

NOTES

This sheet shall be used with the Temporary Traffic Control General Notes Sheets TTC-00(A), TTC-00(B), TTC-00(C), TTC-00(D), and other Temporary Traffic Control Sheets as appropriate.

- 1) This layout represents the minimum traffic controls required for work in the left lane that would require the left lane to be closed on rural multi-lane divided highways and all interstates where left exit and entrance ramps do not exist. For advance signing see TTC-00(D).
- 2) This layout does not illustrate road work where a ramp entrance or an exit taper falls within the work area.
- 3) This layout does not illustrate road work near a signal or a major intersection.
- 4) A vehicle with a flashing green/amber light and a truck mounted attenuator shall be used on all interstate projects or on all roadways with an ADT greater than 20,000 and a pre-construction speed greater than or equal to 40 mph. This vehicle shall move with work operations not to exceed the roll-ahead distance required by the manufacturer plus 100 feet.
- 5) "Advisory Speed" (W13-1) plaques shall be required if the difference between the speed limit prior to construction and the advisory speed (determined by an engineering study performed by the DTOE) is 10 mph or greater.

* Any sign of the W20-5 series may be used.

** Speed limit is to be returned to legally established speed limit.
