Contract No. 4400028908 State Project No. H.014334.6 Federal Aid Project No. H014334 Entity Contract for Bonnabel Blvd: Metairie Rd-I (CE&I) Jefferson Parish

Royal is 100% Louisiana-owned & headquartered

Dear Consultant Selection Committee,

Royal Engineers and Consultants, L.L.C. (Royal) respectfully requests your review and consideration of the enclosed proposal prepared in response to the Department's advertisement for Engineering and Related Services for the Entity Contract for St. John W. Bank Miss. R. Trail, Phase 2 (CE&I). Since 2005, Royal has delivered multi-discipline professional engineering, construction and program management, and resident inspection services for industry, government, and the private sector across the Gulf Coast and is fully licensed, bonded, and insured to do so. Additionally, Royal has provided construction engineering and inspection for complex roadway programs throughout South Louisiana, totaling more than \$500 million.

With offices in Baton Rouge, New Orleans, and Lafayette, staffed with roadway design and construction specialists, the Royal Team is positioned to mobilize immediately and perform the requested services within the established parameters. We have strategically partnered with G.E.C., Inc., with whom we have a strong working relationship. Through our carefully selected team of professionals, we are committed to providing the Department and Jefferson Parish with the full suite of construction engineering and inspection services required, and we are confident we will surpass expectations. Our proposed team meets or exceeds the specified minimum requirements and is organized to meet the needed services described in Attachment A of the advertisement. The Royal Team's statement of qualifications is submitted in direct response to the referenced advertisement. It highlights our relevant experience and expertise and articulates our unique capabilities to perform needed services promptly and professionally within budget.

Royal has a long history of service in Jefferson Parish, including the West Metairie Avenue Bridge (H.015009.5) project and the CE&I project US 90Z Harvey Canal Tunnel Rehabilitation (H.010673), which is in partnership with G.E.C., Inc.

We appreciate the opportunity to respond and look forward to working with the LaDOTD and St. John the Baptist Parish. Please direct communication to our Primary Point of Contact, Michael Pugh, by phone at (504) 283-9400 or via email at mpugh@royalengineering.net.

Sincerely

Michael Pugh, P.E., President

Royal Engineers and Consultants, LLC

DOTD FORM: 24-102

PROPOSAL TO PROVIDE CONSULTANT SERVICES

(Revised January 1, 2023)

Prime consultant shall complete the DOTD Form 24-102 without altering the Form's text; however, the instruction and/or guidance for Sections 12 through 23 can be removed but do not remove Section title and number.

ANY CONSULTANT FAILING TO SUBMIT ANY OF THE INFORMATION REQUIRED ON THE DOTD FORM 24-102, OR PROVIDING INACCURATE INFORMATION ON THE DOTD FORM 24-102, MAY BE CONSIDERED NON-RESPONSIVE.

1.	Contract Name as shown in the advertisement	Entity Contract for Bonnabel Blvd: Metairie Rd-I-10 (CE&I)
2.	Contract Number(s) as shown in the advertisement	4400028908
3.	State Project Number(s), if shown in the advertisement	H.014334.6
4.	Prime consultant name (name must match as registered with the Louisiana Secretary of State where such registration is required by law)	Royal Engineers and Consultants, L.L.C.
5.	Prime consultant license number (as registered with the Louisiana Professional Engineering and Land Surveying Board (LAPELS) if registration is required under Louisiana law)	EF.0003328
6.	Prime consultant mailing address	1501 Religious Street New Orleans, LA 70130
7.	Prime consultant physical address (existing or to be established, if location is used as an evaluation criteria)	1501 Religious Street New Orleans, LA 70130
8.	Name, title, phone number, and email address of prime consultant's contract point of contact	Michael Pugh, P.E., President 504-283-9400 mpugh@royalengineering.net
9.	Name, title, phone number, and email address of the official with signing authority for this proposal	Michael Pugh, P.E., President 504-283-9400 mpugh@royalengineering.net

Prime consultant should enter the firm name in the footer at the bottom of this page. (It will carry over to subsequent pages.)

06/18 - 06/19	New Orleans DPW Coop Principal in Charge of th contractors in five (5) m repair and replacement	Citywide Construction Administration and Resident Inspection Services for Sewerage and Water Board of New Orleans and City of New Orleans DPW Cooperative Agreement – New Orleans, LA Principal in Charge of the team contracted to provide construction management and inspection services for annual maintenance contractors in five (5) maintenance zones, performing repair and restoration of pavement and associated infrastructure, including utility repair and replacement (water, sewer & drainage), sidewalks, ADA-Compliant Ramps, as well as replacement and repair to associated infrastructure., with a monthly total of 30-35 sites per maintenance zone. Responsibilities included team mobilization, including serving as principal engineer.					
11/19 - Ongoing	Principal Engineer on the resident inspection servestoration of parish conwater) that suffered dark contract by DPW and over the principal of the principal contract by DPW and over the principal contract by DPW an	City of New Orleans Roadway Restoration Program CM and Inspection – New Orleans, LA Principal Engineer on the Royal team contracted by the Department of Public Works (DPW) to provide construction management and resident inspection services for the City of New Orleans Roadway Restoration Program CM and Inspection. This project includes restoration of parish concrete and asphalt roadways and associated infrastructure (i.e., sidewalks, driveways, drainage, sewer, and water) that suffered damage during Hurricane Katrina. Construction services are being performed by multiple contractors under contract by DPW and overseen by Royal. Royal is providing all construction management, data management, reporting, platform deployment, quality assurance, administration, pay applications, resident inspection, and closeout services.					
02/15 - Ongoing	St. Bernard Parish Gove Principal Engineer on te administration, resident included project govern	ernment Pre-Cas am contracted for inspection, tech ance, subject ma	t Con-Span Canal Crossings Engineering and CM Services — Sor civil engineering, design, surveying, geotechnical, field lay inical/engineering project close-out, construction managementer expert for design input, and team mobilization for the rathe existing hydraulic capacity of the canal.	St. Bernard, LA out, bidding, co ent (CM) service	onstruction ces. Responsibilities		

03/17 - 05/19	Lafayette Regional Airport, Taxiway F Phase III Enabling Project – Lafayette, LA Civil Engineering Subject Matter Expert on team providing construction management services for the Taxiway Foxtrot Phase III construction project located at the Lafayette Regional Airport which includes the creation of a parallel taxiway for Runway 4L-22R and a connector taxilane to extend Taxilane A to provide access to the new terminal. Responsibilities included performing a project constructability review.
09/19 - 03/20	MaxPave Roadway Program: PM/CM of Utility Rehabilitation – New Orleans, LA Principal Engineer responsible for interagency coordination, project management, contract administration, construction management, assessment, and resident inspection services for the CNO DPW and SWBNO combined utility rehabilitation initiative. The project involves 50 to 75 service cuts weekly to conduct the needed point repairs to the sewer and water infrastructure. Completed on-time and on-budget, Mr. Pugh's primary duties included client service management and civil engineering and utility impacts subject matter expertise.
12/10 - 01/17	Regional Transit Authority Streetcar Expansion Program – Construction Management Plus Principal-in-Charge for this streetcar expansion program, where Royal provided construction management and inspection services, document administration, and change order management. Services also included estimating and review of potential change orders and monitoring differing site conditions encountered during construction. The project consists of 14,400 track feet of continuously welded rail, installation of the half grand union at Canal and N. Rampart, an embedded double cross over at Frenchman & Elysian Fields, refurbishment of over 40 historic light poles to include LED bulbs, overhead catenary system installation, installation of traction powered substation, utility relocation and upgrades, and road milling and repaving. Mr. Pugh's team observed demolition, excavation, utility re-location, concrete, asphalt, earthwork, and track-work to ensure compliance with drawings and specifications.
11/10 - 08/11	Bloski Avenue Extension – Belle Chasse, LA Principal Engineer for this road construction project. Royal worked directly for the Naval Facilities Engineering Command Southeast as the prime contractor. This project consisted of the construction of a 1,300-foot asphalt roadway and included the construction of stormwater drainage, sidewalks, concrete driveways, and solar street lighting. Through value engineering efforts, Mr. Pugh reduced NAVFAC's cost by \$800K and reduced the project schedule by 50 days. Royal was also responsible for the development and maintenance of the Stormwater Pollution Prevention Plan (SWPPP), Environmental Protection Plan (EPP), Health & Safety Plan (HASP), and Accident Prevention Plan (APP).
03/07 - 10/09	Roadway Restoration Project – St. Bernard Parish, LA Lead Design Engineer and Project Principal responsible for engineering, roadway plans/design, and construction management services for the restoration of all concrete and asphalt roadways, including associated infrastructure, including sidewalks, driveways, drainage, sewer, and water systems, that suffered damage during Hurricane Katrina and the recovery process. Mr. Pugh was the engineer in responsible charge for all design and served as the primary technical resource for contractor questions and challenges encountered during construction.
01/98 - 08/00	LaDOTD: Off System Bridge Program – Iberia Parish, LA Mr. Pugh was responsible for maintaining and supervising all Iberia Parish's Off-System Bridge Program projects. This project included intermediate inspection of bridges, recommendations for repairs, supervised repair work, coordination with LaDOTD and Parish officials, and maintenance of detailed bridge files.

Ms. Foreman's responsing accordance with the Off-System High alternatives for the bridge replacement provided by Royal include topographic			Suburban Canal Off System Bridge – Jefferson Parish, LA m Bridge (OSBR) replacement of an existing slab span bridge located in an urban area of asibilities include managing all aspects of design and client relations, overseeing plan production hway Bridge Program Guidelines, leading the hydraulic analysis and design for all viable t in accordance with the LaDOTD Hydraulics Manual, and coordinating survey efforts. Services and boundary survey, preliminary plan production, right-of-way agreements and sketches, and tation of views, categorical exclusion clearance, wetland studies, and other information needed			
08/15 - 01/22		H.013443 Iberia Street Sidewalk – Youngsville, LA Civil/Hydraulic Engineer on team providing engineering design and engineering services during construction for the LaDOTD TAP- funded project involving installation of RCP drainage piping within the existing roadside ditches; a 6' wide concrete sidewalk, including two pedestrian bridges crossing waterways on the south side of Iberia St. from School St. to Sugar Mill Pond Subdivision allowing for greater interconnectivity of pedestrian travel. Responsibilities included design support; performing routine site visits; providing construction management/administration, and engineering support during construction, including utility coordination and responding to requests for information on elevation of pedestrian bridge.					

12/17 - 02/22	Camellia: Settlers Trace Turn Lane – Lafayette, LA Civil/Hydraulic Engineer on team providing engineering services to the LCG for the design of a dedicated right-turn lane and second left-turn lane at the intersection of Camellia Boulevard and Settlers Trace Boulevard. Services include preparing plans and specifications for project construction, performing engineering design and analyses for the widening of the concrete roadway, evaluation of the existing drainage infrastructure, and identifying required modifications to the existing drainage system. Responsibilities included design support; performing routine site visits; providing construction management/ administration, and engineering support during construction, including utility coordination, surveyor coordination; schedule coordination with contractor; facilitation set of on-site job shack; client coordination; lab testing coordination; coordination of traffic control operations and compliance with traffic control plan, and overseeing resident inspection services throughout construction.
08/15 - 11/21	Polly Lane Extension – Lafayette, LA Civil/Hydraulic Engineer responsible for performing engineering design services and construction management for the extension and connection of both existing dead-end streets of Polly Lane, inclusive of roadway reconstruction and widening to its existing section at Verot School Road. The approximate length of the new roadway is 1,080 linear feet and the length of improvements to existing roadway is 930 linear feet. The roadway extension/connection consists of a 2-lane asphaltic concrete roadway, a 32 ft diameter reinforced Class A concrete roundabout, curb and gutter and subsurface drainage, a concrete box culvert over Issac Verot Coulee Lateral 7, sidewalks, and lighting. As Engineer Intern, Ms. Foreman was responsible for performing engineering analyses for design of the storm drainage system, preparation of and revisions to construction documents, performing routine site visits, providing construction management/administration, and engineering support during construction, and overseeing resident inspection services throughout construction. As Project Manager, Ms. Foreman was responsible for invoicing, deliverables, scheduling, resourcing, and client coordination.
06/15 - 06/17	Détente Road Rehabilitation – Youngsville, LA Engineer Intern on team providing design, bidding and construction management services for the rehabilitation of Détente Road, consisting of mill & overlay of asphaltic pavement including asphaltic pavement patching. Responsibilities included coordination of testing laboratory requirements and support with change orders and work change directives related to additional locations.
02/15 - Ongoing	Missouri Street at Corinne Canal – St. Bernard Parish, LA Civil/Hydraulic Engineer on the Royal team contracted by St. Bernard Parish Government (SBPG) to provide Engineering Services for repairs, restorations and/or replacement of Parish owned roadway and bridges to their Pre-Katrina condition while preserving the historical value and intent of each facility and Engineering Services for replacement of 6 existing culverts with precast Con-Span structures. PW 19332, Missouri @ Corrine Bridge consisted of a Hazard Mitigation project to replace the preexisting two – 60" corrugated metal pipe culverts with a 26'-0" wide 72'-0" long clear span, precast concrete structure. Ms. Foreman was responsible for hydraulic analysis, site layout and grading, foundation design, wingwall design, and coordinating development of plans. During construction, responsibilities include submittal reviews (pile loads and con-span wingwall).
08/19 - 01/20	Roadway Repairs – St. Gabriel, LA Engineer Intern on team providing engineering design and engineering services during construction to mill and overlay four roadways including associated work to drive aprons and reconstruct one roadway including pavement removal, general excavation, soil cement, class II base course, asphaltic concrete pavement and associated work to drive aprons. Responsibilities included bid tabulation and recommendation for award.

01/23 – Ongoing	Construction Management and Estimating Services for Nashville Wharf A Substructure Repairs, Phase 2, Port of New Orleans Assistant Project Engineer responsible for assisting the project manager with construction management services including cost estimating, constructability reviews, document control, field representation, and supporting Port NOLA with project closeout for the repair of the substructure of the Nashville Wharf "A" facility located on the Mississippi River in New Orleans, LA. The existing wharf was constructed in 1960 and 1961 and is approximately 2,400 linear feet long and 214 feet wide and supported by approximately 5,371 steel piles.
2019-2021	H.013365 LA45/LA303 Rosethorne Path (Lafitte) Mr. Klare designed a two-mile-long concrete walk along Jean Lafitte Boulevard in Lafitte. The project connected previously isolated sections of residential areas with the town's commercial and recreational assets. The design accommodated a narrow right-of-way, existing drainage inlets, and other utilities while conforming to all ADA and LaDOTD requirements. Construction finished in 2023.
June 2022-March 2023	H.013525 St. Bernard Parish 40 Arpent Trail Mr. Klare designed an asphalt bike trail on 40 Arpent Levee in Chalmette, LA. This 7.5-mile trail expands bicycle and pedestrian access in St. Bernard Parish and includes four bridges across the 40 Arpent Canal. The project is currently under construction.
2010	St. John Eastbank Levee Trail – Multiple projects The levee trail extends from the St. John/St. Charles parish line to the St. Charles/St. James line. As a project engineer, Mr. Klare worked on approximately seven miles of this 14-mile asphalt trail. Construction was completed in phases from 2011-2020.
2016	City of Lafitte Sidewalks Mr. Klare was the project engineer for two projects adding concrete sidewalks around downtown Lafitte. This urban project increased connectivity between critical economic corridors in the Town of Lafitte, providing safe passage for pedestrians and recreational value. Construction was completed in 2017.
2013 to July 2023	Project Engineer-Meyer Engineers, Ltd. Mr. Klare worked on various public and private projects, designing roadways, sidewalks, foundations, and drainage infrastructure. He also performed site and minor structural design. His projects include the LA 59 Realignment and Tammany Trace Tunnel (LaDOTD), the Northeast Louisiana Veterans Cemetery, the S Galvez Street Full Reconstruction (New Orleans) and the Port of South Louisiana Administration Building (St. John the Baptist Parish). Mr. Klare drafted plans and technical specifications, obtained regulatory permits and approval, including LaDOTD, USACE, CUP, Mississippi River Levee Districts, Fire Marshal, and municipal Planning and Zoning. He also prepared cost estimates, project timelines, scopes, and contracts.

13 years of experience	Mr. Dunn is an Engineer assisting the Project Engineer in field operations and office work on numerous projects. He has experience on asphalt paving, catch basins, drainage, sanitary sewer, and embankment and base course projects. He also has a vast understanding of Site Manager, developing LPA project plans and understanding of DOTD specifications. Mr. Dunn has experience with collection of street condition data utilizing the PASER rating method and QuickCapture program. Certifications: ATSSA Flagger, ATSSA Traffic Control Supervisor						
2014-2019	Sales Tax Street and Road Rehabilitation Program, East Baton Rouge Parish, LA Engineer - Mr. Dunn was an engineer assisting the Project Engineer for this project which began in 1990. Mr. Dunn provided oversight of inspectors, developed plans and quantities for upcoming projects, handled partial estimates and change orders and assisted the project engineer on project administration for the past 5 years. GEC has been the prime consulting engineer, responsible for all aspects of construction inspection for all City of Baton Rouge Street Improvements. These projects include a variety of rehabilitations jobs; PPC paving patching, asphalt patching, asphaltic concrete overlay, crack sealing and full reconstruction including soil cement. Mr. Dunn has served as Engineer on the following projects: 14-09 Winbourne Ave, 14-15 Crack Sealing, 15-01 Carrington Place, 15-02 H.010648 Acadian Thruway Project, 15-03 Santa Maria, 15-04 Magnolia Trace & Shadows of White Oak, 15-05 Brookstown, 15-06 H.010650 OLOL Project, 15-07 Old Perkins Barringer Foreman, 15-08 Woodale & Lobdell, 15-09 Pearirs Road & Comite Drive, 15-10 Crack Sealing, 15-11 PCC Partial Depth Patching, 15-12 Stumberg, 16-01 H.011364 Goodwood Blvd., 16-02 H.011363 Sherwood Blvd., 16-03 Sherwood Fores Streets, 16-04 Dalyrmple, 16-05 Bluebonnet and Nicholson, 16-06 Arbor Walk, 16-07 Choctaw, Prescott and Airway, 16-09 Goodwood and Sherwood Forest, 16-10 H.011842 Chocktaw Drive Pavement Preservation. (DPW Project No. 15-CEST-0001)						
05/15-Present	H.009479 / West Larose Vertical Lift Span Bridge Rehabilitation, Larose, LA Engineer - Mr. Dunn is an engineer assisting the Project Engineer with the rehabilitations of the West Larose Bridge. The project includes a new fender system construction, removal of the existing paint system and repainting, structural repairs and bolt replacement, and rehabilitation of the electrical and mechanical systems. Baton Rouge ITS Deployment (Phase 3) Ascension, East Baton Rouge, Iberville, Livingston, Point Coupee and West Baton Rouge						
11/16	Parishes, LA Engineer Intern - Mr. Dunn was Engineer Intern for Engineering and Inspection services for construction and integration of five (5) n DMS sites, ten (10) new CCTV sites, one (1) new hub site, thirty (30) Bluetooth Vehicle Detectors (combined with new and existing sites), and five (5) miles of new fiber optic build-out, conduit, and associated pullboxes.						

07/19-Present	H.011670 / I-10 Loyola Interchange Improvement, Design-Build Project, Jefferson Parish, LA Assistant Project Engineer - GEC, selected as the Owner Verification firm, is providing all necessary engineering & related services for Design-Build Construction Support Services for the administration of the Design-Build contract on behalf of LADOTD, along with managing the implementation of the Project's Construction Quality Assurance Program (CQAP). Mr. Dunn is overseeing the inspectors performing owner verification and the QC firm on the daily field operations. He assists the Project Engineer on design review meetings and field operations.
10/20-02/22	St. Bernard Ave, Group A RR 165, New Orleans, LA Project Engineer–Mr. Dunn was the Project Engineer for construction of complete reconstruction of streets and drain lines throughout the St. Bernard neighborhood district in New Orleans.

, ,	facilitate installation of a permanent pipeline casing adjacent to the Mississippi River Levee. The permanent pipeline casing is required						
	as part of a proposed corridor through Plaquemines and St. Bernard Parishes that would deliver dredged sediment from point bars within the Mississippi River to marsh creation areas within the Breton Sound.						
	Camellia - Settlers Trace Turning Lane – Lafayette, LA Civil/Structural Engineer providing engineering services during construction for Lafayette Consolidated Government, Project features						
	Civil/Structural Engineer providing engineering services during construction for Lafayette Consolidated Government. Project features						
10/21 - 04/22	include a dedicated right turn lane and a second left turn lane at the intersection of Camellia Boulevard and Settlers Trace Boulevard. Services consist of preparing plans and specifications for the construction of the project and performing engineering design and analyses						
10/21-04/22	for widening the concrete roadway, evaluation of the existing drainage infrastructure, and identifying required modifications to the						
	existing drainage system. Additional project features include road striping, sidewalk relocation, and street lighting. Mr. Fontenot served						
	as structural subject matter expert, completing re-design of the catch basin to accommodate changing project needs.						
	H.002550 MacArthur Drive Interchange Completion – Jefferson Parish, LA						
	As an Engineer Intern, Mr. Fontenot assisted with plan and elevation revision, performed quality checks of plans from other firms,						
	designed curtain wall details, and designed overhead sign support addition. Tasks performed included: modification of existing						
06/12 - 07/16	geometric design of baseline for on/off ramps; detailed sections of roadway for graphical grade plans; used current design standards to						
	detail and design curtain	detail and design curtain wall details for final plans; detailed and designed overhead sign support addition and layout for various					
	locations throughout fin	al design; propo	sed options for frontage road modifications and layout of re	oadway beneatl	n bridge structure.		
	Codes used included: AA	ASHTO Roadside	Design Guide, AISC Steel Construction Manual, ACI 318-11 I	Building Code Re	equirements for		
	Structural Concrete, LAD	OTOD Bridge Des	ign Manual.				

	In-Depth Bridge Inspection of Complex Structures – St. Landry Parish, LA
	As an Engineering Intern, Mr. Fontenot performed in-depth inspection of the deck, superstructure, and substructure of the approach
06/12 - 07/17	spans on the Krotz Springs Bridge over the Atchafalaya River. In this role, Mr. Fontenot also coordinated meetings between the
	inspectors; coordinated equipment rentals and staffed personnel; performed bridge inspections; and provided assessment report of
	bridges including potential repair plans. Codes used included: PONTIS Inspection Manual.
	H.003182 Inner Harbor Canal Bridge Rehabilitation – Algiers, LA
	As an Engineering Intern, Mr. Fontenot designed traffic control and signage including detour plans and assisted in quantity checks and
06/12 07/17	details for Final Plans Tasks performed included: used as-built plans and CAD software to layout and design traffic control options and
06/12 - 07/17	detour paths for temporary lane closure during construction efforts; applied LaDOTD Standards for Traffic Management and Signage;
	and refined and checked rehabilitation details and plans for final submittal. Codes used included: MUTCD, LaDOTD Traffic Control
	Standard Plans, AISC Steel Construction Manual, and ACI 318-11 Building Code Requirements for Structural Concrete.
	I-10 Lake Pontchartrain Bridge Deck Patching & Girder Painting – New Orleans, LA
	As an Engineering Intern, Mr. Fontenot performed field inspection of all bridges. Created Assessment Report. Designed traffic control
	and detour plans. Wrote TMP for final submittal. Prepared plans and details for repairs. Tasks performed included: planned for
00/12 07/10	inspection and quantification of bridge deficiencies by preparing traffic control plans and reviewing previous inspection reports; used
06/12-07/18	CAD software to develop detour plans and a TMP for the state's review; performed field inspection; compiled data from the field
	inspection to create an assessment report; and used as-built plans and current state standards to prepare and detail suggested repairs.
	Codes used included: MUTCD, LaDOTD Traffic Control Standard Plans, AISC Steel Construction Manual, ACI 318-11 Building Code
	Requirements for Structural Concrete, AASHTO LRFD Bridge Design Specifications, and LaDOTD Bridge Design Manual.
	Yscloskey Vertical Lift Bridge Painting – St. Bernard Parish, LA
	As a Licensed Engineer, Mr. Fontenot assisted with design and details for a paint containment system, survey and geometric site layout
10/16 - 08/17	of the new operator house foundation, and phasing plans for different construction activities. Tasks Performed included: Site survey and
	layout using total station and automatic level, designed and detailed support system for paint containment, and coordination of
	roadway and water-fairing traffic to optimize productivity during construction activities.
	Luling Bridge Deck Overlay and Repairs – St. Charles Parish, LA
	As an Engineer Intern, Mr. Fontenot revised original traffic control plans and diversion crossovers to expedite construction sequencing
	and feasibility. Updated drainage plan to match revised traffic control. Tasks Performed: geometric Design of Diversion Crossovers,
	hydraulic analysis of watershed area for new and existing drainage design, traffic control layout and phasing plans throughout the
12/15 – 07/16	project, assisted construction efforts in the field using survey data and design plans, design of debris screen for sandblasting operations
	near adjacent traffic, quality control of final plans, quantification of cut/fill and roadway elements for cost estimates. Codes Used:
	AASHTO Roadside Design Guide, AISC Steel Construction Manual, ACI 318-11 Building Code Requirements for Structural Concrete,
	MUTCD, LaDOTD Traffic Control Standard Plans, AASHTO Guide Design Specifications for Bridge Temporary Works, LaDOTD Hydraulics
	Manual

16 Years of Experience		Gary Brouillette is a senior construction inspector in heavy civil construction with fifteen years of field experience. Provided quality assurance acceptance testing and oversight in the sampling/testing of project-related construction materials. His experience includ the inspection of various phases of substructure and superstructure new bridge construction, embankment/base course, PCC pavement, structural concrete, asphalt paving, asphalt plant inspection, bridge demolition, pump station structures, levee structure drainage and sewer structures, subsurface utilities repairs and replacements, roadway restoration to include asphalt mill/overlays, asphaltic concrete and PCCP roadway patching, canal embankment restoration, slope paving, wooden timber and concrete/steel substructure and superstructure wharf repairs, structural steel repairs, and replacements, and inspection of pre-stressed/pre-caste concrete bridge members. His experience also includes approximately eleven years of performing the daily tasks of a Senior Inspector/Resident Inspector and holding state and national certifications in his field. He has extensive and comprehensive knowled of the LaDOTD Standard Specifications for roads and bridges. His project experience also includes using LaDOTD SiteManager and HeadLight for inspection documentation, and he has experience in the LaDOTD "2059" project closeout process. Certifications: LaDOTD Embankment and Base Course Inspector, LaDOTD Structural Concrete Inspector, LaDOTD Asphalt Paving Inspector/Technician, LaDOTD PCC Paving Inspector, ATSSA Traffic Control Supervisor, ATSSA Traffic Control Technician, ATSSA Registered Flagger, 10 Hour Occupational Health and Safety Training Course		ence includes e, PCC ee structures, ll/overlays, ete/steel d/pre-casted nior sive knowledge nager and			
03/23-06/23		LaDOTD: H.010108 Independence SRTS – Phase II, Independence, Louisiana Construction Inspector. Provided field oversight and inspection of the construction of sidewalks, driveways, earthwork, drainage structures, and related work. This project had an estimated cost of \$700,000.					
03/23-06/23		LaDOTD: H.006499 Sa Construction Inspecto	afe Routes to Sch or. Provided field o	pols (SRTS), Baton Rouge, Louisiana eversight and inspection of all construction-related items per rading, drainage, striping, handicapped ramps, and related w	•	•	

04/22-03/23	LaDOTD: H.011670 Loyola Interchange OVS, Kenner, Louisiana Construction Inspector. Provided Owner Verification (OV) inspection services for the construction phases for two flyover access ramps from I-10 to the New Orleans International Airport. Construction inspection of ground elements included concrete barrier rail footings, pier protection footings, barrier rail, median barrier rail, pier protection barrier rail, sign truss footings, noise barrier wall, and curb and gutter. Construction inspection of superstructure elements included steel tub girder spans, LU-48 concrete tub girder spans, LG-36 concrete girder pans, slab spans, approach slabs, light pole supports, bridge barrier rail, bridge median barrier rail, finger expansion and strip seal joints. Inspected all phases of bridge deck construction, from the steel reinforcement installation to concrete placement. This project had an estimated cost of \$125 million.
03/21-04/22	City of New Orleans DPW: RR3 – Lake Terrace & Oaks Group D No. 2017 – RR072, New Orleans, Louisiana Resident Inspector. Provided field oversight on installing a new sewer system, drainage system, water main replacement, manhole rehabilitation, new manhole and catch basin structures, new PCCP roadway construction to include base and subbase materials, sidewalk, and driveway removal/replacement. Review contractor's quantities for monthly pay estimates. This project had an estimated cost of \$7 million.
06/18-04/20	Jefferson Parish DPW: Bonnabel Canal Improvements No. 50-00121583, Metairie, Louisiana Resident Project Representative. Provided field oversight of all construction-related activities, including installing a 3000 linear foot steel sheet pile wall, embankment and base course installation, slope paving, concrete curb wall, drainage pipe extensions, and 6' chain link fence. Reviewed monthly quantities for pay estimates with the contractor and Project Engineer. Scheduled Progress Meetings and field site meetings. Formulated Punchlist for Final Inspection and acceptance of the project. Estimated cost of \$4.2 million.
04/17-03/18	LaDOTD: H.009028 Airline Park Blvd., Metairie, Louisiana Resident Project Representative. Provided field oversight of all construction-related items such as PCC Pavement, removal of PCC Pavement, Class II Base Course installation, various size RCP/RCPA installation, new drainage pump station structure and generator pad, roadway structures to include manholes, catch basins, conflict boxes, and sewer service/water main relocations. Attended Pre-Construction Conference, weekly Progress Meetings, and field site meetings. This project had an estimated cost of \$6.2 million.
11/15-05/16	LaDOTD: H.011759 P2P Gretna, Louisiana Senior Inspector/Lead Inspector. Provided field oversight of PCC pavement Rehabilitation, asphalt patching, cold planing, asphalt paving, ADA handicapped ramp construction. This project required the complete restoration of Old Behrman Hwy. Coordinated phases of construction with the contractor. Attended Pre-Construction Conference, weekly Progress Meetings, and field site meetings. Formulated Punchlist for Final Inspection and Acceptance of project. Assisted in "2059" project closeout. This project had an estimated cost of \$5.7 million.
01/15-07/15	LaDOTD: H.011246 P2P Gretna, Louisiana: Senior Inspector/Lead Inspector. Provided field oversight of PCC pavement rehabilitation, embankment/base course, asphalt patching, cold planing, asphalt paving, ADA handicapped ramp construction, curb construction, sidewalk and driveway construction, roadway structure adjustments, permanent striping, and other various related work. Attended Pre-Construction Conference, weekly Progress Meetings, and field site meetings. Formulated Punchlist for Final Inspection and Acceptance of project. Supervised and assigned work assignments to inspectors assigned to the project. Assisted in "2059" project closeout. This project had two roadway segments totaling 2.7 miles and estimated to cost \$3.4 million.

RR004 Bayou St. John Roadway Restoration for Fairgrounds, and Seventh Ward Group B Roads – New Orleans, LA

As part of a construction administration and resident inspection contract with the City of New Orleans Department of Public Works, Royal provided construction management services for the construction of \$23 million FEMA-funded roadway improvements, one of the largest in the City. The project area covers 110 city blocks and construction is estimated to include 29,000 square yards (SY) of asphalt, 18,000 SY of concrete. It will require the replacement of roadway pavement, water lines, sewer lines, and drainage. The work also includes modifications to improve consumer mobility related to the Americans with Disabilities Act (ADA).

10/19-Ongoing

Tasked with Construction Administration, Resident Inspection, and Overall Construction Management, Royal is providing field management of the contractor and all construction activities, including conducting progress meetings, resolving resident issues, reviewing and approval of monthly pay estimates, field adjustments and applying knowledge and experience in civil construction to ensure the project remains on schedule and budget. Responsibilities include monitoring construction activities to determine and document the progress of the project and compliance with the construction contract, the City's standards and policies, and with an emphasis on site safety, the timely review of submittals, shop drawings, samples, substitute materials, value engineering proposals, the timely rejection of all non-conforming work and materials, the application of work forces to particular portions of the work, the conformance of the work to the construction contractor's schedule, the timely execution of the work, and conducting required interviews of the Construction Contractor. As Royal's resident inspector, Mr. Dunn documents all construction activities and material quantities in-place as well as assisting in the evaluation of the construction contractor payment requests. He also monitors, tests, and maintains, records for all quality testing, submits daily inspection reports, and observes the jobsite safety program.

12/19-Ongoing	FEMA Roadway Restoration Program: New Orleans, LA Project Manager on the Royal team contracted by the City of New Orleans Department of Public Works (DPW) to provide construction management and resident inspection services for the Federal Emergency Management Agency (FEMA) Roadway Restoration Program. This project includes restoration of parish concrete and asphalt roadways and associated infrastructure (i.e., sidewalks, driveways, drainage, sewer, and water) that suffered damage during Hurricane Katrina. Construction services are being performed by multiple contractors under contract by DPW and overseen by Royal. Royal is providing all construction management, data management, reporting, platform deployment, and closeout services. Royal is providing all construction management, data management, reporting, platform deployment, quality assurance, administration, pay applications, and closeout services. Staff includes on- site and back-office support personnel including qualified Construction Managers and Resident Inspectors. Mr. Schellhaas performs quality control on the contractor's monthly invoices, management of resident inspectors, and project funding quality control.
03/07-10/09	Roadway Restoration Project: St. Bernard Parish, LA Project Inspector on the Royal team contracted by the St. Bernard Parish Government for the Roadway Restoration Program. Royal was contracted to engineer, design, and provide construction management services for all Parish roads. This project included restoration of all concrete and asphalt roadways, including associated infrastructure (i.e., sidewalks, driveways, drainage, sewer, and water) that suffered damage in SBP during Hurricane Katrina and the recovery process. The restoration of the roadways and infrastructure was limited to Parish roadways and omitted state and federal roadways. Mr. Schellhaas was responsible for managing any additional work on the job site once the contractor had started his approved work. He inspected and updated quantities for all approved materials used to complete construction. Mr. Schellhaas was also responsible for site management, which included documenting the progress of work, and ensuring the site was barricaded and taped off properly.
09/19-03/20	MaxPave Roadway Program: New Orleans, LA Assistant Project Manager on the Royal team for the City of New Orleans Department of Public Works Max Pave Program. The objective of this project was to complete as many of these work orders as the funding allowed in a condensed 7- 7-month period. DPW hired Royal to manage the entire project from start to finish. As Assistant Project Manager, Mr. Schellhaas was responsible for scheduling field inspectors, daily oversite of the job site, quality control, reviewing, and preparing contractor invoices.
04/19-02/20	St. Gabriel Roadway Repair: St. Gabriel, LA Administrative Support on the Royal team contracted by the City of St. Gabriel to provide engineering services for the restoration of four roadways and the full reconstruction of one roadway. Royal provided construction management during the construction phase, assisted in design alterations during construction, and helped produce as-built drawings for post-construction closeout. Mr. Schellhaas prepared front-end documents for the St. Gabriel roadway repair project.

As part of a construction administration and resident inspection contract with the City of New Orleans Department of Public Works, Royal provided construction management services for the construction of \$23 million in FEMA-funded roadway improvements, one of the largest in the City. The project area covers 110 city blocks, and construction is estimated to include 29,000 square yards (SY) of asphalt and 18,000 SY of concrete. It requires the replacement of roadway pavement, 4.6 miles of waterlines, sewer lines, and drainage. The work also includes modifications to improve consumer mobility related to the Americans with Disabilities Act (ADA).

Tasked with Construction Administration, Resident Inspection, and Overall Construction Management, Royal is providing field management of the contractor and all construction activities, including conducting progress meetings, resolving resident issues, reviewing and approval of monthly pay estimates, field adjustments and applying knowledge and experience in civil construction to ensure the project remains on schedule and budget. Responsibilities include monitoring construction activities to determine and document the progress of the project and compliance with the construction contract, the City's standards and policies, and with an emphasis on site safety, the timely review of submittals, shop drawings, samples, substitute materials, value engineering proposals, the timely rejection of all non-conforming work and materials, the application of work forces to particular portions of the work, the conformance of the work to the construction contractor's schedule, the timely execution of the work, and conducting required interviews of the Construction Contractor. Royal resident inspectors document all construction activities and material quantities in-place and assist in evaluating the Construction Contractor payment requests. They also monitor tests and maintain records for all quality testing, submit daily inspection reports, and observe the jobsite safety program.

Deliverables include the following:

• Construction Field Records, including Daily Reports/Working Day Reports • Final Inspection Report • Monthly Pay Requests, Schedule Updates, and Weather Reports • Overrun/Underrun Statement • Plan Change Requests/Field Change Authorizations • Warranty Inspection Report • Recommendation for Approval of Testing Laboratory Pay Request • Project Schedule • Non-Conforming Materials Notifications • Final "As Built" Drawings • Monthly Progress Report and Invoice

Royal provided professional engineering design services for the extension and connection of both existing dead-end streets of Polly Lane to provide connectivity for vehicular and pedestrian traffic across Issac Verot Coulee. The scope of work also included roadway reconstruction and widening of the existing roadway south of Gathright Street to its existing section at Verot School Road and the installation of sidewalks on both sides of the road along the entire length of the project. The approximate length of the new roadway is 1,080 linear feet and the length of improvements to existing roadway is 930 linear feet. The roadway extension/ connection consists of a 2-lane asphaltic concrete roadway, concrete sidewalks, subsurface drainage, traffic circle, concrete box culvert in Issac Verot Coulee Lateral 7, articulating block matting for scour protection, ADA ramps, and street lighting. The project also involved installation of a new 8" water main and water and sewer service line adjustments and relocations.

Royal's design phase services included topographical and boundary surveying, all preliminary and final plans, preparation of all necessary right-of-way maps/plats and other governmental staking and inspection authorized on an as-need basis by owner, opinions of probable construction cost, design calculations, utility coordination, site condition assessment and surveying, permitting, and preparation of technical specifications and bid documents. The road was designed in accordance with LCG guidelines and other industry and state standards such as the AASHTO Greenbook and the LADOTD Road Design Manual. The sidewalks were designed in accordance with all LCG standard plans and ADA requirements, and the hydraulic design was in accordance with the 2011 LADOTD Hydraulics Manual. Following the completion of Preliminary design plans, Royal determined the required extent of right-of-way to construct the new roadway and sidewalks and coordinated with TBS to perform a boundary survey and prepare right-of-way maps, which were provided to LCG to facilitate the acquisition of the required right-of-way. Prior to finalizing and stamping construction plans, Royal produced 95% Advanced Check Prints for review by LCG and relevant utility companies for a final, detailed review of the project.

Construction phase services included pre-construction coordination, contractor submittal review and tracking, shop drawing review and approval, RFI management, on-site progress meetings, construction monitoring, engineering during construction, preliminary and final walk-through, punch list, substantial completion coordination, completion of record drawings and contractor pay request coordination. Royal also provided resident inspection services.

Design and construction of the project were divided into several phases to expedite the construction of the road and provide access to a newly built apartment complex. Phase 1 of the project was completed in July 2019, and construction of Phase 2 was completed in November 2021.

This project consisted of furnishing all supervision, labor, equipment, and materials necessary to mill and overlay four roadways including associated work to drive aprons and reconstruct one roadway including pavement removal, general excavation, soil cement, class II base course, asphaltic concrete pavement, and associated work to drive aprons.

Royal provided engineering services, including design, plan and specification preparation, cost estimating, and bidding. Additionally, Royal provided all construction management, quality assurance, administration, pay applications and closeout services. Staff included on-site and back-office support personnel.

Back Office: Services included general construction management and administration activities; document control functions; conducting pre-construction conference; reviewing pay applications and recommending payment; reviewing proposed change orders for scope and cost reasonableness; preparing contract change orders; issuing necessary interpretations and clarifications of the contract documents as appropriate; evaluating and determining acceptability of substitute or "or-equal" materials and equipment; recommending substantial completion, and preparing substantial completion documentation; preparing/submitting record drawings; assisting with claims and disputes arising from construction; obtaining warranty documentations and conducting warranty period inspection; reviewing contractor request for added days, and special work requests; and reviewing and tracking material submittals.

Field Services: Included assisting with technical issues arising during construction; assisting in coordination with utilities for relocations; conducting progress meetings (biweekly), and preparing agendas and minutes; monitoring and tracking construction progress; recommending work be rejected while in progress if not in accordance with the contract; obtaining field measurements for estimated pay item quantities; and conducting preliminary and final walk-throughs, and prepared punch list.

Resident Inspection: Specific duties for the Resident Inspector included: observing construction at all times the contractor worked on critical work items; providing on-site quality assurance; inspecting, measuring, and appropriately tracking (eligible) work completed for pay requests; ensuring work did not adversely affect utilities, adjacent areas and/or property, etc.; preparing daily field reports, and/or field books; photographing and/or documenting work progress; verifying contractor provided adequate traffic control and site safety procedures; and prepare incident reports

Royal is providing construction contract administration and construction engineering inspection services for the construction related to the restriping of Cajundome Boulevard, East Pinhook Road/Teurilngs Avenue, Kaliste Saloom Road, Mudd Avenue, and Gendarme Road, in Lafayette Parish.

Royal hosted the preconstruction meeting for the 13.8-mile-long project and assisted LaDOTD with its public notices for the start of the project. Post preconstruction meeting Royal ensured the proper material submittals were received from the contractor and reviewed promptly. During construction, Royal provides onsite full-time resident inspection, uploading reports into the department's Headlight and Site manager software. Royal manages the pay estimates, change orders, field issues, and correspondence with all project members as the project progresses.

Royal personnel ensures that work is performed according to LaDOTD plans and specifications and provides progress reports to the LaDOTD based on daily inspections. After the project, Royal will prepare the 2059 and other required turn-documents.

As a subconsultant to G.E.C., Royal is providing construction engineering and inspection services for the complete rehabilitation of the Harvey Canal Tunnel and its approaches along US 90Z in Jefferson Parish. The rehabilitation includes new tile lining, drainage pumps, pavement, electrical, and ventilation systems.

It was built in 1957 to go underneath the Harvey Canal on Old Business US 90. The tunnel has a length of 1,079 feet and four traffic lanes and was in critical need of rehabilitation.

Royal assists with construction field records and maintaining the project diary. Resident inspectors check the contractor's construction operations to ensure that all work is performed in accordance with the plans and specifications and using approved materials.

Royal maintains records of the construction operations, prepares monthly pay estimates, and makes monthly progress reports in conformance with LaDOTD requirements.

The project began in 1990, and GEC has been the prime consulting engineer responsible for construction inspection for all City of Baton Rouge Street Improvements since 1991. The City passed a renewal of the Sales Tax Street and Road Rehabilitation Program, which extended the roadway improvement program for an additional five years, with GEC remaining the prime consultant providing inspection services. The contract calls for GEC to provide one project engineer, one senior chief inspector, and two chief inspectors. These inspectors must be certified by LADOTD in both asphalt and concrete construction. In addition, GEC provides between five and six inspectors certified by LADOTD in Asphaltic Concrete Paving, Portland Cement Concrete Paving, or Embankment and Base Course construction. Some are certified in more than one category.

GEC's ability to efficiently collaborate with the City-Parish Program Manager & contractors accelerated twenty-three (23) Program projects, reducing contract time by 404 days.

Construction engineering services include:

- Conducting a pre-construction conference.
- Assist in assessment and development of annual program projects.
- Providing full time inspection by certified inspectors and weekly progress reports.
- Administration of multiple contractors.
- Review and approval of pay estimates.
- Issuing work directives.
- Daily meetings with Program Director and Field Coordinator.
- Prepare a pre-final punch list.
- Conduct final inspection and project closeout.
- Conduct one-year warranty inspection.
- Coordinate and oversee field and plant inspection services by sub-consultants.

The City of New Orleans selected GEC to provide engineering design, construction administration, and resident inspection services for roadway enhancement and reconstruction of damaged streets for FEMA-eligible roadway repairs in the St. Bernard neighborhood district in the City of New Orleans.

GEC designed the complete street reconstruction in this neighborhood. The design required removal of existing asphalt pavement roadways and replaced with new asphalt pavement roadways including concrete base, concrete curbs, crushed stone base course, compacted granular subbase, concrete sidewalks, concrete drives, and handicap ramps.

The drainage evaluation resulted in the complete reconstruction of portions of the reinforced concrete drain lines ranging in size from 12-inch diameter to 30-inch diameter.

GEC also provided potable water systems design and modeling, and water main tie-ins. The system consisted of 8-inch and 12-inch water mains including replacement of fire hydrants, connecting numerous water valves, water meters, miscellaneous water line fittings and water connections.

All plans and specifications were submitted to and approved by the City of New Orleans, Department of Public Works, and the Sewerage and Water Board of New Orleans (S&WB). Design was also in accordance with the City of New Orleans, Department of Public Works and S&WB requirements.

Our team worked with the Lafayette Consolidated Government and the District as part of the CE&I Retainer contact.

Firm Members Involved: Brian Buckel, Murphy LeDoux, Brad Dill, Virginia Mitcham

18. Approach and Methodology

<u>Project Understanding:</u> Royal understands this project to be an overlay project on Bonnabel Boulevard between I-10 and Metairie Rd in Jefferson Parish. The current pavement conditions appear composite (asphalt over PCCP) with a mountable curb on a residential street. Limits of the work zone will encounter both residential and commercial properties and this area experiences a high traffic volume. This project, once completed, will be an improvement to the parish and greatly benefit the public.

Experience and Capacity: Royal and G.E.C. have extensive experience in providing construction engineering, resident inspection services, and construction contract administration in accordance with DOTD's Standards and Procedures. Royal has completed projects ranging in scope from Pedestrian Paths, Structural PCCP, Asphalt Mill and Overlay, underground utilities, and sidewalks to ADA-compliant ramps. Our team has the understanding and field experience necessary to provide crucial input to LaDOTD regarding project Asphalt, PCCP, base rehab, ADA requirements, and more.

Royal has provided CE&I services on numerous similar projects in Louisiana, such as the RR004 Bayou St. John, Elysian Fields Overlay, and Harvey Tunnel project. This gives our team the experience to manage and inspect the project throughout all construction phases. Our team is led by Carter O'Brien, PE, who brings over 14 years of heavy civil construction management experience. Mr. O'Brien has successfully executed more than 20 projects for LaDOTD. Katherine Foreman, PE, and Robert Klare, PE, will be assistant Project Engineers. Our team includes GEC, with a deep resume of DOTD projects, including successful past and current partnerships with Royal.

<u>Project Phases</u>: Our resident Inspector team is certified in Base and Embankment, Asphaltic Concrete, PCC Pavement, and Structural Concrete. Our construction engineering and inspection team is proficient in SiteManager, Materials Manager, and Headlight and is familiar with LaDOTD procedures and processes. Based on our understanding of the project, knowledge of LaDOTD's processes and procedures, and experience completing similar Asphalt Overlay projects across the state, we will execute the project in the phases outlined in the figure below.

- Design QA/QC plan
- · Attend software training
- Provide testing lab (if needed)
- Review project plans and special provisions
- Review the DOTD-provided sampling plan
- Site visit with project team to ensure critical items are reviewed

- Host preconstruction meeting
- · Agree upon and issue NTP
- Develop QA/QC plan, materials testing, & field sampling plan
- Review preconstruction submittals
- Review & respond to preconstruction RFIs
- · Coordinate with stakeholders
- Site visits will be done to assess the need for utility relocation, as coordinated with JPG

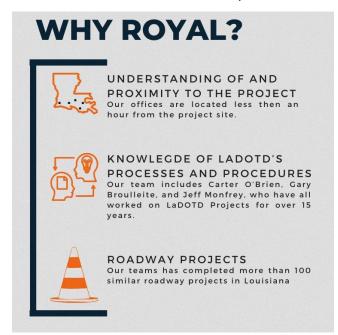

- · Client/contractor liaison
- Daily Site inspections
- Develop detailed inspection reports
- · Conduct document sampling/testing
- Review & monitor traffic control plans
- · Review submittals
- Ensure document control
- Issue monthly pay estimates
- Manage materials
- · Coordinate contractor claims
- QA/QC

- Coordinate final walkthrough
- Develop final punch list
- Obtain final project acceptance
- Assemble required turn-in documents
- Submit closeout documents
- 2059 Submittal
- As-builds

Post Award

To hit the ground running post-award, our team will review LaDOTD's project plans and special provisions and prepare a QA/QC plan for the department to review. Should the LaDOTD laboratory be unavailable, Royal will contact an independent lab to provide materials testing services throughout the project.

Pre-Construction

We understand the importance of aligning all parties during the pre-construction phase. This phase will begin with a team kick-off meeting to discuss the project Notice to Proceed date, project goals, QA/QC plan, materials testing/field sampling plan, and pre-construction submittals. Before moving into the next phase, we will also confirm limits, coordinate with utilities, and review and respond to pre-construction RFIs. This phase will be concluded with the pre-construction conference.

Active Construction

During construction, our resident inspector(s) will observe the contractor's operation daily to confirm that all work is performed in accordance with the specified plans, specifications, and approved materials. We will also review the contractor's traffic control plan(s) daily to confirm it follows MUTCD guidelines and adheres to the project plans. As this project will be open to pedestrian traffic, security of the site is of the utmost importance, our inspectors will perform routine inspections and ensure the contractor addresses any potential hazards open to the public.

To confirm and maintain the quality of the project, we will follow the project sampling plan provided during preconstruction. Our resident inspector(s) will confirm that Asphalt, PCCP, and Class 2 Base course are sampled and tested according to LaDOTD's procedures and the project plans. Using

SiteManager/Headlight, our team will include detailed documentation and photography of all testing, and will obtain and record all certificates of release, material certificates, CD's, and necessary field paperwork throughout the project.

Royal's Resident Inspectors and Engineers are thoroughly familiar with HMA paving and are ready to identify and address issues in the field before completion to ensure the project has a long lifespan. Royal will inspect the contractors' grades during layout and before paving to help mitigate any issues before the contractor has paved. Our team has also managed many multi-use projects and is well equipped to handle the project demands.

Providing timely responses to the contractor and managing document control is critical to maintaining the project schedule. Royal will manage all project correspondence during active construction, including RFIs, change orders, submittals, change orders, monthly pay estimates, and other project documents. Our team intends to answer all RFIs within two business days. We will document all pertinent information and include all RFIs with the final project documents. Similarly, we will review all change orders per LaDOTD's specifications and, once recommended for approval, will send for electronic signatures via SiteManager.

Should there be a claim or dispute, our team will provide detailed records and track time and material information to thoroughly process on behalf of LaDOTD. The Royal team is also experienced in providing recommendations regarding constructability issues or scheduling disputes and stand ready to support LaDOTD if required.

Substantial Completion

Once the project reaches substantial completion, our team will conduct a final walkthrough with all stakeholders and develop a final punch list items for the contractor to address. Once addressed, we will coordinate and obtain final project acceptance from all project stakeholders.

Closeout

After the project is complete, our team will assemble and submit all required closeout documents in accordance with LaDOTD standards, including the following:

- Final estimate (zero sum)
- Change orders with required signatures
- Certificates of release
- Correspondence
- RFIs
- Dispute resolution

- Weather and working day report(s)
- Construction layout book
- As-built plans submitted with final estimate reflecting all changes made from original plans
- 2059

<u>Project Schedule:</u> Royal's team includes experienced critical path schedule reviewers who bring first-hand construction field insight to accurately review contractor schedules for compliance and confirm that time requests are justified.

Typical Schedule:

Entity Contract 4400028908 for Bonnabel Blvd: Metairie Rd-I (CE&I), Jefferson Parish

Project Location: Contract No. 4400028908 for Bonnabel Blvd: Metairie Rd-I (CE&I), Jefferson Parish

Royal's Resident Inspectors and Engineers are thoroughly familiar with local conditions, HMA paving, and other aspects of the project. We are ready to identify and address issues in the field before completion to ensure the project has a long lifespan in Jefferson Parish.

19. Workload:

For all contracts where a firm on the team is a prime consultant or sub-consultant and where a) the consultant selection was made by DOTD, and b) a contract was executed by the consultant and the contracting entity by the date the advertisement for this proposal was posted, list all work meeting the following criteria:

- 1) one of the team's firms is responsible for the performance of the work;
- 2) authorization to perform the work has been provided, as provided in the contract between the consultant and the contracting entity;
- 3) the work has not yet been performed and invoiced; and
- 4) the work is not currently suspended for an indefinite period of time.

For indefinite delivery/indefinite quantity (IDIQ) contracts, list open Task Orders individually.

List only the portion of the fees attributable to firms on the team.
