# **DOTD FORM: 24-102**

## (Revised March 1, 2022)

#### PROPOSAL TO PROVIDE CONSULTANT SERVICES

Prime consultant shall complete the DOTD Form 24-102 without altering the Form's text; however, the instruction and/or guidance for Sections 12 through 23 can be removed but do not remove Section title and number.

ANY CONSULTANT FAILING TO SUBMIT ANY OF THE INFORMATION REQUIRED ON THE DOTD FORM 24-102, OR PROVIDING INACCURATE INFORMATION ON THE DOTD FORM 24-102, MAY BE CONSIDERED NON-RESPONSIVE.

Prime consultant should enter the firm name in the footer at the bottom of this page. (It will carry over to subsequent pages.)

| 1. | Contract title as shown in the advertisement                   | Off System Highway Bridge Program                  |
|----|--|--|
|    |  | Carey Road Over Blackwater Bayou                   |
| 2. | Contract number(s) as shown in the advertisement               | 4400024587   |
| 3. | State Project Number(s), if shown in the advertisement         | H.014988.5   |
| 4. | Prime consultant name (as registered with the Louisiana        | TriCoeur Services, L.L.C.                          |
|    | Secretary of State where such registration is required by law) | TriCoeur Services LLC                              |
| 5. | Prime consultant license number (as registered with the        | EF#: 4660  |
|    | Louisiana Professional Engineering and Land Surveying          | VF#: 0653  |
|    | Board (LAPELS) if registration is required under               |  |
|    | Louisiana law)   |  |
| 6. | Prime consultant mailing address                               | 9270 Siegen Lane, Suite 501, Baton Rouge, LA 70810 |
| 7. | Prime consultant physical address (existing or to be           | 9270 Siegen Lane, Suite 501, Baton Rouge, LA 70810 |
|    | established, if location is used as an evaluation criteria)    |  |
| 8. | Name, title, phone number, and email address of prime          | Barry P. Gahagan, PE, PLS; Projects Principal      |
|    | consultant's contract point of contact                         | Phone: 225-266-7507,                               |
|    |  | E-Mail: BGahagan@TriCoeur.com                      |
| 9. | Name, title, phone number, and email address of the            | Aileen Foley, Managing Principal                   |
|    | official with signing authority for this proposal              | Phone:225-228-2681,                                |
|    |  | Email: AFoley@TriCoeur.com                         |
|    |  |  |

Prime consultant name: TriCoeur Services, L.L.C.

| 10. This is to certify that all information contained herein is |   |
|---|---|
| accurate and true, and that the team presently has              |   |
| sufficient staff to perform these services within the           |   |
| designated time frame. By submitting this proposal,             |   |
| proposer certifies that it is not engaged in a boycott of       |   |
| Israel and it will, for the duration of its contract            |   |
| obligations, refrain from a boycott of Israel. Proposer         |   |
| also certifies and agrees that the following information        |   |
| is correct: In preparing its response, the proposer has         |   |
| considered all proposals submitted from qualified,              |   |
| potential subcontractors and suppliers, and has not, in         |   |
| the solicitation, selection, or commercial treatment of         |   |
| any subcontractor or supplier, refused to transact or           |   |
| terminated business activities, or taken other actions          |   |
| intended to limit commercial relations, with a person or        |   |
| entity that is engaging in commercial transactions in           |   |
| Israel or Israeli-controlled territories, with the specific     |   |
| intent to accomplish a boycott or divestment of Israel.         | Signatura (shall be the same person as #0). |
| The proposer also has not retaliated against any person         | Signature (shall be the same person as #9): |
| or other entity for reporting such refusal, termination, or     | Cilen Foley                                 |
| commercially limiting actions. DOTD reserves the right          |   |
| to reject the response of the bidder or proposer if this        | Date: August 2, 2022                        |
| certification is subsequently determined to be false, and       |   |
| to terminate any contract awarded based on such a false         |   |
| response.   |   |
| 11. If a Disadvantaged Business Enterprise (DBE) goal has       | Firm(s): Firm(s)' %:                        |
| been set for this advertisement, indicate which firm(s)         | N/A   |
| will be used to meet the DBE goal and each firm(s)'             |   |
| percentage.   |   |

### 12. Past Performance Evaluation Discipline Table:

As indicated in the advertisement, insert the completed table here. The percentages for the prime and sub-consultants must total 100% for **each past performance evaluation discipline**, as well as the overall total percent of the contract.

The only past performance evaluation disciplines to be used are: Road, Bridge, Traffic, CE&I/OV, Geotech, Survey, Environmental, Data Collection, Planning, Right-of-Way, CPM, ITS, Appraiser and Other. The crosswalk from the old categories to the new categories can be found at the link below:

 $\frac{http://wwwsp.dotd.la.gov/Inside\_LaDOTD/Divisions/Engineering/CCS/General\%20Information/CPPR\%20Crosswalk\%20to\%20New \cite{Memory of the Company of the Co$ 

**Sub-consultants are allowed to be used for this proposal.** Fill in the table by identifying only those evaluation disciplines consistent with the approach and methodology proposed in Section 18 of the DOTD Form 24-102\*, the name of each firm that is part of the proposal, and the percentage of work in each past performance evaluation discipline to be performed by that firm. The percentage estimated for each evaluation discipline is for evaluation purposes only and will not control the actual performance or payment of the work. The percentages for prime and sub-consultants must total 100% for each past performance evaluation discipline, as well as the overall total percentage of the contract.

| Evaluation<br>Disciplines | % of Overall<br>Contract | Prime TriCoeur Services, LLC | Firm B Civil Design & Construction, Inc. | Firm C ELOS Environmental Services, LLC | Each Discipline must total to 100% |
|---------------------------|--------------------------|------------------------------|--|---|------------------------------------|
| Survey                    | 28.1%                    | 10%                          | 90%                                      | 0%                                      | 100%                               |
| Bridge                    | 63.3%                    | 100%                         | 0%                                       | 0%                                      | 100%                               |
| Environmental             | 8.6%                     | 4%                           | 0%                                       | 96%                                     | 100%                               |
|                           |                          |                              |  |   |                                    |
| Identify the percentage   | ge of work for the ov    | verall contract to be        | e performed by the prin                  | ne consultant and each sub              | -consultant                        |
| Percent of Contract       | 100%                     | 66.4%                        | 25.3%                                    | 8.3%                                    |                                    |

### 13. Firm Size:

For all firms that are part of this team, indicate the approximate number of personnel to be committed to this contract, by DOTD Job Classification and the total number of personnel within the firm that could provide support, if needed. If a specialized job classification is required and not included on the DOTD job classification list, specify "Other (xxxx)" and include the classification title inside the parentheses. The DOTD Job Classification(s) to be used can be found at the following link:

 $\underline{http://wwwsp.dotd.la.gov/Inside\_LaDOTD/Divisions/Engineering/CCS/Job\_Qualification/Job\%20Classifications\%20with\%20Descriptions.pdf}$ 

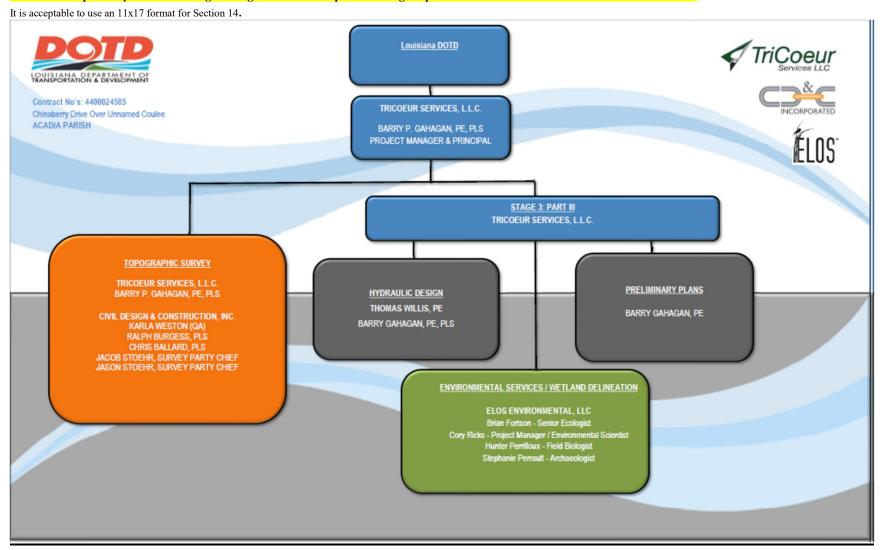

| Firm name                         | DOTD Job Classification    | Number of personnel committed to this contract | Total number of personnel available in this DOTD Job Classification (if needed) |
|-----------------------------------|----------------------------|--|---|
| TriCoeur Services, L.L.C.         | Administrative             | 1  | 1   |
| TriCoeur Services, L.L.C.         | Principal                  | 1  | 1   |
| TriCoeur Services, L.L.C.         | Engineer                   | 2  | 2   |
| TriCoeur Services, L.L.C.         | CADD Technician            | 1  | 1   |
| TriCoeur Services, L.L.C.         | Engineer - Intern          | 1  | 1   |
| Civil Design & Construction, Inc. | Surveyor                   | 2  | 2   |

| ELOS Environmental, LLC           | Environmental Manager      | 1  | 2   |
| ELOS Environmental, LLC           | GIS Analyst                | 2  | 6   |

(Add rows as needed)

### 14. Organizational Chart:

Provide an organizational chart showing ALL **relevant** prime consultant and sub-consultant (if applicable) personnel assigned to the contract, area of project responsibility for each, and reporting lines for the purposes of this contract. An individual's role does not necessarily have to match their DOTD job classification identified in Section 13.

If applicable, identify all personnel performing traffic engineering analysis and/or QC of traffic engineering analysis by placing an asterisk next to their name. Include the certificates required by the Traffic Engineering Process and Report Training Requirements article of the Advertisement in Section 20.

Page 5 of 61 Prime consultant name: TriCoeur Services, L.L.C.

### 15. Minimum Personnel Requirements:

Use the table below to identify both prime consultant and sub-consultant staff designated to work on this contract meeting the Minimum Personnel Requirements (MPRs) specified in the advertisement. Ensure the résumé reflects the required experience stated in the MPR.

| MPR No. Do not insert wording from ad | Personnel being used to meet the MPR (Individual(s) may not satisfy more than one MPR unless specifically allowed by Attachment B of the advertisement) | Firm employed by                  | Type of license / certification & number | State of license | License / certification expiration date |
|---------------------------------------|---|-----------------------------------|--|------------------|---|
| 1                                     | Barry P Gahagan, PE   | TriCoeur Services, LLC            | PE /Civil 21586                          | LA               | 3/31/2024                               |
| 2                                     | Barry P Gahagan, PE   | TriCoeur Services, LLC            | PE /Civil 21586                          | LA               | 3/31/2024                               |

(Add rows as needed)

### 16. Staff Experience:

Résumés shall be provided for all prime and sub-consultant personnel listed in Sections 14 and/or 15 of the proposal. Résumés of personnel not identified in Section 14 or Section 15 of the proposal should not be included and will not be evaluated. Résumés should be limited to 2 pages per person. Any certificates required by the advertisement are to be placed in Section 20.

|              | approximately 2.9 miles to a point that is 700 feet South of Intersection of US 190 and E. Boston St. in Covington, LA. This project also included work in the Abita River and utilized 3D Terrestrial Scanning for the main route.   |
|--------------|---|
| 10/15-12/18  | H.003184.5 I-10 Texas State Line –East of Coone Gully, Calcasieu Parish, LA: Mr. Burgess served as Survey Manager for the project. Duties included meeting with LADOTD, coordination of traditional crews and 3D terrestrial scanning crew, coordination of utility companies on the project, review and verification of drainage crossing I10, merging of existing topographic survey of bridges from LADOTD and final review of all survey data for submittals  |
| 08/16-12/17  | <b>H.011235 I-49 South at Verot School Road, Lafayette, LA</b> : Mr. Burgess served as the Survey Manager for the project. Duties included meeting with LADOTD, and all consultants on the team, coordination of both traditional crews and 3D terrestrial scanning crew, coordination of survey crews with Cardno, Inc, utility locations on the project, met and review right of entry with landowners for project, review of drainage map, merging of existing topographic survey of the I-49 Connector project from LADOTD with current survey of project, review of apparent right of way mapping for prime consultant, and final review of all survey data.             |
| 07//14-10/15 | H.011088.5 I-110 North Street to Plank Road, EBR Parish, LA: Mr. Burgess served as Survey Manager for the project. Duties included meeting with LADOTD, coordination of traditional crews and 3D terrestrial scanning crew, review and verification of drainage map, merging and final review of all survey data for submittals. Other special duties were coordinating with LADOTD District 61 for a rolling lane closure for location of drainage located in the interior of the project along the existing crash wall. Also, coordination with LADOTD Records and EBR City Parish regarding the research of all drainage structures that enter and leave the project area. |
| 04/17-07/17  | H.010006.5-3 LA 58 Petit Caillou Bridge Rehabilitation (Sarah Bridge), Terrebonne Parish, LA: Mr. Burgess served as Survey Manager on this project which included a complete topographic survey, utility coordination, channel cross-sections and the scanning of the existing vertical lift bridge for the design of its repairs/replacement. Project included data collection of the topography via traditional means and methods along with 3D terrestrial scanning and hydrographic surveying.  |
| 03/14-06/14  | <b>H.008369 Cleo Road Roundabout, St. Tammany Parish, LA</b> : Mr. Burgess served as the project manager for the project. CD&C was responsible for the topographic survey that began approximately 2400 ft. NW of intersection of I-59 and US Hwy 1090 and ended approximately 1000 ft. NW of intersection of I-59 and US Hwy 1090. The survey also included 500 ft. of Cleo Road and 175 ft. of Avenue D.  |
| 05/13-07/13  | <b>H.009288 LA 1 Railroad Bridge at DOW, West Baton Rouge, LA</b> : Survey Manager for this project located in West Baton Rouge Parish. The intent is to create a grade separation at the intersection of LA 1 and the R/R spur for DOW. CD&C is performing all of the topographic survey for this project including utility coordination and R/R coordination and permits so that CD&C can survey the spur and parallel line.  |
| 10/14-12/14  | <b>H.011088.5 West Prien Lake, Lake Charles, LA</b> : Mr. Burgess served as the Survey Manager for this project. This project was to provide topographic survey for a new route to be constructed. Topographic survey and DTM was required along the proposed alignment including all utilities and all drainage with the survey limits.  |
| 02/14-03/17  | H.010620 I-49 Design Build: Mr. Burgess managed and supervised all field work, utility coordination, and review of existing survey data for final topographic survey submittal. CD&C also produced ROW maps for the project. Mr. Burgess's duties for this portion also included title reports, review of property surveys and final submittal of final existing right of way plans.  |

| 01/17-12/17   | East Baton Rouge Parish Bridges, East Baton Rouge Parish, LA: In 2017, CD&C has performed topographic surveys for at least 4  |
|---------------|---|
| 01/1/-12/1/   | Bridge Replacement Projects throughout East Baton Rouge Parish. Mr. Ballard served as Survey Project Manager on each of these   |
|               | projects which included cross-sectioning and tracing the channel at each location. These included bridges over Dawson Creek, Claycut  |
|               | Bayou, Copper Mill Bayou, and Cypress Bayou.  |
| 10/16 - 11/16 | H.012728.5 LA 443: Tangi River Bridge Replacement, Tangipahoa Parish, LA: Mr. Ballard served as the Project Manager for this  |
| 10,10 11,10   | Project. Among the duties performed for the project were review of the crew work conditions, review & processing of the survey data,  |
|               | verification and review of final submittal. CD&C completed a topographic survey which included all utilities with depths, all drainage,   |
|               | all building information including finish floor elevations, and all super/substructure of the bridge over the Tangipahoa River. Additional  |
|               | information regarding the river was located by traditional means upstream and downstream for the engineer's design of the new bridge.   |
|               | To utilize data collection of the failed bridge, 3D Terrestrial Scanning was incorporated in conjunction with traditional means to  |
|               | complete the topographic survey. Due to the nature of the project being an Emergency Bridge replacement all staff worked on this  |
|               | project non-stop until field work was completed in less than 3 weeks.   |
| 09/17 - 12/17 | H.012650.5-1 District62 Bridges, Livingston and Tangipahoa Parishes, LA: Mr. Ballard served as a Survey Project Manager for   |
|               | this project which included 5 bridge sites in District 62. In addition to all of the existing data for the bridge and roadway at each site,   |
|               | each channel was cross-sectioned both upstream and downstream of the bridge. These included bridges over the US 190 Bridge over   |
|               | Gray's creek, 2 bridges on LA 442 both crossing East Hog Branch, LA 1063 over the Natalbany River, and US 51 over Ponchatoula   |
| 10/15 15/10   | Creek. Several of these bridges including the US190 one was surveyed utilizing <b>3D Terrestrial Scanning</b> .   |
| 10/15 - 12/18 | H.003184.5 I-10 Texas State Line – East of Coone Gully, Calcasieu Parish, LA: Mr. Ballard served as the Survey Project Manager  |
|               | on this project which is a 6-lane widening of I-10. Duties performed on this project included the review of the survey information from   |
|               | crew, verification of project delivery schedule, processing of data and final review of submittal of project. 3D Terrestrial Scanning was   |
| 01/16 - 08/16 | used in conjunction with traditional means and methods for the completion of this project.  |
| 01/16 - 08/16 | H.005733.5 US 190 Superstreet, St. Tammany Parish, LA: Mr. Ballard served as the Survey Project Manager on this project. CD&C provided a complete topo survey & drainage map along with utility coordination for the project. Project duties included processing of |
|               | data, review of field notes and weeklies, & performing final punch list. This project also included work in the Abita River utilized 3D   |
|               | Terrestrial Scanning for the main route.  |
| 10/15 - 01/16 | H.011773 Hanks Dr/Landis Drive Pedestrian Improvements, East Baton Rouge Parish, LA: Mr. Ballard served as the Survey   |
| 10/13 01/10   | Project Manager on this project that included a topographic survey and establishment of the ROW for Hanks Dr. for installation of new   |
|               | sidewalk.   |
| 06/11 - 09/13 | 260-01-0028, H.002372 LA 42 Widening and Improvements, Ascension Parish, LA: Mr. Ballard worked as a PLS on this project  |
|               | which included boundary and topography, establishing the existing ROW and acquisition of additional ROW.  |
| 07/17 - 12/18 | H.010960.5-2, LA 30 Roundabout at Tanger I-10, Ascension Parish, LA: Mr. Ballard served as the Survey Project Manager on this   |
|               | project that includes a complete topo survey, utility coordination and drainage, along with finish floor elevations of all buildings that   |
|               | fall within the survey limits. Project included data collection of the topography via traditional means and methods along with 3D   |
|               | terrestrial scanning.   |

### 17. Firm Experience:

Identify the team's project experience <u>most relevant</u> to the scope in the advertisement. The projects should be limited to a total of 20, with no more than 5 projects being represented by the prime consultant and with no more than 3 projects represented by each sub-consultant on the team. If more than 5 projects are identified for the prime consultant, all projects identified after the first 5 will not be evaluated. If more than 3 projects are identified for a single sub-consultant, all projects identified after the first 3 from that sub-consultant will not be evaluated. Include no more than one page per project. Projects identified shall only include work performed by firms on the team. The projects identified do not necessarily need to have been DOTD projects.

**Project Description:** The intent of this project was all necessary engineering and related services required for developing plans for the replacement of 35 bridges on the State Highway System and/or local roadways, LA. CD&C provided survey for 6 of these sites. Those include H.013955, H.013956, H.013957, H.013958, H.013959, & H.013989. CD&C used Mobile LiDAR and traditional means and methods to survey the sites in accordance with LADOTD Location and Survey Manual.

#### CD&C's Role:

CD&C performed a topography within the existing right of way on each of the 6 sites our firm was tasked. CD&C also located all utilities within the designated areas of the bridge site and cross-sectioned each channel up and downstream of the bridge. Utilities were marked by LA One Call. **3D Terrestrial Scanning** was used in conjunction with traditional surveying means and methods to collect data for the project.

Members Involved: Karla E. Weston, P.E., Ralph Burgess, PLS, Chris Ballard, PLS, John Ewing, Phil Dupree, Jacob Stoehr, Jason Stoehr, Scott Benton, Madison Mills, LSI & Trenton Norris. Performed in LA: 100%

<u>Project Description:</u> The purpose of this project is to provide a structural, architectural, mechanical, and electrical rehabilitation of the movable bridge and approaches that shall allow it to remain in service for an additional 50 years with routine maintenance along with various other repairs and updates to the site. CD&C was tasked with performing the topographic survey and DTM for this movable bridge structure and site.

CD&C's Role: CD&C performed a topography survey along LA 58 from Little Caillou Road to Bayside Drive within the existing

right of way. Also, CD&C located all utilities within the designated areas of the bridge site and cross-sectioned this large bayou up and downstream of the bridge. Utilities were marked by LA One Call. **3D Terrestrial Scanning** was used in conjunction with single beam hydrographic surveying in addition to traditional means and methods to collect data for the project. To obtain all critical information for design the bridge had to be scanned at both raised and lowered positions.

Members Involved: CD&C employees involved in the project included Ralph Burgess, PLS, Survey Manager; Christopher Ballard, PLS Survey Project Manager; Trent Norris, 3D Scanning Technician; John Ewing, Survey Technician.

Performed 100% I.A.

Project Description: This project is located in West Baton Rouge and East Baton Rouge Parishes in the cities of Port Allen and Baton Rouge, LA. A complete Topographic survey including all utilities (ASCE 38-02, QL "B") with depths and all drainage is required, along with Finish floor elevations of all buildings that fall within the survey limits. The survey begins 1,500 feet West of the western most entrance/exit ramps of the LA 415 and I-10 Interchange. From the I-10, I-12 split the survey shall proceed in southerly and easterly directions along the existing main alignment of I-10 for approximately 1.5 miles & I-12 for approximately 1.5 miles to end the route limits. CD&C's Role:

CD&C as a sub-consultant on this project is responsible for topographic surveying the portion of I-10 in West Baton Rouge Parish beginning at the start of the project limits to a point just before the approach of the I-10 Bridge and the limits of the project along LA 415. This work included using 3D Scanning for the bridge at I-10 bridge @ LA 415 as well as scanning every 500' for control verification and incorporation of the Mobile Lidar for the I-10 pavement.

<u>Services Provided</u>: wetland delineations, preliminary jurisdictional determination, United State Army Corps of Engineers (USACE) nationwide permit applications, threatened and endangered species research, Categorical Exclusions checklist (CE), and solicitation of views (SOV).

ELOS was contracted by Burke-Kleinpeter to provide environmental services for H.013982. The Louisiana Department of Transportation and Development (LADOTD) proposed the replacement of four existing bridges including one site at LA 1042 over Choctaw Creek, one site at LA 1042 over an unnamed creek, one site at LA 10 Spur over Raby Branch, and one site at LA 10 Spur over St. Joseph Branch in St. Helena Parish. This project is one of many bridges part of the DOTD Rural Bridges Phase I projects, for which ELOS was the environmental consultant conducting the environmental reviews and documentation. This project primarily involved wetland delineations and a wetlands finding report. Evidence observed and documented indicates that approximately 0.22 acre of the site location meets the established criteria to be

considered "Section 404 wetlands." In addition, approximately 2.19 acre of this site meet the established criteria to be considered "other waters of the U.S." The DOTD will mitigate the wetlands impacted by construction activities for this project by minimizing impacts as listed in the Louisiana Standard Specifications for Roads and Bridges, 2016 edition, and mitigate for lost wetland habitats by reseeding with appropriate plants and seedlings. No threatened and endangered species surveys were required for this project.

Services Provided: Scenic Rivers and Streams Permits, USACE Permits, Wetland Delineation and Jurisdictional Determination,

Threatened and Endangered Species, Solicitation of Views, and Categorical Exclusion Checklist.

ELOS was contracted by Infinity to provide environmental services for the improvement of DOTD Bridge Replacement projects. LADOTD proposed the replacement of the existing Savanne Road Bridge over Hanson Canal (Recall No. 020165) with a new concrete reinforced bridge at approximately 90° 48' 56.088" West and 29° 35' 37.308" North.

The existing bridge, located approximately 0.82 miles north of LA 182 in Terrebonne Parish, was recommended for replacement by the Louisiana Department of Transportation and Development (LA DOTD). The existing structure was a 4-span, 57-foot-long, and 24-foot-wide concrete bridge. The proposed action was to replace the existing bridge with three 20-foot spans, totaling 60 feet, with 3:1 riprap abutments and a proposed finished grade at branch crossing at 5.51 in accordance with current LADOTD and AASHTO guidelines.

This project included a wetland delineation and jurisdictional determination from the USACE, a Section 404 permit from the USACE, a scenic rivers and streams permit from the LDWF, and a threatened and endangered species survey for West Indian Manatees (*Trichechus manatus*). ELOS was also tasked with preparing and mailing the solicitation of views letters to the relevant agencies and responding to comments. This project qualified for a categorical exclusion (CATEX), meaning a detailed environmental analysis was not required. ELOS prepared and submitted the CATEX documentation.

Firm Personnel Involved: Cory Ricks, Hunter Perrilloux, Mike Hill, and Claire LaBarbera

### 18. Approach and Methodology:

Provide a description of how the work will be performed and provide the proposed project schedule. Include any additional information or description of unique resources that are planned to be used to produce the deliverables. Include any proprietary technologies, methods or approaches that will be used on this project to improve quality or efficiency. If the proposal is for an IDIQ contract, the consultant should review the scope of services in Attachment A to the advertisement to obtain a general understanding of what a typical task order would entail. Based upon that understanding, the consultant should provide a sample schedule that identifies the major milestones, deliverables, tasks, etc., to demonstrate sufficient understanding of a typical task order. The duration of the task order is not required. This section shall be limited to four pages. If more than four pages are included, all pages after the fourth page will not be evaluated.

If the consultant has information it believes is proprietary, label it accordingly.

Off System Bridge Replacements (OSB) Projects are best executed with careful planning, team collaborations, and early awareness of Client concerns and anticipations for the project arguably even more so than On-System project due to the limited size, and frequent challenge of conforming these rural project sites towards compliance with LADOTD/AASHTO design standards.

Prior to the site kickoff meeting a remote investigation of existing site features including topography, approach roadway alignments, flood risks, utility conflicts, route criticality, and right-of-way constraints to have an initial anticipation of project constraints. A review of estimated traffic data (ADT and ADTT) will quickly direct the design team to an understanding of roadway design classification, required bridge clear roadway width and geometrics. The Preliminary Design Report is initiated immediately prior to the site kickoff meeting to facilitate discussion.

To improve team efficiencies, it is preferred to stage the site kickoff meeting between the Project Engineer and Parish representatives briefly in advance of topographic survey crew arrival. At this time an understanding of the Parish's perspectives for the site can be expressed. Issues such as routine inundations (Parish observed high water marks and overtopping if any), seasonal criticality of use such as school bus access, agricultural equipment usage, utility conflicts, channel bank access, channel bank instability issues, debris prone conditions, traffic accident incidence, Right of Way restrictions, etc are best discussed at this early stage along with any anticipated conformance challenges with Design Criteria, all while in an informal setting.

To improve quality and execution of the topographic survey a presurvey meeting is held with the surveyor, the assigned party chief and instrument man (when possible) to discuss the nature of control survey monumentation, preferred methods and detail of capturing relevant ground and surface features, utilities, boundary evidence, hydraulic baseline and channel sections, etc. At this time a review of the LADOTD topographic survey checklist is reviewed and conformance is emphasized. Immediately following establishment of

control, the existing roadway alignment, roadway and terrain surface data is collected and transmitted to office preparation of a preliminary terrain model and surveyed alignment. A concerted effort is made at this time to evaluate and prepare design horizontal alignment for the survey crew to establish and reference as the topographic survey is being completed.

Once the survey has been completed, the field roll and cross sections are developed, data is checked, point data files and existing drainage maps prepared then the survey checklist is completed and submitted to for Department review and acceptance.

QA/QC: The project's QA/QC plan is reviewed upon initiation of each design phase by the identified managers and personnel, through intermittent internal progress reviews and then in advance of all project review submittals to assure best practices are employed and that deliverables will adhere to the LaDOTD standards for the Off System Bridge Program.

DESIGN COORDINATION: The design team initiates alignment and initial coordination between geometric and hydraulic design personnel, discussing field observations, concerns for bridge grade and low chord requirements based upstream flooding, debris passage, channel bank erosions, approach roadway profile allowances for overtopping, conformance with design geometric guidelines. Project alignment, approach roadway profile, roadway width and superelevation transitions. Following 50% design and hydraulic report submittal plan preparation and comment resolutions the design team will continue to advance project development to Pre Plan In Hand or directly to Plan in Hand status when deemed suitable by the LaDOTD. Preliminary Plan development will continue through active participation with the Plan-in-Hand team, engaging dialogue, and considerations of the LADOTD and Parish interests in order to advance the project through to final plan development.

Our relevant and diverse design experience in confronting challenging projects (constricted R/W corridors, utility encroachments, etc.), our familiarity with Parish representatives and our ability to work effectively with the Client/Stakeholders will optimize workflow. By adjusting design methods to meet scope challenges and Owner expectations for the development of safe, durable and the most cost effective solutions can be anticipated. Near conclusion of the preliminary plan phase the require R/W Sketches and Agreements will be drafted for Parish consideration and use in obtaining any necessary R/W.

Final Plan development will proceed under supplemental agreement and Notice to Proceed with accommodation of any necessary standard plan modifications and the full design set compilation. All design calculations and developed plans will be checked for PreACP and ACP submittals. Along with the ACP submittal the final constructability / biddability review is prepared and submitted for LADOTD input, comment and resolution.

#### SUBCONSULTANT PRACTICE & PROCEDURES:

- Topographic Surveys: The topographic surveys shall adhere to all modern survey theory, practice and procedures, and conform to current LADOTD Location and Survey Manual Guidelines and typical surveying methods as applied by LADOTD. This includes all accepted horizontal and vertical control standards as stated in the manual. The LADOTD feature table code list and symbols shall be utilized and met with those included in the latest edition of the survey feature code guidebook produced by the LADOTD Location and Survey Section and Automation. 3D Terrestrial Scanning may be utilized in conjunction with traditional means and methods to capture topography as applicable for each site and will adhere to all LaDOTD Standards as related to Terrestrial and Mobile Scanning. All deliverables will adhere to the Electronic standard as set forth by LaDOTD
- Environmental / Wetland Delineation: Environmental subconsultant will perform the wetland delineation(s) utilizing the methods/guidelines described in the most recent Field Guide for Wetland Delineation, Corps of Engineers Manual, in conjunction with Regional Supplement to the Corps Manual, Atlantic and Gulf Coastal Plain Region. Preliminary data on soils will be taken from the Parish Specific Web Soil Survey and verified in the field. A Global Positioning System (GPS) will be utilized to mark the boundaries of potentially jurisdictional wetlands in the field as well as all data collection points. Pertinent wetland information will be documented in the field using USACE wetland data collection forms. Upon completion of the field survey, reduce the data into a report format containing text, wetland data sheets, photographs and figures depicting the survey area as well as boundaries of potentially jurisdictional wetlands. Field effort, data reductions and reporting should be completed within 4 weeks and ahead of allotted schedule.

Prime consultant name: TriCoeur Services, L.L.C.

#### 19. Workload:

For all contracts where a firm on the team is a prime consultant or sub-consultant and where a) the consultant selection was made by DOTD, and b) a contract was executed by the consultant and the contracting entity by the date the advertisement for this proposal was posted, list all work meeting the following criteria:

- 1) one of the team's firms is responsible for the performance of the work;
- 2) authorization to perform the work has been provided, as provided in the contract between the consultant and the contracting entity;
- 3) the work has not yet been performed and invoiced; and
- 4) the work is not currently suspended for an indefinite period of time.

For indefinite delivery/indefinite quantity (IDIQ) contracts, list open Task Orders individually.

List only the portion of the fees attributable to firms on the team.

# QC procedures shall assure:

- 1) A supervisor or team leader is responsible for determining the necessary technical knowledge and experience of the designer/checker for that specific design; Designers & checkers are assigned to bridge projects by matching experience to project complexity.
- 2) All bridge plan sheets shall include the names or initials and dates of the appropriate designer and checker, and may include their signatures. Including the names or initials of the drafter and reviewer is also good practice. Sealing of the bridge plans by the engineer in responsible charge of the work should follow state requirements.
- 3) All relevant special provisions shall be identified by the appropriate author in responsible charge and checker. Sealing of special provisions should follow state requirements.
- 4) Design calculations, check calculations, review comments/resolutions and other pertinent documents as discussed above shall be retained in the permanent bridge design file. Including other important documents like QC checklists, cost estimates, and supporting reports in the design file is good practice.
- 5) A documented program which details the procedures, standards, and policies to be used in the oversight of bridge design.

## QA procedures shall include:

- 1) Independent check of design calculations with depth and extent of this review commensurate with bridge size, complexity, and level of risk.
- 2) Participation in field engineering reviews during design, construction, and in-service.

### **Design Criteria:**

- 1) Louisiana Department of Transportation and Development Off System Highway Bridge Program Guidelines Latest Edition
- 2) Reference Project Advertisement (Pg 5)

# **Design Checklists:**

Louisiana Department of Transportation and Development - Off System Highway Bridge Program Guidelines - Latest Edition

- 1) Location (Topographic) Survey Checklist
- 2) Plan-in-Hand checklist
- 3) Constructability / Biddability checklist

#### PLAN / CONSTRUCTABILITY / BIDDABILITY REVIEW

(ADOPTED FROM LADOTD WITH MODIFICATIONS)

#### **Purpose:**

- To provide information to assist in producing quality plans.
- To provide a history of information that is easily accessible.
- To provide questions to stimulate discussion of potentially problematic areas.
- To provide questions to stimulate checking details and items required to complete the project.
- To provide aid during design for QA/QC
- To provide primary discussion for the plan-in-hand meeting

#### Instructions for completing the form

- The Design Review portion of the form shall be filled out by the designer during design and prior to PIH submittals.
- The form may be filled out by any district person (ADA, Area Engineer, Lab Engineer, etc.) but the Project Engineer must sign the signature sheet that he concurs with the comments. It is encouraged that the Area Engineer and the Project Engineer both review the plans.
- The Project Engineer and any District personnel designated by the Project Engineer are responsible for reviewing the plans and filling out the review form. The Project Engineer and all reviewers must sign the signature sheet at the back of the form. The Area Engineer is also encouraged to review the plans.
- If answer to the question is in blue box (or lightly shaded if in black and white), a comment is **NOT** required.
- Most questions are designed that a "NO" answer will require comments on what is missing or needed.
- Most questions are designed that a "YES" answer means the plans meet the project needs or a follow up question is required.
- Comments should be shown by reference number on notes page for easy reference. (Example III-2)
- Constructability and Plan-in-Hand questions shall be answered prior to the Plan-in-Hand. The plans should provide enough detail to construct the work required.
- ACP and PS&E / Biddability submittal shall have copies of the completed PIH review attached. If missing contact the Project Manager for a copy. The plans and specifications should provide the details and pay items to bid the project.
- Project Managers are required to respond to all comments and copy all reviewers.
- Each review is considered complete when all comments are addressed
- If question is answered N/A, question is not applicable to project.
- 95% Final Plan reviews (ACP) shall have the completed 95% Preliminary Plan (PIH) review attached. It may be helpful to reference the PIH plan set during the ACP review.
- Comments may be required for certain checklist items. Comments are to be written at the back of the form along with reference numbers for the plan section and checklist item number.

Project managers shall collect all review forms, insert responses to any comments, and copy all reviewers.

# **NOTES PAGE**

| Item      | Comment  | Response  |
|-----------|--|---|
| No        |  |   |
| VII.1     | Is through traffic to be maintained?   | Parish to provide detour signage  |
| VII.25    | Is detour facility clearly depicted?   | Parish to provide detour signage  |
| VIII.8    | Are there provisions for noise abatement (e.g. permanent noise walls)?   | Noise abatement not anticipated   |
| VIII.11   | Is there an erosion control plan provided?   | Erosion control plan to be prepared in Final Plan Phase   |
| IX.2      | If utilities are outside of limits of construction but within the r/w, have all parties (including utility owners) agreed to allow them to remain inplace? | Utility conflicts will be resolved by Parish prior to Bid advertisement                                     |
| IX.6      | Are there conflicts between gravity and force sewer mains and construction? If yes for gravity sewer, are plans included for relocation of sewer?          | Gravity Sewer Main conflict to be resolved. Alternatives to resolve will be reviewed at Plan-in-Hand (PIH). |
| IX.11     | Should an integrated utility relocation plan (scheduling and final location of utilities) be included in the construction plans?                           | Utility conflicts will be resolved by Parish prior to Bid advertisement.                                    |
| X.2       | Have all environmental commitments been identified?  | To be reviewed. No pile driving noise/vibrations at issue since no driving is planned.                      |
| X.4       | Are utility permit requests addressed?   | Any utility permit requests will be resolved by Parish prior to Bid advertisement.                          |
| X.Geo.1   | Have all borings, CPT, test piles, and settlement plates been shown on the plans?  | None taken. Geotechnical scope to be discussed at PIH.  |
| X.AsBlt.3 | Are As-built drawings included with these plans?   | No As built drawings anticipated for inclusion in plans.  |
