

GENERAL NOTES:

- 4" Edge lines shall be placed on all roadways.
- Place edge lines, centerlines and lane lines to avoid longitudinal joints as directed by the project engineer.
- Edge lines in a curb and gutter section should be kept out of the gutter and clear from debris.
- If rumble strips are used, striping details remain unchanged.
- Centerlines shall be placed on roadways with a traveled way width of 16 feet or greater.
- Where the clear width of a bridge is less than the clear width of the roadway, reflectorized pavement markers shall be placed adjacent to the edge line at 20' centers.
- ⇒ indicates the direction of travel (not a pavement marker).
- For non-interstate striping, use one Raised Reflectorized Pavement Marker.
- White Reflectorized Pavement Marker faces same direction traffic and red faces opposing traffic.
