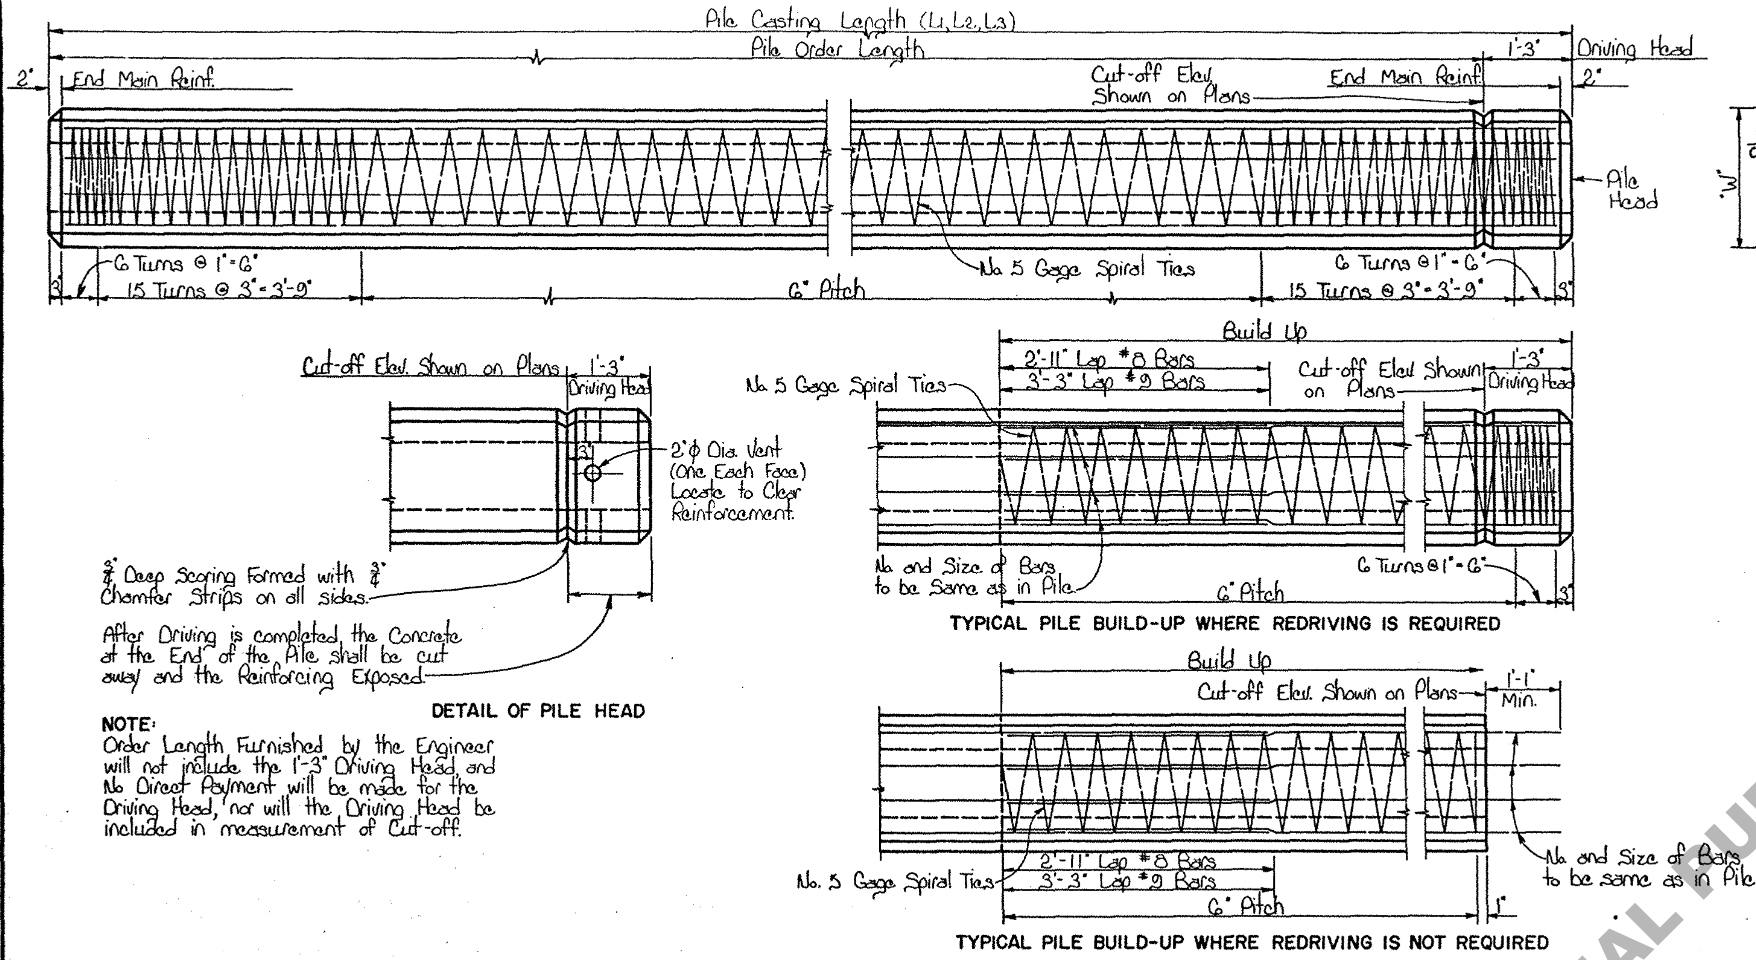
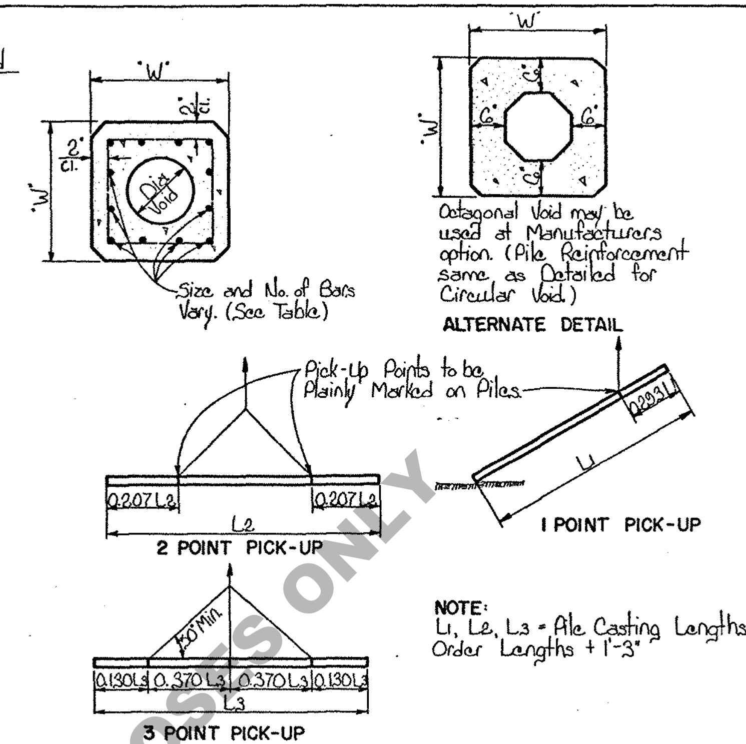
	STATE PROJECT	PARISH	SHEET NO.



DETAILS OF 24,30 & 36 INCH SQ. PRECAST REINFORCED CONCRETE PILES

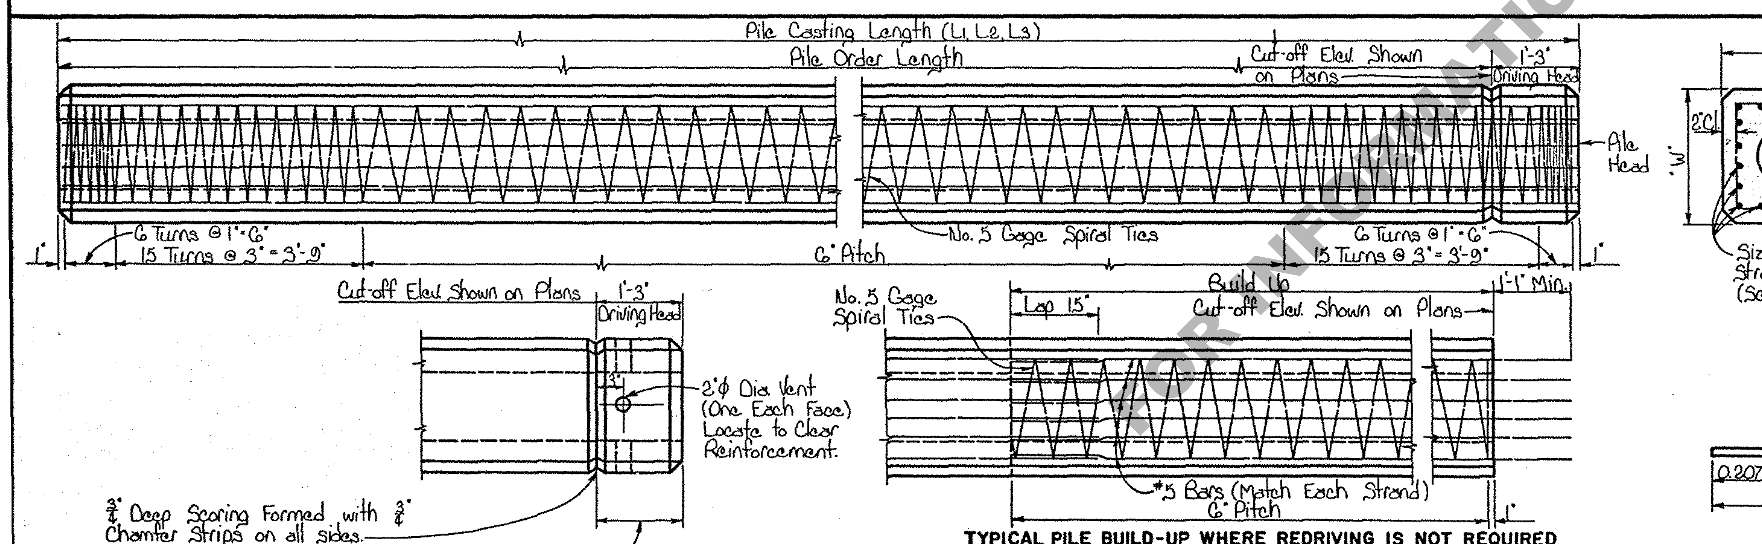


GENERAL NOTES:
PRECAST REINFORCED CONCRETE PILES

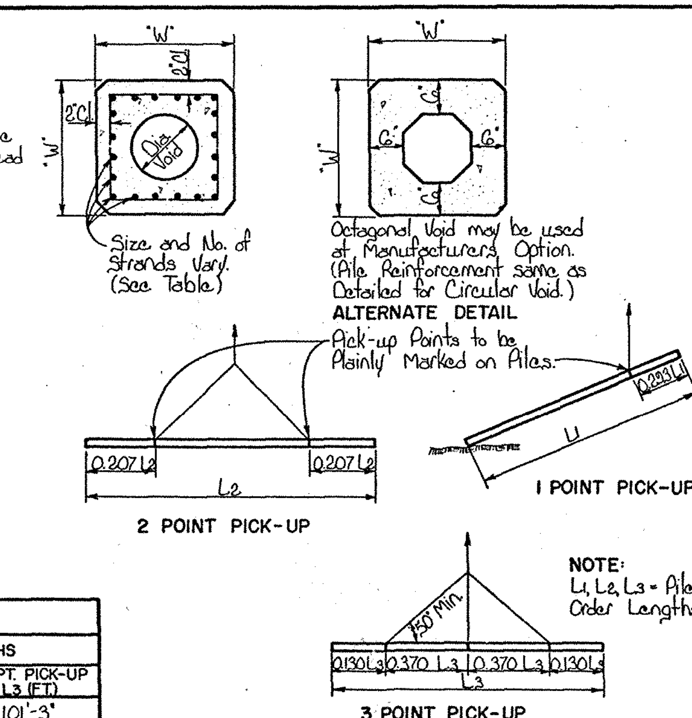
Construction Specifications: Latest Approved La. Dept. of Highways Std. Specs.
Design Specifications: A.A.S.H.O. Std. Specs. for Highway Bridges 1957 as amended to Dec. 31, 1958
Concrete to be Class "A".
Dimensions to Reinforcing Steel are to Bar Faces.
Deformed Reinforcing Steel to be Intermediate or Hard Grade A.S.T.M. A15 or A.S.T.M. A160, or Rail Steel A.S.T.M. A16 and shall conform to A.S.T.M. A305.
Splices of Reinforcement Bars will not be permitted in Piles under 40' in length. One Splice per bar will be permitted in Piles 40' up to 65' in length and two Splices per bar will be permitted in Piles over 65' long. Not more than two Bars may be spliced at any Section, only one bar in any face of the Pile may be spliced at one section; the splices shall be not less than 4'-0" on centers, the Bars shall be Lapped 35 Diameters at each splice, except that Corner Bars to be spliced shall be butted together in line and spliced with another Bar of Equal Size not less than 70 Diameters long.
All Exposed Concrete Corners to have 1½" Chamfer.
Pick-up Lengths have been computed using values of fs = 18,000 p.s.i. and fc = 1200 p.s.i. with an allowance of 50% for impact, and are based on careful handling. Rotation of Pile in the sling is to be prevented until Pile is in Near Vertical Position.
Pick-up Points for all Piles to be clearly marked on Pile.
The Contractor may use the Reinforced or Prestressed Pile at his option.
No. 5 Gage Spiral Ties may be either cold drawn wire, A.S.T.M. A82 or Intermediate, Structural or Hard Grade A.S.T.M. A15.
It will be permissible to substitute ¼" round plain reinforcement of the same grade and at the same spacing for the No. 5 Gage Spiral Ties.

TABLE OF PILE ELEMENTS

PILE SIZE W	VOID DIA.	CLASS OF CONC.	TYPE OF AGGREGATE	PILE WT. PER FT. (LBS)	SIZE OF REINF.	Nº OF BARS EA. FACE	TOTAL Nº OF BARS	MAXIMUM PILE LENGTHS		
								1 PT. PICK-UP L1 (FT.)	2 PT. PICK-UP L2 (FT.)	3 PT. PICK-UP L3 (FT.)
24"	12"	A	Sand & Gravel	483	#9	4	12	56'-3"	81'-3"	101'-3"
30"	18.70	A	Sand & Gravel	675	#8	5	16	61'-3"	86'-3"	121'-3"
36"	24.85	A	Sand & Gravel	879	#8	6	20	66'-3"	96'-3"	121'-3"



DETAILS OF 24,30 & 36 INCH SQ. PRECAST PRESTRESSED CONCRETE PILES



GENERAL NOTES:
PRECAST PRESTRESSED CONCRETE PILES

Construction Specifications: Latest Approved La. Dept. of Highways Std. Specs.
Design Specifications: A.A.S.H.O. Std. Specs. for Highway Bridges 1957 as amended to Dec. 31, 1958.
Concrete shall be Class "P" Concrete. Class "W" Concrete may be substituted for Class "P" Concrete when specified or by written permission of the Engineer.
Dimensions to Reinforcement are to Bar Faces.
Pre-tensioning Steel shall consist of 7-Wire Stress Relieved Cable Strands.
An Initial Tensile Force of 18,900 Lbs. shall be applied to each 7/16" Strand.
All Exposed Concrete Corners to have 1½" Chamfer.
Pick-up lengths have been computed on basis of no tension in the concrete with allowance of 50% for impact and are based on careful handling.
Rotation of Pile in the sling is to be prevented until Pile is in Near Vertical Position.
Pick-up Points for all Piles to be clearly marked on Pile.
Piles may be made at a central plant and transported to the bridge site in trucks.
The Contractor may use the Reinforced or Prestressed Pile at his option.
No. 5 Gage Spiral Ties may be either cold drawn wire A.S.T.M. A82 Intermediate, Structural or Hard Grade A.S.T.M. A15.
It will be permissible to substitute ¼" round plain Reinforcement of the same grade and at the same spacing for the No. 5 Gage Spiral Ties.
