

NOTES

This sheet shall be used with the Temporary Traffic Control General Notes Sheets TTC-00(A), TTC-00(B), TTC-00(C), and other Temporary Traffic Control Sheets as appropriate.

- 1) This layout represents the minimum traffic controls required for moving operations on two-lane roads with two-way traffic, such as striping, street sweeping, and placement of raised pavement markers.
- 2) Distances between vehicles may vary and should be adjusted due to drying time and sight obstructions such as overpasses and hills. Vehicles with attenuators shall move with work operations. Buffer space shall not exceed roll-ahead distance required by the manufacturer plus 100 feet.
- 3) If a queue greater than 5 minutes (about 1000 feet) exists, the contractor shall cease operations and pull over to the shoulder until the queue dissipates.
- 4) Flaggers may be used with this layout, if needed. See TTC-00(B).
- 5) All construction vehicles with flashing lights shall use green/amber colors.

* Any sign of the W20-1 series may be used.
