Contract No. 4400027922 State Project No. H.014736.6 Federal Aid Project No. H014736 Entity Contract for St. John W. Bank Miss. R. Trail, Phase 2 (CE&I) St. John the Baptist Parish

Royal is 100% Louisiana-owned & headquartered

Dear Consultant Selection Committee,

Royal Engineers and Consultants, L.L.C. (Royal) respectfully requests your review and consideration of the enclosed proposal prepared in response to the Department's advertisement for Engineering and Related Services for the Entity Contract for St. John W. Bank Miss. R. Trail, Phase 2 (CE&I). Since 2005, Royal has delivered multi-discipline professional engineering, construction and program management, and resident inspection services for industry, government, and the private sector across the Gulf Coast and is fully licensed, bonded, and insured to do so. Additionally, Royal has provided construction engineering and inspection for complex roadway programs throughout South Louisiana, totaling more than \$500 million.

With offices in Baton Rouge, New Orleans, and Lafayette, staffed with roadway design and construction specialists, the Royal Team is positioned to mobilize immediately and perform the requested services within the established parameters. Through our carefully selected team of professionals, we are committed to providing the Department and St. John the Baptist Parish with the full suite of construction engineering and inspection services required, and we are confident we will surpass expectations. Our proposed team meets or exceeds the specified minimum requirements and is organized to meet the needed services described in Attachment A of the advertisement. The Royal Team's statement of qualifications is submitted in direct response to the referenced advertisement. It highlights our relevant experience and expertise and articulates our unique capabilities to perform needed services promptly and professionally within budget.

We appreciate the opportunity to respond and look forward to working with the LaDOTD and St. John the Baptist Parish. Please direct communication to our Primary Point of Contact, Michael Pugh, by phone at (504) 283-9400 or via email at mpugh@royalengineering.net.

Sincerely,

Michael Pugh, P.E., President

Royal Engineers and Consultants, LLC

500M+

Design & Construction management projects in Louisiana since 2005

DOTD FORM: 24-102

PROPOSAL TO PROVIDE CONSULTANT SERVICES

(Revised January 1, 2023)

Prime consultant shall complete the DOTD Form 24-102 without altering the Form's text; however, the instruction and/or guidance for Sections 12 through 23 can be removed but do not remove Section title and number.

ANY CONSULTANT FAILING TO SUBMIT ANY OF THE INFORMATION REQUIRED ON THE DOTD FORM 24-102, OR PROVIDING INACCURATE INFORMATION ON THE DOTD FORM 24-102, MAY BE CONSIDERED NON-RESPONSIVE.

1.	Contract Name as shown in the advertisement	Entity Contract for St. John W. Bank Miss. R. Trail, Phase 2 (CE&I)
2.	Contract Number(s) as shown in the advertisement	4400027922
3.	State Project Number(s), if shown in the advertisement	H.014736.6
4.	Prime consultant name (name must match as registered with the Louisiana Secretary of State where such registration is required by law)	Royal Engineers and Consultants, L.L.C.
5.	Prime consultant license number (as registered with the Louisiana Professional Engineering and Land Surveying Board (LAPELS) if registration is required under Louisiana law)	EF.0003328
6.	Prime consultant mailing address	1501 Religious Street New Orleans, LA 70130
7.	Prime consultant physical address (existing or to be established, if location is used as an evaluation criteria)	1501 Religious Street New Orleans, LA 70130
8.	Name, title, phone number, and email address of prime consultant's contract point of contact	Michael Pugh, P.E., President 504-283-9400 mpugh@royalengineering.net
9.	Name, title, phone number, and email address of the official with signing authority for this proposal	Michael Pugh, P.E., President 504-283-9400 mpugh@royalengineering.net

Prime consultant should enter the firm name in the footer at the bottom of this page. (It will carry over to subsequent pages.)

11. If a Disadvantaged Business Enterprise (DBE) goal has been set for this advertisement, indicate | Firm(s): which firm(s) will be used to meet the DBE goal and each firm(s)' percentage.

N/A

Firm(s)' %: N/A

12. Past Performance Evaluation Discipline Table:

As indicated in the advertisement, insert the completed table here. The percentages for the prime and sub-consultants must total 100% for each past performance evaluation discipline, as well as the overall total percent of the contract.

The **only** past performance evaluation disciplines to be used are: Road, Bridge, Traffic, CE&I/OV, Geotech, Survey, Environmental, Data Collection, Planning, Right-of-Way, CPM, ITS, Appraiser and Other (please specify).

Past Performance Evaluation Discipline(s)	% of Overall Contract	Royal Engineers and Consultants, L.L.C.				Each Discipline must total to 100%
CE&I/OV	100%	100%				100%
Identify the percentage of	work for the <u>ove</u>	rall contract to be perfo	rmed by the prime	consultant and eac	h sub-consultant.	
Percent of Contract	100%	100%				100%

13. Firm Size:

For all firms that are part of this team, indicate the approximate number of personnel to be committed to this contract, by DOTD Job Classification and the total number of personnel within the firm that could provide support, if needed. If a specialized job classification is required and not included on the DOTD job classification list, specify "Other (please specify)" and include the classification title inside the parentheses.

The DOTD Job Classification(s) to be used can be found at the following link:

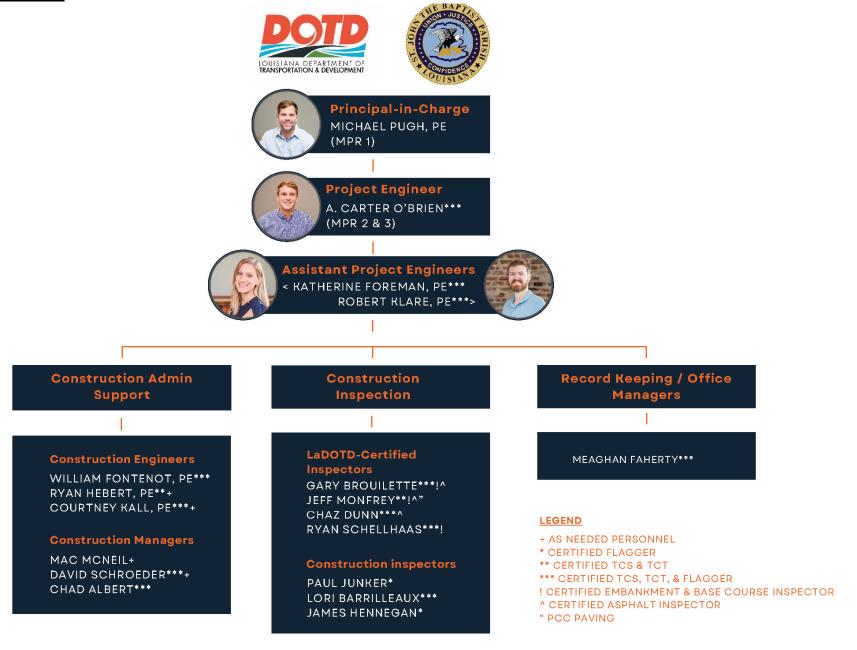

http://wwwsp.dotd.la.gov/Inside LaDOTD/Divisions/Engineering/CCS/Job Qualification/Job%20Classifications%20with%20Descriptions.pdf

Firm name	DOTD Job Classification	Number of personnel committed to this contract	Total number of personnel available in this DOTD Job Classification (if needed)
	Accountant	1	0
	Administrative	1	5
	CADD Operator	1	2
	Clerical	0	3
	Engineer	5	7
	Engineer Intern	0	3
Royal Engineers and Consultants, LLC	Inspector	3	6
	Inspector - Certified	3	4
	Project Office Manager	1	10
	Principal	1	3
	Supervisor–Other	2	4

(Add rows as needed)

14. Organizational Chart:

15. Minimum Personnel Requirements:

Use the table below to identify both prime consultant and sub-consultant staff designated to work on this contract meeting the Minimum Personnel Requirements (MPRs) specified in the advertisement. Ensure the résumé reflects the required experience stated in the MPR. Make sure the P.E. discipline is also listed (highlighted in table) that is meeting the MPR; e.g. professional civil engineer should show the discipline of the license as civil if meeting that MPR.

MPR No. Do not insert wording from ad	Personnel being used to meet the MPR (Individual(s) may not satisfy more than one MPR unless specifically allowed by Attachment B of the advertisement)	Firm employed by	Type of license and discipline meeting MPR/certification & number (Ex: PE # - Civil)	State of license	License / certification expiration date

03/17 - 05/19	Lafayette Regional Airport, Taxiway F Phase III Enabling Project – Lafayette, LA Civil Engineering Subject Matter Expert on team providing construction management services for the Taxiway Foxtrot Phase III construction project located at the Lafayette Regional Airport which includes the creation of a parallel taxiway for Runway 4L-22R and a connector taxilane to extend Taxilane A to provide access to the new terminal. Responsibilities included performing a project constructability review.
09/19 - 03/20	MaxPave Roadway Program: PM/CM of Utility Rehabilitation – New Orleans, LA Principal Engineer responsible for interagency coordination, project management, contract administration, construction management, assessment, and resident inspection services for the CNO DPW and SWBNO combined utility rehabilitation initiative. The project involves 50 to 75 service cuts weekly to conduct the needed point repairs to the sewer and water infrastructure. Completed on-time and on-budget, Mr. Pugh's primary duties included client service management and civil engineering and utility impacts subject matter expertise.
12/10 - 01/17	Regional Transit Authority Streetcar Expansion Program – Construction Management Plus Principal-in-Charge for this streetcar expansion program, where Royal provided construction management and inspection services, document administration, and change order management. Services also included estimating and review of potential change orders and monitoring differing site conditions encountered during construction. The project consists of 14,400 track feet of continuously welded rail, installation of the half grand union at Canal and N. Rampart, an embedded double cross over at Frenchman & Elysian Fields, refurbishment of over 40 historic light poles to include LED bulbs, overhead catenary system installation, installation of traction powered substation, utility relocation and upgrades, and road milling and repaving. Mr. Pugh's team observed demolition, excavation, utility re- location, concrete, asphalt, earthwork, and track-work to ensure compliance with drawings and specifications.
11/10 - 08/11	Bloski Avenue Extension – Belle Chasse, LA Principal Engineer for this road construction project. Royal worked directly for the Naval Facilities Engineering Command Southeast as the prime contractor. This project consisted of the construction of a 1,300-foot asphalt roadway and included the construction of stormwater drainage, sidewalks, concrete driveways, and solar street lighting. Through value engineering efforts, Mr. Pugh reduced NAVFAC's cost by \$800K and reduced the project schedule by 50 days. Royal was also responsible for the development and maintenance of the Stormwater Pollution Prevention Plan (SWPPP), Environmental Protection Plan (EPP), Health & Safety Plan (HASP), and Accident Prevention Plan (APP).
03/07 - 10/09	Roadway Restoration Project – St. Bernard Parish, LA Lead Design Engineer and Project Principal responsible for engineering, roadway plans/design, and construction management services for the restoration of all concrete and asphalt roadways, including associated infrastructure, including sidewalks, driveways, drainage, sewer, and water systems, that suffered damage during Hurricane Katrina and the recovery process. Mr. Pugh was the engineer in responsible charge for all design and served as the primary technical resource for contractor questions and challenges encountered during construction.
01/98 - 08/00	LaDOTD: Off System Bridge Program – Iberia Parish, LA Mr. Pugh was responsible for maintaining and supervising all Iberia Parish's Off-System Bridge Program projects. This project included intermediate inspection of bridges, recommendations for repairs, supervised repair work, coordination with LaDOTD and Parish officials, and maintenance of detailed bridge files.

01/23 – Current	Project manager responsible for providing construction management services including cost estimating, constructability reviews, document control, field representation, and supporting Port NOLA with project close out for the repair of the substructure of the Nashville Wharf "A" facility located on the Mississippi River in New Orleans, LA. The existing wharf was constructed in 1960 and 1961 and is approximately 2,400 linear feet long and 214 feet wide and supported by approximately 5,371 steel piles. The steel pile type varies throughout the structure. The delivery method for the project is Construction Management at Risk (CMAR).
	Sales Tax Street and Road Rehabilitation Program – East Baton Rouge Parish, LA
06/17 - 08/20	Mr. O'Brien assisted the Project Engineer for this project which began in 1990. Mr. O'Brien provided oversight of inspectors, developed plans and quantities for upcoming projects, handled partial estimates and change orders and assisted the project engineer on project administration for the past 5 years. These projects include a variety of rehabilitation jobs; PPC paving patching, asphalt patching, asphaltic concrete overlay, crack sealing and full reconstruction including soil cement. Mr. O'Brien has served as Engineer on the following projects: 14-09 Winbourne Ave, 14-15 Crack Sealing, 15-01 Carrington Place, 15-02 / H.010648 Acadian Thruway Project, 15-03 Santa Maria, 15-04 Magnolia Trace & Shadows of White Oak, 15-05 Brookstown, 15-06 / H.010650 OLOL Project, 15-07 Old Perkins Barringer Foreman, 15-08 Woodale & Lobdell, 15-09 Pearirs Road & Comite Drive, 15-10 Crack Sealing, 15-11 PCC Partial Depth Patching, 15-12 Stumberg, 16-01 / H.011364 Goodwood Blvd., 16-02 / H.011363 Sherwood Blvd., 16-03 Sherwood Forest Streets, 16-04 Dalyrmple, 16-05 Bluebonnet and Nicholson, 16-06 Arbor Walk, 16-07 Choctaw, Prescott and Airway, 16-09 Goodwood and Sherwood Forest, 16-10 / H.011842 Chocktaw Drive Pavement Preservation. (DPW Project No. 15-CEST-0001)
01/19 - 08/19	As an EIT for this 3.436-mile, \$52 million project to widen the westbound lanes of I-10, including total reconstruction of the existing lanes both east and westbound and widening of four structures in St. Martin, Parish, Mr. O'Brien was responsible for Critical Path Method (CPM) schedule review.
08/14 - 08/16	H.003432 / US-51 Business Roundabouts – Hammond, LA Senior Field Engineer responsible for problem identification and resolution in the field. This included preparing, designing, submitting, and revising concrete and asphalt mix designs in accordance with the project plans and specifications. Mr. O'Brien updated the CPM schedule each month, prepared as-built plans during construction to reflect in-field changes, and performed traffic control design during construction. He submitted numerous traffic control plans during construction phase changes and ensured the TC plans were in accordance with the MUTCD. Various drainage structures had to be altered to accommodate in-field conflicts, for which Mr. O'Brien calculated the slope, made drainage structure drawing adjustments, and ensured all changed structures met the project specifications. In addition, he was responsible for OSHA-compliant safety measures being exercised in the field; surveying; and change order management and quality control on all project materials including asphalt density testing, base density testing, concrete cylinders, soil cement densities and striping reflectivity testing.

11 Years of Experience	Mr. Klare has extensive experience in the design of roadways, multiuse trails, and transportation alternative projects (TAP) for LaD projects. Technical skills include AutoCAD, EPA SWMM, and LaDOTD Hydraulic Design Software. He has a Bachelor of Science in Ci Engineering from LSU and his related coursework included Intro to Surveying, Advanced Surveying, Hydrologic Design, Steel Design Concrete Design, Deep Foundations.					
2021-2023	Drainage Improvements to Lime Street, Jefferson Parish Mr. Klare assisted in the design of the full reconstruction of Lime Street in Metairie, LA, from Veterans Highway to W Esplanade Av The \$6.5 million project replaced waterlines, upgraded drainage, and fully removed and replaced the 26' wide concrete roadway a the 0.8 mile stretch. Additionally, Mr. Klare developed traffic control plans for work along Veterans Blvd, W Esplanade Ave, and Kawanee Ave. Design challenges included addressing conflicts between the larger drainage lines, existing utilities, and oak trees.

01/23 – Ongoing	Construction Management and Estimating Services for Nashville Wharf A Substructure Repairs, Phase 2, Port of New Orleans Assistant Project Engineer responsible for assisting the project manager with construction management services including cost estimating, constructability reviews, document control, field representation, and supporting Port NOLA with project closeout for the repair of the substructure of the Nashville Wharf "A" facility located on the Mississippi River in New Orleans, LA. The existing wharf was constructed in 1960 and 1961 and is approximately 2,400 linear feet long and 214 feet wide and supported by approximately 5,371 steel piles.
2019-2021	H.013365 LA45/LA303 Rosethorne Path (Lafitte) Mr. Klare designed a two-mile-long concrete walk along Jean Lafitte Boulevard in Lafitte. The project connected previously isolated sections of residential areas with the town's commercial and recreational assets. The design accommodated a narrow right-of-way, existing drainage inlets, and other utilities while conforming to all ADA and LaDOTD requirements. Construction finished in 2023.
June 2022-March 2023	H.013525 St. Bernard Parish 40 Arpent Trail Mr. Klare designed an asphalt bike trail on 40 Arpent Levee in Chalmette, LA. This 7.5-mile trail expands bicycle and pedestrian access in St. Bernard Parish and includes four bridges across the 40 Arpent Canal. The project is currently under construction.
2010	St. John Eastbank Levee Trail – Multiple projects The levee trail extends from the St. John/St. Charles parish line to the St. Charles/St. James line. As a project engineer, Mr. Klare worked on approximately seven miles of this 14-mile asphalt trail. Construction was completed in phases from 2011-2020.
2016	City of Lafitte Sidewalks Mr. Klare was the project engineer for two projects adding concrete sidewalks around downtown Lafitte. This urban project increased connectivity between critical economic corridors in the Town of Lafitte, providing safe passage for pedestrians and recreational value. Construction was completed in 2017.
2013 to July 2023	Project Engineer-Meyer Engineers, Ltd. Mr. Klare worked on various public and private projects, designing roadways, sidewalks, foundations, and drainage infrastructure. He also performed site and minor structural design. His projects include the LA 59 Realignment and Tammany Trace Tunnel (LaDOTD), the Northeast Louisiana Veterans Cemetery, the S Galvez Street Full Reconstruction (New Orleans) and the Port of South Louisiana Administration Building (St. John the Baptist Parish). Mr. Klare drafted plans and technical specifications, obtained regulatory permits and approval, including LaDOTD, USACE, CUP, Mississippi River Levee Districts, Fire Marshal, and municipal Planning and Zoning. He also prepared cost estimates, project timelines, scopes, and contracts.

11/22 - Ongoing	design of box culverts and retaining walls, and performing design reviews for the design of roadway regrading and reconstruction to						
	facilitate installation of a permanent pipeline casing adjacent to the Mississippi River Levee. The permanent pipeline casing is required						
	as part of a proposed corridor through Plaquemines and St. Bernard Parishes that would deliver dredged sediment from point bars						
	within the Mississippi River to marsh creation areas within the Breton Sound.						
	Camellia - Settlers Trace Turning Lane – Lafayette, LA						
	Civil/Structural Engineer providing engineering services during construction for Lafayette Consolidated Government. Project features include a dedicated right turn lane and second left turn lane at the intersection of Camellia Boulevard and Settlers Trace Boulevard.						
10/21 - 04/22	Services consist of preparing plans and specifications for construction of the project and performing engineering design and analyses for						
10/21 04/22	widening of the concrete roadway, evaluation of the existing drainage infrastructure, and identifying required modifications to the						
	existing drainage system. Additional project features include road striping, sidewalk relocation, and street lighting. Mr. Fontenot served						
	as structural subject matter expert, completing re-design of the catch basin to accommodate changing project needs.						
		•	Completion – Jefferson Parish, LA	<u> </u>	-		
	As an Engineer Intern, Mr. Fontenot assisted with plan and elevation revision, performed quality checks of plans from other firms,						
	designed curtain wall details, and designed overhead sign support addition. Tasks performed included: modification of existing						
06/12 - 07/16	geometric design of baseline for on/off ramps; detailed sections of roadway for graphical grade plans; used current design standards to						
	detail and design curtain	detail and design curtain wall details for final plans; detailed and designed overhead sign support addition and layout for various					
	locations throughout fin	al design; propo	sed options for frontage road modifications and layout of ro	oadway beneath	n bridge structure.		
			Design Guide, AISC Steel Construction Manual, ACI 318-11 I	Building Code Re	equirements for		
	Structural Concrete, LAD	TOD Bridge Des	sign Manual.				

06/12 - 07/17	In-Depth Bridge Inspection of Complex Structures – St. Landry Parish, LA As an Engineering Intern, Mr. Fontenot performed in-depth inspection of the deck, superstructure, and substructure of the approach spans on the Krotz Springs Bridge over the Atchafalaya River. In this role, Mr. Fontenot also coordinated meetings between the
	inspectors; coordinated equipment rentals and staffed personnel; performed bridge inspections; and provided assessment report of bridges including potential repair plans. Codes used included: PONTIS Inspection Manual.
	H.003182 Inner Harbor Canal Bridge Rehabilitation – Algiers, LA
06/12 - 07/17	As an Engineering Intern, Mr. Fontenot designed traffic control and signage including detour plans and assisted in quantity checks and details for Final Plans Tasks performed included: used as-built plans and CAD software to layout and design traffic control options and
00/12 0//1/	detour paths for temporary lane closure during construction efforts; applied LaDOTD Standards for Traffic Management and Signage;
	and refined and checked rehabilitation details and plans for final submittal. Codes used included: MUTCD, LaDOTD Traffic Control Standard Plans, AISC Steel Construction Manual, and ACI 318-11 Building Code Requirements for Structural Concrete.
	I-10 Lake Pontchartrain Bridge Deck Patching & Girder Painting – New Orleans, LA
	As an Engineering Intern, Mr. Fontenot performed field inspection of all bridges. Created Assessment Report. Designed traffic control and detour plans. Wrote TMP for final submittal. Prepared plans and details for repairs. Tasks performed included: planned for
06/12-07/18	inspection and quantification of bridge deficiencies by preparing traffic control plans and reviewing previous inspection reports; used
, , ,	CAD software to develop detour plans and a TMP for the state's review; performed field inspection; compiled data from the field
	inspection to create an assessment report; and used as-built plans and current state standards to prepare and detail suggested repairs. Codes used included: MUTCD, LaDOTD Traffic Control Standard Plans, AISC Steel Construction Manual, ACI 318-11 Building Code
	Requirements for Structural Concrete, AASHTO LRFD Bridge Design Specifications, and LaDOTD Bridge Design Manual.
	Yscloskey Vertical Lift Bridge Painting – St. Bernard Parish, LA
10/16 - 08/17	As a Licensed Engineer, Mr. Fontenot assisted with design and details for a paint containment system, survey and geometric site layout of the new operator house foundation, and phasing plans for different construction activities. Tasks Performed included: Site survey and layout using total station and automatic level, designed and detailed support system for paint containment, and coordination of roadway and water-fairing traffic to optimize productivity during construction activities.
	Luling Bridge Deck Overlay and Repairs – St. Charles Parish, LA
	As an Engineer Intern, Mr. Fontenot revised original traffic control plans and diversion crossovers to expedite construction sequencing
	and feasibility. Updated drainage plan to match revised traffic control. Tasks Performed: geometric Design of Diversion Crossovers,
12/15 – 07/16	hydraulic analysis of watershed area for new and existing drainage design, traffic control layout and phasing plans throughout the project, assisted construction efforts in the field using survey data and design plans, design of debris screen for sandblasting operations
12,13 07,10	near adjacent traffic, quality control of final plans, quantification of cut/fill and roadway elements for cost estimates. Codes Used:
	AASHTO Roadside Design Guide, AISC Steel Construction Manual, ACI 318-11 Building Code Requirements for Structural Concrete,

RR004 Bayou St. John Roadway Restoration for Fairgrounds, and Seventh Ward Group B Roads – New Orleans, LA

As part of a construction administration and resident inspection contract with the City of New Orleans Department of Public Works, Royal provided construction management services for the construction of \$23 million FEMA-funded roadway improvements, one of the largest in the City. The project area covers 110 city blocks and construction is estimated to include 29,000 square yards (SY) of asphalt, 18,000 SY of concrete. It will require the replacement of roadway pavement, water lines, sewer lines, and drainage. The work also includes modifications to improve consumer mobility related to the Americans with Disabilities Act (ADA).

10/19-Ongoing

Tasked with Construction Administration, Resident Inspection, and Overall Construction Management, Royal is providing field management of the contractor and all construction activities, including conducting progress meetings, resolving resident issues, reviewing and approval of monthly pay estimates, field adjustments and applying knowledge and experience in civil construction to ensure the project remains on schedule and budget. Responsibilities include monitoring construction activities to determine and document the progress of the project and compliance with the construction contract, the City's standards and policies, and with an emphasis on site safety, the timely review of submittals, shop drawings, samples, substitute materials, value engineering proposals, the timely rejection of all non-conforming work and materials, the application of work forces to particular portions of the work, the conformance of the work to the construction contractor's schedule, the timely execution of the work, and conducting required interviews of the Construction Contractor. As Royal's resident inspector, Mr. Dunn documents all construction activities and material quantities in-place as well as assisting in the evaluation of the construction contractor payment requests. He also monitors, tests, and maintains, records for all quality testing, submits daily inspection reports, and observes the jobsite safety program.

Royal is providing construction engineering and inspection services for the complete rehabilitation of the Harvey Canal Tunnel and its approaches along US 90Z in Jefferson Parish. The rehabilitation includes new tile lining, drainage pumps, pavement, electrical, and ventilation systems.

It was built in 1957 to go underneath the Harvey Canal on Old Business US 90. The tunnel has a length of 1,079 feet and four traffic lanes and was in critical need of rehabilitation.

Royal assists with construction field records and maintaining the project diary. Resident inspectors check the contractor's construction operations to ensure that all work is performed in accordance with the plans and specifications and using approved materials.

Royal maintains records of the construction operations, prepares monthly pay estimates, and makes monthly progress reports in conformance with LaDOTD requirements.

Royal is providing construction contract administration and construction engineering inspection services for the construction related to the restriping of Cajundome Boulevard, East Pinhook Road/Teurilngs Avenue, Kaliste Saloom Road, Mudd Avenue, and Gendarme Road, in Lafayette Parish.

Royal hosted the preconstruction meeting for the 13.8-mile-long project and assisted LaDOTD with its public notices for the start of the project. Post preconstruction meeting Royal ensured the proper material submittals were received from the contractor and reviewed promptly. During construction, Royal provides onsite full-time resident inspection, uploading reports into the department's Headlight and Site manager software. Royal manages the pay estimates, change orders, field issues, and correspondence with all project members as the project progresses.

Royal personnel ensures that work is performed according to LaDOTD plans and specifications and provides progress reports to the LaDOTD based on daily inspections. After the project, Royal will prepare the 2059 and other required turn-documents.

Royal provided Construction Administration and Resident Inspection Services to rehabilitate the Magnolia Bridge, which crosses Bayou St. John at Harding Drive in Orleans Parish. LaDOTD, Regional Planning Commission, and City bond funds funded the project. It consisted of grading, class II base course, asphalt removal and replacement, steel rehabilitation (cleaning & painting), sheet pile installation, bridge deck replacement, incidental concrete paving and concrete walks, concrete wall repair, and associated work to construct the project according to construction documents. Royal provided construction management (CM) and resident inspection, quality assurance, administration, review of pay applications, and closeout services. Staff included on-site and back-office support personnel, qualified Construction Managers, and Resident Inspectors.

Back office services included: general CM & administration activities, document control, facilitation of preconstruction conference, bid review/ award recommendations, work order basis, generation of details and quantities and management of work order process, review of pay applications and recommendations for payment, review proposed change orders for scope and cost reasonableness, prepare contract change orders, issue necessary interpretations and clarifications of the contract documents, evaluate and determine acceptability of substitute or "or-equal" materials and equipment, recommend substantial completion and prepare substantial completion documentation, prepare/submit record drawings, assist with claims and disputes arising from construction, obtain warranty documentations and conduct warranty period inspection, prepare and submit any required permits not the responsibility of the contractor to obtain, review contractor requests for added days and special work requests, and reviewing and tracking of material submittals.

Field services included assistance with technical issues arising during construction, assistance in coordination with utilities for relocations, facilitation of progress meetings, preparation of agendas and minutes, monitoring and tracking of construction progress, recommendations of work to be rejected while in progress if not following the contract, collection of field measurements for estimated pay item quantities, preliminary and final walk-throughs, and preparation of punch list.

Resident inspection services included: observation of construction at all times the contractor worked on critical work items; inspection, measurement and tracking of work completed for pay requests; observation of utility impacts; observation of adjacent areas and/or property impacts; preparation of daily field reports; photograph and/or documentation of work progress; coordination with A/E, DPW, and LaDOTD on unforeseen items encountered during construction; coordinate with and monitor work performed by the materials testing agency, utilities, and other on-site visitors; preparation documentation required for field changes; verification of contractor providing adequate traffic control and site safety procedures, and preparation of incident reports.

New Orleans Department of Public Works (DPW) Westbank Multiuse Path included pavement restoration, utility repair and replacement (drainage only), sidewalks, ADA- ADA-compliant ramps, and replacement and repair to associated infrastructure. This project was more complex in nature than routine maintenance work, and were single site work orders that are larger in volume than routine maintenance sites. Lawrence Street between Sumner St. - Shirley Dr./Dead End is a two-lane asphalt-surfaced road through a residential neighborhood in New Orleans West Bank. The work consisted of patching, milling and overlaying as well as installing ADA-compliant ramps. All work was successfully completed in accordance with DPW Standard Plans and Specifications. Royal provided construction management, resident inspection, quality assurance, administration, pay applications and closeout services. Staff included on-site and back-office support personnel.

Back Office Services included general vonstruction management snf sdministration sctivities, focument vontrol functions, conducting pre-construction conference, bid review/award recommendation work order basis, platform development and maintenance, developing and producing dashboards and reports, generating details and quantities and managing workd order processes, reviewing pay applications and recommend payment, review of proposed change orders for scope and cost reasonableness, preparing contract change orders, issueing necessary clarifications of the contract documents, evaluating of substitute or "or-equal" materials and equipment, recommending substantial completion, and preparing substantial completion documentation, preparing/submitting record drawings, assisting with claims/disputes, obtaining warranty documentations, conducting warranty period inspection, preparing and submitting any required permits not the responsibility of the contractor to obtain, reviewing contractor requests, and reviewing and tracking material submittals.

Field Services included assisting with technical issues arising during construction, assisting in coordination with utilities for relocations, conducting progress meetings (bi-weekly), preparing agendas and minutes, monitoring and tracking construction progress, recommending work be rejected while in progress if not in accordance with the contract, obtaining field measurements for estimated pay item

quantities, conducting preliminary and final walk-throughs, and preparing punch lists.

Resident Inspection Services included observing construction at all times the contractor is working on critical work items, inspecting, measuring and appropriately tracking (eligible) work completed for pay requests, and ensuring work does not adversely affect utilities, adjacent areas and/or property, etc., preparing daily field reports, and/or field books, documenting work progress, documenting and coordinating with A/E & DPW for unforeseen items encountered during construction, coordinating with and monitor work performed by the material testing agency, utilities, and other on-site visitors as required, preparing memorandums or documentation required for field changes, verifying contractor providing adequate traffic control and site safety procedures, and prepare incident reports

As part of a construction administration and resident inspection contract with the City of New Orleans Department of Public Works, Royal provided construction management services for the construction of \$23 million in FEMA-funded roadway improvements, one of the largest in the City. The project area covers 110 city blocks, and construction is estimated to include 29,000 square yards (SY) of asphalt and 18,000 SY of concrete. It requires the replacement of roadway pavement, 4.6 miles of waterlines, sewer lines, and drainage. The work also includes modifications to improve consumer mobility related to the Americans with Disabilities Act (ADA).

Tasked with Construction Administration, Resident Inspection, and Overall Construction Management, Royal is providing field management of the contractor and all construction activities, including conducting progress meetings, resolving resident issues, reviewing and approval of monthly pay estimates, field adjustments and applying knowledge and experience in civil construction to ensure the project remains on schedule and budget. Responsibilities include monitoring

construction activities to determine and document the progress of the project and compliance with the construction contract, the City's standards and policies, and with an emphasis on site safety, the timely review of submittals, shop drawings, samples, substitute materials, value engineering proposals, the timely rejection of all non-conforming work and materials, the application of work forces to particular portions of the work, the conformance of the work to the construction contractor's schedule, the timely execution of the work, and conducting required interviews of the Construction Contractor. Royal resident inspectors document all construction activities and material quantities in-place and assist in evaluating the Construction Contractor payment requests. They also monitor tests and maintain records for all quality testing, submit daily inspection reports, and observe the jobsite safety program.

Deliverables include the following:

• Construction Field Records, including Daily Reports/Working Day Reports • Final Inspection Report • Monthly Pay Requests, Schedule Updates, and Weather Reports • Overrun/Underrun Statement • Plan Change Requests/Field Change Authorizations • Warranty Inspection Report • Recommendation for Approval of Testing Laboratory Pay Request • Project Schedule • Non-Conforming Materials Notifications • Final "As Built" Drawings • Monthly Progress Report and Invoice

Key Personnel: Carter O'Brien, Meaghan Faherty, David Schroeder, Ryan Schellhaas, Ryan Hebert, Michael Pugh, Courtney Kall, Chad Albert, Jeffery Monfrey, Lori Barrilleaux, Chaz Dunn

18. Approach and Methodology

<u>Project Understanding:</u> We understand that the Entity will be constructing a 10 foot wide asphalt trail along with associated ADA required ramps to accommodate and encourage pedestrian traffic. The project also includes bonfire shelves, benches, and other multi use pedestrian park items. This project, once completed will be a great improvement to parish and provide great benefit to the public.

Experience and Capacity: Royal has ample experience in providing construction engineering, resident inspection services, and construction contract administration in accordance with DOTD's Standards and Procedures. Our team has the understanding and field experience necessary to provide crucial input to LaDOTD regarding project Asphalt, PCCP, base rehab, water and sewer repairs, drainage structures, ADA requirements, and more. Royal has completed projects ranging in scope from Pedestrian Paths, Structural PCCP, Asphalt Mill and Overlay, underground utilities, and sidewalks to ADA-compliant ramps.

Royal has provided CE&I services on numerous similar projects in Louisiana, such as the West Bank Multi Use Path, French Quarter ADA Evaluation, and Harvey Tunnel project, giving our team the experience to manage and inspect the project throughout all construction phases. Our team is led by Carter O'Brien, PE, who brings over 14 years of heavy civil construction management experience. Mr. O'Brien has successfully executed more than 20 projects for LaDOTD. Katherine Foreman, PE, and Robert Klare, PE, will serve as assistant Project Engineers.

<u>Project Phases</u>: Our resident Inspector team is certified in Base and Embankment, Asphaltic Concrete, and PCC Pavement and Structural Concrete. Our construction engineering and inspection team are proficient in SiteManager, Materials Manager, and Headlight and know LaDOTD procedures and processes. Based on our understanding of the project, knowledge of LaDOTD's processes and procedures, and experience completing similar pedestrian and ADA projects across the state, we will execute the project in the phases outlined in the figure below.

- · Design QA/QC plan
- · Attend software training
- Provide testing lab (if needed)
- Review project plans and special provisions
- Review the DOTD-provided sampling plan
- Site visit with project team to ensure critical items are reviewed

- · Host preconstruction meeting
- · Agree upon and issue NTP
- Develop QA/QC plan, materials testing, & field sampling plan
- · Review preconstruction submittals
- Review & respond to preconstruction RFIs
- · Coordinate with stakeholders
- Site visits will be done to assess the need for utility relocation, as coordinated with JPG

- · Client/contractor liaison
- Daily Site inspections
- Develop detailed inspection reports
- Conduct document sampling/testing
- Review & monitor traffic control plans
- · Review submittals
- · Ensure document control
- · Issue monthly pay estimates
- Manage materials
- · Coordinate contractor claims
- QA/QC

- Coordinate final walkthrough
- Develop final punch list
- Obtain final project acceptance
- Assemble required turn-in documents
- · •Submit closeout documents
- 2059 Submittal
- As-builds

Post Award

To hit the ground running post-award, our team will review LaDOTD's project plans and special provisions and prepare a QA/QC plan for the department to review. Should the LaDOTD laboratory be unavailable, Royal will contact an independent lab to provide materials testing services throughout the project.

Pre-Construction

We understand the importance of aligning all parties during the pre-construction phase. This phase will begin with a team kick-off meeting to discuss the project Notice to Proceed date, project goals, QA/QC plan, materials testing/field sampling plan, and pre-construction submittals. Before moving into the next phase, we will also confirm limits, coordinate with utilities, and review and respond to pre-construction RFIs. This phase will be concluded with the pre-construction conference.

Active Construction

During construction, our resident inspector(s) will observe the contractor's operation daily to confirm that all work is performed in accordance with the specified plans, specifications, and approved materials. We will also review the contractor's traffic control plan(s) daily to confirm it follows MUTCD guidelines and adheres to the project plans. As this project will be open to pedestrian traffic, security of the site is of the utmost importance, our inspectors will perform routine inspections and ensure the contractor addresses any potential hazards open to the public.

To confirm and maintain quality on the project, we will follow the project sampling plan provided during preconstruction. Our resident inspector(s) will confirm that Asphalt, PCCP, and Class 2 Base course are sampled and tested according to LaDOTD's procedures and the project plans. Using

SiteManager/Headlight, our team will include detailed documentation and photography of all testing, and will obtain and record all certificates of release, material certificates, CD's, and necessary field paperwork throughout the project.

Royal's Resident Inspectors and Engineers are thoroughly familiar with HMA paving and are ready to identify and address issues in the field before completion to ensure the project has a long lifespan. Royal will inspect the contractors' grades during layout and before paving to help mitigate any issues before the contractor has paved. Our team has also managed many multi-use projects and is well equipped to handle the project demands.

Providing timely responses to the contractor and managing document control is critical to maintaining the project schedule. Royal will manage all project correspondence during active construction, including RFIs, change orders, submittals, change orders, monthly pay estimates, and other project documents. Our team intends to answer all RFIs within two business days. We will document all pertinent information and include all RFIs with the final project documents. Similarly, we will review all change orders per LaDOTD's specifications and, once recommended for approval, will send for electronic signatures via SiteManager.

Should there be a claim or dispute, our team will provide detailed records and track time and material information to thoroughly process on behalf of LaDOTD. The Royal team is also experienced in providing recommendations regarding constructability issues or scheduling disputes and stand ready to support LaDOTD if required.

Substantial Completion

Once the project reaches substantial completion, our team will conduct a final walkthrough with all stakeholders and develop a final punch list items for the contractor to address. Once addressed, we will coordinate and obtain final project acceptance from all project stakeholders.

Closeout

After the project is complete, our team will assemble and submit all required closeout documents in accordance with LaDOTD standards, including the following:

- Final estimate (zero sum)
- Change orders with required signatures
- Certificates of release
- Correspondence
- RFIs
- Dispute resolution

- Weather and working day report(s)
- Construction layout book
- As-built plans submitted with final estimate reflecting all changes made from original plans
- Form 2059

<u>Project Schedule:</u> Royal's team includes experienced critical path schedule reviewers who bring first-hand construction field insight to accurately review contractor schedules for compliance and confirm that time requests are justified.

Typical Schedule: Entity Contract for St. John W. Bank Miss. R. Trail, Phase 2 (CE&I)

Project Location: LaDOTD Contract No. 4400027922 St. John W. Bank Miss. R. Trail, Phase 2

Royal has project experience performing CE&I duties on a similar new-construction multiuse trail.

19. Workload:

For all contracts where a firm on the team is a prime consultant or sub-consultant and where **a)** the consultant selection was made by DOTD, and **b)** a contract was executed by the consultant and the contracting entity by the date the advertisement for this proposal was posted, list all work meeting the following criteria:

- 1) one of the team's firms is responsible for the performance of the work;
- 2) authorization to perform the work has been provided, as provided in the contract between the consultant and the contracting entity;
- 3) the work has not yet been performed and invoiced; and
- 4) the work is not currently suspended for an indefinite period of time.

For indefinite delivery/indefinite quantity (IDIQ) contracts, list open Task Orders individually.

List only the portion of the fees attributable to firms on the team.

Firm(s) ALL FIRMS MUST BE REPRESENTED IN THIS TABLE	Past Performance Evaluation Discipline(s) *	Contract Number and State Project Number	Project Name	Remaining Unpaid Balance**
Royal Engineers and Consultants, L.L.C.	Road, Bridge	4400024593/ H.015009.5	LaDOTD OSBR West Metairie Ave Bridge	\$6,825
Royal Engineers and Consultants, L.L.C.	CE&I/OV	4400024438/ H.010673	Harvey Tunnel Rehabilitation	\$553,658
Royal Engineers and Consultants, L.L.C.	CE&I/OV	4400027010/ H.015018.5	Entity Contract for Lafayette Parish Non-State PVMT Markings	\$53,229

(Add rows as needed)

DO NOT SUM

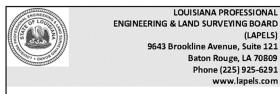

^{*} The **only** past performance evaluation disciplines to be used are: Road, Bridge, Traffic, CE&I/OV, Geotech, Survey, Environmental, Data Collection, Planning, Right-of-Way, CPM, ITS, Appraiser and Other (please specify). If a firm has more than one past performance evaluation discipline for any single project, the firm can use multiple rows to express the remaining unpaid balance per evaluation discipline.

^{**} Round to the nearest dollar. **<u>Do not</u>** round to the nearest thousands. If there are no active contracts with a remaining unpaid balance, place N/A in the Remaining Unpaid Balance column. NOTE: ALL FIRMS MUST BE REPRESENTED IN THIS TABLE. LEAVING THE "REMAINING UNPAID BALANCE" COLUMN BLANK IS NOT ACCEPTABLE.

Certifications/Licenses: 20.

If the advertisement requires submission of licenses and/or certificates, include them here. **Otherwise, leave this section blank**. Royal Engineers and Consultants, L.L.C.

To Whom It May Concern,

This is to verify that the below listed employees Royal Engineers & Consultants have successfully completed ATSSA traffic control training courses in New Orleans, LA as described below:

LA Specific Traffic Control Technician (TCT) 11-30-21 - Meaghan Faherty, Ryan Schellhaas, & David Schroeder

LA Specific Traffic Control Supervisor (TCS) - 12-2-21- Meaghan Faherty, Ryan Schellhaas & David Schroeder

LA Specific Traffic Control Supervisor Refresher (TCS Refresher) 12-3-21-Christopher Barrilleaux & Alec O'Brien

This letter will serve as temporary proof of successful course completion until the above listed employees receive their official certificates from the American Traffic Safety Services Association (ATSSA).

Should there be any questions regarding the above, please contact the undersigned at the above captioned address.

Best Regards,

Thomas L. "Tom" Ervin - ATSSA Master Instructor
