DOTD FORM: 24-102

(Revised March 1, 2022)

PROPOSAL TO PROVIDE CONSULTANT SERVICES

Prime consultant shall complete the DOTD Form 24-102 without altering the Form's text; however, the instruction and/or guidance for Sections 12 through 23 can be removed but do not remove Section title and number.

ANY CONSULTANT FAILING TO SUBMIT ANY OF THE INFORMATION REQUIRED ON THE DOTD FORM 24-102, OR PROVIDING INACCURATE INFORMATION ON THE DOTD FORM 24-102, MAY BE CONSIDERED NON-RESPONSIVE.

Prime consultant should enter the firm name in the footer at the bottom of this page. (It will carry over to subsequent pages.)

1.	Contract title as shown in the advertisement	STATELINE RD OVER CREEK
2.	Contract number(s) as shown in the advertisement	4400025050
3.	State Project Number(s), if shown in the advertisement	H.015014.5
4.	Prime consultant name (as registered with the Louisiana	TriCoeur Services, L.L.C.
	Secretary of State where such registration is required by law)	FITCOEUT Services LLC
5.	Prime consultant license number (as registered with the	EF#: 4660
	Louisiana Professional Engineering and Land Surveying	VF#: 0653
	Board (LAPELS) if registration is required under Louisiana	
	law)	
6.	Prime consultant mailing address	9270 Siegen Lane, Suite 501, Baton Rouge, LA 70810
7.	Prime consultant physical address (existing or to be established, if location is used as an evaluation criteria)	9270 Siegen Lane, Suite 501, Baton Rouge, LA 70810
Q	Name, title, phone number, and email address of prime	Barry P. Gahagan, PE, PLS; Projects Principal
0.	consultant's contract point of contact	Phone: 225-266-7507
	constituit s contract point of contact	E-Mail: BGahagan@TriCoeur.com
0	Name, title, phone number, and email address of the official	Aileen Foley, Managing Principal

12. Past Performance Evaluation Discipline Table:

As indicated in the advertisement, insert the completed table here. The percentages for the prime and sub-consultants must total 100% for **each past performance evaluation discipline**, as well as the overall total percent of the contract.

Sub-consultants are allowed to be used for this proposal. Fill in the table by identifying only those evaluation disciplines consistent with the approach and methodology proposed in Section 18 of the DOTD Form 24-102*, the name of each firm that is part of the proposal, and the percentage of work in each past performance evaluation discipline to be performed by that firm. The percentage estimated for each evaluation discipline is for evaluation purposes only and will not control the actual performance or payment of the work. The percentages for prime and sub-consultants must total 100% for each past performance evaluation discipline, as well as the overall total percentage of the contract.

Evaluation Disciplines	% of Overall Contract	Prime TriCoeur Services, LLC	Firm B Landsource, Inc.	Firm C Terracon Consultants, Inc.	Each Discipline must total to 100%
Survey	28.1%	10%	90%	0%	100%
Bridge	63.3%	100%	0%	0%	100%
Environmental	8.6%	4%	0%	96%	100%
Identify the percentage o	f work for the ove	erall contract to be pe	rformed by the prime	e consultant and each sub-cons	sultant
Percent of Contract	100%	66.4%	25.3%	8.3%	

13. Firm Size:

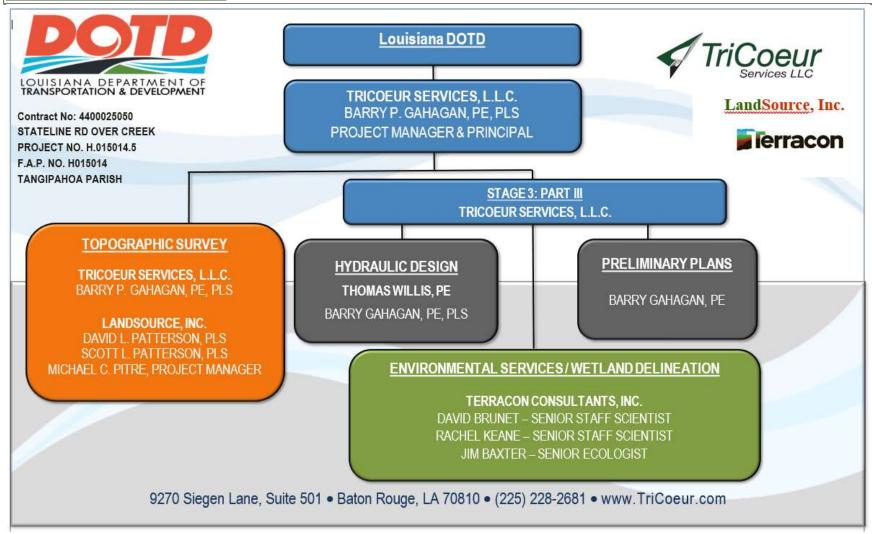

For all firms that are part of this team, indicate the approximate number of personnel to be committed to this contract, by DOTD Job Classification and the total number of personnel within the firm that could provide support, if needed. If a specialized job classification is required and not included on the DOTD job classification list, specify "Other (xxxx)" and include the classification title inside the parentheses. The DOTD Job Classification(s) to be used can be found at the following link:

 $\underline{http://wwwsp.dotd.la.gov/Inside_LaDOTD/Divisions/Engineering/CCS/Job_Qualification/Job\%20Classifications\%20with\%20Descriptions.pdf}$

Firm name	DOTD Job Classification	Number of personnel committed to this contract	Total number of personnel available in this DOTD Job Classification (if needed)
	Administrative	1	1
TriCoeur Services LLC	Principal	1	1
Services LLC	Engineer	2	2
	CADD Technician	1	1
	Engineer - Intern	1	1
LandSource, Inc.	Surveyor	1	2
LandSource, Inc.	CADD Technician	1	4
	Clerical	1	2
	Instrument Man	1	4
	Party Chief	1	4
Orracon	Biologist/Wetlands	2	20
erracon	Environmental Manager	1	15

14. Organizational Chart:

15. Minimum Personnel Requirements:

Use the table below to identify both prime consultant and sub-consultant staff designated to work on this contract meeting the Minimum Personnel Requirements (MPRs) specified in the advertisement. Ensure the résumé reflects the required experience stated in the MPR.

MPR No. Do not insert wording from ad	Personnel being used to meet the MPR (Individual(s) may not satisfy more than one MPR unless specifically allowed by Attachment B of the advertisement)	Firm employed by	Type of license / certification & number	State of license	License / certification expiration date
1	Barry P Gahagan, PE		PE /Civil 21586	LA	3/31/2024
2	Barry P Gahagan, PE	TriCoeur Services LLC	PE /Civil 21586	LA	3/31/2024
3	Barry P Gahagan, PE	Services LLC	PE /Civil 21586	LA	3/31/2024

endangered					
06/21 - 01/22			n Bridge Wetland Delineation, Baton Rouge, LA, DOTD		
			ned a WOTUS delineation for a project that involved a proposed bridge dismantli	ng project and a new	
	replacement structure at t	he Cedar Cre	st bridge location in Baton Rouge, LA where it crosses Weiner Creek.		
01/20 - 02/20	H.013081 Roundhill Road V	Vetland Deli	neation, W. Carroll Parish, LA, DOTD		
	Senior Project Reviewer. Terr	racon conduc	ted a wetland delineation and prepared a preliminary WOTUS delineation report	addressing Section 404	
	of the Clean Water Act an	nd Section 10	f the Rivers and Harbors Act compliance requirements for the proposed Roundhill Road over Little		
	Colewa Bayou bridge rep	lacement.			
12/19 - 02/20	H.013111 Webster Bridge, I				
	Senior Project Reviewer. Terr	racon conduc	ted a wetland delineation and prepared a WOTUS delineation report addressing S	Section 404 of the Clean	
	Water Act (Section 404)	and Section 1	0 of the Rivers and Harbors Act (Section 10) compliance requirements for the pro-	oposed Dorcheat Road	
	over Caney Creek bridge	replacement	project in Webster Parish, LA.		
07/19 - 12/19	H.013143, OSB Avoyelles P	arish, LA, D	OTD		
	Senior Project Reviewer. Terr	racon conduc	ted a wetland delineation for the Carbon Plant Road bridge over Bayou Boeuf in	Avoyelles Parish. The	
	with the 1987 US Army Corps of Engineers (USACE) Wetland Delineation Mar	nual and the Regional			
			Delineation Manual: Atlantic and Gulf Coastal Plain Region (Version 2.0, 2010)		
	design/construction proje	ct with a sim	lar alignment to the previous bridge.		
07/19 - 12/19	H.013130, OSB Ouachita Pa	aris <mark>h, Red C</mark>	ut Road Bridge (over Watson Branch) and Charles Rawls Road (over Prairi	on Bayou), Ouachita	
	Parish, LA, DOTD				
	Senior Project Reviewer. Terr	racon conduc	ted a wetland delineation for the Red Cut Road Bridge traversing Watson Branch	south of West Monroe,	
	LA. The proposed project	t included de	sign/construction of a replacement bridge structure with a similar alignment to the	e previous bridge.	

07/19 - 03/20	H.013163 Wadesboro Road over Unnamed Creek, Tangipahoa Parish, LA, DOTD
	Senior Project Reviewer. Terracon conducted a site visit at the Wadesboro Road Bridge for proposed replacement of the 29.7-foot-long timber
	bridge, a project located withing the Pontchartrain River Basin in the Lake Maurepas Watershed. Terracon subsequently prepared a Waters of
	the US (WOTUS) Delineation report based on site conditions. The delineation was conducted in general accordance with the 1987 USACE
	Wetland Delineation Manual and the Regional Supplement to the Corps of Engineers Delineation Manual: Atlantic and Gulf Coastal Plain
	Region (Version 2.0, 2010), and the Louisiana Department of Transportation and Development (DOTD) guidelines.
05/22 - 06/22	SP H.014270, Lefort Bypass Road OSB, Thibodaux, LA, DOTD
	Senior Ecologist. Terracon prepared a Waters of the US (WOTUS) Delineation report based upon findings obtained during field delineation.
	Terracon recommended consultation with the USACE to determine the appropriate Nationwide Permitting action and for a jurisdictional
	determination of the identified waters, and for potential permit issuance prior to initiating construction activities for this project.
02/22 - 04/22	After the Fact Permitting – McComb Substation, LaPlace, LA, Illinois Central RR
	Senior Project Reviewer. Terracon performed a preliminary WOTUS delineation on the approximately 37.03-acre site to characterize the existing
	site conditions, observe the site for the presence of WOTUS, including wetlands, provide an opinion regarding whether WOTUS (if observed)
	would be considered jurisdictional by the USACE. Additionally, at the time of the WOTUS delineations, Terracon sought to identify (if
	observed) any impact from emergency repair operations from Hurricane Ida.
10/18 - 02/19	City Parish Project No. 16-BR-US-0019, Port Hickey Road Bridge over Drainage Bayou, E. Baton Rouge Parish, LA
	Senior Project Reviewer. Provided environmental wetlands services including Cultural and Historical Sensitivity of the Property (Section 106
	Environmental Review).
07/18 -04/20	SR 306 from SR 400 to SR 369, Baldridge Creek Project, Forsythe County, GA, GDOT
07/10 01/20	Project Manager. For the approximately one-mile road widening project for State Route (SR) 306 located from SR 400 to SR 369, Terracon
	performed a wetland determination in addition to other ecological surveys. Background research was conducted prior to field surveys to identify
	potential ecological resources within the study area. Jurisdictional wetland determinations were performed using the three-parameter approach
	(hydrophytic vegetation, hydric soils, and hydrology) as described in the 1987 USACE <i>Wetland Delineation Manual</i> and utilized the 2012
	Eastern Mountains and Piedmont Regional Supplement as guidance.
	Lustern Wountains and I teamont Regional Supplement as guidance.
08/15 - 10/22	SR371 (Post Road) from SR 9 (Atlanta Hwy) to SR 20 Widening Project, Forsythe County, GA, GDOT
	Senior Project Reviewer. For the proposed widening and roadway reconstruction project, Terracon provided a geotechnical soil survey and several
	environmental services including Phase I Environmental Site Assessment, NEPA, Ecology, Air Quality, Noise Study, History, and
	Archaeology.

Terracon was retained by TriCoeur Services, LLC for the replacement of the Carruth road Bridge over the Little Comite River FEMA Disaster Project in East Feliciana Parish. Terracon provided a wetland assessment and NEPA environmental review for the bridge replacement project.

The Little Comite River is considered a USACE Jurisdictional Water of the US. However, the project qualified for an NWP within the USACE's expedited program for transportation projects due to the lack of wetland habitat in the vicinity of the project area. A report was provided which outlined the site reconnaissance and findings, referenced published maps (including National Wetland Inventory Maps. Topographic Maps, and historical aerial photographs).

Based on the lack of wetland habitat and minimal impacts to the river from the proposed construction, it was recommended that a Nationwide Permit 14- Linear Transportation Projects be obtained for the construction portion of the project.

Terracon was retained by TriCoeur Services to perform a wetland delineation of the Off-System Bridge project which included the replacement of an existing 23-foot wide 190-foot long concrete bridge on Jim Cryer Lane over Bayou Anacoco in Vernon Parish, Louisiana. The replacement bridge was proposed to be a 5-foot span, 240-foot long concrete bridge with 28-foot clear roadway. A wetland delineation was conducted to identify wetland and Waters of the US to provide the USACE with a request for a Jurisdictional Determination. Terracon completed a wetland delineation, utilizing the approved United States Army Corps of Engineers Manual, 1987 and the 2008 Supplement for the Atlantic and Gulf Coastal Plain. Prior to the initiation of field work, Terracon completed a desktop review which included gathering published resources for background information. These resources include the USFWS National Wetland Inventory maps, topographic maps, United States Department of Agriculture Soil Surveys, and aerial photographs. During the site reconnaissance, vegetation communities, hydrologic evidence, and the soil profile to an approximate depth of 16 inches below ground surface was observed and documented. A determination was made as to the actual area of impact based on the construction area and expected bridge footprint with gathered information compiled to prepare a wetland delineation report.

In addition, an Environmental Checklist as required by LADOTD to complete a Categorical Exclusion document to satisfy the NEPA and FHWA requirements was prepared. Solicitation of Views (SOV) Letters including project description and location were prepared and submitted to Federal, State, and Local agency for coordination and consultation. In addition, other readily accessible information was reviewed to provide support documentation toward the completion of the Environmental Checklist. The Environmental Checklist with SOV letter responses, support documentation, and other pertinent information was compiled and submitted to the Contractor for submittal to the LADTOD.

Terracon was retained by TriCoeur Services to perform a wetland delineation of Off-System Bridge project which included designing and constructing the replacement of an existing 64.3-foot wide, 21.3-foot long clear opening concrete decked, steel girder single span bridge over a concrete paved drainage canal in Ouachita Parish, Louisiana. The recommended replacement bridge consists of a 93.2-foot double reinforced concrete box girder bridge. Terracon completed a wetland delineation, utilizing the approved United States Army Corps of Engineers Manual, 1987 and the 2008 Supplement for the Atlantic and Gulf Coastal Plain. Prior to the initiation of field work, Terracon completed a desktop review which included gathering published resources for background information pertaining to wetlands. These resources include the United States Fish & Wildlife Service National Wetland Inventory maps, topographic maps, United States Department of Agriculture Soil Surveys, and aerial photographs. During the site reconnaissance, vegetation communities, hydrologic evidence, and the soil profile to an approximate depth of 16 inches below ground surface was observed and documented at specific observation points. This information was compiled and used to determine and delineate area of wetlands adjacent to the bridge. The wetland habitat and Other Waters were identified and determination was made as to actual area of impact based on the construction area and expected bridge footprint. The information gathered during the site visit and desktop review was compiled to prepare a wetland delineation report.

In addition, an Environmental Checklist as required by the LADOTD to complete a Categorical Exclusion document to satisfy the National Environmental Policy Act (NEPA) and Federal Highway Administration (FHWA) requirements to be prepared. Solicitation of Views (SOV) Letters including project description and location were prepared and submitted to Federal, State, and Local agency for coordination and consultation. Other readily accessible information was reviewed to provide support documentation toward the completion of the Environmental Checklist. These sources included the NRCS Web Soil Survey, USFWS iPAC Project Review Application, EPA Sole Source Aquifer Map, FEMA FIRM Map, and other sources. The Environmental Checklist will include SOV letter responses, support documentation, and other pertinent information was compiled and submitted to the Contractor for submittal to the LADTOD.

Prime Consultant: TriCoeur Services. LLC

Key Members: Jim Baxter, Rachel Keane

18. Approach and Methodology:

INTRODUCTION

The staff provided by the TriCoeur Services, LLC team offer a combined over 60 years of LADOTD Off-System Bridge Replacement (OSBR) experience with a record of project delivery for the OSBR program. Our staff has surveyed and prepared plans for OSBR projects involving both standard plan and numerous non-standard structures in accordance with appropriate LADOTD procedures and manuals including roadway and bridge design, BDEM, BDTM's, environmental and OSBR guidelines. Our team is led by Barry P. Gahagan, PE, PLS, who has served in various roles on LADOTD bridge replacements. Our Survey team includes David L. Patterson, PLS, who has led TriCoeur's survey effort on 7 LADOTD bridge replacements who has been involved in the OSBR program over 15 years. TriCoeur's team includes Terracon Consultants. Inc. who has a long history of performing environmental services for LADOTD through TriCoeur. Jim Baxter holds Wetland Delineation certification since 2005 and has over 20 years of experience performing wetland delineations.

PROJECT UNDERSTANDING & SITE VISIT

A site familiarization will be conducted to assess the project conditions, confirm Project site, identify potential design challenges, and understand Tangipahoa Parish concerns. Helpful dialogue can include site closure concerns, flood history, and utility and R/W constraints in advance of design preparation.

TOPOGRAPHIC SURVEY

Landsource will perform the topographic survey for the project. The TriCoeur engineering staff works closely with survey staff during this phase to ensure that all required data is collected. The dual control and collaboration provides greater QA/QC. Surveys will be completed in accordance with LADOTD Off-System Bridge Guidelines and applicable LADOTD Location & Survey requirements. GPS control will be established using at minimum four (4) control points set in concrete with levels run between these points.

Once control is established and sketches complete, the topographic surveys will continue for the existing roadway, bridge, and channel/river. Surveys will be extended beyond traditional limits to incorporate any curves or additional geometric changes needed for design. Additional data points needed to show DTM break lines and surface anomalies will be collected, and any upstream structures in the channel/river will be surveyed. Bridge sketches will be provided and the channel/river traverses shown on the field roll. Survey data will be reviewed by the project engineering staff for completeness prior to preparation of survey deliverables and field rolls. The survey submittal will include all items required by the LADOTD OSBR Guidelines including photographs, point listing and plotted cross sections. Surveys will undergo QA/QC by both the survey and engineering teams prior to submittal to LADOTD.

Prime Consultant: TriCoeur Services. LLC

TriCoeur Services LLC

50% PRELIMINARY PLANS & HYDRAULICS ANALYSIS

After surveys are reviewed and approved by LADOTD, our team will begin the hydraulics analysis and preparation of 50% Preliminary Plans. <u>Design Criteria</u>

Tricoeur will review the 5-year crash history of the site as provided by the Parish to determine the roadway's performance and if any geometric improvements should be considered. Poor roadway performance may be justification for addressing geometric issues within the project limits per Section 1.2 of A Policy on Geometric Design of Highways and Streets, AASHTO, 7th Edition (Green Book). Upon review of data, bridge design criteria and LADOTD Design Report Forms will be submitted for review and approval, guiding the remainder of plan development.

Hydraulics & Scour Analysis

We will begin the hydraulics and scour analysis by reviewing additional data including topographic maps, FEMA Firm maps, USGS Quadrangle maps and LiDAR to delineate the site's drainage basin. Peak discharges and water surface elevations will be developed. Hydraulic design will be conducted in accordance with the LADOTD Hydraulics Manual and the results prepared in report format along with the Hydraulic Data table. The Bridge, Type, Size and Location (TS&L) will determine the appropriate bridge length, revetment slopes and hydraulic opening will be developed at the start of the hydraulics analysis. The existing bridge(s) may be subject to overtopping and debris loading. Our staff has the recent relevant experience and design tools to perform the design of a non-standard bridge structure in-house per LRFD methodology to accommodate non-standard site conditions.

75% PRELIMINARY PLANS (PRE-PIH) & SOLICITATION OF VIEWS (SOV's)

After review of the 50% Preliminary Plans, Tricoeur will address all comments will prepare the Pre-PIH plans, if necessary, or proceed to Plan in Hand. Upon approval of the replacement structure, Tricoeur and Terracon will prepare the Solicitation of Views (SOVs), receive DOTD approval thereof and mail these to the recipient list provided by LADOTD Environmental Section. Responses will be logged and loops closed to all SOV responses.

95% PRELIMINARY PLANS (PLAN IN HAND)

Comments from the 50% PP or, 75% PP (if necessary) will be addressed in the Plan in Hand submittal. The roadway model, typical sections, plan & profiles, general notes, bridge GPE, summary of estimated quantities, and construction signing will continue to be developed from the previous plan submittal(s). If superelevation is required, the superelevation diagrams will be further developed and completed by the end of preliminary plans along with the foundation layouts. Standard Plan lists, cost estimate and the Constructability & Biddability Review form will be provided. Tricoeur will attend the Plan in Hand meeting onsite with LADOTD and Parish representatives. Meeting notes will be provided within three (3) days.

100% PRELIMINARY PLANS (POST PLAN IN HAND PRINTS)

Plan development will continue to progress as comments are addressed and major design elements are completed. Items discussed at the PIH meeting will be addressed and added to the plans per the PIH Meeting Memorandum.

Prime Consultant: TriCoeur Services, LLC

TriCoeur Services LLC

Environmental

The wetland delineation will be conducted onsite and a wetland findings report prepared in accordance with US Army Corps of Engineers (USACE) guidelines. A Preliminary Jurisdictional Determination (PJD) will be requested from the USACE upon report completion. Permit sketches sized 8.5"x11" will be prepared to accompany the wetlands report, SOV packet, and Environmental Determination Checklist. R/W Sketches & Other Documents

TriCoeur will prepare the Right of Way Sketch per OSBR guidelines showing the required taking lines and anticipated parcels affected along with a draft of the R/W agreements. A draft utility conflict matrix will be provided to the Parish to aide in their responsibility to relocate utilities. Our site visit will establish initial evidence of existing utilities. In addition to the 100% Preliminary Plans, environmental package and R/W sketches, the Design Report forms will be finalized and sealed by Tricoeur's Engineer of Record. The Level 1 or Level 2 TMP checklists will also be prepared and submitted. Pile length requests with all supporting documentation will be submitted at this stage for use by the geotechnical engineer.

75% FINAL PLANS (PRE-ADVANCED CHECK PRINTS)

Following the environmental approval and receipt of the Notice to Proceed for Final Plans, Tricoeur will begin the development of additional plan sheets required including embankment widening details, geometric layout (if necessary), erosion control plans, quantity summary sheets, Pile Data & Elevation, and concrete surface finish. All bridge structure and pile cutoff elevations will be finalized. Any special design superstructure or substructure bridge elements or special approach slabs will be fully detailed and placed on bridge sheets. Bridge railing, joint and bearing details will also be completed. If a nonstandard structure is chosen for the site, a draft of the bridge calculations and Load Resistance and Factor Rating (LRFR) will be prepared at this stage to ensure adequacy of reviews.

98% FINAL PLANS (ADVANCED CHECK PRINTS)

Comments from the 60% Final Plans (Pre-ACP) will be reviewed with LADOTD and addressed. Additional details, notes or changes will be added to the plans and quantities will be completed. The ACP Plans will be provided to the Plan Quality Unit (PQU) if necessary. An ACP review meeting will be held to ensure all comments are addressed. Upon resolution, a 98% Final Plan set will be prepared for review by the Chief Engineer and use by General Files to prepare the proposal. Tricoeur will work with LADOTD staff to input pay items and quantities into AASHTOWARE and generate final cost estimates.

100% FINAL PLANS (TRACINGS)

Tricoeur will provide the 100% Final Plans (Tracings) as per OSBR Guidelines with the Title Sheet on Mylar for Chief Engineer signature. This submittal will be prepared once all comments are addressed from task managers, PQU and/ or the Chief Engineer. Parish granted Design Exceptions will be noted on the Title Sheet. A bound calculations book will be prepared and submitted with the original field books and an electronic copy of the Hydraulics Report.

Prime Consultant: TriCoeur Services. LLC

TriCoeur Services LLC

QUALITY CONTROL AND QUALITY ASSURANCE (QC/QA)

A project specific QC/QA plan has been included Section 21. Each submittal will be accompanied by LADOTD QC/QA certification forms. Design and plan comments, along with their resolutions will be documented in Design Comment Review forms.

LETTING

Tricoeur will respond to questions and assist LADOTD during letting. Upon receiving the bid results and tabulations, Tricoeur will provide additional information to LADOTD as needed regarding contract award.

STAGE 5: CONSTRUCTION

Tricoeur staff will be available to provide LADOTD with Construction Support (if needed) by assisting with RFI's, reviewing shop drawings, evaluating contractor submittals, attending meetings, and providing design review assistance in the event of bridge component changes

- Wetland Studies	D Brunet (Terracon)	J Baxter (Terracon)	R Keane (Terracon)	J Baxter (Terracon)
- Environmental Clearance	D Brunet (Terracon)	J Baxter (Terracon)	R Keane (Terracon)	J Baxter (Terracon)
- Right of Way Agreement / Sketch	B Gahagan, PE, PLS	B Gahagan, PE, PLS	N Lowe, EI	B Gahagan, PE, PLS
Stage 3, Part IV				
- Final Plans	B Gahagan, PE, PLS	B Gahagan, PE, PLS	TM Willis, PE N Lowe, EI	B Gahagan, PE, PLS

QC procedures shall assure:

- 1) A supervisor or team leader is responsible for determining the necessary technical knowledge and experience of the designer/checker for that specific design; Designers & checkers are assigned to bridge projects by matching experience to project complexity.
- 2) All bridge plan sheets shall include the names or initials and dates of the appropriate designer and checker, and may include their signatures. Including the names or initials of the drafter and reviewer is also good practice. Sealing of the bridge plans by the engineer in responsible charge of the work should follow state requirements.
- 3) All relevant special provisions shall be identified by the appropriate author in responsible charge and checker. Sealing of special provisions should follow state requirements.
- 4) Design calculations, check calculations, review comments/resolutions and other pertinent documents as discussed above shall be retained in the permanent bridge design file. Including other important documents like QC checklists, cost estimates, and supporting reports in the design file is good practice.
- 5) A documented program which details the procedures, standards, and policies to be used in the oversight of bridge design.

QA procedures shall include:

- 1) Independent check of design calculations with depth and extent of this review commensurate with bridge size, complexity, and level of risk.
- 2) Participation in field engineering reviews during design, construction, and in-service.

Design Criteria:

- 1) Louisiana Department of Transportation and Development Off System Highway Bridge Program Guidelines Latest Edition
- 2) Reference Project Advertisement (Pg 5)

Design Checklists:

Louisiana Department of Transportation and Development - Off System Highway Bridge Program Guidelines - Latest Edition

- 1) Location (Topographic) Survey Checklist
- 2) Plan-in-Hand checklist
- 3) Constructability / Biddability checklist

PLAN / CONSTRUCTABILITY / BIDDABILITY REVIEW

(ADOPTED FROM LADOTD WITH MODIFICATIONS)

Purpose:

- To provide information to assist in producing quality plans.
- To provide a history of information that is easily accessible.
- To provide questions to stimulate discussion of potentially problematic areas.
- To provide questions to stimulate checking details and items required to complete the project.
- To provide aid during design for QA/QC
- To provide primary discussion for the plan-in-hand meeting

Instructions for completing the form

- The Design Review portion of the form shall be filled out by the designer during design and prior to PIH submittals.
- The form may be filled out by any district person (ADA, Area Engineer, Lab Engineer, etc.) but the Project Engineer must sign the signature sheet that he concurs with the comments. It is encouraged that the Area Engineer and the Project Engineer both review the plans.
- The Project Engineer and any District personnel designated by the Project Engineer are responsible for reviewing the plans and filling out the review form. The Project Engineer and all reviewers must sign the signature sheet at the back of the form. The Area Engineer is also encouraged to review the plans.
- If answer to the question is in blue box (or lightly shaded if in black and white), a comment is **NOT** required.
- Most questions are designed that a "NO" answer will require comments on what is missing or needed.
- Most questions are designed that a "YES" answer means the plans meet the project needs or a follow up question is required.
- Comments should be shown by reference number on notes page for easy reference. (Example III-2)
- Constructability and Plan-in-Hand questions shall be answered prior to the Plan-in-Hand. The plans should provide enough detail to construct the work required.
- ACP and PS&E / Biddability submittal shall have copies of the completed PIH review attached. If missing contact the Project Manager for a copy. The plans and specifications should provide the details and pay items to bid the project.
- Project Managers are required to respond to all comments and copy all reviewers.
- Each review is considered complete when all comments are addressed
- If question is answered N/A, question is not applicable to project.
- 95% Final Plan reviews (ACP) shall have the completed 95% Preliminary Plan (PIH) review attached. It may be helpful to reference the PIH plan set during the ACP review.
- Comments may be required for certain checklist items. Comments are to be written at the back of the form along with reference numbers for the plan section and checklist item number.

Prime Consultant: TriCoeur Services. LLC

Project managers shall collect all review forms, insert responses to any comments, and copy all reviewers.

	Description		omme	nts		tructat	oility	A	CP	Biddal	oility
		N/A	Yes	No	N/A	Yes	No	Yes	No	Yes	No
	I. TYPICAL SECTION SHEETS										
1.	Has District been consulted on the pavement type?		<								
2.	Is District in agreement with the typical section?										
3.	Are project limits covered by typical sections?		<								
4.	Are superelevation diagrams and tables provided?	✓									
	4a. If yes, Is the design speed noted on the diagram?										
5.	Does the typical section fit within existing and/or proposed right-of-way? (Check cross sections)		✓								
6.	Will the typical section drain water from the base course?		✓								
	6a.If yes, is there a method/detail to drain and required items?										
7.											
	7a. If yes, what types are applicable? (List Types)										
	7b. If no, Is lime treatment provided in the plans?										
8.	Are all measurements, thicknesses, and slope rates labeled and accurately indicate what is to be constructed?		✓								
9.	Is the minimum ditch elevation dimension shown on the typical section?										
			✓								
	II. SUMMARY SHEETS										
1.	Will existing ditch cleaning be required?										
	1a. If yes, are there limits and pay items?										
2.	Are there sufficient removal items for the types of pavement/structures being removed?	✓									
3.	Is method of payment for earthwork design addressed (e.g. "temporary" borrow, "additional excess", detour material, embankment, etc.)?		<								

		Desig	n			Cor	struc	tion		
Description		Revie omme	-		n-in-Ha tructal		A	CP	PS8 Bidda	
	N/A	Yes	No	N/A	Yes	No	Yes	No	Yes	No
4. Have sufficient temporary erosion control items been included?		<								
5. Are construction entrances required?										
5a. If yes, are the number and section shown?										
6. Is method of payment for removal of pavement satisfactory?										
7. Is traffic maintenance aggregate required?										
7a. If yes, how much?										
8. Is there a summary of drainage structure sheet provided?										
8a. If yes, are items adequately covered?										
8b. If no, is one required? Why?										
9. Are work elements identified clearly with all corresponding pay items included with adequate quantities to construct project? (i.e. summary tables)	4									
10. Is there any work under this project designated as "no direct pay"?			✓							+
10a. If yes, is this work clearly linked to a specific pay item that can be quantified in the contractor's bid item list?										
11. Are permanent erosion and pollution control items included?		✓								
III. PLAN-AND-PROFILE SHEETS										
Is adequate right-of-way provided for relocation of utilities?		<								
2. Is there space between the R/W line and drainage structure to allow for utility relocation?		<∕								
3. Are right-of-way and property line dimensions shown on plans?		<∕								
4. Will any right-of-entry agreements be required?			✓							
4a. If yes, is this satisfactory?										
4b. If yes, who will secure it?										
5. Does existing horizontal or vertical clearance allow for construction?										
6. Are all the utility owners with contact numbers listed?		<∕								
7. Are the existing utility locations marked in the plans?		✓								
8. Are the utility conflict boxes and their location noted on the plans?		<								
9. Will overlay affect the intersection, gutters, or curbs drainage?	✓

·	N/A	Yes	No	N/A	Yes	No	Yes	No	Yes	No
9a. If yes, are adjustments required?										
10. Are retaining walls required?			✓							
10a. If yes, are details provided for the walls?										
11. Are all oil or gas wells on the project shown on the plans?	✓									
12. Are encroachments on the right-of-way being addressed?										
13. Are existing improvements within 50' of required right-of-way shown on the plans?		<								
14. Is there any potential hazardous waste site / UST?			<							
15. Have construction or drainage servitudes been shown?		<∕								
16. Are the limits of clearing, grubbing, and landscaping shown?		</td <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td>								
17. Can any significant tree be allowed to remain?										
17a. If yes are those to remain been identified?										
18. Are there apparent conflicts between plans and specifications?			<							
19. Are the benchmark data, required elevations, and curve data on the plans?		✓								
20. Does location of the grade shown on the typical section (sub grade or finished) match grade shown in profile? (Check for label)		✓								
21. Are vertical and horizontal limits of removal clear?										
21a. If yes, are the depths of embedment required excavation shown.										
21b. If yes, are details of removable item required?										
22. Have arrangements been made for relocation of hydrants by utility agreement?										
23. Do general site conditions conform to those represented in plans?										
24. Is existing topography accurate and up-to-date?										
25. Does profile fit the terrain?		✓								
IV. DRAINAGE INFORMATION										
If subsurface drainage is being used, is there any evidence of effluent sewerage entering										
existing roadside ditches?										
1a. If yes, what is the plan of action										
Is adequate outfall information shown?		\checkmark								

			Desig	ın			Cor	struc	tion

NOTES PAGE

Item No	Comment	Response
VII.1	Is through traffic to be maintained?	Parish to provide detour signage
VII.25	Is detour facility clearly depicted?	Parish to provide detour signage
VIII.8	Are there provisions for noise abatement (e.g. permanent noise walls)?	Noise abatement not anticipated
VIII.11	Is there an erosion control plan provided?	Erosion control plan to be prepared in Final Plan Phase
IX.2	If utilities are outside of limits of construction but within the r/w, have all parties (including utility owners) agreed to allow them to remain inplace?	Utility conflicts will be resolved by Parish prior to Bid advertisement
IX.6	Are there conflicts between gravity and force sewer mains and construction? If yes for gravity sewer, are plans included for relocation of sewer?	Gravity Sewer Main conflict to be resolved. Alternatives to resolve will be reviewed at Plan-in-Hand (PIH).
IX.11	Should an integrated utility relocation plan (scheduling and final location of utilities) be included in the construction plans?	Utility conflicts will be resolved by Parish prior to Bid advertisement.
X.2	Have all environmental commitments been identified?	To be reviewed. No pile driving noise/vibrations at issue since no driving is planned.
X.4	Are utility permit requests addressed?	Any utility permit requests will be resolved by Parish prior to Bid advertisement.
X.Geo.1	Have all borings, CPT, test piles, and settlement plates been shown on the plans?	None taken. Geotechnical scope to be discussed at PIH.
X.AsBlt.3	Are As-built drawings included with these plans?	No As built drawings anticipated for inclusion in plans.

22. Sub-consultant information:

If one or more sub-consultants will be used, provide the name, address, point of contact and phone number for each. Otherwise, leave this section blank.

Firm Name (as registered with Louisiana's Secretary of State)	Address	Point of Contact and email address	Phone Number
LANDSOURCE, INC. (Charter Number 34514462D)	6730 Exchequer Dr. Baton Rouge, LA 70809	David L. Patterson patterson@landsource.com	(225)752-0995
TERRACON CONSULTANTS, INC. (Charter Number 35701137F)	2822 O'Neal Lane, Building B Baton Rouge, LA 70816	D'Juana Beason Djuana.beason@terracon.com	225-344-6053 225-614-0404 (mobile)

23. Location:

If location is an evaluation criterion for this advertisement and the prime consultant intends to establish a local presence, describe the plan for doing so. Otherwise, leave this section blank.
