.6	6.2	0.5	3.2	0.5	13.0
2022 Tons/Day	2.0	5.3	0.5	2.5	0.5	10.6
2027 MVEB*	2.5	5.0	0.4	3.1	0.4	11.4
2027 Tons/Day	1.3	3.0	0.2	1.7	0.3	6.5
2036 Tons/Day	1.1	2.2	0.2	1.4	0.2	5.2
2046 Tons/Day	1.3	2.3	0.2	1.6	0.2	5.6

* 2027 MVEB applies to years 2036 and 2046 as well.

Source: NSI, 2022; CRPC, 2022

These reductions show that each Parish is in conformity with the US EPA's "Budget Emissions Test" for all analysis years. Since the Parishes and region are within attainment for the NAAQS and future year emissions are estimated to be less than the MVEB, transportation improvements contained in the MTP should not interfere with future attainment or maintenance of the NAAQS for ozone.

Interagency Consultation and Process Timeline:

Date	Event	Remarks
Mar-21	Internal (CRPC Staff)	Establish Interagency Consultation Committee (IACC) member representations and establish initial contact.
29-Apr-21	Interagency Consultation Committee Kick-Off Meeting	Provided overview of Metropolitan Transportation Plan (MOVE 2046), Regional bicycle and Pedestrian Plan (RBPP 2022); Ferry Feasibility Study (FFS 2021) and Pavement and Asset Data Collection (PADC 2022); IACC Timeline; MOVES3 Update and related Training; IACC discussed Future Projects Concurrence for non-exempt projects; Established criteria for exempt projects; Existing + Committed Projects List from MOVE 2046 including project staging and member jurisdiction consultation); Relayed information to IACC members on project submissions in response to Call for Projects STBG>200k for the upcoming TIP FY 2023-2026
May through December 2022	Internal (CRPC Staff + Consultant Team)	Initiate/Conduct Air Quality Conformity Analysis (Transportation Policy Committee (TPC) selected Projects); Finalize Base Year for Vehicle Miles Traveled (VMT) values; Retrieve VMT dataset from DOTD;
21-Sep-21	Stakeholder Meeting w/ DOTD	Discussed anticipated capacity projects with DOTD Planning/Programming section for upcoming STIP/TIP
16-Dec-21	Interagency Consultation Committee 2nd Meeting	Updated IACC members on the MOVE 2046 Project Development Timeline including Public Participation/Stakeholder Consultation process; Project Prioritization Criteria; Staging of Projects (Stage 1 (2021 - 2027); Stage 2 (2028-2036) and Stage 3 (2037-2046)); Review Draft SIP with DOTD; Air Quality (AQ) Conformity Analysis; Present Draft SIP to TPC; Public Comment Period and Plan Adoption timelines; IACC instructed to Staff to develop Comparative analysis BY 2018, BY 2019 and BY 2020 VMT dataset; IACC finalized MOVES model run input parameters for motor vehicle emission budgets analysis; Discussed draft MTP Staged Improvement Program; Finalized future projects concurrence

Date	Event	Remarks
16-Dec-21	Joint TAC/TPC meeting	Technical Advisory Committee (TAC)/TPC approved: Draft Roadway Projects in MOVE Analysis; Draft Executive Summary of the MOVES analysis;
December 17 through January 20, 2022	Internal (CRPC Staff + Consultant Team)	Staff developed a comparative analysis for DOTD's VMT data for 2018, 2019 and 2020 as well as the latest Travel Demand Model (MOVE 2046) and shared results with all IACC members for their input on determining VMT data year; Staff developed MPO Conformity Statistics (VMT) for all Region + All Five Parishes within MPO (metropolitan area)
21-Jan-22	Internal (CRPC Staff and IACC members)	IACC selected/determined BY 2019 for VMT data (pre-COVID conditions) from DOTD based on comparative analysis by staff
February 1 Through March 1, 2022	Internal (Staff and Consultant Team)	Finalize Air Quality Conformity Analysis (TPC Selected Projects)
3-Mar-22	Internal (IACC)	Staff provided IACC members with MOVE 2046 Technical Memorandum for MTP 2046 and AQ Conformity Analysis for feedback and comments.
22-Mar-22	Internal (IACC)	Staff provided to IACC an updated Technical Memorandum for AQ Conformity Analysis which incorporated comments/ feedback from FHWA Resource Center's AQ team via Carlos (FHWA- LA Division)
23-Mar-22	Joint TAC/TPC meeting	TAC/TPC reviewed and approved: Final MOVE 2046 MTP and Air Quality Conformity Analysis including draft TIP FY 2023-2026
8-Apr-22	Interagency Consultation Committee 3rd Meeting (Virtual)	CRPC received EPA Region -VI's concurrence on AQ Conformity Determination for MOVE 2046 MTP and draft TIP FY 2023-2026.
14-Jun-22	BR MPO Whiteboard Meeting (CRPC Staff, DOTD, FHWA)	Projects including phasing within current TIP FY 2019-2022 as well as upcoming TIP FY 2023 -2026 (draft) was discussed. No Changes to AQ SIP.
21-Sep-22	Joint TAC/TPC meeting	TAC/TPC approved the Final TIP 2023-2026 (no changes to the AQ SIP)

The CRPC TIP is a staged program of projects being advanced toward construction over the four year period FFY 2023 – 2026. Projects included in the CRPC TIP have gone through an extensive planning process and are derived directly from Stage I of the MTP which includes the first two years of STIP as required by CFR 450.218(m). These projects have been screened for technical merit and consistency with regional and federal transportation goals before being voted upon by the TPC. The result is a single list of projects for advancement agreed upon by transit operators, the DOTD, FHWA and local stakeholders.

STATUTORY FRAMEWORK FOR STATEWIDE PLANNING & PROGRAMMING

23 U.S.C. 134

Each state must develop a STIP, along with a long-range statewide transportation plan, for all areas of the state in order to accomplish the following objectives:

- Encourage and promote the safe and efficient management, operation and development of surface transportation systems that will serve the mobility needs of people and freight, foster economic growth and development within and between states and urbanized areas, and take into consideration resiliency needs while minimizing transportation-related fuel consumption and air pollution through metropolitan and statewide transportation planning processes; and
- Encourage the continued improvement and evolution of the metropolitan and statewide transportation planning processes by MPOs, state departments of transportation, and public transit operators taking into consideration a number of planning factors that are identified in 23 U.S.C. 135.

23 U.S.C. 135

DEVELOPMENT OF THE STIP

All modes of transportation shall be considered in the development of the STIP. The process shall be continuing, cooperative, and comprehensive to the extent possible. The current Louisiana Statewide Transportation Plan available at

http://wwwsp.dotd.la.gov/Inside_LaDOTD/Divisions/Multimodal/Transportation_Plan/Pages/default.aspx.

The annual Highway Budget Partitions are developed based on the funding scenarios provided in the Statewide Transportation Plan. Once the construction targets are established, the program managers meet with project selection teams to select and prioritize projects that are aligned with the performance goals and those projects are incorporated into the Highway Priority Program (HPP) and the STIP. Additional information is provided in the Highway Project Selection Process, Highway Priority Program/State Transportation Improvement Program and Projects in the STIP sections.

PLANNING FACTORS

The statewide planning process shall be carried out with consideration for and implementation of projects, strategies, and services that will:

- Support the economic vitality of the United States, the states, and nonmetropolitan and metropolitan areas especially by enabling global competitiveness, productivity and efficiency;
- Increase the safety of the transportation system for motorized and non-motorized users;
- Increase the security of the transportation system for motorized and non-motorized users;
- Increase the accessibility and mobility of people and freight;
- Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and state and local planned growth and economic development patterns;
- Enhance the integration and connectivity of the transportation system, across and between modes throughout the state for people and freight;
- Promote efficient system management and operation;
- Emphasize the preservation of the existing transportation system;

- Improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation; and
- Enhance travel and tourism.

PERFORMANCE BASED APPROACH

The statewide planning process shall provide for the establishment and use of a performance-based approach to decision-making to support national goals for delivering the federal-aid highway program (FAHP).

INTEGRATION WITH OTHER PLANS

States must integrate into the statewide planning process, either directly or by reference, the goals, objectives, performance measures and targets that are developed as a part of other state transportation plans and processes.

Each Metropolitan Planning Organization (MPO) prepares a fiscally-constrained long-range metropolitan transportation plan that describes highway and public transportation investments. The plans developed by the respective MPOs for each of the 11 metropolitan areas in Louisiana are incorporated into the Louisiana Statewide Plan without modification.

USE OF PERFORMANCE MEASURES AND TARGETS

Performance measures and targets established in accordance with federal rules shall be considered by states in development of the policies, programs, and investment priorities that are being reflected the STIP.

STIP RESOURCES

FEDERAL FUNDS

Between FFY 2023 and 2026 it is anticipated that Louisiana will be apportioned approximately \$3.9 billion in federal formula funds. Over the over the remaining years of the Infrastructure Investment and Jobs Act (IIJA), it is estimated that Louisiana will receive \$977 million annually, on average. Funding levels and increases based on average growth in federal funding has been assumed. Federal funds received by the state must be matched in varying amounts, generally at a ratio of 80% federal to 20% state, or other non-federal funds. Formula funds are apportioned into eight program categories; each with its own set of eligibilities. A brief description of each is provided below.

NATIONAL HIGHWAY PERFORMANCE PROGRAM

The National Highway Performance Program (NHPP) is a broad category of funding which allows expenditures on a wide range of programs and projects. Expenditures must support progress toward achievement of national performance goals for improving infrastructure condition, safety, mobility or freight movement and increase resiliency on the National Highway System (NHS). Two percent of the NHPP is set-aside for State Planning and Research (SPR) programs. A description of all set-asides is provided later in this section.

SURFACE TRANSPORTATION BLOCK GRANT

The Surface Transportation Block Grant (STBG) program has the most flexibility among all the program categories. Eligible activities include most items eligible for funding under the NHPP, however, projects are not restricted to the NHS. The STBG program has several sub-allocations:

- By population > 200,000;
- By population 50,000 to 200,000;
- By population 5,000 to 49,999;
- By population less than 5,000;
- Recreational Trails Program; and
- Available to any area, also referred to as Flex. This sub-allocation includes a set-aside for off-system bridges.

Set-asides include 2% for the SPR program and a variable amount is set aside for the Transportation Alternatives Program (TAP).

HIGHWAY SAFETY IMPROVEMENT PROGRAM

Projects funded under the Highway Safety Improvement Program (HSIP) strive to achieve a significant reduction in traffic fatalities and serious injuries on all public roads. The HSIP requires a data-driven, strategic approach to improving highway safety on all public roads that focuses on performance. The HSIP is limited specifically to infrastructure improvements, but still allows for training and workforce development. In addition to the 2% set-aside for SPR programs a small portion of the HSIP is set-aside for railway-highway crossing improvements.

CONGESTION MITIGATION AIR QUALITY

The Congestion Mitigation Air Quality (CMAQ) program provides a funding source for implementing transportation projects and programs to help meet the requirements of the Clean Air Act. Funding is available to reduce congestion and improve air quality for areas that do not meet the National Ambient Air Quality Standards (NAAQS) for ozone, carbon monoxide or particulate matter for non-attainment and former non-attainment areas now in compliance (maintenance areas). The 2% set-aside for SPR programs also applies to the CMAQ program.

NATIONAL HIGHWAY FREIGHT PROGRAM

Projects funded under the National Highway Freight Program (NHFP) are required to contribute to the efficient movement of freight on the National Highway Freight Network and be identified in the fiscally constrained freight investment plan included in the State Freight Mobility Plan. In addition, up to 30% of the total NHFP apportionment can be used for freight intermodal or freight rail projects. The 2% set-aside for SPR programs applies to the NHFP.

METROPOLITAN PLANNING

The Metropolitan Planning (PL) program establishes a cooperative, continuous and comprehensive framework for making transportation investment decisions in metropolitan areas. Program funds are available for MPOs to carry out the metropolitan planning process required by 23 U.S.C. 134, including development of the TIP and the long-range MTP.

CARBON REDUCTION

The Carbon Reduction program provides funds to reduce transportation emissions through the development of State carbon reduction strategies and by funding projects designed to reduce transportation emissions. The Carbon Reduction program has several sub-allocations:

- By population > 200,000;
- By population 50,00 to 200,000;
- By population 5,000 to 49,999;
- By population less than 5,000; and
- Available to any area, also referred to as CRP Flex.

PROTECT

The Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT) formula program provides funds for resilience improvements to be better able to continue to serve the primary function of the project during and after weather events and natural disasters for the expected life of the project as well as to better anticipate, prepare for, and adapt to changing conditions and to withstand and respond to disruptions.

SET-ASIDES

The State Planning and Research program was established to support the statewide planning activities required by 23 U.S.C. 135 and to carryout transportation research activities throughout the state. Funding is provided for the program by a 2% set-aside from each state's apportionment of five core programs: the NHPP, the STBG program, the HSIP, the CMAQ program and the NHFP.

The Railroad-Highway Crossings Program provides funds for safety improvements to reduce the number of fatalities, injuries and crashes at public railway-highway grade crossings. Program funding is set-aside from the HSIP. At least 50% of railway-highway crossing funds must be further set-aside for the installation of protective devices at railway-highway crossings.

The Transportation Alternatives Program (TAP) provides funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility and community improvement activities, among others. The IIJA Act requires that the program be funded through a competitive process. Eligible applicants include, but are not limited to, local governments, transit agencies, natural resource or public land agencies, schools, school districts, local education agencies, tribal governments, an MPO that represents an area with a population 200,000 or fewer and a State at the request of another eligible entity. Program funding is set-aside from the STBG program and is sub-allocated as follows:

- By population >200,000;
- By population 50,000 to 200,000;
- By population 5,000 to 200,000;
- By population less than 5,000; and
- Available to any area, also referred to as TAP Flex.

A share of each state's STBG apportionment is also set-aside for use on bridges that are not on federal-aid highways or "off-system" bridges. Funds are available for the rehabilitation and replacement of deficient off-system bridges.

COVID

Title IV of the Coronavirus Response and Relief Supplemental Appropriations Act, 2021 (CRRSAA) enacted on December 27, 2020, appropriated an additional \$10B for Highway Infrastructure Programs (HIP). The purpose of the HIP-CRRSAA is to provide funding to address coronavirus disease 2019 (COVID-19) impacts related to Highway Infrastructure Programs. These funds are not part of the formula funds and have their own obligation limitation. HIP-CRRSAA funds are sub-allocated as follows:

- By population >200,000; and
- Available to any area.

BRIDGE FORMULA PROGRAM

IJA established the Bridge Formula Program (BFP). BFP funds may be used for highway bridge replacement, rehabilitation, preservation, protection, or construction projects on public roads. These funds are not part of the formula funds and have their own obligation limitation. A share of each state's BFP apportionment is set-aside for use on "off-system" bridges (highway bridges located on public roads, other than bridges located on Federal-aid highways).

ARPA

American Rescue Plan Act of 2021 provided additional funding for state and local governments from the USDOT. The Louisiana DOTD was appropriated \$563M in HB 2 Act 485 of the 2021 Regular Session and \$332.8M in HB 2 Act 117 of the 2022 Regular Session. The funds must be budgeted by 12/31/2024 and expended by 12/31/2026. The Louisiana Office of Statewide Reporting and Accounting Policy tracks obligations and expenditures.

GARVEE

Grant Anticipation Revenue Vehicles (GARVEE) bonds are a non-traditional funding source available to DOTD. Specific to highways, a GARVEE is used as a term for a debt instrument that has a pledge of future Title 23 Federal-aid funding. Significantly, it is authorized for Federal reimbursement of debt service and related financing costs. GARVEEs enable a state to accelerate construction timelines and spread the cost of a transportation facility over its useful life rather than just the construction period.

TIFIA

The Transportation Infrastructure Finance and Innovation Act (TIFIA) program is a funding source available to DOTD that provides Federal credit assistance in the form of direct loans, loan guarantees, and standby lines of credit to finance surface transportation projects of national and regional significance.

STATE FUNDS

STATE MOTOR FUEL TAX

Louisiana motorists pay a 16-cent per gallon state tax on motor fuel (gasoline and diesel fuel). These funds are deposited into the Louisiana Transportation Trust Fund (TTF), which supports DOTD's operations and provides funds for federal match requirements on capital projects.

TRANSPORTATION INFRASTRUCTURE MODEL FOR ECONOMIC DEVELOPMENT PROGRAM

In 1989, the Louisiana legislature imposed an additional 4-cent per gallon gasoline tax with the provision that revenues from this tax be dedicated to the completion of the Transportation Infrastructure Model for Economic Development (TIMED) program and that the use of these funds for any other projects be prohibited. For the next 23 years, revenues from the 4-cent per gallon gasoline tax are dedicated to retire the bonds issued to complete the program.

REGISTRATION FEES

Revenue generated from the registration fee Louisiana residents pay on their automobiles, including pickup trucks, vans and SUVs, based on the value of the vehicle is deposited into the TTF. Registration fees are also collected on trucks and trailers, as defined by Louisiana Revised Statute 47:462. Revenue generated from these fees are deposited into the State Highway Improvement Fund (SHIF). Monies appropriated from the fund are to be used for funding projects on any road in the state highway system that is not eligible for federal highway funding assistance. These roadways are referred to as Non-Federal Aid (NFA) routes.

VEHICLE SALES TAX

In the Louisiana Legislature's 2021 Regular Session HB514/Act 486 which will phase in a dedication of the state motor vehicle sales and use tax to the Construction Subfund of the TTF was passed. Starting in SFY 2023-2024, seventy-five percent of the monies appropriated from the fund are to be used for funding a specific list of megaprojects and capacity projects listed in the Act and the remaining twenty-five percent of the monies are to be used to fund highway and bridge preservation projects included in the Highway Priority Program each SFY.

CAPITAL OUTLAY PROGRAM

The Capital Outlay Program (Bond Program) provides a source of funding for public improvement projects of various types. The funds are provided through the sale of state General Obligation Bonds and can be used for acquiring land, buildings, equipment or other properties, or for the preservation or development of permanent improvements. The program requires that projects be submitted by a department secretary. However, local officials from political subdivisions also may make requests through their state senator or representative. Projects then compete through the legislative process. Successful projects are grouped into various funding priorities and included in the approved Capital Outlay Bill. Funding for a specific project does not become available until such time as the bonds for that project are sold or an advance cash line of credit is approved by the State Bond Commission.

REIMBURSABLE

Reimbursable provides a source of funding when it is anticipated for DOTD to be reimbursed by an insurance claim for damage to an asset.

BUDGET ALLOCATION

The Department has developed a Transportation Asset Management Plan (TAMP) in accordance with 23 CFR 515. The TAMP, combined with the existing plan strategies and goals, guides the DOTD in its effort to most effectively manage its transportation assets. The TAMP is risk-based and describes the inventory and existing condition of highways and bridges on the NHS in Louisiana. Based on this information the TAMP describes how the level of funding for pavement and bridge preservation programs were determined in order to meet established performance targets. The TAMP also assists the DOTD in the identification and prioritization of the appropriate projects and when to implement them. This is subsequently reflected in the STIP by demonstrating the plan to improve the condition of pavements and bridges on the NHS in the most efficient use of public funds possible.

Each year the estimated available budget is partitioned among four major project categories: Preservation, System Operations/Motorist Services, Safety and Additional Capacity, each category being further divided into sub-categories based on the funding scenarios in the Louisiana Statewide Transportation Plan, projected funding sources, federally and state legislative constrained funding uses and the need to meet performance management requirements identified in the TAMP. Due to the fact that state revenues for transportation infrastructure have not been increased since 1989, the DOTD will focus available capital funding on addressing existing transportation infrastructure needs and on meeting performance management requirements. The implications of this investment strategy are that much of the available funding will be shifted to programs in the Preservation category in order to meet the performance management requirements for pavement and bridge condition as well as to address existing needs, keeping as much of the remainder of the state system open to traffic as resources will allow. Additionally, performance management requirements for the HSIP are being met by expending all safety funds on safety projects. A discussion detailing the requirements of performance management and the methodology for target setting can be found in the section of this document titled “TRANSPORTATION PERFORMANCE MANAGEMENT.”

HIGHWAY PROJECT SELECTION PROCESS

The Louisiana Statewide Transportation Plan documents a long-range multimodal transportation strategy to meet the goals and objectives for the State’s transportation and infrastructure system. The Louisiana Statewide Transportation Plan was originally developed in 1996, updated in 2003, 2008, 2015 and an update is in progress. The current Louisiana Statewide Transportation Plan includes a 30 year revenue forecast based on four scenarios which are level funding, reduced federal funding, moderate growth and robust growth.

The DOTD Executive Staff meets once a year to set the Departments goals and objectives and to set the funding appropriations for the various programs. During this meeting, the Departmental risks, which are the global level risks, are considered when setting the funding levels for the various programs in a manner that the Department can most effectively meet our asset performance targets. Based on the funding scenarios in the Louisiana Statewide Transportation Plan, projected funding sources, federally and state legislative constrained funding uses and the need to meet performance management requirements identified in the Transportation Asset Management Plan (TAMP), DOTD identifies the available funding that can be applied to projects and develops budget partitions which are partitioned into categories and subcategories based on the different types of assets and/or needs of the system. **Table 5** provides a crosswalk between the 2015 Louisiana Statewide Transportation Plan Vision and Goals and the Budget Partition Categories. Once the budget partitions are set and the capital funding available for the different subcategories of the Budget Partition are known, the projects in the annual

Highway Priority Program are determined. The STIP is derived from the projects in the Highway Priority Program.

TABLE 5: STATEWIDE TRANSPORTATION PLAN VISION AND GOALS TO BUDGET PARTITION CATEGORIES

LONG RANGE PLAN VISION FOR TRANSPORTATION SYSTEM	LONG RANGE PLAN GOALS	BUDGET PARTITION CATEGORIES
Integrated	3) Economic Competitiveness (freight, intermodal, reliable travel time, connection)	Capacity, Misc.
Connected	3) Economic Competitiveness (freight, intermodal, reliable travel time, connection)	Preservation/Sustainability, Operations/Motorist Services, Capacity, Misc.
Safe	2) Safety (automotive, bicyclist & ped crashes)	Safety
Secure	1) Infrastructure Preservation and Maintenance (pavement, bridges)	Preservation/Sustainability, Operations/Motorist Services
Well-maintained	1) Infrastructure Preservation and Maintenance (pavement, bridges)	Preservation/Sustainability, Operations/Motorist Services
Balanced	4) Community Development and Enhancement (access to jobs; modal options regardless of age, ability, or income)	Misc.
Quality of life	4) Community Development and Enhancement (access to jobs; modal options regardless of age, ability, or income) 5) Environmental Stewardship (alt. fuel fleets, wetlands, air quality)	Misc.
Travel choice	4) Community Development and Enhancement (access to jobs; modal options regardless of age, ability, or income)	Misc.

The Highway Priority Program Project Selection Process is an annual process to identify, prioritize and select highway projects on the various asset classes in the State. There are four categories of highway projects:

- System Preservation;
- Traffic Safety;
- Capacity Expansion; and
- System Operation.

There are two methods to identify projects to become part of the Highway Priority Program (HPP). The first method is to gather and analyze data. The condition of the road, how the road operates, safety and the congestion on the road is considered. The second method is to seek customer input from the public, state and local elected officials, the MPO's, regional and local planning officials as well as other state and federal agencies during the annual legislative public hearings in each of the 9 DOTD Districts and year round through letters, emails, and meetings.

The DOTD District and the MPOs rank the projects based on technical analysis and customer input. The District then submits the suggested projects to the Project Selection Teams. The Project Selection Team makes the final selections based on District recommendations, technical analysis, customer input, available funding, performance targets identified in the TAMP and the State Long Range Plan.

The System Preservation Category is divided into seven subcategories. Three of the subcategories, pavement preservation of non-interstate roads on the NHS system, pavement preservation of the interstate and preservation of state owned bridges, are directly related to the performance targets identified in the TAMP. However, projects in other programs, such as the Capacity program, can help us achieve the performance targets identified in the TAMP.

Each Project Selection Team is made up of people with expertise in the type of project in that program. It includes DOTD Headquarter Officials, representatives from other State Agencies, and in some cases DOTD District Officials. Some project selection teams also request input from representatives from federal agencies and local associations. During the project selection team meeting, the project selection committees review the Project Level risks and consider these risks when prioritizing the projects so that the program will efficiently and effectively appropriate the funding to meet the Department's performance targets.

The Project Selection Teams meet a minimum of once a year to review their program's construction target for the current SFY and the projected targets for the next five to seven SFYs depending on the program and to review the performance measures that have been set. Since it takes longer to deliver bridge projects, the Bridge Programs are to provide a seven year program and all programs are to provide a three to five year program. Additional information regarding how the resulting programs of projects meet the performance targets that have been identified through the TPM process is provided in the PERFORMANCE MEASURES AND THE STIP section.

FISCAL CONSTRAINT

This STIP is fiscally constrained in accordance with federal regulations set forth in 23 CFR 450. The current and estimated revenues to fund the STIP were described in the STIP RESOURCES section. The STIP fiscal constraint is illustrated in **Figure 2**. Figure 2 compares the total estimated regular recurring funds we expect to have available each FFY versus the amount planned in the STIP for that FFY to be funded with regularly recurring funds.

The total estimated regularly recurring federally funded program is a combination of an assumed obligation authority, based on past actual obligation limitation, the IIJA BFP funds which have their own obligation limit, plus an assumed \$20 million in the yearly redistribution of obligation limitation, often referred to as August redistribution. This amount is considered conservative since over the last four years the average amount of August redistribution received by DOTD is \$59.1 million. Estimated state funding shown is a combination of funds deposited in the TTF, the SHIF and capital outlay and is based on forecasts developed by the Revenue Estimating Conference (REC).

Projects that are programmed in the STIP reflect the outcome of the yearly process to identify project needs through DOTD's established project selection process. This process is required through Louisiana Revised Statute Title 48 Sections 229.1 through 231 and requires projects as programmed to be presented to the public through a series of public hearings held in each of the nine DOTD Districts.

The STIP funding plan is illustrated in **Figure 3**. Figure 3 shows the breakdown of the total amount each FFY that we plan to fund with regularly recurring funds and one-time money we reasonably expect to have available that FFY. The one-time money includes State General Obligation Bonds (STBONDS) assigned to particular projects by line item in the Louisiana Capital Outlay Bill during a legislative session, Federal Demonstration and High Priority (DEMO) funds provided by the US Congress, COVID funds, ARPA funds and the remaining STP>200-E and STPFLEX-E funds.

FIGURE 2: STIP FISCAL CONSTRAINT (\$ IN MILLIONS)**FIGURE 3: STIP FUNDING PLAN (\$ IN MILLIONS)**

STIP MANAGEMENT

LINE ITEMS

In accordance with 23 CFR 450.218(j), projects that are not considered to be of appropriate scale for individual identification in a given program year may be grouped by function, work type and/or geographic area using the applicable classifications listed under 23 CFR 771.117(c) and (d) and/or 40 CFR part 93. In non-attainment and maintenance areas, project classification must be consistent with the “exempt project” classifications contained in the Environmental Protection Agency’s (EPA) transportation conformity regulations. In addition, projects proposed for funding under 23 U.S.C Chapter 2 that are not regionally significant may be grouped in one line item or identified individually in the STIP.

AMENDMENTS & ADMINISTRATIVE MODIFICATIONS

In accordance with 23 CFR 450.218(n), projects in any of the first four years of the STIP may be moved to any other of the first four years of the STIP subject to the project selection provisions required by 23 CFR 450.222. In addition, the STIP may be revised without formal approval, provided that a procedure that is agreed upon by all parties has been established through interagency consultation and coordination. This type of revision is referred to as an administrative modification. However, STIP revisions that would affect fiscal constraint or the status of an air quality conformity determination must take place by amendment. The differences between administrative modifications and amendments is discussed on the following page.

An **administrative modification** refers to a minor revision to the TIP and/or STIP, such as minor changes to previously included project phase cost, funding source and initiation dates. An administrative modification does not require public review and comment, a re-demonstration of fiscal constraint or a conformity determination (in nonattainment and maintenance areas).

The thresholds for administrative modifications include:

- Revisions to a project description without changing the project scope or which do not conflict with the pertinent environmental document
- Minor changes to the cost of a project phase (feasibility, environmental, right-of-way, utility relocations, engineering and construction):
 - Funding changes are limited to \$1,250,000 for project phases $\leq$ \$5,000,000
 - For project phases $>$ \$5,000,000, an administrative modification is limited to budget changes of less than 25% in funding
- Minor changes to funding sources of previously included projects that do not affect fiscal constraint of the STIP or the ability to complete the project as initially described
- Minor changes to project/project phase initiation dates as long as the project stays within the approved STIP/TIP timeframe and do not affect fiscal constraint of the STIP or the ability to complete the project as initially described
- A change in the project implementing agency
- A split or combination of individually listed projects as long as cost, schedule and scope remain unchanged
- The addition or deletion of projects from grouped project listings (line items) as long as the line item total funding amounts stay within the guidelines stated above.

If a project affected by the administrative modification is located within the planning boundaries of an MPO, the MPO must first generate and/or accept the administrative modification for its TIP.

Each MPO approved administrative modification must be published online separately from TIP amendments. The MPO should summarize this as an informational item to MPO Committee members each month. An MPO Board may delegate approval of administrative modifications to the MPO's Executive Director and in this case the MPO must provide copies of the delegation to DOTD, FHWA and FTA. Any administrative modification must be forwarded to the DOTD Transportation Planning and Public Transportation Sections as appropriate, for approval on behalf of the Governor.

For projects in rural areas, administrative modifications will be incorporated into the STIP upon approval by DOTD on behalf of the Governor.

An **amendment** refers to a revision involving a major change to a project or project phase included in the TIP and/or STIP, including the addition or deletion of a project or a project phase or a major change

in the project/project phase cost, design concept or scope (e.g., changing project termini or the number of through traffic lanes). Changes to projects that are included for illustrative purposes only do not require an amendment. Revisions that require an amendment require public review and comment, the re-demonstration of fiscal constraint and where applicable, a conformity determination (projects in nonattainment or maintenance areas that are considered “non-exempt”).

If a revision requiring an amendment is within the planning boundaries of a MPO, it must first be amended in the TIP before it can be amended in the STIP. Once approved by DOTD, on behalf of the Governor, the amendment will be incorporated into the STIP.

All approved administrative modifications and amendments will be incorporated into the STIP which can be accessed at the link below. STIP amendments are processed by the FHWA within two weeks following its submittal. The FHWA can partially approve an amendment on a project by project basis. Any project not approved will be resubmitted once questions and/or concerns have been resolved.

If a question arises regarding the interpretation of an administrative modification or an amendment; DOTD, FHWA, FTA and the MPO, as appropriate, will work to resolve the issue in coordination with each other. If after consultation a question remains, the final decision rests with the FTA for transit projects and the FHWA for highway projects.

Complete documentation for administrative modifications and amendments to the STIP is available at: http://wwwsp.dotd.la.gov/Inside_LaDOTD/Divisions/Multimodal/STIP/Pages/default.aspx.

TRANSPORTATION PERFORMANCE MANAGEMENT

The Moving Ahead for Progress in the 21st Century Act (MAP-21) and the Fixing America’s Surface Transportation Act (FAST) transformed the FAHP by establishing new performance management requirements to ensure that investments for federal transportation funds are as efficient as possible. Performance management refocuses attention on national goals, increases the accountability and transparency of the FAHP and improves project decision-making through performance-based planning and programming.

Transportation Performance Management (TPM) is a strategic approach to making investment and policy decisions to achieve national performance goals by using the information on the transportation system. Key information provided through TPM helps to understand the consequences of investment decisions across all transportation assets or modes and ensures targets and measures are developed in cooperative partnerships and are based on data and objective information. It is a systematically applied, ongoing process.

In accordance with 23 CFR 450.218 the STIP shall include, to the maximum extent practicable, a discussion of the anticipated effect of the STIP toward achieving the performance targets that have been identified through the TPM process, linking investment priorities to those established performance targets.

PERFORMANCE MEASURES AND TARGET SETTING

The TPM framework established through MAP-21 and FAST is being implemented through a series of interrelated performance rulemakings. Collectively the rules address the national goals for transportation as identified in 23 U.S.C. 150(b):

- **Safety** – to achieve a significant reduction in traffic fatalities and serious injuries on all public roads.
- **Infrastructure condition** – to maintain the highway infrastructure asset system in a state of good repair.
- **Congestion Reduction** – to achieve a significant reduction in congestion on the National Highway System.
- **System Reliability** – to improve the efficiency of the surface transportation system.
- **Freight Movement and Economic Vitality** – to improve the National Highway Freight Network, strengthen the ability of rural communities to access national and international trade markets and support regional economic development.
- **Environmental Sustainability** – to enhance the performance of the transportation system while protecting and enhancing the natural environment.
- **Reduced Project Delivery Delays** – to reduce project costs, promote jobs and the economy and expedite the movement of people and goods by accelerating project completion through elimination delays in the project delivery process, including reducing regulatory burdens and improving agencies' work practices.

In accordance with these goals, performance measures have been established. Targets have been subsequently established for applicable measures in coordination with MPOs. The following discussion describes the methodology for setting performance targets and how the implementation of projects in the STIP will potentially contribute to successfully reaching these targets.

HIGHWAY SAFETY IMPROVEMENT PROGRAM

Louisiana has adopted a strategic vision for reducing traffic-related deaths and serious injuries – Destination Zero Deaths. The vehicle for reaching this destination is the Louisiana Strategic Highway Safety Plan (SHSP), which uses a strategic, data-driven, multidisciplinary approach to identify the state's most severe traffic safety problems and the most effective approaches to solve them.

The DOTD, the Louisiana State Police (LSP), and the Louisiana Highway Safety Commission (LHSC) lead the SHSP. The first SHSP was developed in 2006 and was most recently updated in 2022. The SHSP sets forth the strategies and actions that will help Louisiana achieve the vision and mission by targeting effective solutions at the State's most severe traffic safety problems on all public roads. The 2022 SHSP targets four key emphasis areas: impaired driving, occupant protection, infrastructure and operations and distracted driving. Strategies focused on young drivers and older drivers/pedestrians are cross-cutting among all emphasis areas. A copy of the current SHSP can be accessed at the website below.

<http://www.destinationzerodeaths.com/Images/Site%20Images/ActionPlans/SHSP.pdf>

The FHWA-funded HSIP is administered by DOTD and is focused on improving safety on all public roads through the Infrastructure and Operations emphasis area. This emphasis area addresses crashes related to roadway departure, intersections, and non-motorized users. Also, included in this emphasis area is the implementation and advancement of quantitative safety analysis methods.

Performance targets for DOTD's HSIP and LHSC's Highway Safety Plan which are set on an annual basis, must be coordinated with the SHSP. Safety performance targets for the HSIP have been established for the following federally mandate performance measures:

- Number of fatalities

- Rate of fatalities per 100 million VMT
- Number of Serious Injuries
- Rate of serious injuries per 100 million VMT
- Number of non-motorized fatalities and serious injuries

Targets are submitted to FHWA in the HSIP Report by August 31 each year; this report can be accessed at the website below.

<https://safety.fhwa.dot.gov/hsip/reports/>

Safety projects included in the STIP are identified to address critical and primary Infrastructure and Operations emphasis areas in support of the HSIP performance measures and SHSP performance goals. Safety projects are selected through a data-driven process and are in conformance with the HSIP requirements. The data-driven safety project selection process includes:

- Evaluation of safety performance (site specific or systemic approach)
- Identification of appropriate and effective countermeasures that address one or more SHSP primary emphasis areas
- Consideration for safety benefit vs. cost

The purpose and need of all projects is focused on safety and is intended to have a positive effect on the state's highway safety performance in order to move toward achieving the SHSP performance goals and HSIP performance measures. The evaluation of safety effectiveness for HSIP projects is conducted annually and reported through the HSIP Annual Report for fatal and serious injury crashes. The HSIP Annual Report can be access at the website below.

<https://highways.dot.gov/safety/hsip/reporting>

NATIONAL HIGHWAY PERFORMANCE PROGRAM

To carry out the National Highway Performance Program (NHPP), the performance measures established to assess the condition of pavement and bridges are:

- Percentage of pavements on the Interstate System in good condition
- Percentage of pavements on the Interstate System in poor condition
- Percentage of pavements on the non-Interstate NHS in good condition
- Percentage of pavements on the non-Interstate NHS in poor condition
- Percentage of NHS bridges classified as in good condition
- Percentage of NHS bridges classified as in poor condition

The DOTD currently manages the 11th largest state owned highway system in the United States. In order to maintain the system in the best possible condition for the amount of available funding, the Department has developed a Transportation Asset Management Plan (TAMP) in accordance with 23 CFR 515. The TAMP is risk-based and describes the inventory and existing condition of highways and bridges on the NHS in Louisiana. Based on this information the TAMP describes how the level of funding for pavement and bridge preservation programs were determined in order to meet established performance targets. The TAMP also assists the DOTD in the identification and prioritization of the appropriate projects and when to implement them. This is subsequently reflected in the STIP by demonstrating the plan to improve the condition of pavements and bridges on the NHS in the most efficient use of public funds possible.

In accordance with 23 CFR 667.1, the DOTD shall conduct statewide evaluations to determine if there are reasonable alternatives to roads, highways, and bridges that have required repair and reconstruction activities on two or more occasions due to emergency events. The 2022 TAMP, in development, details the methodology as required by 23 CFR 667.1. DOTD takes this evaluation into consideration in the development of the STIP in accordance with 23 CFR 667.9.

Baseline conditions and targets were reported in the State Biennial Performance Report for Performance Period 2018 – 2021 on the FHWA’s web-based Performance Management Form on October 1, 2018. Actual conditions for the full performance period 2018-2021 and the baseline conditions and targets for performance period 2022-2025 will be reported on the FHWA’s web-based Performance Management Form when the system becomes available in 2022. A copy of the current TAMP can be accessed at the website below.

http://wwwsp.dotd.la.gov/Inside_LaDOTD/Divisions/Multimodal/Data_Collection/Pages/Asset-Management.aspx

Also for the purpose of carrying out the NHPP, two measures have been established to assess the reliability of the system (Travel Time Reliability Measures):

- Percent of the person-miles traveled on the Interstate that are reliable (Interstate Travel Time Reliability Measure)
- Percent of the person-miles traveled on the non-Interstate NHS that are reliable (Non-Interstate NHS Travel Time Reliability Measure)

NATIONAL FREIGHT MOVEMENT

The performance measure established to assess freight movement on the Interstate System is the Truck Travel Time Reliability Index. This measure considers factors that are unique to the freight industry including the use of the system during all hours of the day and the need to consider more extreme impacts to the system in planning for on-time arrivals.

For the two travel time reliability measures as well as the freight reliability measure, targets are set for all roadways on the applicable system within a state or MPO, regardless of ownership. Data for these measures is provided by the FHWA through the National Performance Management Research Data Set (NPMRDS). This is a national data set of average travel times for each segment of the NHS for each 15-minute period of each day. The data is hosted by the University of Maryland Center for Advanced Transportation Technology Laboratory (CATT Lab). States and MPOs can access the raw data at no cost through the CATT Lab’s online massive-data downloader tool. The CATT Lab has also developed a tool to assist states and MPOs with analyzing the data and calculating the required metrics and measures. The analysis tool is made available to states, through participation in a pooled fund study led by the Rhode Island DOT. The DOTD has chosen to join the study and by doing so, MPOs in Louisiana are also provided access to the analysis tools.

The DOTD’s in-house research division, the Louisiana Transportation Research Center (LTRC) downloaded and analyzed the NPMRDS data using the tools developed by the CATT Lab. Long-term, DOTD anticipates continuing to conduct this analysis in-house with technical assistance from the LTRC to improve its understanding of the measures and the raw data.

Interstate Travel Time Reliability: State DOTs must establish 2- and 4- year targets for the percent of person-miles on the Interstate system that are reliable. The level of travel time reliability (LOTTR) is the metric for determining this performance measure. The LOTTR is calculated for four time periods:

- Weekdays from 6:00 a.m. – 10:00 a.m.
- Weekdays from 10:00 a.m. – 4:00 p.m.
- Weekdays from 4:00 p.m. – 8:00 p.m.
- Weekends from 6:00 a.m. – 8:00 p.m.

For each time period across an entire year, the LOTTR is defined as the ratio of the longer travel time (80th percentile) to a “normal” travel time (50th percentile) for all vehicles. The data is analyzed based on 15-minute groupings of speeds and travel times for traffic message channels (TMC), which are the individual highway segments for which the NPMRDS data is reported. The FHWA defines a reliable segment as one whose LOTTR is less than 1.5 during all four time periods. If the highest LOTTR is 1.5 or above, the segment is considered unreliable. To translate the LOTTR to the performance measure, the length of each segment is multiplied by its annual average daily traffic (AADT) and the average occupancy factor for all vehicles (the default average occupancy factor is set by the FHWA as 1.7). The product of this calculation results in the number of person-miles. The calculation is done for both reliable segments and all segments. Dividing the sum of reliable segment person-miles by the sum of all segment person-miles provides the measure of percent of travel time reliability.

Non-Interstate NHS Travel Time Reliability: State DOTs must also establish 2- and 4- year targets for the percent of reliable person-miles on the non-Interstate NHS. For the first reporting period, 2-year targets are not required for this measure. The metrics and measure are calculated in the same manner as the Interstate Travel Time reliability measure, and the same methodology was used to derive targets.

Freight Reliability: State DOTs must also establish 2- and 4- year targets for truck travel time reliability (TTTR) on the Interstate system. The measure is calculated similarly to the Interstate and non-Interstate NHS Travel Time reliability measures, but the metric’s parameters are different and it is not translated into a percentage of reliable person-miles. This measure also uses a subset of the NPMRDS data that contains only truck data, rather than the all vehicle (passenger cars and trucks) data used for the Interstate and non-Interstate NHS reliability measures.

The TTTR index is the metric for determining the performance measure and is calculated for the following five time periods:

- Weekdays from 6:00 a.m. – 10:00 a.m.
- Weekdays from 10:00 a.m. – 4:00 p.m.
- Weekdays from 4:00 p.m. – 8:00 p.m.
- Overnight (all days) from 8:00 p.m. – 6:00 a.m.
- Weekends from 6:00 a.m. – 8:00 p.m.

For each time period across an entire year, the TTTR is defined as the ratio of the longer truck travel time (95th percentile) to a “normal” truck travel time (50th percentile). The data is analyzed based on 15-minute groupings of speeds and travel times for TMCs. For each TMC, the highest TTTR value is carried forward into the measure calculation. To translate the individual TMC values into the overall TTTR index, the length of each segment is multiplied by its maximum TTTR of the five time periods. These length-weighted TTTRs are then added together and divided by the sum of all segment lengths to result in the TTTR index for the performance measure.

Baseline conditions and targets were reported in the State Biennial Performance Report for Performance Period 2018-2021 on the FHWA's web-based Performance Management Form on October 1, 2018. Actual conditions for the full performance period 2018-2021 and the baseline conditions and targets for performance period 2022-2025 will be reported on the FHWA's web-based Performance Management Form when the system becomes available in 2022. Transportation performance management requirements will be addressed and assessed to determine how projects in the 2023-2026 STIP effected DOTD's achievement of reliability performance targets, as applicable, in the next update of the Louisiana Freight Mobility Plan and the Louisiana Statewide Transportation Plan.

CONGESTION MITIGATION AND AIR QUALITY PROGRAM

The purpose of the CMAQ program is to fund transportation projects or programs that contribute to the attainment or maintenance of NAAQS in those specific areas. The program recognizes investments that increase multimodal solutions and vehicle occupancy levels as strategies to reduce both criteria pollutant emissions and congestion. The performance measures established for the purpose of carrying out the CMAQ program are:

- Total emissions reduction of on-road mobile source emissions; only applicable to the Baton Rouge MPO area
- Annual hours of Peak Hour Excessive Delay per capita (not applicable to Louisiana at this time)
- Percent of non-SOV travel (not applicable to Louisiana at this time)

In order to set total emissions targets, a query of CMAQ program projects that were scheduled to be let between FFYs 2022 and 2025 was done. The programmed projects were compared to similar projects that have already been implemented in terms of their scope and performance in order to determine achievable targets. Established targets reflect the anticipated cumulative emissions reduction that will result from the implementation of these projects.

Baseline conditions and targets were reported in the State Biennial Performance Report for Performance Period 2018-2021 on the FHWA's web-based Performance Management Form on October 1, 2018. Actual conditions for the full performance period 2018-2021 and the baseline conditions and targets for performance period 2022-2025 will be reported on the FHWA's web-based Performance Management Form when the system becomes available in 2022. Transportation performance management requirements will be addressed and assessed to determine how projects in the 2023-2026 STIP effected DOTD's achievement of CMAQ performance targets, as applicable, in the next update of the Louisiana Freight Mobility Plan and the Louisiana Statewide Transportation Plan.

TRANSIT ASSET MANAGEMENT

An important component of the Transit Asset Management plan (TAM) is to define targets and measures that will help the DOTD plan for future investment in transit assets to maintain a State of Good Repair. The performance measures detail how each asset type's depreciation is measured. Target Useful Life Benchmark (ULB) thresholds vary depending on the asset class.

Numerous transit projects included in the FFY 2023-2026 Transit Element STIP support achieving the targets that have been established for a state of good repair for transit assets, including the purchase of

new assets and the maintenance and upgrade of existing assets. Continued purchase of new assets will support the overall goal.

A copy of the TAM plan can be accessed at the link below.

[http://www.dotd.la.gov/Inside_LaDOTD/Divisions/Multimodal/transit/Pages/Transit-Asset-Management-\(TAM\).aspx](http://www.dotd.la.gov/Inside_LaDOTD/Divisions/Multimodal/transit/Pages/Transit-Asset-Management-(TAM).aspx)

A summary of baseline conditions for all required highway performance measures for performance period 2022-2025 is shown in **Table 6**. A summary of baseline conditions for regionally adopted transit performance measures for performance period 2022-2025 is shown in **Table 7**. Additional information regarding performance measures, baseline conditions and target setting can be found on FHWA's Transportation Performance Management website, shown below.

<https://www.fhwa.dot.gov/tpm/>

**TABLE 6: BASELINE CONDITIONS FOR REQUIRED HIGHWAY PERFORMANCE MEASURES
FOR PERFORMANCE PERIOD 2022-2025 TO BE DETERMINED**

Performance Measure	Baseline
Percentage of Pavements of the Interstate System in Good Condition	
Percentage of Pavements of the Interstate System in Poor Condition	
Percentage of Pavements of the Non-Interstate NHS in Good Condition	
Percentage of Pavements of the Non-Interstate NHS in Poor Condition	
Percentage of NHS Bridges Classified as in Good Condition	
Percentage of NHS Bridges Classified as in Poor Condition	
Percentage of the Person-Miles Traveled on the Interstate That Are Reliable	
Percentage of the Person-Miles Traveled on the Non-Interstate NHS That Are Reliable	
Truck Travel Time Reliability (TTTR) Index	
Total Emission Reductions: PM2.5	**
Total Emission Reductions: NOx	
Total Emission Reductions: VOC	
Total Emission Reductions: PM10	**
Total Emission Reductions: CO	**

*Per 23 CFR 490.105(e)(7) baseline conditions are not required to be reported for Interstate System pavement condition measures and Non-Interstate NHS Travel Time Reliability measures for the first reporting period only.

**Since there are no areas designated as nonattainment or maintenance for PM2.5, PM10 or CO in Louisiana, statewide targets for annual emissions reductions for these measures are not required. Subsequently, a baseline condition is not reported for these measures.

**TABLE 7: BASELINE CONDITIONS FOR REGIONALLY ADOPTED
TRANSIT PERFORMANCE MEASURES
FOR PERFORMANCE PERIOD 2022-2025**

Asset Class	Performance Measure	Baseline Condition (2022 at/over ULB)
Automobile (AO)	Age - % of revenue vehicles within a particular asset class that have met or exceeded their ULB	80%
Bus (BU)		N/A
Cutaway (CU)		37%
Minivan (MV)		64%
Sports Utility Vehicle (SV)		67%
Van (VN)		93%
Facilities <i>All buildings or Structures</i>	Condition - % of facilities with a condition rating below 3.0 on the FTA Transit Economic Requirements Model (TERM) Scale	

PERFORMANCE MEASURES AND THE STIP

In accordance with 23 CFR 450.218 the following demonstrates the effect of the STIP toward achieving the performance targets that have been identified through the TPM process, linking investment priorities to those established performance targets.

In accordance with the 2019 TAMP Investment Strategies, the annual Highway Budget Partition provides the link between projected funding for investment strategies, the annual Highway Priority Program (HPP) and the Statewide Transportation Improvement Program (STIP). Iterative Pavement Management System (PMS) and Bridge Management System (BMS) analyses are performed using various budget scenarios in order to identify the most appropriate funding levels for each asset class using actual treatment types. Once funding levels, or construction targets, are finalized, the annual capital budget is partitioned by making allocations to the preservation programs that support TAMP investment strategies first. Through the analyses, budgets are projected into the future for a number of years in order to reach performance goals within a prescribed timeframe. This exercise is repeated on a regular basis in order to determine whether the investment levels are sufficient to meet the established asset condition targets associated with performance goals for pavement and bridge assets on the National Highway System (NHS). Construction targets are adjusted as needed.

Using the established construction targets, program managers meet with project selection teams to select and prioritize projects that are aligned with the performance goals. Projects that are selected are incorporated into the HPP and are subsequently included in the STIP per established processes. With each new STIP projects that are projected to use federal funds within the STIP timeframe are included by project phase and federal fiscal year of anticipated authorization. In the interim years, projects are added by the approved STIP amendment process.

Part of the DOTD's project delivery process is to document asset information as well as proposed improvement types, which are linked to a project number in the LaGov Project Systems (PS) module. Project improvements are coded using the appropriate FHWA Improvement Type in order to quantify the investment that is made on each asset according to the work done. A crosswalk between FHWA Improvement Types and TAMP Work Types is shown in **Table 8**.

TABLE 8: FHWA IMPROVEMENT TYPE TO TAMP WORK TYPE CROSSWALK

TAMP Work Type	FHWA Improvement Type	
	Pavements	Bridges
Initial Construction	1 - New Construction Roadway	8 - Bridge New Construction
Maintenance	N/A	N/A
Preservation	5-4R Maintenance Resurfacing	40 - Special Bridge
		47 - Bridge Preventative Maintenance
		48 - Bridge Protection
Rehabilitation	6-4R Maintenance Restoration/Rehabilitation	59 - Bridge Deck Resurfacing
		13 - Bridge Rehabilitation - Added Capacity
Reconstruction	3-4R Reconstruction Added Capacity	10 - Bridge Replacement - Added Capacity
	4-4R Reconstruction No Added Capacity	
	7-4R Maintenance Relocation	
		11 - Bridge Replacement - No Added Capacity

Through the LaGov PS portal, projects can be filtered by NHS status as well as the appropriate FHWA Improvement Types in order to quantify the investments that were made according to each TAMP Work Type. NHS Pavement and NHS bridge investments by TAMP Work Type for each of State Fiscal Years 2019 through 2022 are shown below in **Table 9** and **Table 10** respectively.

It's worth noting the Initial Costs for NHS Pavement and NHS Bridge are significantly higher than 2021. Most of this is attributed to project H.008145, LA 1: Leeville to Golden Meadow (Phase 2). This project involves replacing a section of pavement on the NHS System (LA 1) which is highly vulnerable to climate change and often at risk of flooding due to extreme weather events with a new structure. Replacing such a vulnerable section of pavement with a new structure improves the resiliency of the NHS network.

TABLE 9: NHS PAVEMENT INVESTMENTS (LETTING COST) BY YEAR AND BY TAMP WORK TYPE

Fiscal Year	Initial Construction	Maintenance	Preservation	Rehabilitation	Reconstruction
2019	76,110,628	-	42,341,565	32,507,798	49,557,632
2020	115,390,957	-	100,158,698	75,115,080	191,938,258
2021	19,080,500	-	57,501,382	40,048,391	23,491,017
2022	92,043,462	-	45,390,579	113,171,942	20,394,415
Total	302,625,547	-	245,392,224	260,843,211	285,381,322

Excludes Local NHS assets

TABLE 10: NHS BRIDGE INVESTMENTS (LETTING COST) BY YEAR AND BY TAMP WORK TYPE

Fiscal Year	Initial Construction	Maintenance	Preservation	Rehabilitation	Reconstruction
2019	29,680,449	-	2,994,300	52,940,831	36,103,523
2020	11,489,166	-	1,045,194	56,163,336	242,749,667
2021	1,500,000	-	4,750,162	7,911,610	74,605,260
2022	494,959,335	-	3,522,581	51,120,344	75,743,554
Total	537,628,950	-	12,312,237	168,136,121	429,202,004

Excludes Local NHS assets

In order to help demonstrate the link between TAMP investment strategies and actual improvements, investments are quantified in **Table 11** by the Preservation HPP category code that corresponds with pavement and bridge improvements that are made on the NHS along with the associated construction target from the annual Budget Partition. It should be noted that construction targets for preventive maintenance categories include allocated funding for projects both on and off the NHS; whereas, the letting costs only represent investments made on the NHS. To demonstrate how one very large project can affect the program, PR I had \$0 in letting in SFY2021-2022, due to a single project (H.012889) that had to be rejected and re-bid.

TABLE 11: INVESTMENTS (LETTING COST) BY PROGRAM CATEGORY (PRESERVATION PROGRAMS) AND CONSTRUCTION TARGETS

HPP Category Codes	HPP Category Names	Authorization Totals (Letting Cost)	Allocation Totals (Construction Targets)**
PR BR	Preservation Bridge (Interstate & NHS)	129,992,613	126,400,000
PR BP	Preservation Bridge Preventive Maintenance*	0	3,000,000
PR I	Preservation Interstate (Pavement)	0	35,900,000
PR NH	Preservation National Highway System (Pavement)	142,735,553	87,000,000
PR PM	Preservation Preventative Maintenance*	778,189	9,000,000
Total		273,506,354	261,300,000

* Budget allocations for the preventative maintenance categories include funding for improvements on both the NHS & non-NHS; letting totals include costs for improvements on the NHS only.

** Construction Targets are from the SFY2021-2022 Budget Partition

Additional investments made on NHS pavements and bridges are quantified in **Table 12** below. These investments are made through programs outside the preservation programs that are targeted in the TAMP investment strategies. When considered as part of the overall improvements made to pavements

and bridges on the NHS, the total investment is within 5% of the NHS preservation construction targets for the fiscal year. Once the letting amounts are incorporated and above numbers are adjusted, the total investment on NHS pavements and bridges will exceed the target construction amounts.

TABLE 12: ADDITIONAL INVESTMENTS (LETTING COSTS) ON THE NHS IN OTHER PROGRAM CATEGORIES

HPP Category Codes	HPP Category Name	Authorization Totals (Letting Cost)
CA	Capacity	1,336,930
DE	Demo (Federal Earmarks)	5,086,304
OE TS	Operations Transportation Management System	4,894,432
OT	Other*	463,896,544
RT	Road Transfer	15,263,266
US	Urban Systems	21,333,026
TI	TIMED	108,371,846
OE DR	Roadway Flooding	1,225,083
PR NS	Preservation Non-I	113,387
OE AM	Access Management	1,319,034
Total		622,839,852

* Projects in the Other/Miscellaneous category typically include emergency repairs, projects with state earmarks (i.e., Capital Outlay), federal discretionary funds or other one-time money.

It is also worth noting that a single year of data could be misleading in terms of the actual progress being made toward the goal of improving pavements and bridges on the NHS in Louisiana. In any given year, projects can be moved into a subsequent year for a number of reasons but balance is typically achieved over multiple years.

In addition to the 2022 projects documented above, the Department is also making a significant investment in Interstate 10 by widening it from the I-10/I-12 split to the LA 415 interchange. This project will replace several end of life bridges and pavement and add service life back into the network.

PUBLIC INVOLVEMENT

MPO CONSULTATION

In general the DOTD Office of Planning meets with each MPO once per year or if needed to discuss ongoing, general compliance with all applicable federal and state transportation laws and rules and the status of individual transportation projects. Particular attention is paid to the projects funded by STBG program funds that are allocated to the various MPO areas of the state. Transition of projects from the adopted MTP to the TIP is included in the discussions. Individual projects are reviewed with respect to phasing (engineering – including environmental review and decision, right-of-way & utilities and construction) and the fiscal years that each phase is scheduled to commence, estimated costs for each phase and responsible parties. Maintaining a financially constrained TIP is critical and overriding. Occasionally, phases of projects must be adjusted from one fiscal year to another to continue financial balance.

These meetings are generally conducted between the DOTD Office of Planning staff, the respective DOTD District Administrator(s), the technical staff of the MPO and the professional staffs of the appropriate entity, when necessary. The transportation planning staff from the FHWA Louisiana

Division are usually invited to participate. At times, individual MPOs have requested less formal meetings between just the DOTD Office of Planning staff and the technical staff of the MPO. Any formal proposed revisions to a MTP or TIP must be made available for discussion through the individual MPO's Public Involvement Process, and frequently require presentation to the various committees of the MPO.

As scheduling permits representatives from DOTD Office of Planning staff attend regular MPO technical and policy committee meetings. For the majority of the MPO's, the technical committee reviews any proposals appropriate for MPO action and subsequently makes recommendations to the policy committee. The technical staff at several of the MPO's are allowed to bring proposals or recommendations to the policy committee without receiving a recommendation from the technical committee. In all MPOs, the policy committee makes the final decisions. The DOTD is represented on both committees through the Office of Planning staff and/or the DOTD District Administrator.

In full cooperation with each individual MPO, DOTD also provides assistance with periodic updates of MTPs. The frequency of plan updates is in compliance with applicable federal rules. Where necessary, MTPs are also analyzed for conformity with the federal Clean Air Act and Amendments. DOTD staff works closely with the various agencies involved with air quality conformity; the MPO, FHWA, FTA, EPA and the Louisiana Department of Environmental Quality (DEQ) as well as local entities and consultants as appropriate.

In addition to the more formal interaction between MPOs and DOTD Headquarters staff, there is also ongoing coordination and discussion between MPO technical staff and DOTD District staff. The DOTD District staff includes not only the District Administrator, but also various district staff responsible for traffic control, maintenance and construction. This continuous coordination is extremely valuable for potential project identification, feasibility and possible inclusion in the MTP and eventually the TIP. The DOTD District Administrator is a member of several internal DOTD teams that select projects for inclusion in the state transportation priority program, in all areas of the state including MPO areas.

RURAL CONSULTATION

ONGOING CONSULTATION

Throughout the year, DOTD District personnel, and to a lesser extent, Headquarters personnel, are in communication through letters, emails, phone calls and meetings with rural officials regarding needed projects and relative priorities. They regularly meet with state, parish and municipal elected officials to discuss potential projects, maintenance issues, funding, etc. The DOTD District personnel use this information when selecting and suggesting projects to the project selection teams as described in the Highway Project Selection Process section. The rural officials are also notified of the annual public hearings held throughout the state where they can provide additional input on the proposed HPP and STIP.

At this time, consultation with the Tribal governments in LA is facilitated through the FHWA Division office due to the Tribal Governments request to be approached by the federal government. However Tribal consultation will be taken under consideration as part of our Public Involvement Procedures update.

HIGHWAY PRIORITY PROGRAM/STATE TRANSPORTATION IMPROVEMENT PROGRAM

The Highway Priority Program (HPP) is the document submitted annually to the State Legislature which defines the projects which are being developed by the DOTD. The STIP contains the same projects, however, it is the document submitted to the FHWA for approval.

Currently, annual public hearings are held throughout the state to receive public input on the proposed HPP and STIP. These public hearings are held once in each of the nine DOTD Highway Districts. The hearings are usually in October or November each year. Notices of the hearings are published in newspapers in each highway district and notices are sent to state and local officials in each area including each Mayor, Parish President, Chief of Police, Sherriff, School Board Office and LA Senator and Representative. A notification is sent to the Police Jury Association of Louisiana for distribution to all their members which include officials from all areas of the state including rural areas. A notification is also sent to each Chamber of Commerce, the Coast Guard, the Army Corps of Engineers, the Native American Tribes, the FTA, FEMA Region VI, US Representatives and several statewide agencies such as the Department of Culture Recreation and Tourism, the Department of Economic Development Office of Business Development and the Inter-Tribal Council of LA, Inc., etc. The notice is also published on the DOTD website and other social media platforms.

Public input is received every year for the STIP during the annual public hearing process since the projects in the STIP are the same as the ones in the HPP. An opportunity to comment on the proposed HPP and the STIP is provided at the annual public hearings and for 45 days after the hearings. Each comment is noted during the hearing for future project selection processes and when possible DOTD responds to each comment during the hearing. Not all comments will be addressed as future projects because they are maintenance issues or the responsibility of the local government.

The preliminary HPP and STIP is available on the DOTD website at:

http://wwwsp.dotd.la.gov/Inside_LaDOTD/Divisions/Multimodal/Transportation_Planning/Highway_Priority/Pages/default.aspx

The HPP and STIP is published and copies made available directly to the following:

- Each DOTD District Office
- Each of the eight Louisiana Planning and Development Districts
- Each State Senator and Representative representing rural areas

Notices of the availability of the document is published in newspapers in each highway district as a display advertisement and on the DOTD website at:

http://wwwsp.dotd.la.gov/Inside_LaDOTD/Divisions/Multimodal/Transportation_Planning/Highway_Priority/Pages/Public_Hearing_Info.aspx

The notice includes the location where the document may be inspected, a brief description of the document, the deadline for comments and the address where comments may be mailed for consideration. The period for public review and comment will be no less than 45 days. The Legislative Public meetings are recorded so that they can be transcribed. All comments received are included in the transcript. Once completed a transcript for each hearing is made available in the appropriate Parish library. A summary of all requests is made for distribution to the District Administrators and the Program Managers to be considered for future project selection processes.

The technical and policy information used in the development of the HPP and STIP includes, but is not limited to, the following and can be accessed at the provided link.

- DOTD Bridge Design documents
http://wwwsp.dotd.la.gov/Inside_LaDOTD/Divisions/Engineering/Bridge_Design/Pages/default.aspx
- DOTD Road Design documents
http://wwwsp.dotd.la.gov/Inside_LaDOTD/Divisions/Engineering/Road_Design/Pages/default.aspx
- Engineering Directives and Standards Manual

Other technical and policy information used in the development of the HPP and STIP not listed above can be found at:

http://wwwsp.dotd.la.gov/Inside_LaDOTD/Divisions/Engineering/Pages/default.aspx

PUBLIC INVOLVEMENT PROCEDURES

An update of the Statewide Transportation Planning Public Involvement Process is overdue. DOTD will begin the process to update the procedures in coordination with FHWA and all appropriate stakeholders in FFY 2022-2023.

FEDERAL LANDS ACCESS PROGRAM

The Federal Lands Access Program (FLAP) was established in 23 U.S.C. 204 as a subcomponent of the Federal Lands Highway Program to improve transportation facilities that provide access to, or adjacent to, or are located within federal lands. The program supplements state and local resources for public roads, transit systems and other transportation facilities, with an emphasis on economic development, accessibility and mobility, environmental quality, safety and preservation.

The FLAP is funded by contract authority from the Highway Trust Fund (HTF) and subject to the overall federal-aid obligation limitation. Funds are allocated among the states that have federal lands managed by the National Park Service, the U.S. Forest Service, the U.S. Fish and Wildlife Service, the Bureau of Land Management and the U.S. Army Corps of Engineers. Funds are distributed using a statutory formula based on the following factors:

- Each state's share of total recreational visitation (30%)
- Each states share of total federal land area (5%)
- Each states share of total federal public road miles (55%)
- Each states share of total number of federal public bridges (10%)

Eligible program activities include transportation planning, research, engineering, preventative maintenance, rehabilitation, restoration, construction, adjacent vehicular parking areas, operation and maintenance of transit facilities and any transportation project eligible for assistance under title 23 that is within or adjacent to, or that provides access to federal land.

A call for projects was issued for FFYs 2023 – 2026 with an estimated total of \$4.3 million available for programming of the four years.

The TIP for projects currently programmed in Louisiana can be found at the link below. Projects are considered included in the STIP by line item L.000050 LA Public Lands Highway Program.

<https://flh.fhwa.dot.gov/programs/flpp/tip/efl.htm>.

FEDERAL LANDS TRANSPORTATION PROGRAM

The Federal Lands Transportation Program (FLTP) was established in 23 U.S.C. 203 to improve the transportation infrastructure owned and maintained by the following Federal Lands Management Agencies: National Park Service (NPS), US Fish and Wildlife Service (FWS), USDA Forest Service (USFS), Bureau of Land Management (BLM), US Army Corps of Engineers (USACE), Bureau of Reclamation (BOR) and independent Federal agencies with land and natural resource management responsibilities. The program focuses on improving Federal lands transportation facilities (FLTFs) that are located on, adjacent to, or provide access to Federal lands. The FLTFs must be owned and maintained by the Federal government and must be included in the national FLTF inventory.

By statute, the NPS, FWS and USFS receive annual allocations identified in the legislation while the Office of the Secretary of Transportation decides the allocation amounts for the BLM, BOR, USACE and eligible independent Federal agencies based on their applications.

The TIP for projects currently programmed in Louisiana can be found at the link below. Projects are considered included in the STIP by line item L.000080 Misc Federal Discretionary Projects.

<https://flh.fhwa.dot.gov/programs/flpp/tip/efl.htm>.

TRIBAL TRANSPORTATION PROGRAM

The Tribal Transportation Program (TTP) was established in 23 U.S.C. 202 as a subcomponent of the Federal Lands Highway Program to provide safe and adequate transportation and public road access to and within Indian reservations, Indian lands, and Alaska Native Village communities. A prime objective of the TTP is to contribute to the economic development, self-determination and employment of Indians and Native Americans.

TTP is funded by contract authority from the Highway Trust Fund and is subject to the overall Federal-aid obligation limitation. Funds are allocated among Tribes using a statutory formula based on tribal population, road mileage and average tribal shares of the former Tribal Transportation Allocation Methodology (TTAM) formula.

This program is jointly administered by the Bureau of Indian Affairs (BIA) and the Federal Highway Administration. The TTP TIP that is a 5 year (FFY 2020-2021 to FFY 2024-2025) plan for improvements on each reservation. The TTP TIP for projects currently programmed in Louisiana can be found at the link below. Projects are considered included in the STIP by line item L.000049 Indian Reservation Roads.

<https://highways.dot.gov/federal-lands/programs-tribal/planning/current-documents>

PROJECTS IN THE STIP

The FFY 2023-2026 STIP is developed in coordination with the Highway Priority Program (HPP) and includes the approved TIPs from the eleven MPO's in Louisiana. As stated above, projects that are programmed in the STIP reflect the outcome of the yearly process to identify project needs through DOTD's established project selection process in accordance with state laws. A copy of project maps that are developed as part of this process can be accessed at the below link. In addition, there is an ongoing effort to implement a Geographic Information System (GIS) based System of Engagement in order to, among other things, communicate project related information visually through maps. Once fully implemented, stakeholders will have the ability to access project information in near real time.

http://wwwsp.dotd.la.gov/Inside_LaDOTD/Divisions/Multimodal/Transportation_Planning/Highway_Priority/Pages/default.aspx.

As stated earlier, projects can be in the STIP by Line Item or identified individually by the project number. Our Line Items have been grouped by function and/or work type. If the scope of a project aligns with the work to be covered by that line item and the construction estimate is < \$10M and the project can be environmentally cleared with a categorical exclusion, the project can be in the STIP by Line Item.

Figure 4 depicts an example project from the STIP. Since DOTD is the sponsor of STIP projects by default, a sponsor is only identified when the project is locally sponsored. **Table 13** provides a list and description of funding categories used within the STIP project listing (**Appendix B**).

** THE SURFACE TRANSPORTATION PROGRAM (STP) WAS REPLACED BY THE SURFACE TRANSPORTATION BLOCK GRANT PROGRAM (STBG) IN THE FAST ACT. SINCE FUND ELIGIBILITIES DID NOT CHANGE, FUNDING CATEGORY DESCRIPTIONS IN THE STIP WERE NOT REVISED AS A RESULT OF THIS CHANGE.

*** OFF SYSTEM BRIDGE PROGRAM FUNDS WERE NOT ORIGINALLY PART OF THE STP; HOWEVER THIS PROGRAM WAS INCORPORATED INTO THE STBG IN THE FAST ACT.

**APPENDIX A:
JOINT CERTIFICATION OF THE METROPOLITAN
PLANNING PROCESS**

Joint Certification of the Metropolitan Transportation Planning Process

In accordance with the federal legislation, 23 Code of Federal Regulations 450.334 and the Fixing America's Surface Transportation Act (FAST-Act), the Louisiana Department of Transportation and Development (LADOTD), and the Northwest Louisiana Council of Governments (NLCOG) for the Shreveport/Bossier City urbanized area hereby certify that the transportation planning process is addressing the major issues in the Metropolitan Planning Area (MPA) and is being conducted in accordance with all applicable requirements of:

1. 23 U.S.C. 134 and 135, 49 U.S.C. 5303, and 5304, and this subpart;
2. In non-attainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506(c) and (d)) and 40 CFR part 93;
3. Title VI of the Civil Rights Act of 1964 as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
4. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
5. Section 1101(b) of the FAST-Act (Pub. L. 114-357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
6. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
7. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;
8. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
9. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities

APPENDIX C: TRANSIT PROJECTS

AS APPROVED ON NOVEMBER 21, 2022

The Transit Element of the STIP, as originally submitted on September 1, 2022, as approved and as amended can be accessed at:
http://wwwsp.dotd.la.gov/Inside_LaDOTD/Divisions/Multimodal/transit/Pages/default.aspx

APPENDIX D: PUBLIC COMMENTS RECEIVED

FROM LEGISLATIVE PUBLIC HEARINGS FOR THE
SFY 2023-2024 HIGHWAY PRIORITY PROGRAM

SORTED BY DISTRICT

Project Number	Project Name	District	Parish	Program	Comment From	Email	Comment	DOTD Response
H.002861	CAUSEWAY BLVD - EARHART EXPRESSWAY INTER	02	Orleans	DE	T Dawson	djtucker01@gmail.com	This is another project that should have been completed when the expressway was originally constructed. Not to mention, the fact that the Earhart should be extended out to the I-310 to the west and I-10 to the east thus making a loop that would improve the flow of traffic in the city. Please fund this.	Thank you for your comment. At this time, Louisiana faces an \$18.8 billion backlog of unfunded highway transportation needs that are necessary for public safety, congestion relief and preservation of the State's existing transportation infrastructure. Unfortunately, the DOTD has enough funds to only address about 5% of these needs each year while the backlog grows at a greater rate. In today's dollars, it would cost approximately \$260 million just to complete the Causeway Boulevard-Earhart Expressway Interchange project; this amounts to just over 27% of the available capital budget for the current year. While we agree that this is a worthwhile project, it is imperative for us to address all of the needs that we can on a statewide basis each year.
H.003074	I 10: WILLIAMS BLVD - VETERANS BLVD	02	Jefferson	CO	T Dawson	djtucker01@gmail.com	Please fund and complete this long awaited freeway widening. This expansion should be extended west to I-55, but I realize that is not likely to happen any time soon (50 years).	Thank you for your comment. At this time, Louisiana faces an \$18.8 billion backlog of unfunded highway transportation needs that are necessary for public safety, congestion relief and preservation of the State's existing transportation infrastructure. Unfortunately, the DOTD has enough funds to only address about 5% of these needs each year while the backlog grows at a greater rate. While we agree that this is a worthwhile project, it is imperative for us to address all of the needs that we can on a statewide basis each year.
H.003074	I 10: WILLIAMS BLVD - VETERANS BLVD	02	Jefferson	CO	Bruce Richards	brichards@nyassociates.com	This project needs to be funded, and quickly. All of the rest of the I-10 widening project in East Jefferson has either been completed or construction is underway, but this segment remains undone, causing a major bottleneck on I-10 in both directions, as sections have been widened on either side of this last segment.	Thank you for your comment. At this time, Louisiana faces an \$18.8 billion backlog of unfunded highway transportation needs that are necessary for public safety, congestion relief and preservation of the State's existing transportation infrastructure. Unfortunately, the DOTD has enough funds to only address about 5% of these needs each year while the backlog grows at a greater rate. While we agree that this is a worthwhile project, it is imperative for us to address all of the needs that we can on a statewide basis each year.
H.014752	LA 3021: DUAL TURN LANES @ LA 39	02	Jefferson	OE TS	Philip Kiefer	philipjkiefer@gmail.com	Elysian Fields and Claiborne are both historically deadly corridors, and any project at this intersection needs to consider safety of bicyclists and pedestrians, not just motorist efficiency.	DOTD design guidelines include Complete Streets standards for bicycle and pedestrian accommodations in future project designs.
H.011969	LA 1264: IHNC MB REHAB (TED HICKEY)	02	Orleans	PR BR	Clark Thompson	clarkthompson@gmail.com	The lanes of this bridge are entirely inappropriate width For the designated 35 mph speed limit. This bridge will need less preservation if vehicles operate at a lower speed. It needs a road diet, pylons, and a mixed use bike/pedestrian lane on each side	Lane use/traffic operation changes are outside the scope of this project. The project scope is to correct structural deficiencies, update/upgrade mechanical and electrical systems, and renovate the operator house. The Senator Ted Hickey Bridge along with Danziger Bridge provide alternate routes to cross the Industrial Canal when incidents on the I-10 Highrise Bridge slow traffic. Further investigation on the feasibility of implementing a road diet across the Senator Ted Hickey Bridge would be needed to determine potential traffic impacts on the surrounding roadway network. We appreciate the attention all interested parties put forth during the public comment period and look to enhance roadways whenever possible and safe. We look forward to working with you on future projects to achieve an infrastructure system that benefits the general public as a whole.
H.013364	CITY PARK PALM DRIVE SIDEWALKS (NO)	02	Orleans	EN	Philip Kiefer	philipjkiefer@gmail.com	This is great! I walk and run through here all the time, and would love to not have to dodge cars or run through mud.	Thank you for your comment.

H.014330	ST. CHARLES AVE: NAPOLEON TO NASHVILLE	02	Orleans	US	Philip Kiefer	philipjkiefer@gmail.com	This project shouldn't go forward without significant safety improvements made to St. Charles, including traffic calming and shortened crossing distances for pedestrians. A woman was killed by a speeding driver while walking her dog just a few blocks from this corridor. I know multiple people who have been hit by cars while biking this corridor. Given the volume of pedestrian and bike traffic, St. Charles should be a priority for parking-protected bike lanes, crosswalk bumpouts to facilitate safer crossing for pedestrians, and potentially sidewalk-grade crosswalks as well to slow car traffic. Quit letting people die on your watch.	We will consider your comments during the design process. This project scope includes removal and replacement of ADA ramps, curb modifications, and additional crosswalks. The scope of this project is also to bring this segment of St. Charles Avenue in compliance with DOTD's Complete Streets policy, which requires safe accommodations for pedestrians and bicyclists.
H.014752	LA 3021: DUAL TURN LANES @ LA 39	02	Orleans	OE TS	Clark Thompson	clarkthompson@gmail.com	This is an extremely dangerous intersection for pedestrians and cyclists. While doing this essential road work, it is the appropriate time to take steps to make this a safer pedestrian crossing and safe for Thruway for bicycles.	DOTD design guidelines include Complete Streets standards for bicycle and pedestrian accommodations in future project designs.
H.014886	US 90: TULANE AVE - DANZIGER BR	02	Orleans	PR NH	Greta Cappelmann	gretacapp@gmail.com	I would like to see a continuation of the bike lane that is present from Bienville St. to St. Bernard Ave. on Broad Street, across the whole outlined section, along with increased road signage. The money saved from not re-structuring the road into a parking-protected lane (which I don't think is realistic due to sight lines, presence of drive-ways, trash cans present on curbs, etc) can be used to fund maintenance (ie. regular cleaning of the bike lane with a street sweeper, upkeep of signs, etc).	The current scope of this project is to restore the pavement condition of US 90 from Tulane Ave. to the Danzinger Bridge. The funds being used for this particular project are not eligible for maintenance of the bike lanes, upkeep of signs, etc. However, restriping the roadway to provide continuous bike lanes has been discussed as possibly being added to the scope of this project, provided the necessary funds are available and it is feasible based on collected data.
H.014886	US 90: TULANE AVE - DANZIGER BR	02	Orleans	PR NH	Philip Kiefer	philipjkiefer@gmail.com	There is no reason for you to be redoing this street WITHOUT also adding parking protected bike lanes that connect to the Broad Street Bridge overpass. NHTSA data is broken so I can't pull a report on how many people have died in this stretch over the last 5 years, but Broad is an incredibly dangerous road for people on foot and bike, and needs traffic calming and separation as soon as possible to stop more people from dying.	The current scope of this project is to restore the pavement condition of US 90 from Tulane Ave. to the Danzinger Bridge. Reconfiguring the striping for the parking lanes and bike lanes is outside the scope of this project, but it has been discussed as possibly being added, provided the necessary funds are available and it is feasible based on collected data.
H.014886	US 90: TULANE AVE - DANZIGER BR	02	Orleans	PR NH	Philip Kiefer	philipjkiefer@gmail.com	There is no reason for you to be redoing this street WITHOUT also adding parking protected bike lanes that connect to the Broad Street Bridge overpass. H.014886	US 90: TULANE AVE - DANZIGER BR	02	Orleans	PR NH	Clark Thompson	clarkthompson@gmail.com	This street needs parking protected bike lanes. White paint does nothing to prevent injury or death.	The current scope of this project is to restore the pavement condition of US 90 from Tulane Ave. to the Danzinger Bridge. Reconfiguring the parking lanes and bike lanes is outside the scope of this project, but it has been discussed as possibly being added, provided the necessary funds are available, and it is feasible based on collected data.

Project Number	Project Name	District	Parish	Program	Comment From	Email	Comment	DOTD Response
H.014886	US 90: TULANE AVE - DANZIGER BR	02	Orleans	PR NH	Samuel Fick	Samfick@gmail.com	Please perform a "road diet" on Broad Street by dropping it from three car travel lanes down to two. The extra space from removing a lane could be used as a protected bike / bus lane. This is a hugely important corridor for people traveling by bus or by foot but it is also extremely dangerous because the road design allows for speeding and other dangerous actions by people in cars.	The current scope of this project is to restore the pavement condition of US 90 from Tulane Ave. to the Danziger Bridge. The funds being used for this project are not typically eligible for a road diet, however it has been discussed. If the proper funding becomes available, and a need is warranted based on collected data, a road diet may be added to the scope of work for this project from Tulane Ave. to Canal St.
H.015198	S. CARROLLTON AVE PED & BIKE IMPR (NO)	02	Orleans	SA PP	Philip Kiefer	philipjkiefer@gmail.com	This project should be prioritized for safety and connectivity through a commercial corridor. Currently, there's no safe way to walk or bike between Mid-City and the Carrollton corridor uptown, because doing so requires navigating multiple uncontrolled, low-visibility highway on and off ramps. Drivers are also often in conflict, particularly when headed southbound on Carrollton and turning left onto the highway eastbound.	The City of New Orleans submitted an application for the Safe Routes to Public Places (SRTPP) program to address the pedestrian/bicyclists/transit concerns within the project limits of South Carrollton Avenue from Palmetto Street/Washington Street to Tulane Avenue/Airline Highway, approximately 0.3 miles in length. We are currently in the feasibility stage of the process where the project will be evaluated to determine if the proposed improvements in the application can be constructed, as well as any other appropriate countermeasures. Once this evaluation is complete, the findings will be presented to both DOTD and the City of New Orleans. If both parties agree to the refined scope, the project will move forward with design. Your comment will be passed to the Consultant handling the Feasibility Study for their consideration during the feasibility study.
H.015198	S. CARROLLTON AVE PED & BIKE IMPR (NO)	02	Orleans	SA PP	Greta Cappelmann	gretacapp@gmail.com	I would like to see a bike lane implemented similar to that which can be seen on Carrollton Ave below Claiborne, all along Carrollton Avenue, from St. Charles to City Park, along with increased road signage. The money saved from not re-structuring the road into a parking-protected lane (which I don't think is realistic due to sight lines, presence of drive-ways, trash cans present on curbs, etc) can be used to fund maintenance (ie. asphalt maintenance, regular cleaning of the bike lane with a street sweeper, upkeep of signs, etc).	The City of New Orleans submitted an application for the Safe Routes to Public Places (SRTPP) program to address the pedestrian/bicyclists/transit concerns within the project limits of South Carrollton Avenue from Palmetto Street/Washington Street to Tulane Avenue/Airline Highway, approximately 0.3 miles in length. We are currently in the feasibility stage of the process where the project will be evaluated to determine if the proposed improvements in the application can be constructed, as well as any other appropriate countermeasures. Once this evaluation is complete, the findings will be presented to both DOTD and the City of New Orleans. If both parties agree to the refined scope, the project will move forward with design. H.015316	I-10: US 90 BUS. TO ELYSIAN FIELDS (NO)	02	Orleans	OT	T Dawson	djtucker01@gmail.com	This section of I-10 is long over due for a total reconstruction and expansion. I know this goes against what a few people want to do (removal of the freeway). Removing this vital section of i-10 will permanently damage the already fragile economy of New Orleans and once again show that the city is not interested in upgrading the roads and freeways like successful cities do. This is an important part of the roadway network in New Orleans not a useles spur or loop that other cities have removed but have received false praise over their forward thinking of removing a freeway. If this was any other city in America, it would have been torn down and expanded to keep up with the traffic it is experiencing. The few people who want to permanently remove this freeway are just wanting to remove it because they care for themselves only and not the public as a whole.	Thank you for your interest in this project. H.015316 I-10: US 90 BUS. TO ELYSIAN FIELDS (NO) does not involve the removal of the referenced section of I-10. The project consist of three (3) elements: 1) the rehabilitation of that section of I-10; 2) the enhancement of the area under the elevated freeway to better accommodate all users, including bicyclists and pedestrians; and 3) the potential removal of entrance/exit ramps along that section of the freeway, subject to further review. This project was the subject of a Federal discretionary grant application, and as such its implementation is currently dependent on award of grant funds.
H.014887	LA 3173: LA 105 - LA 3174	03	Lafayette	PR NF	KEITH ARDOIN	ardoin4@bellsouth.net	Critical NEED. This road has been in need of an overlay for 30 years. This road has truck traffic 24/7 going to Delek Refinery. I live on this road, major cracks and potholes.	Thank you for your comment. This project is scheduled to LET in SFY 2023-2024.
H.011243	I-49 INTERCHANGE IMP. AT US 190 & LA 31	03	St. Landry	SA	John N. Harper	johnh4@cox.net	I may not be reading this correctly, but there needs be improvements made for southbound I-49 traffic to exit at 190 east. It is a dangerous intersection, especially when it takes longer for a tractor-trailers to safely cross 190. It also backs up traffic on exit 19, which is dangerous as well. Perhaps a flyover from I-49 south onto US 190 east.	Thank you for your comment. The feasibility study completed under H.011243 - 49 INTERCHANGE IMP. AT US 190 & LA 31 has identified some intersection improvements that will be completed under H.000445 - US 190: UPRR OVERPASS NEAR OPELOUSAS which include installing a traffic signal at the I-49 SB exit ramp and US 190 and converting the I-49 West Frontage Road intersection at US 190 to a RCUT intersection.
H.011358	US 190 (VINE STREET) RECONSTRUCTION	03	St. Landry	OT	John N. Harper	johnh4@cox.net	This is a terrible stretch of highway. Not only does it need to widen, but the main culprits are the water lines underneath the roadway. They need to be moved and a comprehensive road rebuild.	Utility relocations are being considered during the environmental process.

H.013203	US 90: LA 318 - LA 83	03	St.Landry	PR NH	Wayne Bodin	Wayne.Bodin@lusfiber.net	US Hwy 90 from Hwy 85 Patouville exit to Hwy 318 is in much worse condition than the plan repair on 318 to 83. Would like to know what criteria was use to justify not reconstructing Hwy 90 from 85 to 318?	US 90/Future I-49 South is a priority and the Department is investing in improvements along the corridor because we understand its importance to the communities and traveling public. Most sections need complete reconstruction, other sections need to be widened and reconstructed, with overpasses being widened also. These improvements require large investments in the infrastructure and will be programmed as funding becomes available.
H.014766	LA 10: LITTLE WAUKSHA BR - US 71	03	St. Landry	PR NS	Cathy Alexander	Cpagebakerlafire@gmail.com	This road needs URGENT attention.	Thank you for your comment. This project is scheduled to LET in SFY 2023-2024.
H.015308	I-49: PONT DES MOUTON - ST LANDRY P/L	03	St.Mary	PR I	Brian Blanchard	Jesusfreak1969@gmail.com	I feel that I-49 North should be widened from 2 lanes to 3 lanes from the Pont Des Mouton exit to Gloria Switch Rd. exit or even Exit 4 to alleviate traffic congestion coming out of Lafayette.	The referenced project is being designed to address immediate concerns with the pavement condition and distressed joints. DOTD is aware of the traffic conditions along I-49 and each year we are evaluating those conditions to determine the need for future projects to make infrastructure improvements, including increasing capacity, along the interstate. DOTD is making large investments in improving the US 90/I-49 corridor because we understand its importance to the communities and traveling public.
H.001724	SHREVEPORT-BLANCHARD HWY.	04	Caddo	CA	Joshua	Dip9951sip@gmail.com	As someone who has lived in the Lakewood community for over 20 years, I can say that the traffic on this road has more than doubled. The merge from under the KCS underpass onto Hillary Huckaby has gotten more and more dangerous over the years. The extension of the merge lane has been problematic, as people still stop far back because of the traffic and only having one lane to merge into, when people turn into the gas station, people on hillary huckaby fly around the turning people by using the extended merging lane, sometime almost hitting people merging. This traffic and dangerous traffic situation could be solved by 4 laning this hwy immediately.	Currently, there is no funding available for this project.
H.010341	LA 115: LA 1207 - LA 28	04	Rapides	PR NS	Craig smith	craigsmithrppj@gmail.com	very much needed	Thank you for your comment.

H.009932	US 80: VANCIL ROAD - WELL ROAD	05	Ouachita	CA	Brad Cammack	bncammack@gmail.com	This project does not extend far enough. You should not do projects H.014500 or H.014851 until you extend 4 lanes to HWY 15. Well Road is about to be so congested that a lot of traffic will opt to go to HWY 15 to get to I-20. The 4 lane widening project needs to go past Westridge Middle School all the way to HWY 15 (Cheniere Drew Road).	The project limits were established very early on in the Environmental Assessment process; however, this topic has been discussed numerous times throughout the National Environmental Policy Act process. As with all projects, the scope of work is a function of the available funding. Currently, this project does not have the necessary funding to move into the next phase of project development. Any change to add to the project limits would require even more funding and further delay the project from becoming a reality. Also, the Environmental Assessment process would need to be started again to include the new limits and proposed design impacts. This project is being funded through the Capacity Program. Both of the projects mentioned in your comment (H.014500 and H.014851) are funded with Pavement Preservation funding; therefore any funds generated by cancelling or delaying them to future fiscal years still could not be used to fund this project.
H.014500	LA 15: US 80 - LA 616	05	Ouachita	PR NS	Brad Cammack	bncammack@gmail.com	This project should not move forward until the widening of HWY 80 is extended to HWY 15. Well Road is going to be congested, and in my opinion 4 lanes on HWY 80 to HWY 15 makes more sense than repaving a decent road.	The current scope of this project, H.014500, is to restore the pavement condition of LA 15 from US 80 to LA 616. The funds being used for H.014500 are not eligible for widening a section of US 80.
H.014077	LA 17: RICHLAND P/L – 1.5 MI N DARNELL	05	West Carroll	PR NS	David Acreman	dacreman@att.net	I have lived on Hwy 17 for 45 years. The entire route has only been overlaid 1 time. This 1.5 mi project is a slap in the face for people who travel this road on a daily basis. The Northern section that was re-worked this year was not a priority compared to the Southern section with the worst bumps, cracks, and patchwork. Please repair the WHOLE ROUTE from Oak Grove to Delhi!!	First, we appreciate your comments and taking the time to voice your concerns regarding LA 17. You are correct. In 2022, LA 17 was rehabilitated from the Arkansas state line to Gaddis Street just north of the town of Oak Grove. The project limits encompassed a total of 10.41 miles of roadway work. The project you specifically referenced, SP H.014077, encompasses 8.29 miles of roadway rehabilitation work from the Richland Parish line to 1.5 miles north of the town of Darnell. The project LET for bids on February 8, 2023 and a construction contract was awarded. Another project on LA 17, SP H.014498, is scheduled to LET in SFY 2023-2024. This project encompasses 12.49 miles of roadway rehabilitation work from 1.5 miles north of the town of Darnell to Gaddis Street just north of the town of Oak Grove. After the completion of construction of these two projects mentioned, all of LA 17 will have been rehabilitated within West Carroll Parish for a total of 31.19 miles. It is also worth mentioning another project on LA 17, SP H.014789, is scheduled to LET for bids in SFY 2024-2025. This project is located in Richland Parish and encompasses 2.38 miles of roadway rehabilitation work from Rundell Loop to the Franklin Parish line. As is apparent by all of the projects mentioned above, DOTD has put a priority on LA 17 in this District and committed a majority of the District's Pavement Preservation budget to rehabilitating it to a standard the travelling public expects.

H.004100	I-10: LA 415 TO ESSEN ON I-10 AND I-12	61	EBR	NHPP	Phillip Lillard	pslillard@juno.com	The entire I-10 La 415 to Essen project needs to be reviewed again and a simpler and less expensive plan adopted. The current CMAR construction procedure needs to be reviewed by the LA Legislature, and the current plan to limit I-10 to one travel lane in each direction at the MS River bridge for about 14 months needs to be stopped. It also appears that I-110 going south at the MS River bridge would also be limited to one travel lane which will negatively affect traffic coming from North Baton Rouge. The project as now planned will create a gigantic mess for traffic for interstate, intrastate and local traffic, and will have a negative affect on the Baton Rouge economy and the national economy. The project needs to be revised before the entrance ramp into Baton Rouge at the MS River bridge is demolished. Also the cost estimate and time estimate for the ENTIRE construction needs to be updated, and the source of funding needs to be identified for the entire project. It appears that the entire project is now not scheduled to be completed until year 2038. The DOTD does not seem to want to discuss that construction time estimate in their conversations about this project.	Please refer to I10BR.com website for detailed information regarding the project. The website contains a link to Federally approved Environmental Assessment (FONSI), project information, a project area map, the Segment 01 construction schedule, public outreach exhibits, project briefing presentations, press releases, and much more.
H.004100	I-10: LA 415 TO ESSEN ON I-10 AND I-12	61	EBR	NHPP	Lloyd Allen	scubaumc03@yahoo.com	Agree we need the capacity increase and replacement of aging structures but cutting I 10 down to 1 lane in each direction is the stupidest thing I've heard come out of DOTD. Don't you see how bad the traffic is already? You never start or finish on time so we are all left with the mess. Get creative, find other ways even if it comes at a higher cost. Don't shut down the capital of our state. Should've built a loop decades ago to solve this issue. What have you been doing instead?	Please refer to I10BR.com website for detailed information regarding the project. The website contains a link to Federally approved Environmental Assessment (FONSI), project information, a project area map, the Segment 01 construction schedule, public outreach exhibits, project briefing presentations, press releases, and much more.
H.009300	HOOPER ROAD WIDENING (LA 3034 - LA 37)	61	EBR	CA	Ryan McNabb	rpmb@yaho.com	Good project. But a bridge connecting it to Watson would be even better and make it a more useful connector.	The scope of H.009300 is only to widen the existing portion of Hooper Rd. between LA 3034 (Sullivan Rd.) to LA 37 (Greenwell Springs Rd.). The extension of Hooper Rd. to LA 16 in Watson is being developed under another project.
H.012449	WARDS CREEK TRAIL - PECUE EXTENSION	61	EBR	RP	Reginal	RBrumfield80@gmail.com	Safety at these crossings is paramount	Thank you for your comment.
H.012563	LA 73: BAYOU MANCHAC BRIDGE (HBI)	61	EBR ASCENSION	PR BR	Lanny Bergeron	lmb1537@aim.com	Are these green lines correct? Will this be a rebuild or restoration?	After looking at the map provided, the green lines are referring to H.014088 US 61: INT. IMPROVEMENTS AT LA 427 , which was scheduled to LET in SFY 2022-2023, hence the green lines, but now requires a traffic study and will not LET until SFY 2023-2024. H.012563 LA 73: BAYOU MANCHAC BRIDGE (HBI) is in Stage 0 - Feasibility/Scoping which is represented by a red dot and is a bridge replacement/rehabilitation project.
H.014128	US 190: UPASS US 61 - LIVINGSTON P/L	61	EBR	PR NH	Patrick Prine	patrick.prine89@gmail.com	The turn lanes and intersection at US-190 and Ponderosa is delapidated. Most people stay on the roadway till right before the turn causing traffic flow problems and safety concerns. This is a very busy intersection.	Thank you. Your concerns are noted. This intersection is included in the corridor improvements.

H.014919	WAX ROAD EXT.: LA 408 TO LA 3034	61	EBR	OT	Ryan McNabb	rpmbr@yahoo.com	I think this is an excellent project that will help with interconnectivity in the City of Central.	Thank you for your comment.
H.015142	PLANCHET ROAD IMPROVEMENTS	61	EBR	US	Michelle Dearie	michelle.dearie@gmail.com	Planchet is our ONLY way out when Frenchtown Road bridge has to be rebuilt	We will incorporate these comments into the design process and coordinate with the Frenchtown Road Bridge project.
H.013196	US 190: 0.5 MI W OF LA 978 - LA 976	61	Pointe Coupee	PR NH	Cathy Alexander	Cpagebakerlafire@gmail.com	Again, 190 needs urgent attention.. major road for diverting from I10, major evacuation route... it is tearing up our vehicles !	Thank you for your comment. This project is scheduled to LET in SFY 2022-2023.
H.014086	US 61: ST. JOHN PL - ASCENSION PL	61	St. James	PR OE SA	Chad Weidert	cweidert3@cox.net	A great project. Especially the shoulders of both the North and South bound lanes are deteriorating really bad. Huge hazard as I've seen bicyclists trying to ride in this area and it is extremely challenging to traverse.	Thank you for your comment.
H.014416	LA 3125 @ LA 3274 ROUNDABOUT	61	St. James	OT	Chad Weidert	cweidert3@cox.net	I entered comments about the roundabout a few weeks ago but didn't see any sort of response nor email reply. Maybe I'm not entering the information correctly? I'll try again. My comments has to do with why not install right turn bypasses on each inlet/outlet of the roundabout reducing the amount of traffic entering the circle? Also, why are the right turn bypasses on the North side of the roundabout instead of the South side as traffic seems to be heavier on the South. Thanks, Chad	Bypass lanes are typically not included for a roundabout unless it is warranted by the traffic engineering analysis report. The traffic data that was collected included turning movements by type of vehicle for each approach during the morning and afternoon peak periods. This data was also projected 20 years into the future to analyze the roundabout's future performance. The analysis for a single-lane roundabout indicated that the north leg (LA 3274) and the east leg (LA 3125) would not perform as well with only a single-leg approach. Bypass lanes were included for those two legs to increase the roundabout's overall performance. The other approaches on the west side (LA 3125) and the south side (LA 3274) performed well with a normal single-leg approach and did not require a bypass lane.
H.014416	LA 3125 @ LA 3274 ROUNDABOUT	61	St. James	OT	Chad Weidert	Cweidert3@cox.net	Noticed that the right turn bypasses are located on the North side of the roundabout. Why not all sides or the South side having right turn bypasses? My experience with this area of highway lends me to believe that most traffic using right turns are on the South side with the North side having fewer right turns. I live less than 200 feet from the proposed roundabout for more than 27 years and enter this area multiple times a day.	Bypass lanes are typically not included for a roundabout unless it is warranted by the traffic engineering analysis report. The traffic data that was collected included turning movements by type of vehicle for each approach during the morning and afternoon peak periods. This data was also projected 20 years into the future to analyze the roundabout's future performance. The analysis for a single-lane roundabout indicated that the north leg (LA 3274) and the east leg (LA 3125) would not perform as well with only a single-leg approach. Bypass lanes were included for those two legs to increase the roundabout's overall performance. The other approaches on the west side (LA 3125) and the south side (LA 3274) performed well with a normal single-leg approach and did not require a bypass lane.
H.012348	LA 1026: ROUNDABOUT @ EDEN CHURCH ROAD	62	Livingston	OE AM	Trent Barnett	trentbarnett@gmail.com	So needed!	Thank you for your comment.
H.000688	US 11 NORFOLK SOUTHERN RR OVERPASS (HBI)	62	St. Tammany	PR BR US	Philip Grigsby	grigsbyphil@hotmail.com	This bridge is very narrow and traffic backs up during peak times. A new and wider bridge would also allow for the rest of US 11 to be widened between Gause and I-12.	The existing bridge has two 12-foot lanes and no shoulders. Phase 1, which is fully funded, will replace the existing bridge with a new 2-lane structure with 12-foot lanes and 8-ft outside shoulders. Phase 2, which currently has no funding identified, would widen the bridge to four lanes and provide two additional travel lanes between I-12 and Gause Blvd.

H.002397	PETE'S HWY(LA 16)INTERCHANGE @ I-12	62	Livingston	DE	Trent Barnett	trentbarnett@gmail.com	Even a partial interchange (1 entrance, 1 exit) would alleviate traffic issues at Denham Springs off-ramp drastically - backs up onto interstate all times of day, and Range Ave has far too much traffic volume, people trying to access the interstate becomes a choke point	Thank you for your comment. The project is currently in the environmental assessment stage. The intent of this project is to relieve congestion at the Range Ave and I-12 interchange. The NEPA document considered a new interchange at LA 16 and I-12 to facilitate improvements in traffic flow at the LA 3002 (Range Ave) and I-12 interchange and traffic flow on or around Range or I-12. The preferred alternate was determined to be corridor improvements at and around the LA 3002 and I-12 interchange with phased implementation. Once the environmental document is finalized and the scope is set, the project name will be changed to better reflect the work to be completed.
H.010387	U.S. 90: LA 433 - U.S. 190	62	St. Tammany	PR NS	Blake	Captainsvfreedom@gmail.com	Re open old 90 2025 is unacceptable i10 bridge over pearl River is un acceptable..its on fire and backed up everywhere day needed to be 4 lanes its 2	The current scope of this project, H.010387, is to restore the pavement condition of US 90 from LA 433 to US 190.
H.012573	LA 1026: LA 16 - FORREST DELATTE RD.	62	Livingston	PR NS	James Jones	contractor@cox.net	Juban Road is overdue and in poor condition. However, it would be better to finish the north end of Juban before tackling another project. If you can't finish one don't start another. Looks like the contractor has defaulted. Replace the contractor and get finished.	The scope of this project, H.012573, is to preserve the roadway and restore the pavement condition of LA 1026 from LA 16 to Forrest Delatte Rd.
H.013737	LA 41: LA 41 SPUR - LA 36	62	St. Tammany	PR NS	Cody English	05-traffic-masters@icloud.com	This should be top priority, as this pavement is getting to be very rough. A roundabout at LA41 and LA36 should also be considered as that is a dangerous intersection at rush hours of the day.	The current scope of this project, H.013737, is to restore the pavement condition of LA 41 from LA 41 SPUR to LA 36. The funds being used for H.013737 are not eligible for a roundabout. However, we will reach out to our Safety section to make them aware of the suggestion.

LA DOTD Highway Priority Program FY 2023-2024					Jason Dobbins	Jason.dobbins@outlook.com	Focus on I-20 in Bossier City! Expand to 6 lanes. Other priority projects should be I-49 and I-69. Expand Hwy 157 between Haughton and Fillmore	Thank you for your comment. Your comment will be distributed to the appropriate District Administrators and Program Managers for consideration in the next project selection process. At this time, Louisiana faces an \$18.8 billion backlog of unfunded highway transportation needs that are necessary for public safety, congestion relief and preservation of the State's existing transportation infrastructure. Unfortunately, the DOTD has enough funds to only address about 5% of these needs each year while the backlog grows at a greater rate. It is imperative for us to address all of the needs that we can on a statewide basis each year.
LA DOTD Highway Priority Program FY 2023-2024					Dana Schiele	Dana@deepsouthiron.com	Please take a look at Hammack Rd. where it meets Highway 16 in Denham Springs. This is an extremely dangerous intersection, compounded by the fact that recent roadwork has left the intersection in disrepair. Also, there is a new subdivision nearby which is only going to exacerbate the problem. Thanks!	Thank you for your comment. Your comment will be distributed to the appropriate District Administrators and Program Managers for consideration in the next project selection process.
H.011565					JK	a@a.com	op	
LA DOTD Highway Priority Program FY 2023-2024					Eboni Rose	ebonit@hotmail.com	I want to know if my home will flood in the future	Thank you for your comment. More information would be needed in order to address your comment.
LA DOTD Highway Priority Program FY 2023-2024					Barry J Hebert	barry_hebert@yahoo.com	Please consider addressing the 5B Metro Airport exit as part of this plan. I was recently in an accident in the left lane because the exit backs up and folks in the middle lane will stop to exit last minute.	Thank you for your comment. More information such as the project name or project number would be required in order to address your comment.
LA DOTD Highway Priority Program FY 2023-2024					Lori Whatley	lori.whatley@la.gov	This is a heavily traveled road for 18 wheelers and motorists traveling to/from Shreveport for work that desperately needs to be completed as soon as possible.	Thank you for your comment. More information such as the project name, project number or route and Parish you are referring to would be required in order to address your comment.
LA DOTD Highway Priority Program FY 2023-2024					Lori Whatley	lori.whatley@la.gov	Please make sure this highway will hold up to the future traffic that is expected in the next few years.	Thank you for your comment. More information such as the project name, project number or route and Parish you are referring to would be required in order to address your comment.

APPENDIX E:
FEDERAL DISCRETIONARY PROJECTS FROM FEDERAL
LEGISLATION WITH LOCAL PUBLIC AGENCIES AS DIRECT
RECIPIENT FROM FHWA/USDOT

UPDATED SEPTEMBER 2025

Louisiana US DOT-FHWA IIJA Competitive Projects-Summary as of July 2025

Program Name	Award Year	US DOT Award Type	Delivery Phase Included	Amount Awarded	Total Project Cost	Non-State Direct Recp.	Sponsor Name	Project #	Project Name	Project Description	Location/MPO Area
National Scenic Byways (NSBP)	FY 22	Construction	Construction	\$113,160.00	\$113,160.00	no	LADOTD	H.015960	Public Restroom at Holly Beach on the Creole Nature Trail	To purchase and install a pre-cast concrete restroom facility.	Rural
Reduction of Truck Emissions at Port Facilities (RTEPF)	FY 23	Technology	Procurement	\$7,117,567.00	\$8,909,123.00	yes	Port of New Orleans	TBD	Electric Pilot for Port NOLA & Terminal Fleets	The Port of New Orleans and its partners, BP Pulse, Entergy New Orleans (Entergy), New Orleans Terminal (NOT), Ports America Louisiana (PAL), Urban League of Louisiana (ULL), and Nunez Community College (NCC) are requesting funding to upgrade electrical infrastructure, purchase 14 heavy-duty (HD) all-electric terminal trucks and five light-duty (LD) all-electric pickup trucks, track emissions and energy use, and evaluate new emissions-reducing equipment. Funding will additionally support workforce development through partnerships with NCC and ULL.	New Orleans
Bridge Investment Program (BIP)	FY 22	Planning	Planning	\$60,000.00	\$92,462.36	no	LADOTD	H.015616	Replacement of Old LA 182 over Lafourche Bayou Planning	The feasibility planning study to determine potential alternatives to replace a bridge in Lafourche Parish.	Houma
Rural Surface Transportation Grant (RURAL)	FY 22	Construction	NEPA/Design/Construction	\$25,000,000.00	\$52,000,000.00	no	LADOTD	H.015425	Louisiana DOTD Ferry Design & Construction	The project will design and construct two ferry boats. One ferry boat will provide continued access across the Mississippi River between Highway 23 and Highway 39 at Pointe a la Hache, and between Belle Chasse and Scarsdale in Plaquemines Parish.	New Orleans
Multimodal Project Discretionary Grant Opportunity (MEGA)	FY 22	Construction	NEPA/Design/Construction	\$150,000,000.00	\$153,000,000.00	no	LADOTD	H.003931	I-10 Calcasieu River Bridge Replacement	This project will replace the I-10 Bridge to increase capacity. The new bridge will be wider, with six lanes, shoulders and center barriers, a lower approach incline, increased overhead clearance, and improved interchanges.	Lake Charles

Louisiana US DOT-FHWA IIJA Competitive Projects-Summary as of July 2025

Program Name	Award Year	US DOT Award Type	Delivery Phase Included	Amount Awarded	Total Project Cost	Non-State Direct Recp.	Sponsor Name	Project #	Project Name	Project Description	Location/MPO Area
Multimodal Project Discretionary Grant Opportunity (INFRA)	FY 22	Construction	NEPA/Design/Construction	\$59,619,429.00	\$99,365,715.00	no	City of Baton Rouge	TBD	North Baton Rouge Mobility Projects	This project has three components: 1) The Airline Highway North Expansion will improve a five-mile segment of U.S. Route 190 by adding a lane in each direction, improving turn lanes, and adding connections to local transit, bike, and pedestrian networks; 2) The Florida Boulevard component will make pedestrian and bus improvements, and establishes BRT infrastructure along approximately six miles of Business U.S. Route 90. 3) The Scotlandville Parkway Mobility Network will convert an existing trail to a new, linear, multimodal pathway.	Baton Rouge
Multimodal Project Discretionary Grant Opportunity (INFRA)	FY 25	Construction	NEPA/Design/Construction	\$22,595,853.00	\$81,033,402.56	no	Caddo-Bossier Parishes Port Commission	TBD	Port of Caddo-Bossier I-69 Connector	The project will connect I-49 to the future I-69 Corridor Project Frontage Road by upgrading and extending Stonewall Frierson Road. Improvements to Stonewall Frierson Road would include a Restricted Crossing U-Turn (RCUT) intersection for peak operations of the northbound off-ramp and two 12-foot travel lanes with 8-foot shoulders. Ellerbe Road will also connect the I-69 Corridor Project Frontage Road segment by upgrading and extending Robson Road. In addition to extending Robson Road, this project will replace two bridges (on the existing Robson Road) and construct one new bridge (on the new Robson Road Extension).	Shreveport-Bossier
Rebuilding American Infrastructure with Sustainability and Equity (RAISE)	FY 24	Planning	Planning	\$7,363,098.00	\$7,363,098.00	no	Plaquemines Port Harbor & Terminal District	TBD	Peters Road Bridge Extension	This project will fund the preliminary design activities including Environmental Assessment and right-of-way mapping for Peters Road Bridge and Extension, Phase III. The project to be planned will extend Peters Road from the southern boundary line of Jefferson Parish south to LA 23 in Plaquemines Parish and includes a new bridge over the Gulf Intracoastal Waterway.	New Orleans

Louisiana US DOT-FHWA IIJA Competitive Projects-Summary as of July 2025

Program Name	Award Year	US DOT Award Type	Delivery Phase Included	Amount Awarded	Total Project Cost	Non-State Direct Recp.	Sponsor Name	Project #	Project Name	Project Description	Location/MPO Area
Rebuilding American Infrastructure with Sustainability and Equity (RAISE)	FY 24	Planning	Planning	\$328,000.00	\$328,000.00	yes	Lafourche Parish	TBD	Resiliency Plan for LA Hwy 1	This project will fund the development of a comprehensive resiliency plan for approximately 7-miles of LA Hwy 1 along the Gulf of Mexico from Port Fourchon to the parish border at Thunder Bayou. The plan will consider risk management through traditional and nature-based solutions, flood protection measures, evacuation route planning, climate change predictions, as well as conduct stakeholder and public outreach.	Rural
Rebuilding American Infrastructure with Sustainability and Equity (RAISE)	FY 22	Planning	Planning	\$2,450,000.00	\$2,450,000.00	yes	City of Slidell	TBD	Bayou Patassat Green Corridor Project - Phase II	The project will include planning, feasibility, and design activities. This project will ultimately design an interconnected network of facilities within four study areas of the Olde Towne Slidell Waterfront Masterplan. These include ADA accessible sidewalks/crosswalks, new bicycle and pedestrian paths, a boardwalk design along Bayou Bonfouca, consolidated parking along the corridor, waterway transport options, and micro-transit options.	New Orleans
Rebuilding American Infrastructure with Sustainability and Equity (RAISE)	FY 22	Construction	NEPA/Design/Construction	\$17,253,272.00	\$17,253,272.00	no	City of Natchitoches	H.015580	Natchitoches Safe Streets Revitalization Project	This project will rehabilitate the Texas Street Business Corridor from the Highway 1 South Bypass to Washington Street. This will include rehabilitation of roads and drainage facilities, new pavement, new and widened sidewalks, walking paths, and dedicated bike and pedestrian lanes.	Rural

Louisiana US DOT-FHWA IIJA Competitive Projects-Summary as of July 2025

Program Name	Award Year	US DOT Award Type	Delivery Phase Included	Amount Awarded	Total Project Cost	Non-State Direct Recp.	Sponsor Name	Project #	Project Name	Project Description	Location/MPO Area
Rebuilding American Infrastructure with Sustainability and Equity (RAISE)	FY 22	Construction	Design/Construction	\$1,099,455.00	\$1,374,319.00	no	Plaquemines Parish	TBD	Ferry Road Improvement Project	This project will construct a hard-surface access roadway to the Pointe-a-la-Hache ferry facility in Plaquemines Parish. It shall include a new southbound left turn lane on Highway 23 and a northbound deceleration turn lane and acceleration lane. Subsurface drainage will be improved to accommodate the new roadway and a nominal parking area will be included to accommodate commuters and pedestrians. This road will replace the existing ferry access road and facility that has been damaged over the years by various storms, high river currents, and corrosion	New Orleans
Rebuilding American Infrastructure with Sustainability and Equity (RAISE)	FY 22	Construction	Construction	\$22,164,000.00	\$27,705,000.00	no	City of Shreveport	H.015724	Shreveport Healthcare & Development Corridor	This project will fund construction of roadway and intersection improvements on the approximately 1.6 mile healthcare corridor at the nexus of I-49 and I-20 in Shreveport. The project includes the following elements: reconstructed roadways and transit bus pull-outs, BRT with electric bus technology, ADA improvements, traffic signal and emergency vehicle preemption improvements, pedestrian facilities including a pedestrian bridge, protected bicycle lanes, and street lighting.	Shreveport-Bossier
Rebuilding American Infrastructure with Sustainability and Equity (RAISE)	FY 22	Construction	Design/Construction	\$2,626,679.00	\$5,716,404.00	no	Lafourche Parish	H.015662	Valentine Pontoon Bridge Replacement	The project will replace the existing dilapidated Valentine Pontoon Bridge over Bayou Lafourche on State Highway 1 and 308 between Lockport and Larose with a more modernized pontoon bridge.	Rural
Rebuilding American Infrastructure with Sustainability and Equity (RAISE)	FY 23	Construction	NEPA/Design/Construction	\$10,537,798.00	\$13,790,798.00	no	Columbia Port Commission	TBD	Columbia Port Commission/Ouachita River & LA Hwy 165 Multimodal Connectivity and Safety Project	The project will fund the land acquisition and construction activities for a Truck Parking Facility located near the inland Port of Columbia, Ouachita River, and LA State Highway 165. This includes surface parking for approximately 50 commercial trucks, 100 cars, and 12 electric vehicle (EV)	Rural
