

Feasibility Worksheet

Project	ID number	Route Location	
Barrier	Location	Length (feet)	Height (feet)
Number of first row receptors (receptors adjacent to barrier):	Number of <i>first row</i> receptors that achieve at least a 5dBA reduction in noise with barrier:		% that achieve ≥ 5 dBA reduction:
Are there any additional feasibility issues to consider?	<i>Explain:</i>		
Based on the above, is the barrier feasible?	Circle Yes or No		
	<i>Explain:</i>
