

LADOTD FORM: 24-102

(Revised August 11, 2025)

PROPOSAL TO PROVIDE CONSULTANT SERVICES

Prime consultant shall complete the LADOTD Form 24-102 without altering the Form's text; however, the instruction and/or guidance for Sections 12 through 23 can be removed but do not remove Section title and number.

ANY CONSULTANT FAILING TO SUBMIT ANY OF THE INFORMATION REQUIRED ON THE DOTD FORM 24-102, OR PROVIDING INACCURATE INFORMATION ON THE DOTD FORM 24-102, MAY BE CONSIDERED NON-RESPONSIVE.

Prime consultant should enter the firm name in the footer at the bottom of this page. (It will carry over to subsequent pages.)

1. Contract Name as shown in the advertisement	IDIQ CONTRACT FOR DESIGN SERVICES STATEWIDE WITH MAJORITY OF WORK IN DISTRICT 61
2. Contract number(s) as shown in the advertisement	4400032781
3. State Project Number(s), if shown in the advertisement	N/A
4. Prime consultant name (name must match exactly as registered with the Louisiana Secretary of State (SOS) where such registration is required by law; including punctuation; include screenshot from SOS at the end of Section 20)	MICHAEL BAKER INTERNATIONAL, INC. 
5. Prime consultant license number (as registered with the Louisiana Professional Engineering and Land Surveying Board (LAPELS) if registration is required under Louisiana law)	E.F. 0000062 V.F. 0000010
6. Prime consultant mailing address	2600 CitiPlace Drive, Suite 450 Baton Rouge, Louisiana 70808
7. Prime consultant physical address (existing or to be established, if location is used as an evaluation criteria)	
8. Name, title, phone number, and email address of prime consultant's contract point of contact	Daniel Thornhill, PE Office Manager - Associate Vice President 225-218-2846 Daniel.Thornhill@mbakerintl.com
9. Name, title, phone number, and email address of the official with signing authority for this proposal	Daniel Thornhill, PE Office Manager - Associate Vice President 225-218-2846 Daniel.Thornhill@mbakerintl.com

10. This is to certify that all information contained herein is accurate and true, and that the team presently has sufficient staff to perform these services within the designated time frame. By submitting this proposal, proposer certifies that it is not engaged in a boycott of Israel and it will, for the duration of its contract obligations, refrain from a boycott of Israel. Proposer also certifies and agrees that the following information is correct: In preparing its response, the proposer has considered all proposals submitted from qualified, potential subcontractors and suppliers, and has not, in the solicitation, selection, or commercial treatment of any subcontractor or supplier, refused to transact or terminated business activities, or taken other actions intended to limit commercial relations, with a person or entity that is engaging in commercial transactions in Israel or Israeli-controlled territories, with the specific intent to accomplish a boycott or divestment of Israel. The proposer also has not retaliated against any person or other entity for reporting such refusal, termination, or commercially limiting actions. DOTD reserves the right to reject the response of the bidder or proposer if this certification is subsequently determined to be false, and to terminate any contract awarded based on such a false response.

Pursuant to Act No. 581 of the 2024 Louisiana Legislature Regular Session, proposer further certifies that it does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association based solely on the entity's or association's status as a firearm entity or firearm trade association. In addition, proposer certifies it will not discriminate against a firearm entity or firearm trade association during the term of the contract based solely on the entity's or association's status as a firearm entity or firearm trade association.

Signature (shall be the same person as Section 9):

Date: 09/03/2025

11. If a Disadvantaged Business Enterprise (DBE) goal has been set for this advertisement, indicate which firm(s) will be used to meet the DBE goal and each firm(s)' percentage.

RESOURCE AVAILABILITY. Our management team has identify the number of required resources based on five (5) concurrent task orders. Our team was created based on redundancy to handle the expected multiple task orders per the advertisement. Staffing will be adjusted based on the actual issued task orders. We have additional staff identified on our bench ready to deploy if additional task orders are issued above the advertisement. Our mission is to have the most qualified and number of personnel to expedite the schedule while minimizing impacts to the overall project budget.

15. MINIMUM PERSONNEL REQUIREMENTS

Led by Daniel Thornhill, PE, a Project Manager with over 28 years of roadway design experience (including 22 serving the DOTD) and Brandon Pitre, PE, PTOE, RSP1 with over 10 years of roadway experience, Michael Baker and our subconsultant staff designated to work on this contract meet the Minimum Personnel Requirements (MPRs) specified in the advertisement. Résumés included in this submission reflect the required experience stated in each MPR.

MPR No. Do not insert wording from ad	Personnel being used to meet the MPR (Individual(s) may not satisfy more than one MPR unless specifically allowed by Attachment B of the advertisement)	Firm employed by	Type of license and discipline meeting MPR/certification & number	State of license	License / certification expiration date

16. STAFF EXPERIENCE

Résumés are provided for all prime and sub-consultant personnel listed in Sections 14 and/or 15 of the proposal. Résumés of personnel **not** identified in Section 14 or Section 15 of the proposal should not be included and **will not be** evaluated. Résumés are **limited to 2 pages per person**. Certificates required by the advertisement are included in Section 20.

Project Management Team

Firm employed by Michael Baker			
Name	Daniel Thornhill, PE	Years of relevant experience with this employer	↻ 5
Title	Office Executive	Years of relevant experience with other employer(s)	↻ 23
Degree(s) / Years / Specialization		B.S. / 1997 / Civil Engineering	
Active registration number / state / expiration date		PE.0032367 / LA / 09-30-2026 Traffic Control Technician-LA State Specific / April 2026 Traffic Control Supervisor -LA State Specific / April 2026	
Year registered	2006 2002	Discipline	Civil
Contract role(s) / brief description of responsibilities		MPR 1, 2, & 3; PRINCIPAL IN CHARGE/CONTRACT MANAGER	
MPR 1, 2, & 3. Mr. Thornhill will serve as the Principal-In-Charge and Project Manager and provide support to Lead Design Engineer, Brandon Pitre, PE, to complete Design services, and provide accountability for quality and timeliness. He will also ensure priorities are established before and during execution of the project.			
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
11/21 - Ongoing	US 371: KCS RR Overpasses HBI, Webster Parish, Louisiana. Principal/Project Manager. Responsible for the design and development of construction plans for the replacement of 3 bridges at two locations along US 371. First location is the replacement of a 3 span bridge over KCS Railroad in Sibley, LA. Project entails the development of new bridge alignment following DOTD and KCS Railroad requirements along with modifications of the existing road to accommodate the new bridge vertical alignment. Additional site requirements include developing a detour road/bridge alignment to construct the new bridge under traffic along with reconstruction of LA 164/US 371 intersection. Second location is the replacement of parallel bridges along US 371 at the Minden/I-20 interchange. Bridges will be replaced in phase construction to maintain traffic. Two new 3-span bridges will be construction over KCS railroad meeting all the required DOTD and KCS design requirements as required at the Sibley bridge site.		
08/22 – 05/23	Barksdale AFB Entrance Roads, Bossier Parish, Louisiana. Project Manager. Responsible for the development of construction plans for new entrance roads for Barksdale AFB. The project includes a new roundabout at the Air Force Base gates along with new 4-lane divided highway to tie into the new LA 1267 highway constructed by DOTD under the I-20/I-220 Design Build interchange improvements. Additional responsibilities include coordination with the DOTD I-20/I-220 Project Manager and Design Build Owner Verification Managers along with overseeing new roadway drainage that meets DOTD Hydraulic requirements. Construction should begin in Summer of 2023.		
10/22 - Ongoing	Infrastructure Investment and Jobs Act (IIJA) Off-System Bridge Program – District 07, Louisiana. DOTD. Principal. Responsible for the oversight of 12 Off-System Bridge replacements and recommendation of final bridge structures for five parishes in District 07. Additional responsibilities include the oversight of sub-consultants identified to be included in the program. This project program requires Michael Baker to deliver 12 bridge replacements within the \$30.3 million dollars with allocated for District 07. This service includes topo surveys, row mapping, development of construction plans, environmental clearance, utility relocation agreements, and determine row acquisition. DOTD issued NTP for additional services in May 2023.		
04/22 - Ongoing	LA 30: EBR PL – I-10, East Baton Rouge, Iberville, and Ascension Parishes, Louisiana. Principal/Project Manager. Responsible for the oversight of the Environmental Assessment (EA) of the widening of LA 30 from a 2-lane roadway to 4-lane roadway. Project is currently in Part 1 of the EA which main focus on traffic count/study/analysis along with some early environmental field screening, initial geometric improvements at existing 5 intersections, SUE services, and development of existing hydraulic flows for existing 6 bridge/culvert structures. Additional responsibilities include oversight of existing alignments along with existing right-of-way lines.		

<p>10/21 - Ongoing</p>	<p>New Orleans Rail Gateway Environmental Impact Statement, Jefferson and Orleans Parishes, Louisiana. DOTD. Project Engineer for development of alignment alternatives in Avondale area. Alternatives include railroad overpasses at two locations to replace four at grade railroad crossings. Currently trains will block at grade railroad crossings for hours each day at the Avondale railyard. New overpasses meet both DOTD and railroad criteria. New alternatives include both roadway and bridge design.</p>
<p>05/16 – 01/18</p>	<p>Ham Reid Road at Lake Street (LA 3092) Intersection Improvement Project for Calcasieu Parish Police Jury. Project Manager/Lead Design Engineer. Responsibilities included the development of construction plans for a new single lane roundabout at the intersection of Ham Reid Road and Lake Street (LA 3092). Project was studied as both a new signal and roundabout to provide traffic flow for land being developed along the southwest quadrant of the project. Through coordination with LA DOTD, it was determined a new single lane roundabout was the best alternative. The new roundabout would be a 4-leg roundabout that would connect to Spanish Mission Trail roadway of Trails Subdivision with one of roundabout legs to provide seamless connectivity with Ham Reid Road to eliminate a possible Z-intersection configuration with only a 3-leg roundabout. Mr. Thornhill's responsibilities included coordination with both Calcasieu Parish Project Manager, LA DOTD District 7 Engineers, and LA DOTD Project Permit Specialist; development of geometric layouts both horizontally and vertically, development of right-of-way taking lines and coordination of right-of-way maps with surveyor, and hydraulic analysis for both subsurface and storm water flow. Project was being done as a permit project for Calcasieu Parish through LA DOTD District 7.</p>
<p>03/14 - 08/15</p>	<p>I-12 Entrance Ramp at Millerville Road, East Baton Rouge Parish, Louisiana. Project Manager/Engineer. Responsible for the design and construction of a new westbound entrance ramp from Millerville Road to I-12. Project included widening of Millerville Road to accommodate new double left turn lanes at new intersection at new development. Project included developing construction plans to meet LADOTD and FHWA design guidelines and standards. Addition construction plan details involved development of traffic control plans for a lane shift of three (3) lanes along I-12 to provide protection for construction workers while the new entrance ramps were being constructed along with addition of new traffic signals and remove of an existing traffic signal. Project was issued a project permit through LADOTD District 61. During the plan preparation and construction, Mr. Thornhill met with LADOTD District 61 District Administrator and Construction Engineer to make sure all LADOTD standards where being followed along with making sure the contractor was meeting all the requirements set forth by LADOTD District 61 in the project permit.</p>
<p>09/14 – 08/15</p>	<p>LA 27 turn lane improvements, Cameron and Calcasieu, LA. Project Manager. Responsible for overseeing the development of roadway construction plans adhering to DOTD design guidelines for three turn lanes along LA 27 at the Cameron LGN plant entrances. Also provided engineering support during construction. Project included the modification of the existing box culvert at Crab Gully with developing solutions to utility conflicts at this crossing.</p>
<p>11/15 – 01/18</p>	<p>Southcity Parkway Extension - Lafayette, LA. Project Manager/Lead Design Engineer. Responsibilities included the development of construction plans for a new 1.7-mile, four-lane median divided corridor between US 167 (Johnston Street) with Kaliste Saloom Road. Project included three multilane roundabout intersections and new bridge crossing of the Vermillion River. Additional responsibilities included coordination with the Coast Guard to develop the new Vermillion Bridge crossing to make sure it met navigational vertical clearances. Project included development of public involvement meeting maps to get feedback from the local residents on the new alignments and its possible impacts to the neighboring communities.</p>
<p>08/12 - 01/18</p>	<p>Juban Road (LA 1026) Widening (I-12 to US 190), Livingston Parish, Louisiana. Project Manager/Lead Design Engineer. Responsible for the development of construction plans for the widening of Juban Road from a 2-lane roadway to a 4-lane boulevard from just north of the I-12 Interchange to US 190. Improvements included three (3) multi-lane roundabouts along Juban Road while including sidepaths on both sides of Juban Road to meet the LADOTD complete streets initiative. Access Management was a priority along this route therefore the median was reduced to 6' to 8' to discourage left turn movements and make all driveways right-in/right-out while utilizing the roundabouts for U-turn movements. The roundabouts are located at future driveway number 5 for the Juban Crossing Development, midway along project, and at the Juban Road at US 190 intersection. The roundabout would replace an existing signal that causes traffic congestion especially during peak afternoon traffic. Project included all necessary improvements along US 190 for the new roundabout and additional turn lane for the new Sanctuary Development.</p>

Firm employed by Michael Baker					
Name	Brandon Pitre, PE, PTOE, RSP1		Years of relevant experience with this employer		↻ 5
Title	Project Manager – Transportation		Years of relevant experience with other employer(s)		↻ 7
Degree(s) / Years / Specialization		MS / 2012 / Civil Engineering BS / 2010 / Civil Engineering			
Active registration number / state / expiration date		PE.0040975 / Louisiana / 03-31-2027 ATSSA Traffic Control Supervisor, expires 04-29-2026 ATSSA Traffic Control Flagger, expires 12-20-2027			
Year registered	2016	Discipline	Civil		
Contract role(s) / brief description of responsibilities		MPR 3; PROJECT MANAGER/ROADWAY DESIGNER			
Mr. Pitre meets MPR 3 and will serve as Lead Design Engineer with experience in planning and geometric design for a variety of projects. He has worked in the public sector at the Louisiana Department of Transportation and Development in the Construction and Road Design sections before working as an engineering consultant. He has experience with safety retainers on both design and construction sides.					
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).				
11/21 - Ongoing	US 371: KCS RR Overpasses HBI, Webster Parish, Louisiana. DOTD. Transportation Engineer/Project Manager. Mr. Pitre is the project manager of the project while also serving as the roadway design lead for the project who will oversee the delivery of the Preliminary and Final roadway and bridge design plans. The project consists of the design and replacement of three bridges which cross over a KCS railroad line at two separate locations in Webster Parish (Sibley and Minden). The new bridges will be concrete girder-type and include widening the two existing bridges in Minden to accommodate an additional travel lane for each bridge. To minimize construction cost and to account for the geometric constraints of the LA 164 intersection, the new replacement bridge in Sibley will be built on a new offset alignment. The Minden site involves the replacement of two parallel steel girder bridges along US 371 at the Minden/I-20 interchange. Strict adherence to the KCS railroad design guidelines and adequate coordination with KCS must be maintained during all design phases.				
08/22 – 05/23	Barksdale AFB Entrance Road and Gate Complex, Design-Build, Bossier Parish, Louisiana. Transportation Engineer. Mr. Pitre is responsible for the roadway design and construction plan development of this project. The project consists of the design and construction of an extension of an existing state-owned highway, LA 1267, along with a new multi-lane roundabout. The new roadway will be a 4-lane divided highway entrance into the Barksdale AFB. Mr. Pitre is responsible for developing the 3D roadway design model for the project and overseeing the delivery of the construction plans. Other responsibilities include project support during construction, such as reviewing contractor shop drawings, submittals to ensure material compliance with DOTD standards, and answering requests for information (RFI's) promptly.				
04/22 - Ongoing	LA 30: EBR P/L – I-10, Iberville and Ascension Parishes, Louisiana. DOTD. Transportation Engineer/Project Manager. Mr. Pitre is the project manager and the lead roadway design engineer. The project is an environmental assessment (EA) which widens about 14 miles of LA 30 from two lanes to at least four. Mr. Pitre is responsible for generating the line-and-grade diagrams to evaluate the reasonable alternatives based on the traffic analysis and recommended improvements to the major intersections along the project limits.				
10/22 - Ongoing	Infrastructure Investment and Jobs Act (IIJA) Off-System Bridge Program – District 07, Louisiana. DOTD. Project Manager. Responsible for the oversight of the development of preliminary and final construction plans for 12 Off-System Bridge replacement locations for the five Parishes in District 07. The replacement structures will be concrete slab span bridges or reinforced concrete box culverts (RCB's) based on the hydraulics analysis and design results, while also factoring in site-specific constraints and the overall construction cost of each replacement option. There is a strict timeline in which the federal funds allocated for this program need to be utilized, which requires all projects to be let for construction by the end of 2026, or some of the funding could be rescinded. As a result, Mr. Pitre is responsible for meeting all project deliverable milestone dates while ensuring the overall program budget of \$30.3				

	million is not exceeded. Additional responsibilities include coordination with sub-consultants for the services of topographic surveys, property surveys, right-of-way (ROW) mapping, geotechnical investigations, and hydraulic support.
06/18 – 12/19	US 90 Ramps at LA 88 Roundabouts, New Iberia, Louisiana / Highway Safety Design Retainer, DOTD, Lead Roadway Designer. Mr. Pitre served as lead Roadway Design Engineer for this project whose scope consisted of converting the eastbound and westbound U.S. 90 ramp terminals into two multi-lane roundabouts, along with making improvements to the existing drainage network (sub-surface and open ditch) to increase hydraulic capacity. Since the local project representatives expressed concerns for design solutions aimed at reducing flooding during intense rain events, many of the existing cross drains, side drains, and existing roadside ditches needed to be upsized. Other safety measures were implemented in this project by the following measures: safety end treatments on culvert ends adjacent to LA 88, guard rail improvements based on the latest DOTD design standards, flexible traffic delineators separating lanes of opposing traffic flow, and two U-turns (bulb-outs) added along LA 88 on each side of U.S. 90. Responsible for roadway design and construction plan production, completing the 100% Preliminary Plans based on comments from the client at the Plan-In-Hand meeting. This involved resolution of all the client's comments from the 100% Preliminary Plans submittal which involved items such as: modifying the typical pavement sections and details, adjusting the roadside ditch geometry, revising the construction sequencing layout, modifying the drainage design, and creating the permanent signing and pavement marking layout sheets. Responsible for developing and delivering the 100% Final Plans as the Engineer of Record which involved determining the required quantities of the required construction items and developing the accompanying construction cost estimate. Other work for this project included creating the existing and proposed drainage maps, hydraulics calculations utilizing DOTD's HYDRWIN program and preparation of the hydraulics report.
12/17 – 07/18	U.S. 190B at Jefferson Avenue Roundabout Design for Highway Safety Design Retainer, Covington, Louisiana. DOTD. Roadway Design Engineer. Responsible for design and construction plan production for this project, whose scope consisted of converting a four-way intersection into a single-lane roundabout in downtown Covington in an area of narrow right-of-way limits. Responsible for completing 100% Preliminary Plans based on comments from the client at the Plan-In-Hand meeting. This involved making several changes to the plans such as: revisions to the typical pavement section and details, plan and profile sheets, and construction sequencing sheets. Responsible for developing the 60% Final Plans which involved resolution of all the client's comments from the 100% Preliminary Plan submittal, determining the required construction items, and developing the accompanying construction cost estimate. Other work included the hydraulics analysis and design calculations utilizing DOTD's HYDRWIN drainage program and preparation of the hydraulics report. During the 60% Final Plans development stage, this project was halted by DOTD based on the significant real estate cost for acquisition of an adjacent property (gas station on intersection corner).
11/15 - 06/17	Francis Road Extension, Covington, Louisiana. St. Tammany Parish Government. Transportation Engineer. Assisted in design and construction plan production of a two-lane asphalt roadway extension project to better serve the local community by providing better connectivity between the local subdivisions and a recreational facility. Responsible for conducting drainage analysis to compare pre- and post-development drainage design and to determine required culvert sizing for new, required cross drain, and nearby roadside drainage structures. Mr. Pitre's other responsibilities included drafting different horizontal alignments and vertical profiles to present different alternatives in the assemblance of the construction plans for the client. These options were presented to give the client an idea of what the impact financially would be as the different design alternatives had varying cost estimates and project footprints associated with them.
10/16 – 01/17	I-12 Widening, LA 21 to US 190, Covington, Louisiana. Louisiana Department of Transportation. Transportation Engineer. Responsible for developing the typical roadway section sheets of the mainlines, exit ramps, and surface streets for a 6-mile-long interstate widening project, performing the hydraulics analysis and design to appropriately size the cross drains, and creating the existing and proposed drainage map sheets in the preliminary construction plans.

Firm employed by Michael Baker					
Name	L.R. "Eric" Erikson, PE, CFM		Years of relevant experience with this employer		↻ 2.5
Title	Department Manager – Water Resources		Years of relevant experience with other employer(s)		↻ 24
Degree(s) / Years / Specialization		M.S. / 2003 / Engineering and Technology Management B.S. / 1999 / Civil Engineering			
Active registration number / state / expiration date		PE.0031061 / Louisiana / 03/31/2026 CFM US-23-12645 / 07/31/2027			
Year registered	2004 2023 (CFM)	Discipline	Civil		
Contract role(s) / brief description of responsibilities		DEPUTY PROJECT MANAGER/HYDRAULICS DESIGN LEAD			
Mr. Erikson will serve a technical advisor to the hydraulics/drainage team for task orders requiring drainage analysis and design. He will also support the team if hydraulic modeling is required for the replacement/modification of drainage structures.					
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , "designed drainage", "designed girders", "designed intersection", etc. Experience dates should cover the time specified in the applicable MPR(s).				
01/23 – Ongoing	LA 30: EBR PL – I-10, Ascension, Iberville, and East Baton Rouge Parishes, Louisiana DOTD - Mr. Erikson is currently serving as the Hydraulics QA/QC Reviewer for the NEPA study for the widening of LA 30. Project is currently in the Part 1 phase of the study to determine the required widening requirements of LA 30 from the East Baton Rouge Parish Line to I-10. Project covers nearly 14 miles of improvements along LA 30 through Iberville and Ascension Parish. The study will determine how many additional lanes necessary for LA 30 along this stretch with intersection improvements at Bayou Paul Lane, LA 74, LA 3115, LA 73, and LA 3251. Additional responsibilities for Mr. Erikson include determining if the drainage areas have been delineated properly and that the storm water runoff flows meet DOTD requirements along with reviewing the HEC-RAS models for consistency and conformity to the DOTD Hydraulics Manual.				
01/23 – Ongoing	US 371 KCS RR Overpass HBI, Louisiana DOTD. QA/QC Engineer. Responsible for providing guidance, review, and Quality Control for the drainage design of the new improvements of US 371 for the replacement of 3 bridges at 2 different locations: (Sibley, LA and Minden, LA). The bridges are being replaced of KCS railroad at both locations. The Sibley, LA site consists of a new bridge alignment offset from the existing to allow traffic to remain open during construction. The bridges at the Minden site bridges are being replaced in multiple traffic control operations where 1 bridge will remain open while a new bridge is being built. Once new bridge is built, traffic will move over to new bridge while the other bridge is being replaced. Mr. Erikson's QA/QC review will make sure drainage is being done in accordance to DOTD Hydraulic Manual..				
01/23 – Ongoing	Airline Highway (US 61) – North for MOVEBR, East Baton Rouge Parish, Louisiana City/Parish of Baton Rouge. Project Manager. Responsible for the review and analysis of major drainage crossings along Airline Highway between I-110 to US 190/US 61. Project is currently in the NEPA Decision making process. Addition responsibilities include reviewing existing models provided by MOVEBR for Jones Creek Crossing and Hurricane Creek crossings. NEPA Hydraulics phase is a low-level look at drainage improvements for the widening of Airline Highway from a 4-lane divided roadway to a 6-lane divided roadway. Once the NEPA process is complete, engineers will be released to develop construction plans. Mr. Erikson will oversee the development of the roadway drainage for the improvements. Project is currently following the DOTD guidelines for NEPA clearance.				
01/23 - Ongoing	Louisiana Watershed Initiative (LWI) Region 6 TO 2, Louisiana DOTD. Deputy Project Manager. Responsible for providing contract administration and assisting project manager in general project management duties such as resource allocation, scheduling, coordination of				

	team members, and financial analysis. Michael Baker supplemented data collection and analysis, continued stakeholder engagement services, and performed topographic, bathymetric, and channel surveys. This task includes 2 HUC8 Watershed models.
01/23 - Ongoing	Louisiana Watershed Initiative (LWI) Region 6 TO 3 Louisiana. DOTD. Deputy Project Manager. Responsible for the contract administration and assisting the project manager with general project management duties such as resource allocation, scheduling, team coordination, and financial analysis. Michael Baker is providing engineering and modeling services to the Louisiana Department of Transportation & Development (DOTD) for Region 6 for the Louisiana Watershed Initiative (LWI). This task includes 2 HUC8 Watershed models.
01/23 - Ongoing	Louisiana Watershed Initiative (LWI) Region 1, Louisiana DOTD. Deputy Project Manager. Responsible for the contract administration and assisting the project manager in general project management duties such as resource allocation, scheduling, team coordination, and financial analysis. This task includes 3 HUC8 Watershed models.
01/23 - Ongoing	Louisiana Watershed Initiative (LWI) Region 4, Louisiana DOTD. Deputy Project Manager. Responsible for contract administration and assisting the project manager with general project management duties such as resource allocation, scheduling, team coordination, and financial analysis. This task include 1 HUC8 Watershed models.
01/23 - Ongoing	LWI/SPP Group 1 Beauregard, Vernon and St. Landry Parishes, Louisiana DOTD. Project Manager. Responsible for the overall execution of the project, contract administration, and general project management duties, which include resource allocation, team coordination, sub-consultant coordination, scheduling, and financial analysis. Project will determine improvements to the watershed and reservoirs located within to mitigate flooding in the region.
01/23 - Ongoing	Parish Comprehensive Drainage Plan, St. Tammany Parish, Louisiana St. Tammany Parish. Deputy Project Manager. Responsible for contract administration and assisting with general project management duties, such as resource allocation, team coordination, scheduling, and financial analysis. Attending public outreach meetings and assisted the public in understanding the project objective and goals. Provided review and QC of the Phase 1 final report.
1/20 – 12/22	South Choctaw Widening, Baton Rouge, Louisiana City. Parish of East Baton Rouge DPW. QA/QC. Responsibilities included oversight of entire construction plan set, including geometric design and drainage design. Reviewed DOTD HYDRWIN input and output files to make sure the design team was following DOTD Hydraulics Manual and design requirements. Also responsible for assisting the designer in addressing drainage comments from the municipality.

Firm employed by Michael Baker					
Name	Jade Rung, PE, PMP		Years of relevant experience with this employer		↻ 3
Title	Associate Vice President		Years of relevant experience with other employer(s)		↻ 27
bDegree(s) / Years / Specialization		BS / 1995 / Civil Engineering			
Active registration number / state / expiration date		PE.0029081 / Louisiana / 09-30-2026 Project Management Professional No. 1284298 / July 2027			
Year registered	2000	Discipline	Civil		
Contract role(s) / brief description of responsibilities		CLIENT LIAISON			
Mr. Rung is experienced in all phases of delivery for multi-million-dollar capital projects. He has a proven history of domestic and international business development and program/project management for commercial, municipal, industrial, marine, and heavy civil construction. He has substantial experience in design and construction management including the delivery in all phases of the project life cycle. In addition, Mr. Rung has successfully led the delivery of multiple Design-Build facility construction projects, both as a designer and as a general contractor. His skills include scheduling, cost management, construction coordination, scope compliance, issues/change management, conflict resolution, standardized status reporting, and community outreach.					
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).				
2022-Ongoing	Parish Comprehensive Drainage Plan, Covington, Louisiana. St. Tammany Parish. Business Development Lead. Responsible for project acquisition and stakeholder engagement; client management, public outreach coordination, and local representation. Michael Baker conducted a comprehensive drainage plan for the Saint Tammany Parish located on the north shore of Lake Pontchartrain, Louisiana. The plan evaluated the existing state of drainage in the parish including flood risk, water quality and development guidelines, recommended capital projects, and potential policy changes that would lead to reduced flood damaged and increased safety. The Michael Baker team provided data gathering efforts, ranked list of problem areas and provided four (4) in-person public and stakeholder outreach throughout Phase I of this project.				
2021- Ongoing	H.013284 Mississippi River Bridge South GBR: LA 1 to LA 30 Connector, Baton Rouge, Louisiana. LADOTD. Executive Sponsor for Bridge Services. Mr. Rung provided business development and executive contract development for the bridge design/review services for the Enhanced Planning Study for the new bridge crossing of the Mississippi River to alleviate traffic congestion in the Capital Region. The five-parish Baton Rouge Metropolitan Area includes Ascension, East Baton Rouge, Iberville, Livingston, and West Baton Rouge Parishes. The new “south” Mississippi River Bridge and approaches will be a conventional highway/expressway facility connecting to LA 1 on the west side of the Mississippi River and to LA 30 (and widening of LA 30) on the east side of the Mississippi River. It is planned that the new crossing will be funded in part through the collection of tolls. Three alternatives have been identified from the Enhanced Planning Study and will be analyzed further in Part 2 of the project, which consists of preparing the NEPA document to identify a preferred alternative.				
01/16-01/17	Ocean Cay MSC Marine Reserve, Ocean Cay, Bahamas. MSC Cruises. Project Development Manager. Facilitated the scope development and coordination for the Design-Build project; investigated scope alternatives, provided detail adjustments and facilitated value-engineering options for the construction of the project; coordinated scope and bid evaluations for the dredging, sitework, port improvements, building construction, and utility systems for the island development. The project work includes dredging, demolition, clearing and grubbing, mass grading, beach grading and re-nourishment, bulkhead for cruise ship berth and marina basin, breasting and mooring dolphins, CIP reinforced concrete, rip rap, landscape, hardscape, buildings, utilities, RO plant, power plant (generators), wastewater treatment plant, fuel storage, water intake wells, and deep injection wells.				

01/01-01/03	Marine Corps Reserve Training Center, Lafayette, Louisiana. Department of the Navy. Project Manager. Provided contract negotiation and management of all subcontractors for every trade on the project; provided estimating, negotiating, contracting, and change management services for the Design-Build project.
01/98-01/99	Bulk Cement Handling and Storage Dome, Clarkesville, Missouri. Holnam Cement. Project Manager. Provided on-site design and construction coordination for the project including cost estimating, scheduling, and reporting; provided monthly updates to the Holnam Cement, Inc. plant board of directors; handled all phases of the construction process including procurement and implementation of specialized designed and fabricated equipment. As an unofficial Design-Build package to the client, oversaw design and was contracted to deliver the world's largest cement storage dome with a capacity of 90,000 tons along the Mississippi river. The project was completed within 12 months.
2006	Louisiana Transportation and Development District 02 Office Hurricane Repairs, New Orleans, LA. LADOTD. Department of General Contractor. Provided general contracting, permitting, subcontracting, scheduling, coordination and close-out for the repairs to the existing office building.
2010-2011	Ruskin Dam Rehabilitation. British Columbia Hydro Power, Vancouver, Canada. Project Controls Manager/Deputy Project Manager. Provided management for the project controls team to provide all data control for the project; coordinated internal project tasks and responsibilities; developed cost-loaded project schedule including maintenance and publication; facilitated internal and external project communications; coordinated all project scopes, schedules, funding, and budgets for accurate and timely reporting during all phases of the project.
2011-2012	Union Passenger Terminal to Canal Street Rail Expansion, City of New Orleans, New Orleans, LA. Regional Transit Authority. Project Executive. Facilitated communications for the project between the internal project management team, City of New Orleans, project designer, and general contractor; provided updates on the progress and schedule look-ahead for the project progress.
2011-2012	Sewer System Evaluation and Rehabilitation Program, City of New Orleans, New Orleans, LA. Sewerage and Water Board of New Orleans. Project Executive. Facilitated communications for the project between the internal project management team, City of New Orleans, project designer, and general contractor; provided updates on the progress and schedule look-ahead for the project progress.
2014-2016	Hurricane and Storm Damage Risk Reduction System (HSDRRS), Mississippi River Levee (1.2A & 2.2) Flood Protection. US Army Corps of Engineer. Project Executive. Provided executive support for the project delivery team; local communications with State, Parish, and City officials; provide oversight for the general construction activities.
12/09-01/14	I-55/SR 570 Interchange Improvements, McComb, Mississippi. Mississippi Department of Transportation. Project Manager. Responsible for the project management, budget setup, plan design and detail, quantity calculations, QC/QA, and final roadway design and traffic signal plans. Under an engineering services master agreement, Michael Baker performed the field survey and developed final roadway and traffic signal design plans for interchange improvements at the I-55 and SR 570 interchange. The project widened and lengthened the entrance and exit ramps to add turn lanes and included two new traffic signals on SR 570. Michael Baker performed the traffic modeling for the improvements and designing conduit and fiber-optic cable installations to interconnect the new traffic signals with the master system.

Roadway Design Team 1

Name	Alison Gonzalez, PE	Years of relevant experience with this employer	↻ 4
Title	Project Manager	Years of relevant experience with other employer(s)	↻ 15
Degree(s) / Years / Specialization		B.S. / 2007 / Civil Engineering	
Active registration number / state / expiration date		PE.0047215 / LA / 03-31-2027 PE037086 / GA / 12-31-2025	
Year registered	2022 2012	Discipline	Civil
Contract role(s) / brief description of responsibilities		MPR 3; ROADWAY DESIGN TEAM 1	
Ms. Gonzalez meets MPR 3 and will serve as a Design Engineer with experience in geometric design for a variety of projects. She has worked on projects for multiple DOT agencies which allows her to bring a practical engineering point of view to the team.			
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
05/23 - Ongoing	US 371: KCS RR Overpasses HBI, Webster Parish, Louisiana. Project Engineer. Responsible for the design and development of construction plans for the replacement of 3 bridges at two locations along US 371. First location is the replacement of a 3 span bridge over KCS Railroad in Sibley, LA. Project entails the development of new bridge alignment following DOTD and KCS Railroad requirements along with modifications of the existing road to accommodate the new bridge vertical alignment. Additional site requirements include developing a detour road/bridge alignment to construct the new bridge under traffic along with reconstruction of LA 164/US 371 intersection. Second location is the replacement of parallel bridges along US 371 at the Minden/I-20 interchange. Bridges will be replaced in phase construction to maintain traffic. Two new 3-span bridges will be construction over KCS railroad meeting all the required DOTD and KCS design requirements as required at the Sibley bridge site.		
05/23 - Ongoing	LA 30: EBR PL – I-10, East Baton Rouge, Iberville, and Ascension Parishes, Louisiana. Project Engineer. Responsible for the oversight of the Environmental Assessment (EA) of the widening of LA 30 from a 2-lane roadway to 4-lane roadway. Project is currently in Part 1 of the EA which main focus on traffic count/study/analysis along with some early environmental field screening, initial geometric improvements at existing 5 intersections, SUE services, and development of existing hydraulic flows for existing 6 bridge/culvert structures. Additional responsibilities include oversight of existing alignments along with existing right-of-way lines.		
12/21 – Ongoing	SR 25 @ Savannah & Middle River. Scott Bridge Company, Inc. Lead Roadway Engineer. Responsible for preparing all roadway submittals as required by the Design Build Agreement (DBA), including preliminary plans, final plans, release for construction (RFC) plans, and NPDES permitting plans. Michael Baker provided the Design-Build Services to replace two bridges along SR 25, one over the Savannah River (James P. Houlihan Bridge) and one over Middle River. Traffic will be maintained on the existing bridges while the proposed bridges are constructed parallel to the existing bridges. A Section 4(f) evaluation is required for impacts to historic resources and public recreational land, along with consultations with USFWS and NOAA fisheries due to the presence of federally protected aquatic species.		
04/20 - Ongoing	Sea Island Road @ Dunbar Creek. Georgia Department of Transportation. Lead Roadway Engineer. Responsible for concept design and report development, preliminary plans, right-of-way plans, and final plans for the replacement of an existing bridge located on CR 583/Sea Island Road over Dunbar Creek on St. Simons Island. The proposed bridge will be raised one foot to meet the 100-year flood elevation. An onsite detour will be utilized by constructing a temporary bridge to the north of the existing bridge where traffic will be routed during construction. The roadway approaches were reconstructed to provide two 12-foot lanes with 8-foot rural shoulders.		

01/18 – Ongoing	<p>I-16/I-95 General Engineering Consultant Services, Savannah, Georgia. Georgia Department of Transportation. Subject Matter Expert. Responsible for reviewing roadway plans and design calculations to ensure that the design is in compliance with the Design-Build Agreement (DBA). Michael Baker is providing owner's representative post-let general engineering consultant services on the I-16 at I-95 interchange improvements and I-16 widening, as part of GDOT's MMIP program. Services include final design review, submittal review, and owner's verification of design-builder-provided construction engineering and inspection services.</p>
09/17 – 04/23	<p>Bridge Bundle - SR 10 Loop EB & WB at Middle Oconee River (PI#0013715), SR 82 at Middle Oconee River (PI#0013819), Clarke and Barrow Counties, Georgia. Georgia Department of Transportation (GDOT). Assistant Project Manager for this 0.10-mile long bridge replacement project on the northwest side of the heavily travelled SR 10 loop. This bridge replacement project is a 4-lane divided rural freeway around the city of Athens, GA to replace the existing 288-foot long, twin steel beam bridges, with a 3-span 350-foot long PSC beam bridge over the river. Staged construction will be utilized by first building a portion of the new bridge in the median area while traffic is maintained on the existing bridges. SR 82 is a 0.30-mile long 2-lane rural bridge replacement project that will replace the existing 4-span 250-foot long steel beam bridge with a 270-foot long, 3-span PSC beam bridge on a curved roadway alignment over the river. ABC techniques and an off-site detour will be utilized by closing the roadway to minimize the construction schedule and disruption to the public. M&N is responsible for overall project management, concept design, public involvement, environmental, preliminary plans, right-of-way plans, final construction plans including full bridge design and bridge hydraulic studies on this bundle.</p>
06/16 – Ongoing	<p>Quacco Road Widening, Chatham County, Georgia. Chatham County. Design engineer for the proposed Quacco Road Improvements project. The project includes roadway widening and operational improvements to intersections, drainage features, and pedestrian facilities along a 2.6-mile-long segment of this corridor beginning just east of the existing bridge over I-95 and terminating at the existing signalized intersection with US 17. In addition, ADA compliant sidewalks and a 10' shared use path will contribute to the connectivity for the existing commuter bus route of Chatham Area Transit (CAT). The project deliverables will include completion of concept design, preliminary plans, stormwater management, right-of-way plans and final plans.</p>
05/14 – 04/19	<p>Operational, Safety and Pedestrian Improvements along Maxham Road, Douglas County, Georgia. Douglas County. Lead engineer for the construction of operational, safety and pedestrian improvements along Maxham Road from SR 6/Thornton Road to Tree Terrace Parkway. This project includes 0.5 miles of roadway improvement, stormwater management facilities, and sidewalks. The project deliverables include concept, preliminary and final construction plans, right of way plans and NPDES permitting.</p>
11/01 – 10/15	<p>SR25CO/Bay Street Widening, Chatham County, Georgia. Chatham County. Design engineer for the widening of 1.3 miles of an existing sub-standard four-lane facility to a four-lane section with raised median and urban shoulders. A high volume of pedestrian traffic and potentially historic properties along the project corridor complicates the project. One of the major purposes of this project was to improve pedestrian safety by providing accessible pedestrian facilities with connections to adjacent businesses, neighborhoods, parks, and bus facilities. The completed project will provide a safe and aesthetically pleasing gateway to Savannah from the west. The project deliverables include concept development and approval, preliminary and final construction plans, right of way plans and NPDES permitting.</p>

Name	Brooks Miller, Jr., PE, PTOE		Years of relevant experience with this employer		↻ 26
Title	Associate Vice President		Years of relevant experience with other employer(s)		↻ 0
bDegree(s) / Years / Specialization			BS / 1983 / Civil Engineering		
Active registration number / state / expiration date			PE.0034472 / Louisiana/ 09-30-2027		
Year registered	2007	Discipline	Civil		
Contract role(s) / brief description of responsibilities			ROADWAY DESIGN TEAM 1		
Mr. Miller is experienced in designing and managing roadway and traffic design projects. Mr. Miller has gained valuable planning, roadway and traffic related experience over the last several years working on numerous departments of transportation projects. He has served as project manager on numerous high-profile highway design and rehabilitation projects involving design coordination, plan development, signing and pavement marking details development, traffic signal design, community outreach, contractor coordination and issue resolution, and intricate maintenance of traffic and construction phasing design.					
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).				
11/22- Ongoing	Owner’s Project Manager for I-10 Mobile River Bridge and Bayway Project. Alabama Department of Transportation. MOT and Roadway Manager. Michael Baker is serving as the owner’s representative for the Mobile River Bridge and Bayway Project. This is to provide support services to ensure compliance of the Design-Builder’s design, construction, contract documents, construction engineering and inspection, and testing.				
07/22- Ongoing	SR 35 Widening and Additional Lanes from CR-62 to CR-124 through the Town of Section, Jackson County, Alabama. Alabama Department of Transportation. Project Manager. Michael Baker provided engineering services to widen and add lanes to SR 35 through the Town and Section. Michael Baker’s services included the preparation of ROW plans, stormwater design, floodplain studies, erosion and sediment control plans, final design, cost estimates, and traffic control plans.				
06/21-11/22	Owner’s Project Manager for I-10 Mobile River Bridge and Bayway Project (Phase 1). Alabama Department of Transportation. Project Manager. Michael Baker served as the owner’s representative for the Mobile River Bridge and Bayway Project (Phase 1). This included pre-construction activities, writing and assisting with the RFQ and RFP, and helping manage other project consultants while short-listing and selecting a Design-Build Team.				
05/19-09/19	SR 6/US 82 Widening and Additional Lanes from SR-14 to US-31, Prattville, Alabama. Alabama Department of Transportation. Project Manager. Responsible for roadway and drainage design for final construction plans to the client for a three-mile highway widening project on US 82. Project included the replacement of two bridges. A hydraulic bridge over Autauga Creek and a second bridge over a Norfolk Southern Railroad line. The project also included the design for asphalt paving with a concrete paving alternate.				
02/17-08/18	SR 304 and McIngvale Road Interchange, Final Construction Plans, Desoto County, Mississippi. Mississippi Department of Transportation. Project Manager. Michael Baker developed Phase B Final Contract Plans for a new diamond interchange at SR 304 and McIngvale Road. Michael Baker provided final design for four ramps and developed a 3D design model of the new interchange using Power Geopak. Included in this contract, Michael Baker developed drainage plans, permanent signing and pavement marking plans, traffic control plans and details, construction signing, and traffic signal design for two traffic signals located at the eastbound and westbound ramp intersections with McIngvale Road. Michael Baker prepared intelligent transportation system (ITS) plans and details for a fiber connection between traffic signals and existing ITS infrastructure.				
04/06-08/11	Reconstruction of I-55 from North of Old Agency Road to South of SR 463, Madison County, Mississippi. Mississippi Department of Transportation. Civil Engineer. Michael Baker provided engineering services for the reconstruction of three miles of I-55 from Old Agency Road to SR 463. The reconstruction created a split-diamond interchange with frontage roads and several bridges and retaining walls. A new four-lane boulevard was constructed as the southern leg of the interchange, and an existing two-lane road was reconstructed into a four-lane boulevard as the northern leg. Michael Baker provided field surveys,				

	digital orthophotography mapping, preliminary and final roadway, bridge, and retaining wall design; hydraulics and hydrology; maps and deeds; signalization, intelligent transportation system, and lighting design; construction phase services; and quality control/quality assurance.
07/15-08/19	SR 304 and McIngvale Road Interchange Environmental Assessment and Phase A Right-of-Way Plans, DeSoto County, Mississippi. Mississippi Department of Transportation. Project Manager. Responsible for project oversight. Michael Baker is performing an environmental assessment and preparing Phase A right-of-way plans for a proposed interchange at SR 304 and McIngvale Road. Michael Baker's services include data collection and analysis, traffic impact analyses, alternatives analysis, preparation of preliminary and final right-of-way plans, public involvement, and preparation of environmental assessment documentation.
09/13-08/16	SR 15 and Lamey Bridge Road Roundabout, Harrison County, Mississippi. Mississippi Department of Transportation. Project Manager. Responsibilities include project management, budget setup, roadway plan design and detail, QC/QA, and preliminary and final submittal of Phase A Final ROW plans. Michael Baker provided engineering and environmental services for a proposed roundabout at the intersection of SR 15 and Lamey Bridge Road. Michael Baker's services included a Phase I archaeological survey, a categorical exclusion, a traffic analysis and impact study, and development of Phase A final right-of-way plans.
04/07-02/13	I-269 from East of I-55 to North of SR 305, DeSoto County, Mississippi. Mississippi Department of Transportation. Project Manager. Responsible for the project management, budget, roadway design plans, and QA/QC. Michael Baker provided engineering services for I-269 from east of I-55 to north of SR 305, and services included detailed mapping from aerial photography, field surveys, traffic analysis, the preparation of final right-of-way plans, and preparation of final construction plans.
01/10-12/12	I-15 Corridor Expansion, Utah County, Utah. Utah Department of Transportation. Civil Engineer and MOT Manager. Served as the MOT Design Lead from project startup in January 2010 to February 2011. Provided the maintenance of traffic and construction phasing design for the four-mile segment of I-15, including three full interchange replacements. Served as the Maintenance of Traffic Manager from February 2011 to project completion in December 2012. Responsibilities included MOT and construction phasing design. Coordinated and resolved traffic issues with owners, contractors and local agency stakeholders. Responsible for Requests and Notices of Closures with Utah Department of Transportation, conducted Technical Workgroup meetings, and handled MOT design changes during construction. I-15 CORE was a \$1.2 billion project in Utah County that included the reconstruction of 24 miles of I-15, including 10 interchanges and 63 bridges. Project also included accelerated bridge construction design and complex construction phasing.
12/09-01/14	I-55/SR 570 Interchange Improvements, McComb, Mississippi. Mississippi Department of Transportation. Project Manager. Responsible for the project management, budget setup, plan design and detail, quantity calculations, QC/QA, and final roadway design and traffic signal plans. Under an engineering services master agreement, Michael Baker performed the field survey and developed final roadway and traffic signal design plans for interchange improvements at the I-55 and SR 570 interchange. The project widened and lengthened the entrance and exit ramps to add turn lanes and included two new traffic signals on SR 570. Michael Baker performed the traffic modeling for the improvements and designing conduit and fiber-optic cable installations to interconnect the new traffic signals with the master system.

Firm employed by Michael Baker			
Name	Alexis Harrouch, EI	Years of relevant experience with this employer	↻ 3
Title	Engineer Intern	Years of relevant experience with other employer(s)	↻ 2
Degree(s) / Years / Specialization		B.S. / 2020 / Civil Engineering

Year registered	2021	Discipline	Civil
Contract role(s) / brief description of responsibilities		ROADWAY DESIGN TEAM 1	
Ms. Harrouch will serve as a transportation/roadway designer responsible for the development of horizontal and vertical alignments, roadway hydraulics, development of 3D design models, and development of construction plans.			
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
10/22 – Ongoing	US 371: KCS RR Overpasses HBI, Webster Parish, Louisiana. LADOTD. Transportation/Roadway Designer. Responsible for the horizontal layout of US 371 for the replacement of the existing bridge at Sibley, LA. Additional responsibilities include the develop of construction plans that meet DOTD and KCS RR requirements. Performed quantity take-offs and developed quantity box sheets for Final Plans.		
10/22 – 5/23	Barksdale AFB Entrance Road and Gate Complex, Design-Build, Bossier Parish, Louisiana. Transportation/Roadway Designer. Responsible for the quantity takeoff and development of construction plans for contractor on a design-build project for new entrance roads for Barksdale AFB. The project consists of the design and construction of an extension of an existing state-owned highway, LA 1267, along with a new multi-lane roundabout. The new roadway will be a 4-lane divided highway entrance into the Barksdale AFB.		
10/22 - Ongoing	Infrastructure Investment and Jobs Act (IIJA) Off-System Bridge Program – District 07, Louisiana. DOTD. Project Manager. Responsible for the development of construction plans for 12 Off-System Bridge replacement locations for the five parishes in District 07. Additional responsibilities include the coordination with sub-consultants for the services of topographic surveys, row mapping, geotechnical investigations, and hydraulic support. This project program requires Michael Baker to deliver 12 bridge replacements within the \$30.3 million dollars with allocated for District 07. DOTD issued NTP for additional services in May 2023		
10/24 – Ongoing	Additional Lanes on Three Notch-Kroner Road (CR-32) from McDonald Road (CR-39) to Schillinger Road South (CR-31), Mobile County, Alabama. Alabama DOT. Roadway Designer. Responsible for the striping and signing layout, traffic control plans, and Erosion Control Plans. Additional responsibilities include the development of construction plans, drainage profiles, drainage sections, and culvert wingwall layouts that meet Alabama DOT requirements in OpenRoads Designer.		
10/22 - Ongoing	LA 30: EBR P/L – I-10, Iberville and Ascension Parishes, Louisiana. LADOTD. Engineer Intern/Roadway Designer. Responsible for the layout of the existing alignment along with determining the apparent row along the corridor based off as-builts and provided GIS parcel information from both Ascension and Iberville Parishes. Project limits have been extended an additional 5 miles to include the environmental study along the corridor in East Baton Rouge Parish. Additional responsibilities include the delineation of drainage area for several cross structures (bridge/box culverts/culverts) along the corridor along with determining the existing flows for those structures.		

10/22 - Ongoing	Airline Highway (US 61) – North for MOVEBR, East Baton Rouge Parish, Louisiana City/Parish of Baton Rouge. Engineer Intern. Responsible for the delineation of drainage areas along with using the DOTD Hydraulics Manual and HYDRWIN software to develop the flows for both Jones Creek and Hurricane Creek that cross along the project limits. Additional responsibilities include checking the required hydraulics for the addition of an additional through lane in each direction and the impacts on existing parallel drainage along the corridor. The project is currently in the NEPA phase and once environmentally clear, required drainage structures will be designed for the future improvements.
01/23 - Ongoing	Ardenwood-Lobdell Connector for MOVEBR, East Baton Rouge Parish, Louisiana City/Parish of Baton Rouge. Engineer Inter. Responsible for performing independent technical review of roadway plans at each milestone submittal for the new Ardenwood-Lobdell Connector. The new connector is a 2-lane roadway with curb & gutter along with intersection improvements at both Lobdell Ave. and Ardenwood Rd. Project includes accommodations for complete streets with pedestrian sidewalks and bikepaths.
07/23 – Ongoing	Mickens Road for MOVEBR, East Baton Rouge Parish, Louisiana. City/Parish of Baton Rouge. Engineer Intern. Responsible for the development of the preliminary surface, drainage, and hydraulics report. The drainage was designed to the latest LADOTD Hydraulics Manual and City/Parish of Baton Rouge standards and criteria. A preliminary surface was created using LIDAR downloaded from LSU Atlas and The National Map Downloader from USGS. The preliminary drainage was developed using LADOTD Hydrowin and Excel.
08/23 – 02/24	SR 15 Pontotoc Feasibility Study, Pontotoc, Mississippi. Mississippi DOT. Roadway Designer & Engineer Intern. Michael Baker is providing traffic analysis, safety analysis, and access management evaluation to identify solutions that will determine the needs for widening SR-15 from US 278/MS 6 to SR-41/Main St in Pontotoc, Mississippi to a four-lane boulevard section. The corridor is currently a mix of two-lane, three-lane (with a center turn lane), and five lane (with a center turn lane) sections. The Feasibility study includes desktop and field data collection, traffic analysis, environmental and planning analysis, conceptual traffic engineering, development and high-level design including two build concepts for 26 intersections along the road. It also includes planning level cost estimates, agency coordination, and coordination with the public via a public meeting. Responsible for the layout of the two build concepts which included J-Turns, Bulb Outs, Auxiliary lanes, Green-T intersections, and Roundabouts. Additional responsibilities include developing vehicle turning movement layouts with the use of Transoft AutoTurn and development of preliminary baselines through the use of OpenRoads Designer.
01/24 – 06/24	SR 25 - Grants Ferry to SR 471, Flowood, Mississippi. Mississippi DOT. Roadway Designer & Engineer Intern. Michael Baker will develop final Right of Way Plans for the widening of SR-25 from Grants Ferry Road to SR 471 from 4 lanes to 6 lanes, approximately 3 miles. Our team is designing this project to the latest standards and criteria of MDOT and use the latest version of OpenRoads Designer. All unsignalized crossovers will be converted to directional crossovers. Responsible for developing vehicle turning movement layouts with the use of Transoft AutoTurn. Additional responsibilities include creating preliminary baselines, profiles, cross sections, and 3D roadway models through the use of OpenRoads Designer.
07/23 – 09/23	SR 35 – Additional Lanes from CR-62 to CR-124 through the Town of Section, Jackson County, Alabama. Alabama DOT. Design Engineer & Engineer Intern. Michael Baker provided engineering services to widen and add lanes to State Route 35 through the town of Section, Alabama. Michael Baker’s services included the preparation of Right of Way plans, drainage and stormwater design, floodplain studies, erosion and sediment control plans, traffic control plans, construction cost estimates, and final design. Responsible for the development of final baselines, profiles, drainage profiles, and drainage cross sections through the use of Microstation and InRoads Select Series 2. The drainage profiles and drainage cross sections were designed to the latest ALDOT standards and criteria.
01/21 – 09/22	I-49 Connector, Lafayette, Louisiana. Lafayette Parish. Engineer Intern. Responsible for the development of preliminary typical sections, cross sections and roadway models through the use of Microstation and Inroads Select Series 2. Developed vehicle turning move layouts with the use of Transoft AutoTurn along with participating in the development of geometry design for the project. Additional responsibilities included roundabout design in the core area along with the required tapers per LADOTD Standards.

Firm employed by Michael Baker				
Name	Jacob Rish, EI	Years of relevant experience with this employer	↻ 1	
Title	Engineer Intern	Years of relevant experience with other employer(s)	↻ <1	
Degree(s) / Years / Specialization		B.S. / 2024 / Civil Engineering		
Active registration number / state / expiration date		EI.0035857 / LA / 03-31-2027		
Year registered	2024	Discipline	Civil	
Contract role(s) / brief description of responsibilities		ROADWAY DESIGN TEAM 1		
Mr. Rish will serve as a transportation/roadway designer responsible for the development of horizontal and vertical alignments, roadway hydraulics, development of 3D design models, and development of construction plans.				
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).			
01/24 – Ongoing	US 371: KCS RR Overpasses HBI, Webster Parish, Louisiana. LADOTD. Transportation/Roadway Designer. Responsible for the development of construction plans that meet DOTD and KCS RR requirements. Performed quantity takeoffs and worked on summary of quantity box sheets along with revising typical sections to show superelevation rate tables and profiles.			
01/24 – Ongoing	Infrastructure Investment and Jobs Act (IIJA) Off-System Bridge Program – District 07, Louisiana. DOTD. Transportation/Roadway Designer. Participated in the development of construction plans for 12 Off-System Bridge replacement locations for the five parishes in District 07. Performed quantity takeoffs for the development of summary of quantity sheets. Assisted with creating typical section sheets along with helping create the embankment widening plans for guardrail. This project program requires Michael Baker to deliver 12 bridge replacements within the \$30.3 million dollars with allocated for District 07. DOTD issued NTP for additional services in May 2023			
11/24 – Ongoing	CR 32: Additional Lanes on Three Notch-Kroner Road, Mobile County, Alabama. DOTD. Transportation/Roadway Designer. Michael Baker provided engineering services to widen and add lanes CR 32 in Mobile County, Alabama. Responsible for the development of construction plans that meet ADOT standards. Laid out drainage structures and created drainage profiles and drainage cross-sections.			
11/24 – Ongoing	SR 35 – Additional Lanes from CR-62 to CR-124 through the Town of Section, Jackson County, Alabama. Alabama DOT. Engineer Intern/Roadway Designer. Michael Baker provided engineering services to widen and add lanes to State Route 35 through the town of Section, Alabama. Michael Baker’s services included the preparation of Right of Way plans, drainage and stormwater design, floodplain studies, erosion and sediment control plans, traffic control plans, construction, cost estimates, and final design. Responsible for the development of final baselines, profiles, drainage profiles, and drainage cross sections through the use of Microstation and InRoads Select Series 2. The drainage profiles and drainage cross sections were designed to the latest ALDOT standards and criteria			

Firm employed by Michael Baker			
Name	Marcela Trochez	Years of relevant experience with this employer	↻ 3
Title	Civil Associate	Years of relevant experience with other employer(s)	↻ 0
Degree(s) / Years / Specialization		B.S. / 2020 / Civil Engineering B.S. / 2014/ Biology	
Active registration number / state / expiration date		N/A	
Year registered	N/A	Discipline	N/A
Contract role(s) / brief description of responsibilities		ROADWAY DESIGN TEAM 1	
Ms. Trochez will support roadway designs by assisting with the development of horizontal and vertical alignments, roadway hydraulics, development of 3D design models, and development of construction plans.			
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
10/22 – Ongoing	US 371: KCS RR Overpasses HBI, Webster Parish, Louisiana. LADOTD. Transportation/Civil Associate. Responsible for the development of roadway construction preliminary and final plans that meet LADOTD and KCS RR requirements for the design and replacement of three bridges crossing over KCS railroad tracks. Two of the bridges are parallel bridges located at the US 371 and I-20 Intersection in Minden, which is 3.7 miles apart from the third single bridge located on US 371 at Sibley. Responsibilities included the development of typical sections, horizontal alignments and vertical alignments for both locations and their incorporation into roadway construction sheets, such as plan and profile sheets, geometric layout sheets, and sequence of construction sheets. Additional responsibilities included the development of existing and proposed drainage maps, as well as the design of a new sub-surface drainage system in both the Minden and Sibley locations. Moreover, a cost estimate was performed for both sites, in which quantities were periodically updated in excel if anything in the design had changed. Software programs used for the roadway design sheets were Microstation V8I and InRoads V8.11. The software program used for the drainage design was the LADOTD hydraulics computer software HYDR WIN 2009.		
10/22 – 5/23	Barksdale AFB Entrance Road and Gate Complex, Design-Build, Bossier Parish, Louisiana. Transportation/ Civil Associate. Responsible for the development of roadway construction plans for contractor on a design-build project for new entrance roads for Barksdale Air Force Base (AFB), which included drawing typical sections, creating horizontal and vertical alignment, and generating pavement quantities. Additional tasks involved the detailing of each construction sheet such as plan and profile, geometric layout, existing and proposed drainage maps, suggested sequence of construction, and signing and striping sheets. The project consists of the design and construction of an extension of an existing state-owned highway, LA 1267, along with a new multi-lane roundabout. The new roadway will be a 4-lane divided highway entrance into the Barksdale Air Force Base (AFB).		
10/22 - Ongoing	Infrastructure Investment and Jobs Act (IIJA) Off-System Bridge Program – District 07, Louisiana. DOTD. Transportation/ Civil Associate. Responsible for supporting the development of preliminary and final construction plans for 12 Off-System Bridge replacement locations for the five parishes in District 07. The tasks performed for this project involved site visits, generating typical sections, horizontal and vertical alignment, roadway modeling, roadway quantities, and hydraulic support. The type of roadway construction sheets created for each of the bridge sites included the title, typical section, summary of quantities, plan and profile, reference points and benchmark elevations, embankment widening and guardrail, geometric layout, temporary erosion control, suggested sequence of construction, detour and cross-section sheets. MicroStation V8I and Inroads V8.11 were the software used to generate all roadway design for each bridge site. Additional tasks involved meeting with the client at plan in hand meetings to discuss the proposed plans and address any concerns and comments they had. This project program requires Michael Baker to deliver 12 bridge replacements within the 30.3 million dollars allocated for District 07. LADOTD issued NTP for additional services in May 2023.		

<p>9/23 - Ongoing</p>	<p>Mickens Road (Hooper Road – Joor Road) – MOVEBR, East Baton Rouge Parish, Louisiana City/Parish of Baton Rouge. Transportation/ Civil Associate. The project involves improvements to Mickens Road, which is a two-lane roadway with not shoulder or pedestrian facilities. The potential improvements involve the widening of the first half of the road from a two-lane to a three-lane road with pedestrian facility and a closed drainage system. The second half of the road will potentially be a two-lane road with paved shoulders and an open drainage design. Michael Baker in charge of providing a preliminary drainage study. Civil Associate responsible for performing the existing drainage analysis and contributing to the proposed drainage design, each by following the guidelines of the LADOTD Hydraulic Manual and the city/parish of Baton Rouge Standards and Criteria. ArcGIS Pro, LSU Atlas, and The National Map downloaders from USGS were resources used to obtain preliminary LIDAR data and Surface data to begin the preliminary existing and proposed drainage analysis. Additional responsibilities included writing a hydrology and Hydraulic report detailing the data analysis process and stating the results of both the existing drainage conditions and the proposed drainage design recommendations</p>
<p>12/23 - Ongoing</p>	<p>SR 15 Pontotoc Feasibility Study. Mississippi DOT. Transportation/ Civil Associate. Michael Baker is providing traffic analysis, safety analysis, and access management evaluation to identify solutions that will determine the needs for widening of SR 15 from US 278/MS 6 to SR 41/Main Street in Pontotoc, Mississippi to a four-lane boulevard section. The corridor is currently a mix of two-lane, three-lane (with center turn lane), and five-lane (with a center turn lane) sections. The Feasibility study includes desktop and field data collection, traffic analysis, safety analysis, environmental and planning analysis, conceptual traffic engineering, development and high-level design including two build concepts for 26 intersections along the road. Civil Associate responsible for supporting the development of two conceptual alternative designs to improve the access management along the corridor and each of the 26 intersections to enhance the Level of Service (LOS) at location of interest. Followed the MDOT Roadway Design Manual and Design Standards in the design of each intersection and median openings to meet geometric requirements as well as access management. Each intersection and median opening were furthered analyzed using TRANSOFT Auto Turn software to perform auto-turn movements of design vehicles such as a WB-67 to determine if further changes were necessary to clear the auto-turn movements. Open Roads Design Software was used for the design.</p>
<p>07/22 - Ongoing</p>	<p>New Orleans Rail Gateway - Avondale PEL Study, Jefferson Parish, Louisiana. DOTD. Transportation/ Civil Associate. Michael Baker is providing operations, engineering, and environmental studies and preparing a planning and environmental linkages (PEL) study to evaluate the consolidation, road-over-rail grade separation, or closure of four at-grade highway-rail crossings (Live Oak Boulevard, Willswood Lane, George Street, and Avondale-Garden Road). For the project, Michael Baker is performing project management, solicitation of views, secondary-source environmental resources inventory, geographic information system (GIS) mapping, freight rail operations forecasting and crossing occupancy time analyses, roadway traffic and crash analyses, purpose and need, roadway/bridge conceptual design, cost estimates, alternatives analyses, stakeholder and agency coordination, and public outreach. Civil Associate was responsible for the development of the conceptual roadway and bridge alternative analysis considering the LADOTD Roadway Design Guidelines and Complete Streets Policy, which involved the generation of multiple alternative horizontal and vertical alignments, and typical sections. The alternatives of choice were further conceptualized and analyzed by meeting sight distance requirements and using TRANSOFT Auto Turn software to analyze auto-turn movements of design vehicles such as a WB-67 to determine whether curve widening was necessary at certain locations. Curve Widening was set in place at multiple locations in the conceptualized design following the AASHTO Green Book guidelines. Final exhibits were put together for client review.</p>
<p>07/23 –09/23</p>	<p>SR-35 Widening and Additional Lanes from CR-62 (Williams St.) To North of CR-124 (Scenic Dr.) through Jackson County, AL. Alabama DOT. Michael Baker provided engineering services to widen and add lanes to State Route 35 through the town of Section, AL. Michael Baker's services included the preparations of right-of-way plans, drainage and stormwater design, floodplain studies, erosion and sediment control plans, traffic control plans, construction cost estimates, and final design. Civil Associate Responsible for supporting development of construction plans. Responsibilities included the development of typical sections, horizontal and vertical alignment, drainage and roadway cross-sections by using MicroStation V8i and Inroads software.</p>

Roadway Design Team 2

Name	Gerry G. Menard, PE	Years of relevant experience with this employer	↻ 34
Title	Principal / Chief Transportation Engineer	Years of relevant experience with other employer(s)	↻ 12
Degree(s) / Years / Specialization		BS / 1978/ Civil Engineering	
Active registration number / state / expiration date		PE.20437 / Louisiana / 3/31/2027	
Year registered	1983	Discipline	PE/Civil
Contract role(s) / brief description of responsibilities		ROADWAY DESIGN TEAM 2	
Experience dates (mm/yy-mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
01/23 - Present	4400024832: Retainer Contract for Roadway Design Services, District 03, LADOTD District 03. Mr. Menard serves as the Supervising Engineer for this retainer contract for roadway design services, consisting of three (3) assigned task orders to date. Task orders include preparation of preliminary and final plans for: the mill and overlay of LA 347, including patching of the failed base course , along with drainage improvements to remediate and/or supplement the sub-surface drainage; the addition of turn lanes from LA 182 onto Duchamp Road, including milling and overlay ; and the mill and overlay of the existing roadway and shoulders with drainage and intersection improvements . EG Fee: \$976.9K		
06/14 - Present	H.004957: I-12 to Bush, LA 3241 (I-12 – LA 36), St. Tammany Parish, LA. Project Manager and Lead Design Engineer for the LADOTD’s I-12 to Bush roadway project. Mr. Menard has performed design oversight and QC checking for typical roadway sections including roadway and intersection horizontal geometry and vertical profile with super elevation details, including five (5) roundabouts to be constructed on an existing roadway involving complex construction phasing considerations . The project consists of approximately 6 miles of roadway. The first 2.5 miles of the project involves widening the roadway from two lanes to four lanes along the existing alignment of LA 434. The remaining 3.5 miles of the project consists of designing a four-lane divided roadway on a new alignment.		
04/09 – Present	H.004420: LA 302: Bayou Barataria Bridge Replacement, Jefferson Parish, LA (LADOTD). Mr. Menard served as Project Manager for the replacement of the existing low-level swing span bridge on LA 302 over Bayou Barataria at Jean Lafitte. This project consisted for four phases. In the first phase, EG performed an Economic Benefit Study for the purpose of pursuing an alternative funding source (Truman Hobbs Funds) for the project. The second phase was performed concurrent with the first and consisted of the topographic survey, design and preparation of Preliminary Plans and preparation of right-of-way maps for the road and bridge (approach spans) . The third phase consisted of the final design and preparation of plans for road and bridge (approach spans) . The fourth phase will be for construction related services .		
01/13 – Present	H.013494: LA 52 Complete Streets Improvements, St. Charles Parish, LA. As Project Manager , Mr. Menard is responsible for the performance of preliminary and final design as part of the redesign of LA 52 using LADOTD’s Complete Streets approach for associated drainage improvements, landscaping, and construction of a multi-use pathway and ADA-compliant pedestrian sidewalk. Project involves engineering and design and all related supplemental services for drainage improvements and Complete Streets services along LA 52. This project was partially grant funded and is being designed in accordance with FHWA design standards.		
05/13 - Present	Mall of Louisiana Blvd. (formerly Picardy-Perkins Connector), East Baton Rouge Parish, LA. Mr. Menard serves as Project Manager for an urban roadway project that will connect Perkins Road (LA 427) to Mall of Louisiana Boulevard/I-10 Interchange, and is intended to relieve traffic congestion on Bluebonnet Blvd. Mr. Menard is overseeing the design of the four-lane curb-and-gutter project , which has included a design study and the preparation of preliminary and final plans . Additional project features include a raised median, sidewalks, a new bridge crossing at Dawson Creek, and an underpass at the Kansas City Southern (KCS) railroad. Project consists of approximately 1 mile of roadway , 3 roadway bridges, a railroad underpass, a stormwater pumping station, retaining walls, and a railroad bridge.		

07/17 – Present	Move Ascension: Germany Road (US 61 – LA 44) Safety Widening, Ascension Parish, LA. Mr. Menard serves as Project Manager and Lead Design Engineer . Services performed by Mr. Menard have included oversight of survey personnel , preparation of preliminary and final roadway plans and specifications for mill and overlay design, development of right-of-way maps, and construction engineering and inspection .
06/02 - 10/21	MOVEBR: South Choctaw Drive Widening and Intersection Improvements (Flannery Road to Central Thruway), Baton Rouge, LA. Project Manager for Phase I and project engineer for Phase II to produce construction plans for a 2 lane roadway widened to 4 lanes with intersection improvements . Tasks completed by Mr. Menard include alignment and turn lanes geometry, grading & geometric layouts , and quantity calculations . Additional funding to complete Phase II of the project was received in 2020 and the project was completed in 2021.
05/14 – 03/18	4400004357: Retainer Contract for Traffic Engineering Management Roadway Projects Statewide. Mr. Menard served as the Supervising Engineer for 3 task orders for this retainer contract . Projects included a single lane rural roundabout in Terrebonne Parish, an urban two-lane roundabout in Livingston Parish, and a “ road diet ” conversion of a 6 lane urban arterial into a Superstreet by elimination of full access median openings (i.e., crossovers) and replacing with directional left turns and U-turns on the arterial. The Superstreet converted approximately three (3) miles of an existing six (6) lane urban arterial on US 190 in St. Tammany Parish.

Firm employed by Evans-Graves Engineering, Inc.			
Name	Lisa A. Blanchard, PE	Years of relevant experience with this employer	↻ 19
Title	Transportation Engineer	Years of relevant experience with other employer(s)	↻ 4
Degree(s) / Years / Specialization		BS / 2002 / Civil Engineering	
Active registration number / state / expiration date		PE.32916 / Louisiana / 3/31/2027	
Year registered	2007	Discipline	PE/Civil
Contract role(s) / brief description of responsibilities		ROADWAY DESIGN TEAM 2	
Experience dates (mm/yy-mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
01/23 - Present	<p>4400024832: Retainer Contract for Roadway Design Services, District 03, LADOTD District 03. Ms. Blanchard serves as the Project Manager and Lead Design Engineer for this retainer contract for roadway design services, consisting of three (3) assigned task orders to date. Task orders include preparation of preliminary and final plans for: the mill and overlay of LA 347, including patching of the failed base course, along with drainage improvements to remediate and/or supplement the sub-surface drainage; the addition of turn lanes from LA 182 onto Duchamp Road, including milling and overlay; and the mill and overlay of the existing roadway and shoulders with drainage and intersection improvements. EG Fee: \$976.9K</p>		
09/22 - Present	<p>MOVEBR: Mickens Road (Hooper Road to Joor Road), Baton Rouge, LA. Project Engineer and Lead Designer for the performance of a design study, construction plans, cost estimates, and construction phase support for capacity improvements to approximately 2.8 miles of the Mickens Road corridor. As part of this work, Ms. Blanchard has overseen the performance of topographic surveys using Evans-Graves’ in-house survey crews. Design work has included studies and design for the incorporation of Complete Streets features for the corridor, including the design of a new ADA-compliant sidewalk and multi-purpose pathway to potentially be included in the project’s final design.</p>		
04/21 - Present	<p>MOVEBR: North Blvd. Corridor Enhancement (I-110 to Foster/Florida), Baton Rouge, LA. Project Engineer and Lead Designer performing preliminary and final design and providing survey oversight, cost estimates, and construction phase support for corridor improvements to North Blvd. that will promote increased usage of the corridor in East Baton Rouge Parish. This work is being designed in conformance with LADOTD Complete Streets design, including Ms. Blanchard’s study and design of ADA-compliant sidewalks and multi-use pathway features.</p>		
06/14 - Present	<p>H.004957: I-12 to Bush, LA 3241 (I-12 – LA 36), St. Tammany Parish. Design Engineer for preliminary plans of approximately six miles of urban and rural roadway on an existing and new alignment. Provided typical roadway sections including details for pavement structure (designed by LADOTD) to comply with designated Roadway Classifications and mill and overlay. Established roadway and intersection horizontal geometry and vertical profile including super elevation details. Design Engineer for five (5) roundabouts to be constructed on an existing roadway and involving complex construction phasing considerations. Performed drainage design using the LADOTD HYDR software including estimation of drainage areas, computation of peak runoff, and selection of most economical cross drains. Developed roadway templates using MicroStation InRoads to create cross sections over the length of the project.</p>		
07/17 – Present	<p>Move Ascension: Germany Road (US 61 – LA 44) Safety Widening, Ascension Parish, LA. Project Engineer under a task order based contract to provide professional engineering services for roadway projects to improve traffic congestion in Ascension Parish. Ms. Blanchard is currently performing roadway engineering and design under a task order for safety widening and associated mill and overlay of approximately 9,000 feet of Germany Road between US 61 (Airline Highway) to LA 44. Each lane is being widened to 11’ with 2’ paved shoulders and all side ditches are being regraded to provide 4:1 foreslopes over the entire project length. The project has multiple funding sources and requires LADOTD oversight and involvement.</p>		
05/13 - Present	<p>Mall of Louisiana Blvd. (formerly Picardy-Perkins Connector), East Baton Rouge Parish, LA. Project Engineer. Ms. Blanchard assisted in preparation of roadway plans including the generation of the pavement marking layout and the joint layout sheets and updates to the geometric layouts. Also prepared plans for the realignment of Pecue Lane at Perkins Road as part of intersection improvements. The project scope included the design of a four lane, curb</p>		

	and gutter urban collector with enclosed drainage system that would connect Perkins Road with the Mall of Louisiana Boulevard. Design work included horizontal and vertical geometry and drainage.
04/18 – 08/21	Move Ascension: US 61 and Germany Road Intersection Improvements, Ascension Parish, LA. Project Engineer . Ms. Blanchard was responsible for the design of preliminary and final roadway plans and specifications , in addition to providing project oversight . Project involved the design of roadway improvements and associated mill and overlay at the intersection of US 61 and Germany Road. The project included the reconfiguration of the existing intersection to include Left turn, Through, and Right turn lanes from Germany Rd. onto US 61, as well as a through lane from Duplessis Rd. across US 61 onto Germany Rd.
05/14 – 03/18	4400004357: Retainer Contract for Traffic Engineering Management Roadway Projects Statewide. Ms. Blanchard served as the Project Engineer for 3 task orders for this retainer contract . Projects included a single lane rural roundabout in Terrebonne Parish, an urban two-lane roundabout in Livingston Parish, and a “ road diet ” conversion of a 6 lane urban arterial into a Superstreet by elimination of full access median openings (i.e., crossovers) and replacing with directional left turns and U-turns on the arterial. The Superstreet converted approximately three (3) miles of an existing six (6) lane urban arterial on US 190 in St. Tammany Parish. Specific duties performed by Ms. Blanchard included production of preliminary and final plans, typical roadway sections including details for pavement structure (designed by LADOTD) to comply with designated roadway classifications, roadway and intersection horizontal geometry and vertical profile , and QC of drainage design and sequence of construction design , including plan checking and quantity determination .
12/03 – 03/11	700-30-0051: US 167 (Winnfield to LA 1236), Winn Parish, LA. As Project Engineer , Ms. Blanchard developed typical roadway sections and detailed pavement structure (designed by LADOTD) for the designated Roadway Classification. Typical Sections included alternatives for both asphalt and concrete pavement . She also set vertical and horizontal geometry and provided intersection geometric details . Ms. Blanchard also contributed to the comprehensive drainage design for the project including estimation of drainage areas, computation of peak runoff, and selection of most economical cross drain culverts . Assisted in the development of ditch grades , determining limits of construction , and recommended right-of-way . Coordinated design work with KCS Railroad , which parallels and crosses the project.

Services provided by Mr. Hebert include quantity and calculation checks for the bridge and roadway, ditch geometry design, and cross drain analysis and design .				
07/20 – Present	Move Ascension: Germany Road (US 61 – LA 44) Safety Widening, Ascension Parish, LA. Mr. Hebert serves as an Engineer Intern on this project for the redesign of the US 61 and Germany Road intersection as part of Ascension Parish’s Move Ascension Program . The project includes the addition of dedicated right and left turn lanes on Germany Road, along with subsurface drainage and associated mill and overlay . Services performed by Mr. Hebert include quantity and drainage calculation checks .				
07/20 – Present	H.013494: LA 52 Complete Streets Improvements, St. Charles Parish, LA. Mr. Hebert serves as an Engineer Intern on this project for the redesign of LA 52 using the LADOTD’s Complete Streets approach for associated drainage improvements, landscaping, and construction of a multi-use pathway and ADA-compliant pedestrian sidewalk. Services performed by Mr. Hebert have included preliminary research of the area, storm drain inlet spacing , and subsurface storm drainage for one of the 0.8-mile long project phases. This project is partially grant funded and is being designed in accordance with FHWA design standards.				
04/21 - Present	MOVEBR: North Blvd. Corridor Enhancement (I-110 to Foster/Florida), Baton Rouge, LA. Mr. Hebert serves as an Engineer Intern on this project and has performed flood stage and watershed determinations for Ward Creek and a watershed determination for Cloud Canal as part of EG’s design work on the project. This MOVEBR project involves the design of corridor improvements including Complete Streets mobility improvements for approximately 2.65 miles of roadway from Interstate 110 to Florida Blvd.				

Firm employed by Evans-Graves Engineering, Inc.			
Name	P. Stephen Lundgren, Jr., PE	Years of relevant experience with this employer	↻ 20
Title	Chief Civil Engineer	Years of relevant experience with other employer(s)	↻ 13
Degree(s) / Years / Specialization		MS / 1994 / Civil Engineering with H&H Specialization; BS / 1992 / Civil Engineering	
Active registration number / state / expiration date		PE.28222 / Louisiana / 3/31/2027	
Year registered	1999	Discipline	PE/Civil
Contract role(s) / brief description of responsibilities		ROADWAY DESIGN TEAM 2	
Experience dates (mm/yy-mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
04/18 - Present	<p>H.013494: LA 52 Complete Streets Improvements, St. Charles Parish, LA. Mr. Lundgren serves as Project Manager and is responsible for the supervision and coordination of preliminary and final design, engineering services during bidding and construction, topographic surveying, and permitting for the redesign of LA 52 using LADOTD Complete Streets approach for associated drainage improvements, landscaping, and construction of a multi-use pathway and ADA-compliant pedestrian sidewalk. Project involves engineering and design and all related supplemental services for H&H design, drainage improvements, and Complete Streets design along LA 52. As part of this work, Mr. Lundgren also oversaw the performance of a Stage 1 Environmental Assessment for the project under a separate contract. This project is being designed in accordance with FHWA and LADOTD design standards. Construction Cost: \$9.26m</p>		
12/12 - Present	<p>Read Blvd. East Neighborhood (Groups A, B, E, F), Orleans Parish, LA. Mr. Lundgren is the Project Manager and Chief Design Engineer for the project, which involves removal and reconstruction of heavily-damaged areas or repairs, adjustments, and modifications to lightly-damaged areas in the Read Blvd. East neighborhood, which consists of nearly 90 residential streets. The project includes a total of nearly 6 miles of new or rebuilt roadway (concrete, asphalt, and composite) and curbs, including hydrologic & hydraulic design report, design of surface and subsurface drainage facilities, new subsurface water and sewer mains and service lines, rebuilt sidewalks and driveways, and ADA compliant curb ramps for the handicapped at all intersections, including medians. Mr. Lundgren's duties have involved coordinating surveys, coordinating with the various City departments, the SWBNO, FEMA, and other interested parties to ensure compliance with their requirements, preparing design reports, preparing bid documents including plan drawings, technical specifications, and bid forms, preparing construction cost estimates, and providing construction administration and resident inspection services. The estimated construction cost of the project is \$19,000,000.</p>		
05/17 – 05/20	<p>Reconstruction of Michoud Blvd. (Chef Menteur to Dwyer), Orleans Parish, LA. Mr. Lundgren served as the Project Manager and Chief Design Engineer for the project, which involved removal and reconstruction of nearly 1 mile of roadway (concrete with asphalt alternate) and curbs, including new subsurface drainage, utility relocations including water and sewer mains, structures, and service lines, tree protection, striping and markings for multi-use facility sharing, traffic control and detour plans, temporary construction plans, rebuilt sidewalks and driveways, and ADA compliant curb ramps for the handicapped. Mr. Lundgren's duties included coordinating surveys, preparing hydraulic/hydrologic model runs and analyses of the existing and proposed conditions and developing the new subsurface drainage system, presenting the results of the preceding in a drainage report, developing new roadway grade profiles to coordinate with the new surface drainage collection system in accordance with model runs, coordinating with the various City departments, the SWBNO, and other interested parties to ensure compliance with their requirements, preparing bid documents including plan drawings, technical specifications, and bid forms, preparing a construction cost estimate, and providing construction administration and resident inspection services. Michoud Blvd. was a bond funded project. Construction of the project was completed in 2019. Construction Cost: \$4.07m</p>		
02/10 – 02/12	<p>Plaquemines Parish Curbs and Sidewalks Replacement, Plaquemines Parish, LA. Mr. Lundgren served as Project Manager and was responsible for the supervision and coordination of this CDBG grant-funded project. Tasks included design, site assessment, coordination of topographic survey, permitting, grant application, plans and specifications, cost estimating, bidding, construction administration, and inspection of new construction</p>		

	for damaged or missing integral concrete curbs and concrete sidewalks along 4,330 feet of LA Hwy. 23 in Port Sulphur, 13,800 feet of LA Hwy. 11 in Buras, and local streets in the Braithwaite Park Subdivision. Construction Cost: \$950k
2006 - 2009	Brewster Road Widening, Mandeville, LA. Mr. Lundgren served as a Project Engineer for the conceptual planning of a five-mile roadway and the design and construction documents of two miles of that roadway to improve an overloaded rural road to eliminate flooding and ease traffic conditions on a major east-west connector in West St. Tammany Parish. Total construction cost: \$1.3m

Firm employed by **Evans-Graves Engineering, Inc.**

Name	Keith M. Meyer, PE	Years of relevant experience with this employer	↻ 20
Title	Civil / Structural Engineer	Years of relevant experience with other employer(s)	↻ 27
Degree(s) / Years / Specialization		BS / 1985 / Civil Engineering	
Active registration number / state / expiration date		PE.24638 / Louisiana / 9/30/2026	
Year registered	1992	Discipline	PE/Civil
Contract role(s) / brief description of responsibilities		ROADWAY DESIGN TEAM 2	

Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).
4/20 – 12/22	Title. Role. Duties.
04/18 - Present	H.013494: LA 52 Complete Streets Improvements, St. Charles Parish, LA. Mr. Meyer serves as Project Engineer and performing preliminary and final design for the redesign of LA 52 using LADOTD Complete Streets approach for associated drainage improvements, landscaping, and construction of a multi-use pathway and ADA-compliant pedestrian sidewalk. Project involves engineering and design and all related supplemental services for drainage improvements and Complete Streets services along LA 52. As part of this work, Mr. Meyer performed drainage calculations and roadway grade profiles. This project was partially grant funded and is being designed in accordance with FHWA and LADOTD design standards. Construction Cost: \$9.26m
12/12 - Present	Read Blvd. East Neighborhood (Groups A, B, E, F), Orleans Parish, LA. Mr. Meyer serves as a Project Engineer on this project and is responsible for the review and recommendation of the necessary revisions required to be made to the FEMA Project Worksheet (PW) in order to accommodate new items of work. Additional work includes the development of all quantities for the project including the separation of quantities to be funded by eligible FEMA items, the City of New Orleans, Department of Public Works Non-FEMA eligible items, and the New Orleans Sewerage and Water Board (S&WBNO) FEMA eligible items. The estimated construction cost of the project is \$19,000,000.
05/17 – 05/20	Reconstruction of Michoud Blvd. (Chef Menteur to Dwyer), Orleans Parish, LA. Project Engineer responsible for developing the recommended sequence of construction for the reconstruction of Michoud Blvd. (southbound and northbound roadways) between Chef Menteur Highway and Dwyer Road. The recommended sequence of construction consists of eight (8) different phases of work and development of all detour routes necessary during construction. Each phase of construction was addressed by Mr. Meyer to show the limits of work in each phase. Detour route design included all construction signage and was designed in compliance with the detour requirements of the City of New Orleans, DPW and the Manual on Uniform Traffic Control and Devices. Michoud Blvd was a bond funded project. Construction Cost: \$4.07m
07/16 – 06/19	Joe Brown Park and Audubon Nature Center Paving Repairs, Orleans Parish, LA. Project Engineer responsible for the review of damages to the roadways located inside of the Joe W. Brown Memorial Park and Audubon Nature Institute. Mr. Meyer’s review of damages led to the development of project scoping reports that were provided to FEMA, allowing the roadway repairs to be funded through FEMA funds. In addition, Mr. Meyer developed all sections, details, quantities, and cost estimates to be managed through the City of New Orleans, DPW. Construction cost: \$1.174m
04/09 - Present	H.004420: LA 302: Bayou Barataria Bridge Replacement, Jefferson Parish, LA. Project Engineer responsible for the design of a double leaf bascule bridge - approach spans (approximately 4,550 LF with 65 Bents/Piers), to 100% of LADOTD Preliminary Design Stage. Bridge superstructure types consist of Type III and Type IV PPC Girders and BT-78 Girders all in accordance with AASHTO guidelines.
06/09 – 07/12	I-10 Southwest Frontage Road, Slidell, LA. Project Engineer responsible for the design of a 7 – 20’ span (140’) flat slab span bridge designed in accordance with AASHTO guidelines. Mr. Meyer also developed a bridge load rating summary for the bridge using LADOTD Bridge Design Manual bridge rating criteria.
06/02 – 09/11	I-40 Twin Span Bridges Crossing Gold Creek and Stone Dam Creek, Faulkner County, AR. Mr. Meyer served as the Engineer of Record for the design of twin flat slab span bridge structures, (4 total) including concrete cap-beams, columns, spread footings and foundations, all in accordance with

	AASHTO guidelines and AHTD guidelines. This Staged Design/Construction Arkansas State Highway Commission project was part of the agency's Highway 65 – East (Widening) project.
1994 - 1996	US 67 Relocation, Craighead and Lawrence Counties, AR. Mr. Meyer served as Deputy Project Manager for the design of six (6) bridges on a 26-kilometer stretch of interstate on a new location in Northeast Arkansas for the Arkansas State Highway and Transportation Department . Bridge types consist of steel plate girder and wide-flange beam superstructures with cast-in-place decks supported on reinforced concrete bents with concrete filled steel shell piling foundations .

Firm employed by Evans-Graves Engineering, Inc.			
Name	Wesley S. Roy, PE	Years of relevant experience with this employer	↻ 1
Title	Civil Engineer	Years of relevant experience with other employer(s)	↻ 16
Degree(s) / Years / Specialization		BS / 2007 / Civil Engineering	
Active registration number / state / expiration date		PE.49529 / Louisiana / 3/31/2027	
Year registered	2024	Discipline	PE/Civil
Contract role(s) / brief description of responsibilities		ROADWAY DESIGN TEAM 2	
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
01/25 - Present	H.013494: LA 52 Complete Streets Improvements, St. Charles Parish, LA. Mr. Roy serves as Project Engineer and performing preliminary and final design for the redesign of LA 52 using LADOTD Complete Streets approach for associated drainage improvements, landscaping , and construction of a multi-use pathway and ADA-compliant pedestrian sidewalk . Project involves engineering and design and all related supplemental services for drainage improvements and Complete Streets services along LA 52. As part of this work, Mr. Roy performed drainage calculations and roadway grade profiles. This project was partially grant funded and is being designed in accordance with FHWA and LADOTD design standards. Construction Cost: \$9.26m		
12/24 - Present	James L. Hunt Road Improvements, Southern University, Baton Rouge, LA. Project Engineer . Mr. Roy performed engineering and design services for the development of final plans and bid documents for the rebuild of James L Hunt Road serving the Southern University Agricultural Center campus. Design included asphalt mill and overlay for approximately 0.5 miles of two lane roadway with new striping and driveway transitions . Additional services performed by Mr. Roy will include assistance with construction bidding and construction administration . EG Fee: \$54.7K		
2017 - 2022	H.012856 Natchez Drive Rehabilitation, Slidell, LA. Project Engineer . Mr. Roy designed a two lane divided roadway with left-turn lanes cut into the median at various locations. The objective of the project was to rehabilitate the roadway pavement and correct minor deficiencies in roadway drainage structures of Natchez Drive from the I-10 East Service Road. Mr. Roy designed and developed the complete civil engineering plan set for DOTD approval .		
2017 - 2021	H.011721 US 190/LA 22 Improvements, Mandeville, LA. Project Engineer . Project involved the construction of temporary signals, pavement widening and subsurface drainage , removal of the existing roadway, cold milling and overlay , construction of curb and gutter islands , reconstruction of drive aprons , and construction of permanent traffic signaling . Mr. Roy designed and developed the complete civil engineering plan set for DOTD approval .		
2017 - 2021	H.013381 Lindberg Drive @ US 190 (Gause Blvd), Slidell, LA. Project Engineer . Project was designed to reduce congestion on the northbound approach of Lindberg Drive to the signalized intersection of US 190 (Gause Blvd) by adding capacity and modifying traffic signal phasing and timing . Improvements also included the re-striping of the opposing Kensington Blvd southbound approach to US 190 (Gause Blvd). Mr. Roy designed and developed the complete civil engineering plan set for DOTD approval .		
05/16 – 05/17	Forest Cove Road Improvement Project, D'Iberville, MS. Project Engineer . Project included rehabilitation and improvement of the existing roadway to ensure positive drainage runoff by providing a milling/paving plan for parking areas . As project engineer, Mr. Roy was responsible for the design of striping details and put together plans for the rehabilitation of the roadway's existing surface drainage .		
05/16 – 05/17	Coast Electric Gulfport Site Improvement & Drainage Project, Gulfport, MS. Project Engineer . Mr. Roy, as project engineer, designed paving and subsurface drainage improvements to ensure positive runoff for a site that would hold heavy duty traffic vehicles .		
08/12 – 05/16	Reconstruction and Widening of I-55 Terry to Byram (MDOT), Hinds County, MS. Project Engineer . Mr. Roy was responsible for the production of conceptual and final roadway designs, plan preparation, horizontal and vertical geometric design, cost estimates, traffic control plans, temporary striping, and plan quantities for all items necessary for the project's construction and completion. Project involved the widening of I-55 to 6 lanes for approximately 6 miles and the LRFD structural design for retaining walls and widening of 6 bridges. MDOT project.		

Hydraulics Team (Roadway/Bridge)

Firm employed by Michael Baker			
Name	Justin West, PE, CFM	Years of relevant experience with this employer	2
Title	Civil Associate	Years of relevant experience with other employer(s)	4
Degree(s) / Years / Specialization		BS / 2019 / Environmental Engineering / Louisiana State A&M University	
Active registration number / state / expiration date		PE.0049277 / Louisiana / 3-31-2027 CFM US-22-12180 / 01/31/2026	
Year registered	2019	Discipline	Civil and Environmental
Contract role(s) / brief description of responsibilities		HYDRAULIC DESIGN	
Mr. West will serve as hydraulics engineer for both roadway and bridge hydraulics for task orders throughout the duration of this contract.			
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract, <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
04/24-Ongoing	St. Tammany Parish Comprehensive Drainage Plan St. Tammany Parish Government. Assistant Project Manager and Lead Modeler. Mr. West is responsible for assisting with general project management duties, such as resource allocation, team coordination, scheduling, and financial analysis. Mr. West attended public outreach meetings and assists the public in understanding the project objective and goals. Mr. West completed the existing models for the parish consisting of 12 models.		
01/23 – Ongoing	IIJA Off System Bridge Replacement, District 07 Parishes DOTD. Hydraulics Reviewer. Mr. West assisted in the technical QA/QC process through reviewing the hydraulic and hydrologic models completed for several of the watersheds delineated within the project area and the associated hydraulic reports.		
03/23-Ongoing	FM 149 TxDOT. PCSWMM Designer. Mr. West was the lead hydraulic modeler for the existing and proposed conditions PCSWMM models for the changes made to Farm to Market Road 149. The existing and proposed conditions modeling completed in PCSWMM included estimating and drafting the proposed drainage areas surrounding the project area, the sizing of drainage structures, and lay out of the drainage geometry in the modeling software.		
04/22 – Ongoing	LA 30: EBR PL – I-10, Ascension, Iberville, and East Baton Rouge Parishes, Louisiana DOTD Technical QC. Mr. West assisted in the technical QA/QC process through reviewing the hydraulic and hydrologic models completed for several of the watersheds delineated within the project area. He reviewed and assisted in the writing of the associated hydraulic reports for each proposed project location.		
09/21 – Ongoing	Louisiana Watershed Initiative (LWI) Region 6 TO 3, Louisiana DOTD. HEC-RAS Modeler. Mr. West is the Lead modeler for the Eastern Central Louisiana Coastal (Region 6) HEC-RAS model. Mr. West developed the loss method for infiltration, soils, and land use data. Mr. West created centerlines for the major streams in the watershed by filtering out small streams from the National Hydrology Database. Mr West developed the hydraulic models' break lines, bridge structures, and mesh geometry, and simulated storms within the HEC-RAS models and adjusted calculated values to calibrate and validate the model.		
09/21 – Ongoing	Louisiana Watershed Initiative Modeling Contract – Region 1, Louisiana. DOTD. HEC-RAS Modeler. Mr. West was the lead modeler for Black Lake Bayou (Region 1) HEC-RAS model and technical Qc reviewer for Lower Sabine. He developed the loss method for infiltration, soils, and land use data. I created centerlines for the major streams in the watershed by filtering out small streams from the National Hydrology Database and the hydraulic models' break lines, bridge structures, and 1-D geometry. He simulated storms within the HEC-RAS models and adjusted calculated values to calibrate and validate the model.		

02/22 – 02/23	LCG Stormwater Master Plan, Lafayette Parish Lafayette Consolidated Government- Mr. West analyzed multiple watersheds with 2D hydraulic modeling in HEC-RAS. Mr. West completed the existing conditions model for one of the watersheds in this project. Mr. West assisted with the proposed alternatives to mitigate flooding for the basin that was also developed for the client. Mr. West was responsible for the proposed and existing models. Using the outcome of the proposed projects to establish mitigation alternatives for stormwater management. Mr. West reviewed the results and drafted a report highlighting the conclusions made
02/22 – 02/23	East Baton Rouge City-Parish Stormwater Master Plan, East Baton Rouge Parish Department of Transportation and Drainage – Mr. West assisted in developing the proposed conditions Floodplain Conveyance Zones for Several watersheds within the Parish.
02/22 – 02/2023	LCG Residential Buyout Plan, Lafayette Parish Lafayette Consolidated Government - Mr. West used GIS programming to create a structure map of Lafayette Parish to locate at-risk structures for a buyout program. Using the outcome of the proposed locations to establish a mitigation plan that distinguished houses that would be the most at-risk alternatives from stormwater flooding. Mr. West reviewed the results and drafted a report highlighting the conclusions made.
05/22 – 02/23	RESTORE Parish Matching Grant Program CPRA The CPRA Parish Matching Program was designed to help coastal parishes that received RESTORE funds prioritize Coastal Master Plan projects while also recognizing and responding to the needs of parishes to implement projects that may not be contained in the Coastal Master Plan. Mr. West is responsible for the Existing and proposed models completed in the USACE HEC-RAS modeling program. Using the projects to establish non-structural mitigation alternatives for stormwater management. Mr. West reviewed the results and drafted a report highlighting the conclusions made.
02/22 – 02/23	Chennault Stormwater Plan Calcasieu Parish Public Works Mr. West analyzed the Chennault Airport’s existing drainage conditions with 2D hydraulic modeling in HEC-RAS. Proposed alternatives to mitigate flooding for the Airport were also developed for the client. Mr. West was responsible for the proposed models. Using the outcome of the proposed projects to establish mitigation alternatives for stormwater management. Mr. West reviewed the results and drafted a report highlighting the conclusions made
05/22 – 02/23	Comite River Improvements Feasibility Study East Baton Rouge Parish Department of Transportation and Drainage. For the Comite River improvements it was proposed that the removal of debris from the Comite River would improve drainage for the channel. Mr. West was the lead modeler for the project which consisted of a review of all video data received from an aerial drone survey, marking and sizing obstructions made, an existing model consisting of over 200 impacted channel locations, a proposed model, and the associated technical report. Mr. West created presentations and assisted in stake holder meetings.
02/21 – 02/22	St. Charles Parish Drainage Master Plan St. Charles Parish Public Works. Mr. West was an engineering modeler developing the St. Charles Parish Master Drainage Plan (MDP). The MDP analyzes the existing gravity and forced drainage networks within the West Bank of St. Charles Parish and provides recommendations for improvements to these systems aimed towards mitigating flooding both for the existing conditions and due to future planned development.
06/20 – 02/21	LWI and HMGP Permit Applications: Grays Creek North and South and Grays Creek Detention Ponds, Dixon Creek Drainage Improvements, Shadow Springs Subdivision Drainage Improvements, Colonial Cove Subdivision Drainage Improvements, Walker Sewer Mitigation Project, Clinton Allen Drainage Ditch, and created hydrologic and hydraulic analysis and FEMA benefit-cost analysis.
06/20 – 02/21	Steady Flow 1D HEC-RAS Model, Beaver Creek, and Long-Slash Branch Watersheds. Mr. West completed 1D hydraulic and hydrologic models for the Bever Creek and Long-Slash Branch watersheds. These studies involved the hydrologic and hydraulic analysis of drainage structures and drainage areas within the watersheds. Existing conditions and proposed conditions models were created along with a benefit-cost analysis for the improvements proposed in the proposed conditions model.

Firm employed by Michael Baker			
Name	Afaq Ahmad Durrani, EI, CFM	Years of relevant experience with this employer	2
Title	Civil Associate	Years of relevant experience with other employer(s)	1
Degree(s) / Years / Specialization		M.S.E / 2022 / Civil Engineering / University of Louisiana at Lafayette	
Active registration number / state / expiration date		EI.0035541 / LA / 03-31-2026 CFM US-24-13499 / 2026	
Year registered	2023	Discipline	Civil
Contract role(s) / brief description of responsibilities		HYDRAULIC DESIGN	
<p>Mr. Afaq will serve as hydraulics engineer for both roadway and bridge hydraulics for task order throughout the duration of this contract. Mr. Afaq's responsibilities include modeling, designing, and completing quality control on multi-million-dollar projects that range from large watershed modeling to individual bridge replacement hydraulic studies. Mr. Afaq has successfully delivered projects in a wide array of civil engineering sectors including hydraulic modeling and stormwater management. He is well versed in a variety of hydrologic and hydraulic softwares including the USACE HEC suite (HEC-HMS, HEC-RAS, HEC-DSSVue), ArcGIS Pro, ArcMap, and LADOTD HydrWin suite.</p>			
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract, <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
05/23 – Ongoing	<p>IIJA Off System Bridge Replacement, District 07 DOTD. Hydraulics Engineer/Modeler. Performed hydrological and hydraulic analysis and modeling in HEC-RAS. Hydraulic calculations were also performed in HYDRWIN. The hydraulic analysis consisted of HEC-RAS 1D and 2D models where applicable to identify existing hydraulic performance of each structure and recommending an equivalent structure that meets or improves the hydraulic capacity of the existing structure Mr. Afaq also performed scour analysis and no-rise analysis for proposed structures. Prepared the final Hydraulic reports that were submitted to LA DOTD for approval. This project program requires Michael Baker International to deliver 12 bridge replacements within the 30.3 million dollars allocated for District 07.</p>		
05/24 - Ongoing	<p>Little Bogue Falaya Pond, St. Tammany Parish, Louisiana. Hydraulics Engineer/Modeler. Currently performing the Hydrological and Hydraulic analysis for this project. Little Bogue Falaya is located in Covington, St Tammany Parish. Identified and developed project alternatives by running multiple detention pond scenarios with different design details to ensure the most efficient pond characteristics are identified. Conceptual layouts of the different alternatives will be provided, as well as a Preliminary Engineering report that summarizes the hydrologic and hydraulic analysis efforts and their results. The BCA of the recommended pond alternative will be performed for 10%, 4%, 2% and 1% Annual Exceedance Probability events.</p>		
08/24 - Ongoing	<p>Jones Creek Detention, East Baton Rouge Parish, Louisiana. Hydraulics Engineer/Modeler. Currently performing the Hydrological and Hydraulic analysis for this project. The Jones Creek Detention project is a 40-acre storm water retention area that will serve to reduce flooding in the Jones Creek Watershed. Contracted by the City of Baton Rouge / Parish of East Baton Rouge, Michael Baker serves as a specialty sub-consultant to prime consultant GIS Engineering. Michael Baker will provide all hydraulic engineering and modeling for the project utilizing HEC-RAS and other hydraulic modeling software</p>		
01/23-12/24	<p>Louisiana Watershed Initiative Modeling Contract – Region 1, Louisiana. DOTD. Hydraulics Modeler. Modeler for Black Lake Bayou (Region 1) HEC-RAS model. Created a coupled 1D/2D hydraulic model along with developing break lines, refinement regions, culverts, bridge structures , cross sections, and mesh geometry in the hydraulic model. Simulated storms within the HEC-RAS models and adjusted calculated values for calibration and validation of the model. Prepared hydraulics and structure logbook for Black Lake Bayou. Mr. Afaq created 1D models for other HUC 08's in region 1 which include Saline Bayou and Bodcau Bayou. The LWI project was launched in 2018 and introduced a watershed-based approach to reducing flood risk. It is organized by seven modeling regions, each of which encompasses multiple HUC-8 watersheds. These models will be instrumental in providing stormwater management decisions regarding land use, policy, and infrastructure</p>		

<p>01/23 –12/24</p>	<p>Louisiana Watershed Initiative Modeling Contract – Region 4, Louisiana. DOTD. Hydraulics Modeler Served as a Hydraulic modeler for Lower Sabine located in Region 4 of Louisiana Watershed Initiative. Responsibilities included calibrating and validating the hydraulic model for Lower Sabine and helped in preparing the modeler’s logbook. Similar to the LWI Region 1 project above, these models will be instrumental in providing future stormwater management decisions regarding land use, policy, and infrastructure.</p>
<p>05/22 – 12/22</p>	<p>BLE model for Hazard Rd. Iberia Parish Government, Louisiana. Intern. Developed the Base Level Engineering model for Hazard Road to check the effect of asphalt overlay on flooding in the adjacent area while using HEC-RAS to create a 2D model. The BLE was presented in Public meeting to show the benefits of asphalt overlay.</p>
<p>05/22 – 12/22</p>	<p>University at Renaud Roundabout. Louisiana DOTD. Intern. Served as part of the drainage design team. Responsibilities included delineating the drainage area and determined the longest flow paths, calculated the time of concentration, discharge and pipe size. Used both ArcGIS pro and HYDRWIN to aide in the drainage design.</p>
<p>05/22 – 12/22</p>	<p>Kaliste Saloom: Phase 3B. Louisiana Consolidated Government (LCG). Intern. Helped with preparing daily, weekly reports and monthly payment sheets.</p>

Bridge/Structures Design Team

Firm employed by Michael Baker					
Name	Jeffrey McRae, PE		Years of relevant experience with this employer		↻ 28
Title	Technical Manager – Bridge		Years of relevant experience with other employer(s)		↻ 0
Degree(s) / Years / Specialization		B.S. / 1996 / Civil Engineering			
Active registration number / state / expiration date		PE.0034554 / LA / 09-30-2025			
Year registered	2009	Discipline	Civil		
Contract role(s) / brief description of responsibilities		BRIDGE DESIGN			
Mr. McRae will serve as structural design leader if task orders require new/replacement/modification of existing structures.					
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).				
11/21 – Ongoing	US 371: KCS RR Overpasses HBI, Webster Parish, Louisiana. LADOTD. Bridge Design Lead. Mr. McRae is serving as the Bridge Design Lead for the replacement of 3 bridges along US 371 at 2 locations: Sibley, La and Minden, LA. His responsibilities include overseeing the bridge design calculations and development of bridge plans making sure they meet both DOTD and KCS Railroad Design Guidelines. Project does include the design of a detour structure (Akrow Bridge) for the bridge site at Sibley in order to keep US 371 open under traffic.				
02/24 - Ongoing	Infrastructure Investment and Jobs Act (IIJA) Off-System Bridge Program. Bridge Engineer. Responsibilities included performing QC of initial detailed cost estimates for preparing the structural selection memo and shortlisting 12 bridges based on various parameters like cost, structural health, and functional adequacy. Currently performing QC for all bridge plans and calculations. Michael Baker was selected by LADOTD to provide bridge, roadway, and environmental services for the replacement of off-system bridges in the five parishes located in LADOTD District 07. The 12 new structures include box culverts and slab span bridges. All the bridge surveys and the hydraulic studies are approved, and preliminary plan submittals for all the bridges are underway				
01/06 - 12/12	S.R. 27 Reconstruction Between the Kansas City Railroad and US 80, State Route 27, Vicksburg, Mississippi. Mississippi Department of Transportation. Project Manager. Responsibilities included project management, generation of engineering design calculations, bridge geometry, bridge quantities and conceptual through final design contract plans. This project consisted of preparation of right-of- way and construction plans to reconstruct S.R. 27 between the Kansas City Railroad and US 80 in Warren County, MS. Michael Baker performed bridge and retaining wall design as well as roadway lighting. Suconsultants, ABMB and CivilTech, provided the necessary roadway design.				
01/10 - 04/13	S.R. 16 from S.R. 15 to S.R. 19 Bridge Design, Neshoba County, Mississippi. Mississippi Department of Transportation. Engineer. Responsibilities included generation of engineering design calculations, bridge geometry, bridge quantities, and conceptual through preliminary bridge design contract plans for ten bridges. Michael Baker provided engineering services for improvements to 10 miles of S.R. 16 from S.R. 15 to S.R. 19. Michael Baker’s services included the Phase A preliminary bridge plans for eight bridges, including hydraulic design for three bridges and a railroad crossing bridge, and stream and wetland delineation.				
12/00 - 01/04	S.R. 22 / Nissan Roads, Madison County, Mississippi. Mississippi Department of Transportation. Assistant Engineer. Responsibilities included generation and checking of engineering design calculations, bridge quantities and final design contract plans. Responsibilities also included generating all bridge design calculations and contract plans for an AASHTO beam bridge located at Nissan Drive over the Illinois Central Railroad. This Nissan project was for the development of contract plans for three access roads to the site of the Nissan Plant in Canton, Madison County, Mississippi.				
11/13 - 12/19	S.R. 28 Big Creek, Quinn Creek, and Strong River Bridge Replacements, Simpson County, Mississippi. Mississippi Department of Transportation. Engineer. Responsibilities included generating preliminary bridge R.O.W. plans, geometric calculations and design calculations for three hydraulic bridge crossings. One of the crossings, Strong River, required four separate alternates to be detailed as well as a construct-ability report and cost estimate comparison discussing the advantages and disadvantages of each alternate. Michael Baker is providing engineering services for the replacement of the S.R.				

	28 bridges over Big Creek, Quinn Creek, and Strong River. Michael Baker's services included hydraulic analyses, scour assessments, stream bank stabilization evaluations, preparation of hydraulic analysis reports, and conceptual and preliminary design.
03/09 - 03/21	S.R. 9 Bridge Replacements, Calhoun County, Mississippi. Mississippi Department of Transportation. Project Manager. Responsibilities included overall project management, QA/QC of bridge design calculations, and generation of final contract plans. Michael Baker provided engineering and design services for final bridge construction plans for four bridge replacements: Bridge No. 35.5 over Shutispear Creek, Bridge No. 40.7 over Yalobusha River Relief, Bridge No. 40.9 over Yalobusha River, and Bridge No. 41.2 over Yalobusha River Relief on S.R.9.
09/13 - 12/16	S.R. 3 Bridge Hydraulic Design, Tate County, Mississippi. Mississippi Department of Transportation. Engineer. Responsibilities included generating preliminary bridge R.O.W. plans, geometric calculations and design calculations for two hydraulic bridge crossings. Michael Baker provided engineering services for the replacement of the S.R. 3 bridges over Strayhorn Creek and Arkabutla Creek. Michael Baker's services included bridge hydraulic analyses, scour analysis and evaluation, bridge scour and stream bank stabilization design, and conceptual and preliminary structural design.
05/12 - 12/14	S.R. 6 West Batesville Bypass Engineering Design, Panola County, Mississippi. Mississippi Department of Transportation. Engineer. Responsibilities included generation of engineering design calculations, bridge geometry, bridge quantities, and conceptual through preliminary bridge design contract plans for five bridges. Michael Baker provided engineering services for the design of the S.R. 6 West Batesville Bypass, a new six-mile, four-lane, controlled-access highway with two interchanges. Michael Baker's services included field surveying, bridge hydraulic and structural design, and right-of-way plans.
03/12 - 04/13	S.R. 178 Bridge Replacement Right-of-Way Plans, Itawamba County, Mississippi. Mississippi Department of Transportation. Engineer. Responsibilities included generation of engineering and geometric design calculations, and development of final right-of-way bridge plans for eight bridges and two box bridge extensions. Michael Baker developed final right-of-way plans for replacement of eight bridges, extension of two box bridges, removal of one box bridge, and addition of a stream relocation and a new box bridge under a relocated local road. The roadways, totaling approximately seven miles along S.R. 178 between Clay and the Alabama State Line, were upgraded either to new construction standards or to 3R standards, depending on the locations. The project was divided into five sites. Three sites required detour roads, and two sites were temporarily closed to traffic. Michael Baker also performed all hydraulic analyses at the bridges and box bridges.
04/07 - 03/10	Reunion Parkway over I-55 Interchange in Madison County, Mississippi. Madison County. Project Manager. Responsibilities included project management duties and generation of engineering design calculations, bridge geometry, bridge quantities, and conceptual through final design contract plans. This project includes bridge and retaining wall design, as well as surveying for a Single Point Urban Interchange (SPUI) located at the intersection of I-55 and Reunion Parkway in Madison County, MS. The bridge is a curved steel box girder design.
09/06 - 03/10	US 61 Intersection at Catherine Devereux Road, Adams County, Mississippi. Mississippi Department of Transportation. Project Manager. Responsibilities included project management duties and generation of engineering design calculations, bridge geometry, bridge quantities, and conceptual through final design contract plans. This project consisted of preparation of Right-of-way and Construction Plans to reconstruct the intersection of US 61 at Catherine Devereux Road in Adams County, Mississippi. Michael Baker shared in the duty of bridge and MSE retaining wall design with the prime, ABMB Engineers.

Firm employed by Michael Baker					
Name	Shalin Sheth, PE		Years of relevant experience with this employer		↻ 3
Title	Bridge Engineer		Years of relevant experience with other employer(s)		↻ 4
Degree(s) / Years / Specialization		M.S. / 2019 / Civil Engineering B.S. / 2016 / Civil Engineering			
Active registration number / state / expiration date		PE.146736 / TX / 09/30/2026 PE.0048337 / LA / 03/31/2026			
Year registered	2022 (TX) 2023 (LA)	Discipline	Civil		
Contract role(s) / brief description of responsibilities		BRIDGE DESIGN			
Mr. Sheth will serve as a structural/bridge design engineer. His experience includes bridge structural design, bridge load rating, bridge load testing, and project management, for a variety of projects. As a professional engineer licensed in the states of Louisiana and Texas, he has worked on a variety of projects involving structural analysis, design, and plan development of prestressed concrete girder bridges, post tensioned segmental girder bridges, concrete slab span bridges, steel truss pedestrian bridges, and curved steel bridges. He also has experience in developing cost estimates and feasibility studies for bridge replacements as a part of client services and is also certified by FHWA/NHI for bridge inspection services. As a bridge EI, he has had past experience with drafting and detailing bridge widening plans, along with structural designing of bridge components, load rating bridges of various types, performing field load testing of bridges, computing bridge quantities and cost estimates, preparing bridge rehabilitation plans, conducting GPR surveys of bridge decks, and various administrative tasks.					
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).				
02/24 - Ongoing	Infrastructure Investment and Jobs Act (IIJA) Off-System Bridge Program. Bridge Engineer. Initial responsibilities included preparing a detailed cost estimate for preparing the structural selection memo and shortlisting 12 bridges based on various parameters like cost, structural health, and functional adequacy. Currently responsible for developing engineering design calculations, bridge geometry, bridge quantities, design plans, and coordinating with the in-house roadway team and the geotechnical subconsultants. Michael Baker was selected by LADOTD to provide bridge, roadway, and environmental services for the replacement of off-system bridges in the five parishes located in LADOTD District 07. The 12 new structures include box culverts and slab span bridges. All the bridge surveys and the hydraulic studies are approved, and preliminary plan submittals for all the bridges are underway.				
09/22 – Ongoing	US 371: KCS Railroad Overpasses HBI, Webster Parish, Louisiana. Louisiana Department of Transportation and Development. Bridge Engineer. Responsibilities include computation of engineering design calculations, determining structural feasibility of bridge geometry, structural design of all bridge components, computation of bridge quantities, and plan production at various preliminary and final submittal stages/milestones. The project consists of full-scale replacement of two railroad overpass bridges 3.7 miles apart on the same route of US 371, with three bridges. Michael Baker is providing transportation and bridge engineering services for this project as a lead consultant, while subconsultants Ardaman and Associates, and Vectura Consulting Services, are providing geotechnical and traffic control services respectively				
07/24 - Ongoing	Agua Fria Pedestrian Bridge, Arizona. City of Avondale. Bridge Design Lead. Responsibilities include leading the structural design for a 3 span pedestrian bridge spanning 525' across a canal and connecting two pedestrian walkways on either side, developing the design files, overseeing plan development for structural related sheets, recommending the structure alignment and profile taking into account the requirements and restrictions of all stakeholders (City of Avondale, ADOT, Flood Control District), structural design of ramps connecting to the bridge and the associated retaining walls, and coordinating with the client, the prefabricated bridge manufacturer, and the construction manager at risk (CMAR) in the later stages of the project				

01/24 – 07/24	<p>Dauphin Island Bridge Repair, Alabama. Alabama Department of Transportation. Bridge Engineer. Responsible for developing a finite element model in MIDAS Civil for the Dauphin Island Bridge, including approach spans consisting of 7 prestressed concrete girders 118' each as a continuous unit, and the main span unit consisting of post tensioned segmental girders, which had a layout of 211 ft – 400 ft – 211 ft. The task consisted of running live load analysis, transforming reactions from various load cases to ultimately derive reactions at bearings for sizing of jacks so that the spans could be jacked for bearing repair. The challenge was to be able to jack up the girders while the bridge was open to traffic, including special allowances for emergency vehicles. Also responsible for drafting repair plans and QCing related quantity calculations.</p>
09/23 & 09/24	<p>Bridge Inspections and Load Ratings, Mississippi. Office of State Aid Road Construction. Bridge Engineer. Responsible for conducting in-depth inspections of bridges (concrete channels, concrete slabs, reinforced concrete girders, steel girder bridges, concrete box culverts), documenting photographs and measurements, assigning condition ratings to bridge elements, and recommending bridge closures based on critical findings if applicable for 27 bridges in Sep 2023 and 16 bridges in Sep 2024, for OSARC, MS. Also responsible for performing load rating evaluation for bridges (concrete slabs, steel girders, steel and timber girder/stringer/floor-beam systems, steel railcar bridges) in Mississippi using AASHTOWare BrR for superstructure analysis and an in-house spreadsheet developed for substructure analysis, preparing load rating summary reports and critical finding recommendations if applicable, and providing guidance to engineer interns, in 2023 and 2024.</p>
07/19 - 08/22	<p>Macarthur Interchange Completion Phase II at US90-Z Eastbound, Jefferson Parish, Louisiana. Louisiana Department of Transportation and Development. Engineer Intern. Responsibilities included structural analysis and girder capacity verification of prestressed concrete girders, developing spreadsheets and Mathcad files for computing development lengths and splice lengths, and deck reinforcement design. Further responsibilities included computing bridge quantities, girder riser elevations, riser thicknesses, deck elevations for the bridge, along with drafting CAD sheets in MicroStation for framing plans, pier cap details, and deck reinforcement plans in compliance with LADOTD standards. This project consisted of demolition of an off-ramp and an on-ramp, along with reconstruction of both at different locations in addition to new construction to facilitate bridge widening. SDR Engineering provided comprehensive transportation and bridge structural engineering services.</p>
05/21 - 08/21	<p>Mermentau River Swing Span Truss Bridge Repairs at Grand Cheniere, Louisiana. Louisiana Department of Transportation and Development. Engineer Intern. Responsibilities included preparing a structural rehabilitation solution to repair the steel truss member with structural deficiency, along with repair solutions for floorbeams and stringers using steel cover plates. Further responsibilities also included drafting and redrawing the fender system plans and railing repair plans and reviewing overall bridge repair quantities and the plan set. SDR Engineering provided the bridge inspection and load rating services in the preliminary stage, and later prepared repair and rehabilitation plans and procedures for the entire superstructure and substructure along with the fender system for the movable bridge span.</p>
07/19 - 02/21	<p>Load Rating of 311 Bridges, Louisiana. Louisiana Department of Transportation and Development. Engineer Intern. Responsibilities included load rating 51 bridges of various types such as concrete slab bridges, reinforced concrete girder bridges, prestressed girder bridges, prestressed and reinforced channel bridges, reinforced concrete culverts, and timber beams/timber trestle bridges. For a typical bridge, the load rating process involved developing and analyzing the superstructure structural model in AASHTOWare BrR, substructure structural model in RC Pier (now LEAP Bridge Concrete), and post processing the analysis results using Mathcad to effectively determine the load carrying capacity of the bridge (load rating factors) and accordingly recommending the posting load to LADOTD. This project's scope was initially the load rating of 311 bridges located across Louisiana, however later another 300+ bridges and culverts were added to the scope. SDR Engineering provided the load rating services for this project.</p>
08/20 - 09/20	<p>Bridge Deck Investigation using Ground Penetrating Radar (GPR) system, Louisiana. Louisiana Department of Transportation and Development. Engineer Intern. Responsibilities included performing GPR investigation of bridge decks for 5 bridges across Louisiana using a vehicle mounted GPR setup provided by 3D-radar (now Kuntur), processing and analyzing scanned data, summarizing insights, and compiling reports regarding feasibility and usefulness of such an investigation. SDR Engineering provided the investigation services for this pilot GPR bridge deck evaluation project.</p>

Firm employed by Michael Baker					
Name	Layton R. Breithaupt, PE		Years of relevant experience with this employer		↻ 6
Title	Bridge Engineer		Years of relevant experience with other employer(s)		↻ 0
Degree(s) / Years / Specialization		B.S. / 2018 / Civil Engineering A.A. / 2014 / Drafting and Design			
Active registration number / state / expiration date		PE.29138 / MS / 12/31/2026 PE.0048097 / LA / 03/31/2026			
Year registered	2022 2023	Discipline	Civil		
Contract role(s) / brief description of responsibilities		BRIDGE DESIGN			
Mr. Breithaupt's main responsibility is to aide in the design of bridges. He has experience in designing bridges for Mississippi DOT, West Virginia DOT, and Georgia DOT. Mr. Breithaupt had internships that allowed him to hone in on drafting and design skills along with 3D modeling. He also had the opportunity to work on many LiDAR projects during the internships.					
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).				
07/22 – Ongoing	Baldwin County River Road. Baldwin County Commission (AL). Civil Associate. Responsibilities included the generation of bridge design calculations, including superstructure and substructure design, and checking of final bridge plans. Responsibilities also included generation of load rating reports, quantity calculations and design computation PDF books.				
08/22 - Ongoing	I-55 from Mississippi Highway 24 to U.S. 98 in McComb, McComb, Mississippi. Mississippi Department of Transportation. Civil Associate. Responsibilities included Phase C work which consisted of checking material orders and shop drawings. Michael Baker performed rehabilitation of I-55 from M.S. 24 to U.S. 98. Work included establishing leveled elevations for existing control while setting mobile LiDAR control along the roadway. LiDAR control points were set horizontally with RTK GPS then leveled through with a digital level. Survey operations were also required.				
05/19 - 07/19	I-79 Upgrade South Fairmont to Pleasant Valley Engineering Services, Marion County, West Virginia. West Virginia Department of Transportation, Division of Highways. Civil Associate. Responsibilities included the generation of bridge design calculations, including substructure design, and checking of final bridge plans. Responsibilities also included generation of quantity calculations and design computation PDF books. Michael Baker provided engineering and environmental services for the widening of I-79 to six lanes, from 0.38 miles south of U.S. 250 (exit 132) to 0.25 miles north of C.R. 64 (exit 135). This two-phased project provided the preparation of construction plans and related documents and included the necessary NEPA services to facilitate project construction.				
08/22 - Ongoing	MDOT ON-CALL SERVICES 2021. Mississippi Department of Transportation. Civil Associate. Responsibilities included the generation of bridge design calculations, including superstructure and substructure design, and checking of final bridge plans. Responsibilities also included generation of load rating reports, quantity calculations and design computation PDF books.				
08/18 - 12/22	Reunion Parkway Design Services Phase 3, Madison County, Mississippi. Madison County Board of Supervisors. Civil Associate. Responsibilities included the generation of bridge design calculations, including superstructure and substructure design, and checking of final bridge plans. Responsibilities also included generation of load rating reports, quantity calculations and design computation PDF books. Michael Baker provided design services for two bridge sites along Phase 3 of the Reunion Parkway in Madison County, Mississippi. The scope included developing Phase B Final Bridge Plans for an 880-foot-long bridge over Bear Creek and a 530-foot-long bridge over the Illinois Central Railroad.				

07/19 - Ongoing	U.S. 49 Florence to Scales Construction Engineering and Inspection, Rankin County, Mississippi. Confidential Client. Civil Associate. Responsible for QC of bridge quantities. Michael Baker provided engineering services, including field surveys, preliminary through final design, construction phase services, and public relations support, for the construction of U.S. 49 from Florence to the Scales Area. Working as an extension of client staff, Michael Baker provided construction management, Phase C Design (RFI/submittals), utility coordination, scheduling review (Primavera P6), material testing, erosion control, surveying, traffic control, and public relations support, for the construction of U.S. 49 from Florence to the Scale Area.
08/18 – 04/20	Appalachian Corridor V Bridge Project, Itawamba County, Mississippi. Mississippi Department of Transportation. Civil Associate. Responsibilities included the generation of bridge design calculations, including superstructure and substructure design, and checking of final bridge plans. Responsibilities also included generation of load rating reports, quantity calculations and design computation PDF books. Michael Baker provided design and engineering services for bridge hydraulics, conceptual and final bridge construction plans, and construction engineering services for four twin hydraulic bridge crossings on the Appalachian Corridor "V" alignment (S.R. 76) from Fairview to S.R. 23.
04/22 - Ongoing	S.R. 9 Bridge Replacements, Calhoun County, Mississippi. Mississippi Department of Transportation. Civil Associate. Responsibilities included the generation of bridge design calculations, including superstructure and substructure design, and checking of final bridge plans. Responsibilities also included generation of load rating reports, quantity calculations and design computation PDF books. Michael Baker provided engineering and design services for final bridge construction plans for four bridge replacements: Bridge No. 35.5 over Shutispear Creek, Bridge No. 40.7 over Yalobusha River Relief, Bridge No. 40.9 over Yalobusha River, and Bridge No. 41.2 over Yalobusha River Relief on S.R.9
07/20 – 12/20	SR 601 Middle-Canal Road. Mississippi Department of Transportation. Civil Associate. Responsibilities included the generation of bridge design calculations, including superstructure and substructure design, and checking of final bridge plans. Responsibilities also included generation of load rating reports, quantity calculations and design computation PDF books.
08/18 – 12/20	2017 Roadway Design Services IDIQ Master Contract. Mississippi Department of Transportation. Civil Associate. Responsibilities included the generation of bridge design calculations, including superstructure and substructure design, and checking of final bridge plans. Responsibilities also included generation of load rating reports, quantity calculations and design computation PDF books.
03/22 - Ongoing	CHA CR486 Final. Georgia Department of Transportation. Civil Associate. Responsibilities included the generation of bridge design calculations, including superstructure and substructure design, and checking of final bridge plans. Responsibilities also included generation of load rating reports, quantity calculations and design computation PDF books.

Survey Team 1

Firm employed by Evans-Graves Engineering, Inc.			
Name	Max O. Usrey, III, PE, PLS	Years of relevant experience with this employer	↻ 31
Title	Professional Land Surveyor	Years of relevant experience with other employer(s)	↻ 17
Degree(s) / Years / Specialization		BS / 1979 / Civil Engineering	
Active registration number / state / expiration date		PE.20762 / Louisiana / 9/30/2025; PLS.4737 / Louisiana / 9/30/2025	
Year registered	1992 (PE); 1994 (PLS)	Discipline	PE/Civil
Contract role(s) / brief description of responsibilities		MPR 4; SURVEY & RIGHT-OF-WAY TEAM 1	
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
08/24 – Present	H.014767.5: LA 182 @ Duchamp Intersection Improvements, St. Martin Parish, LA. Project Surveyor. Under an IDIQ contract for roadway design services within LADOTD District 03, Mr. Usrey oversaw the performance of topographic survey for approximately 4,100 LF of roadway corridor in accordance with DOTD Location and Survey Manual and LADOTD Topographic Survey Guidelines . All features in the field are being located to produce a complete topographic survey and digital terrain model of the project corridor, including structure types and top elevations, storm drain pipe sizes and materials, and invert elevations within the survey limits. Horizontal and vertical controls were set using DOTD-required GPS methods . Final survey submittal will include .pdf files and notes, reports, tabulations, and verifications . Total EG Fee: \$290.5K		
04/21 - Present	North Blvd. Corridor Enhancement (I-10 to Foster/Florida) (MOVEBR), Baton Rouge, LA. Project Surveyor. Mr. Usrey oversaw and coordinated the performance of topographic corridor surveys as part of the design study and preliminary design phases of the project. Designed improvements will promote increased usage of the corridor in East Baton Rouge Parish. This work is being designed in conformance with LADOTD Complete Streets design, which includes the study and design of ADA-compliant sidewalks and multi-use pathway features. Total Fees: \$855K		
11/22 - Present	Mickens Road (Hooper Road to Joor Road) (MOVEBR), Baton Rouge, LA. Project Surveyor. Mr. Usrey oversaw the performance and coordination of a topographic corridor survey for the project, which will bring capacity improvements to approximately 2.8 miles of the Mickens Road corridor. Design work performed by EG includes studies and design for the incorporation of Complete Streets features for the corridor, including the design of a new ADA-compliant sidewalk and multi-purpose pathway to potentially be included in the project’s final design.		
2021	H.010960: LA 30 Roundabouts at Tanger Mall and I-10, Gonzales, LA. Project Surveyor/QA/QC. Under a retainer contract for professional surveying services, Mr. Usrey managed and oversaw the performance of property surveys and right-of-way maps for identified areas, resulting in a final right-of-way map that consisted of 9 sheets containing 30 parcels. Mr. Usrey also oversaw the production of a COGOWIN Parcel Program legal description .IN file along with performance of title research reports showing the respective parcel number. <u>LADOTD commended the Evans-Graves team for submitting all deliverables 13 days under contract time</u> and for providing additional right-of-way information that was beyond the scope of the contract , which was a great benefit to the Real Estate section.		
09/11 – 06/20	Read Blvd. East Neighborhood, New Orleans, LA. Project Surveyor/QA/QC. Mr. Usrey performed oversight of topographic and boundary surveys for approximately 6 miles of damaged roadway, curbs, sidewalks, driveways, and handicap ramps in Orleans Parish, LA as part of the City of New Orleans, DPW’s Read Blvd. East Neighborhood project. Surveys included utilities, drainage, and topographic features for this multi-phased, FEMA funded, roadway repair and replacement project , which also includes the design of new ADA-compliant sidewalks . Project involved significant coordination between the City of New Orleans DPW, S&WBNO, and FEMA.		
04/19 – 09/19	H.007811: Comite River Diversion Canal, Right-of-Way Mapping and Property Surveys, East Baton Rouge, LA. Project Surveyor/QA/QC. Mr. Usrey supervised all phases of this task including title work coordination and reconciliation, coordination and reconciliation of property surveys , coordination and supervision of the mapping production and provided quality control / checking of the final right of way maps . Mr. Usrey also was the primary point of contact for the LADOTD for all matters concerning this project, which was successfully completed under an expedited schedule to the satisfaction of LADOTD personnel.		

08/15 – 08/18	4400005727: LADOTD Survey Retainer for Districts 02, 61, and 62. Contract Manager/Project Surveyor/QA/QC . Manager of task order driven retainer contract for roadway surveying services for LADOTD. Provided the LADOTD with property surveys and right-of-way maps in Ascension, St. John the Baptist, Lafourche, Iberville, East Feliciana, Livingston, and Jefferson Parishes. Surveys have been used for road realignments, bridge replacements, intersection improvements, and widenings of various roadway sections across the state.
01/16 – 08/17	River Reintroduction into the Maurepas Swamp (LADOTD). Project Surveyor/Project Engineer/QA/QC . Mr. Usrey performed topographical surveys , right-of-way surveys, roadway and bridge plans, and specs including temporary detour road. The project diverts 1,500 cfs river water through a diversion structure in the Mississippi River levee into a 5-mile outflow channel, and into Maurepas Swamps.
10/14 – 06/15	LA Hwy. 30 at South Purpera Avenue, Ascension Parish, LA (LADOTD). Project Surveyor/QA/QC . Performed topographic survey for turn lanes and intersection improvements.
12/03 – 03/11	700-30-0051 & 023-05-0028: Route US 167 (Winnfield to LA 1236). Project Surveyor/QA/QC . Mr. Usrey supervised topographic and property surveys for the project and prepared right-of-way maps for the widening of approximately seven (7) miles of an existing 2-lane roadway in Winn Parish to a 4-lane divided roadway that included bridges over the Dugdemona River and the KCS Railroad.
08/97 – 12/00	450-10-0159I-12: Widening (O’Neal Lane to Pete’s Highway), East Baton Rouge & Livingston Parishes, LA. Project Surveyor/QA/QC . Mr. Usrey performed oversight of topographic survey , preparation of field rolls , and preliminary design for the widening of the existing three (3) lane roadway to a five (5) lane roadway with curb and gutter and subsurface drainage.

Survey Team 2

Firm employed by SJB Group, LLC			
Name	Charles Tim Brewer, RF, PS, PLS, RPLS, RPP		Years of relevant experience with this employer  3
Title	Principal-in-Charge		Years of relevant experience with other employer(s)  28
Degree(s) / Years / Specialization		B.S. / 1988 / Forestry Management	
Active registration number / state / expiration date		PLS.005009 Louisiana 9/30/2025; MS PLS.2766 Mississippi 12/31/2025	
Year registered	2009 (LA); 1999 (MS)	Discipline	Professional Land Surveyor
Contract role(s) / brief description of responsibilities		SURVEY & RIGHT-OF-WAY TEAM 2	
Mr. Brewer, has over 30 years of survey experience and over 15 years of experience managing a wide variety of surveying projects for USACE, MDOT, LADOTD, MoveBR, MoveAscension, and private clients. His survey experience includes Boundary, Topographic, As-Built and ALTA Surveys, Right-of-Way Mapping, Construction Layout, and control for aerial survey and mapping.			
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
08/24 - Ongoing	LA DOTD Project No. H.003931 – I-10 Calcasieu River Bridge P3 Project. Surveyor of Record/Project Manager . SJB Group provided an additional Topographic Survey, a Property Survey and Right-of-Way Mapping for this project which is the largest in La DOTD history. This project covers a 5.5 mile stretch of Interstate 10 and includes 15 bridges and 19 ramps. Mr. Brewer performed title research and boundary analysis, oversaw field activities and supervised the preparation of the primary control sketch, property survey and base right-of-way maps.		
10/23 - Ongoing	LA DOTD Project No. H005121 LA 1 – LA 415 Connector. Project Manager . SJB Group provided field data for the design of a roadway to connect LA 415 to LA 1 as a supplement to previously performed surveying for the realignment of the due to recent development and construction. Limits include a 2.9-mile corridor beginning approximately 0.2 miles north of the intersection of I-10 and LA 415 and continuing in a southeasterly direction along the extension of LA 415 across the intercoastal canal, industrial areas, and agriculture field to the intersection of LA. Also included is an approximate 1.8-mile corridor along LA 1 that extends from the roadway into residential, commercial, and retail areas. The SJB Group team collected current conditions of the areas included in the project limits and merging the current data with the previous survey and updating any observed condition changes. The collection of field data is completed through the utilization of conventional survey methods with survey total stations and global positioning systems (GPS). Mobile LiDaR methods are utilized for the collection of data along the high traffic segments of LA 1 and processed through Trimble Business Center, with data extraction performed through TopoDot.		
04/23 – 09/23	LA DOTD Project No. H.017322.5 – Morgan City Sidewalks & Shared Use Path, St. Mary Parish. Surveyor of Record/Project Manager . Sub to Digital Engineering. SJB Group conducted Right-of-Way Mapping, Topographic Survey, and Subsurface Utility Engineering to assist in the installation of sidewalks, handicapped ramps, drainage structures, and other related work in Morgan City. The project limits included Everett Street from Front Street to 4th Street, 4th Street from Everett Street to Barrow Street, and Myrtle Street from Youngs Road to Auditorium Drive. In the performance of this contract the existing right-of-way of twenty streets, one state highway right-of-way, and an irregular railroad right-of-way was determined at two crossing locations. All surveying was performed to LADOTD Location & Survey Section requirements.		
08/20 – 09/23	LA DOTD Contract No. H4400017597 – Rural Bridge Replacement Initiative, Districts 03, 07, 61, 62. Project Manager . Sub to Burk-Kleinpeter. SJB Group performed a Topographic Survey, Right-of-Way Mapping, and roadway design performed for the proposed bridge replacements for LA DOTD Districts 03, 07, 61, and 62. Each site required a complete property map and the preparation of Right-of-Way Maps with supporting data for right-of-way acquisition. The Topographic Survey of the project limits of each bridge included a complete inventory for each drainage structure (type, size, length, and invert) and cross sections of all drainage ways. A Leica TS16 Robotic Total Station and a Leica GS18 T GNSS RTK Rover were used. All surveying was performed to LADOTD Location		

	& Survey Section requirements.
03/22 – 8/22	LA DOTD Project No. H.012685.5 – LA 385: Ryan Street Intersection Improvements. Project Manager . This project included a Topographic Survey in Calcasieu Parish near the intersection of I-210 and LA 385 (Ryan Street) near the campus of McNeese State University. The survey included all utilities, drainage, and finish floor elevations of buildings that fell within the survey limits. The total linear distance was approximately 2.67 miles. LiDAR Data was gathered using a Velodyne Mobile Scanner and Ladybug. Terrestrial Surveying was performed using a Leica TS16 Robotic Total Station and a Leica GS18 T GNSS RTK Rover. Data was processed using OpenRoads Designer TopoDOT and InSuite MicroStation. All surveying was performed to LADOTD Location & Survey Section requirements.
6/21 - Ongoing	LA DOTD Project No. H.004100.5 – I-10: LA 415 to Essen on I-10 and I-12. Project Manager . SJB Group performed the property surveying along a 4.4-mile stretch of Interstate 10 from St. Joseph St. to College Dr. in East Baton Rouge Parish, Louisiana for the Louisiana Department of Transportation and Development’s widening project. This project required extensive title research to acquire the necessary existing surveys and deeds (in addition to the substantial amount of review of the title research reports supplied to SJB by LADOTD). It also required field surveying and mapping of in excess of one hundred twenty five parcels along the project corridor, which range in size from small urban residential lots to large commercial tracts. This project corridor also encompasses existing drainage servitudes, a railroad right-of-way, and numerous side streets in the heart of Baton Rouge, all of which SJB surveyed and mapped.
02/22 – 03/22	LA DOTD Project No. H.005967.50 – Nelson Road Extension and Bridge. Project Manager . The Nelson Road Extension project was from north across Contraband Bayou to intersect West Sallier Street. The project included the realignment of Nelson Road, new bridge construction, and relocation of an existing railroad. The project was divided into three phases: Property Surveys, base right-of-way maps, and final right-of-way maps.
10/20 – 08/22	LA DOTD Project No. H.002176.50 – LA 10 Bridges. Project Manager . The LA 10 Bridges project in St. Landry parish included Right-of-Way surveys for three sites for this project, produce base right-of-way maps, along with signed and sealed right-of-way maps for the three sites. SJB surveyed the affected properties and determined the existing right-of-way for LA Hwy 10 and multiple state-claimed water bodies. Submission of preliminary property survey map depicting the existing right-of-way and property lines within the project limits.
10/23 – 12/24	LA DOTD Project No. H.012052 LA 3092 Gauthier Road @ Lake Street Roundabout. Surveyor of Record/Project Manager . The project was performed for construction of a new roundabout at the intersection of LA 3092 (Gauthier Road) and Lake Street in Calcasieu Parish. A property survey was necessary for each required parcel for the preparation of a right-of-way map set. The project included the determination of the existing right-of-way of the subject roadways and property analysis.
01/24 – 05/24	LA DOTD Project No. H.012001 – LA339 Canal and Creek Bridges. The LA 339 Canal and Creek Bridges project in Vermillion Parish included Right-of-Way surveys for three sites for this project, produce base right-of-way maps, along with signed and sealed right-of-way maps for the three sites. SJB surveyed the affected properties and determined the existing right-of-way for LA Highway 339 and multiple intersecting streets. Submission of preliminary property survey map depicting the existing right-of-way and property lines within the project limits.
06/22 – 12/22	LA DOTD Project No. H.012685.5 – US 167: Mt. Vernon Street to Churchill Drive. Surveyor of Record/Project Manager . This project included a Property Survey and Topographic Survey along US 167 in Lafayette, LA for sidewalk improvements. The project consisted of right-of-way determination of US 167 and 3 street intersections. The project was performed according to the Location and Survey Manual and Addendum A.
04/21 – 11/23	LA DOTD Project No. H.002244 LA 56 Boudreaux Canal MB Replacement. Project Manager . The project was performed for the removal and replacement of bridge structures and construction of a diversion bridge located along LA 56 in Terrebonne Parish between the Town of Chauvin, LA and Cocodrie, LA. The project consisted of performing title takeoffs, a property survey and producing a right-of-way map set.
09/22 - Ongoing	MDOT Project No. SJB-PS 2022 IDIQ Contract Statewide. Surveyor of Record/ Contract Manager . The projects include topographic surveys, boundary surveys to produce the property surveys, hydraulic survey pdf files of the roadway centerlines, creek centerlines, floodplain profiles, and right-of-way determination. The projects are performed according to the Mississippi Department of Transportation Survey Manual. SJB Group has completed three work assignments under the contract.

Name	Ralph Burgess, PLS		Years of relevant experience with this employer		☞ < 1
Title	Supervisor		Years of relevant experience with other employer(s)		☞ 26
Degree(s) / Years / Specialization		BS / 2004 / Industrial Technology Design			
Active registration number / state / expiration date		PLS.0005040 / LA / 09/30/2026			
Year registered	2010	Discipline	Professional Land Surveyor		
Contract role(s) / brief description of responsibilities		SURVEY & RIGHT-OF-WAY TEAM 2			
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).				
04/24 – 04/25	LA DOTD: 44-25027, Infrastructure Investment and Jobs Act (IIJA) Off System Bridge Program District 08, LA. Sr. Project Manager . The project included the completion of property surveys, and right of way maps for the replacement of 4 bridges (Cutt’s Bayou, Harrisonburg, Lakeside Loop, & Gaspard Road). Responsible for field crew coordination, project QA/QC, title research & review, and deliverables preparation. Surveys were performed at La DOTD Location and Survey.				
08/21 – 04/24	LA DOTD Project No. H.011833.5 St. Mary Street Sidewalks Scott, LA. Surveyor of Record / Project Manager . Topographic surveying and coordination of all utilities for the location of their assets. Reviewed and performed QC/QA of all topography submittals and drainage maps. The topographic data for this project was collected both traditionally and using 3D Scanning methods.				
10/23 – 04/24	LA DOTD Project No. H.011235 Verot School Road. Surveyor of Responsible Charge . Oversaw and coordinated all topographic field work which include traditional means and methods, 3D Terrestrial Scanning, and coordination with the SUE Consultant on the project. The project was for interchange for the at Verot School Road and Future I49 corridor. Other duties were reviewing all the Title Take offs, Title reports, property surveys, and base Right-of-Way maps.				
08/23 -12/23	LA DOTD Project No. H.015496 Sauvage Avenue and Caddy Drive Bridges. Surveyor of Record / Survey Manager . Topographic surveying while coordinating with local utility companies for asset location. Conducted thorough quality control and quality assurance reviews of all topography submissions and drainage maps. The topographic data for this project was collected using traditional means and methods. Additionally, this project included property surveys and Right-of-Way mapping in accordance with LA DOTD standards.				
05/23 – 08/23	LA DOTD Project No. H.012914 LA 3073 – Ambassador @ Verot-Bonin. Surveyor of Responsible Charge . Managed and directed the topographic survey while coordinating with local utility companies for asset location. Conducted thorough quality control and quality assurance reviews of all topography submissions and drainage maps. The topographic data for this project was collected using traditional means and methods along with Terrestrial LiDAR scanning.				
02/21 – 07/22	LA DOTD Project No. H.013955 LA 961 Bridge at Sandy Creek, West Feliciana Parish, LA. Surveyor of Responsible Charge . Managed and directed the topographic survey while coordinating with local utility companies for asset location. Conducted thorough quality control and quality assurance reviews of all topography submissions and drainage maps. The topographic data for this project was collected using both traditional means and methods. Additionally, this project included property surveys and Right-of-Way mapping in accordance with LA DOTD standards.				
08/22 – 02/23	LA DOTD Contract No. 4400017091 Louisiana Watershed Initiative Region 5 – Task Order 3 Surveyor in Responsible Charge . Topographic survey and coordinated with other survey firms on the contract. Reviewed and performed QC/QA of all topography submittals. The topographic data for this project was collected both traditionally and using 3D Scanning methods. The final information was loaded into GIS program for the modeling of the Region 5 Watershed.				
02/21 – 07/22	LA DOTD Project No. H.013958 Carpenters Bridge Rd. Whiskey Chitto Creek. Surveyor of Record / Survey Manager . Directed the topographic survey while coordinating with local utility companies for asset location. Conducted thorough quality control and quality assurance reviews of all topography submissions and drainage maps. The topographic data for this project was collected using both traditional means and methods. Additionally, this project included property surveys and Right-of-Way mapping in accordance with LA DOTD standards.				
02/21 – 07/22	LA DOTD H.013956 LA 961 Bridge at Beamon Rd. Bayou Maringouin, Pointe Coupee Parish, LA. Survey Manager/Responsible Charge . The project included the completion of property surveys, base right of way maps, and final right of way maps that were required for the project. Responsible for field crew				

	coordination, review of title takeoff & title reports, right of way calculations, review production of maps, final QA/QC, and final deliverables to the Client. The Surveys were performed to La DOTD Location and Survey Standard.
01/21 – 06/21	LA DOTD Project No. H.013959 Reeds Bridge Rd. Calcasieu River Relief, Allen Parish, LA. Surveyor of Record / Survey Manager . Directed the topographic survey while coordinating with local utility companies for asset location. Conducted thorough quality control and quality assurance reviews of all topography submissions and drainage maps. The topographic data for this project was collected using both traditional means and methods. Additionally, this project included property surveys and Right-of-Way mapping in accordance with LA DOTD standards.
01/21 – 06/21	LA DOTD: H.013959 Reeds Bridge Rd. Calcasieu River Relief, Allen Parish, LA. Survey Manager/Responsible Charge . The project included the completion of property surveys, base right of way maps, and final right of way maps that were required for the project. Responsible for field crew coordination, review of title takeoff & title reports, review of right-of-way calculations, review production of maps, final QA/QC, and final deliverables to the Client. The Surveys were performed to La DOTD Location and Survey Standard.

Support Services

Traffic/Roadway Support, Environmental, Geotech, Other (SUE), Construction

Firm employed by Vectura Consulting Services, LLC				
Name	Laurence Lucius Lambert, II, PE, PTOE, PTP		Years of relevant experience with this employer	
Title	Supervisor		Years of relevant experience with other employer(s)	18
Degree(s) / Years / Specialization			BS / 1997 / Civil Engineering MS / 2006 / Civil Engineering MBA / 2010	
Active registration number / state / expiration date			PE.0029901 / LA / 03-31-2026	
Year registered	2002	Discipline	Civil	
Contract role(s) / brief description of responsibilities			TRAFFIC/ROADWAY SUPPORT	
Mr. Lambert will serve as supervisory engineer overseeing the development of Traffic Management Plans along with traffic signal plans, traffic control, and signing and striping plans.				
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).			
06/21 – 02/22	H.013267 Capital Area Pathways Project, Baton Rouge, LA. Laurence was Project Manager for a traffic study to evaluate trail crossings at three state routes that required DOTD approval. The traffic study included traffic data collection, safety analysis, existing conditions analysis and alternative analysis. Laurence used the DOTD Traffic Engineering Manual, MUTCD, and FHWA guidance to develop the most effective trail crossing alternatives.			
02/21 – 03/21	H.013256.5 I-10 ITS Scott to Lake Charles, Southwest LA. Laurence was the Lead Traffic Engineer for a Level 2 Traffic Management Plan (TMP) for the construction of ITS equipment along I-10. The plan included a safety strategy that included a CAT Scan, LOS determination utilizing Citrix data, lane closure recommendations based on a queue analysis and public information strategies.			
04/18 – 12/21	H.010960.5 LA 30 Roundabouts at Tanger & I-10 Gonzales, Ascension, LA. Laurence provided a Quality Control review of the temporary construction and sequence of construction plans . Vectura also provided Quality Control review of signing and striping plans at 30% and 60% plan sets to ensure the roundabouts conformed to the Pavement Markings Details Sheet PM-09 and the MUTCD details on roundabouts.			
04/18 – 12/21	H.011909.5-4 Roundabout: US 171 at Boone St., Vernon Parish, LA. Laurence provided a Quality Control review of the temporary construction and sequence of construction plans . Vectura also provided Quality Control review of signing and striping plans at 30% and 60% plan sets to ensure the roundabouts conformed to the Pavement Markings Details Sheet PM-09 and the Manual on Uniform Traffic Control Devices (MUTCD) details on roundabouts.			
02/20 – 09/21	College Drive Corridor Enhancement from Perkins Road to I-10, Baton Rouge, LA. Laurence was the Project Manager to develop Chapter 1 (Data Collection), Appendix A (Initial Data Collection), and Appendix B (Final Data Collection) for proposed improvements College Drive. Since the I-10 interchange was included in the study, approval from DOTD was required . After the 7-day, 24-hour counts were collected in March of 2020, DOTD stopped all data collection due to the impacts of COVID-19. After a pause of a year, Vectura closely worked with the City of Baton Rouge and DOTD to provide sufficient data that traffic patterns were returning to pre-COVID conditions and allowed PM peak hour data to be collected. Vectura collected, turning movement counts, 85% speed data, travel time runs, queue measurements, field observations, verification of Traffic Signal Inventories, and bicycle / pedestrian / transit observations.			
10/17 – 10/18	H.013025 LA 182 (University Avenue) Corridor Planning Study, Lafayette, LA. Laurence was the Lead Traffic Engineer for a Corridor Planning Study for LA 182. The scope focused on improving safety and mobility for pedestrian, bicycle, and transit users. Laurence collected AM & PM peak vehicle turning movement counts as well as pedestrian and bicycle counts. Laurence coordinated with the Acadiana Planning Commission to develop growth rates and design year volumes . Laurence then performed Highway Capacity Manual analysis for 5 intersections along the intersection analyses for the signalized and roundabout controlled alternatives. Included in the study was a safety analyses of five intersections and the intermediate segments. Based on the results of the safety analysis, Laurence provided design criteria to the design team for improving safety of pedestrians, bicycles, and vehicles.			

09/16 – 04/17	H.004957.5 I-12 To Bush - LA 3241 (I-12 – LA 36) Corridor Study, St. Tammany Parish, LA. Laurence was the Lead Traffic Engineer for a DOTD traffic study for the new LA 3241 alignment with the purpose of obtaining both existing and projected future traffic variables in accordance with standard operating procedures typically performed in these types of analyses. Laurence worked closely with the NORPC and District 62 to develop design year volumes using data the TransCAD model. The traffic study examined concepts that improved the safety and efficiency of the roadway consistent with the latest DOTD policies related to access management. Laurence, along with Brin, collected 7-day, 24-hour counts w/ classification on mainlines, turning movement counts for morning and evening peak periods and speed data for mainlines. Laurence also developed a VISSIM traffic simulation model of the preferred alternative
07/16 – 01/17	Federal Highway Administration Intersection & Interchange Geometrics (IIG): Innovative Design Considerations for All Users. At the request of the FHWA division office for Virginia, Laurence was asked to review a set of design plans for a Displaced Left Turn (DLT) in Norfolk, VA. The plans were part of a design-build project that included widening a corridor, modifications to an interchange and the implementation of a DLT. Vectura specifically reviewed and commented on the intersection geometry, pavement markings and signage. The findings were summarized in a technical memorandum as well as “red line” comments were scanned and submitted to the FHWA Virginia Division office for their use.
04/11 – 09/11	SPN 424-04-0032 US 90 at Louisiana 85 Design-Build Maintenance of Traffic Plan, Iberia Parish, LA. Lead Traffic Engineer . Laurence developed a Maintenance of Traffic plan that accommodated the bridge and road widening, but also maintain passage of large trucks and freight through the heavily travelled corridor crucial for agricultural goods and farming. Laurence was the Lead Traffic Engineer for one of the first design-build projects undertaken by DOTD, which included the construction of a grade separated, diamond interchange to replace the existing US 90 intersections with Louisiana 85 in Iberia Parish to upgrade this future I-49 corridor to interstate standards.
06/10 – 10/10	SPN 454-02-0071 I-12 Widening Design-Build Amite River Bridge to Juban Road Maintenance of Traffic Plan, Livingston Parish, LA. Laurence was responsible for designing a Maintenance of Traffic plan that would keep drivers informed of real time traffic situations through a comprehensive traffic management system. Four lanes (two lanes in each direction) were to remain open during peak travel times throughout the length of the project. Temporary lane closures only occurred at night.
09/06 – 09/07	EBR 06-CS-HC-00012 Downtown Baton Rouge Signal Project, Baton Rouge, LA. Laurence was the Project Manager to develop construction plans to upgrade 29 signals in downtown Baton Rouge as part of the EBR Green Light Plan. He coordinated numerous utility conflicts during construction since current utility plans were not readily available in an old part of town. He made several signal pole foundation location adjustments based on numerous field visits with utility companies.
07/14 - 01/17	FHWA Intersection & Interchange Geometrics: Innovative Design Considerations for All Users (Multiple States) FHWA funded workshops for state Departments of Transportation that were interested in learning more about innovative intersection & interchange design. Laurence presented either part or all the one-day or two-day workshops that included modules on the overall policy and goals of FHWA for these types of innovations, roundabouts, roundabout interchanges, DLTs, DDIs, J-turns / Superstreets, MUT, Thru-turns, quadrant, and the assessment tools (CAP-X) available to compare the measures of effectiveness of each innovation. Each module includes sections on design, traffic operations, safety and multi-modal accommodation Laurence has presented for the Alabama, Kentucky, Ohio, Oklahoma, Massachusetts, Tennessee, and Texas Departments of Transportation under this contract.
09/17-04/18	US 11 at US 190 Bus. (Fremaux Ave.) Pedestrian Crosswalk Study and Traffic / Pedestrian Signal Equipment Design Slidell, LA Laurence assisted in the development of a formal traffic study for a proposed crosswalk with pedestrian traffic signal equipment and pedestrian clearance timings based on DOTD requirements. Brin assisted with vehicle and pedestrian data collection, spot speed study, analyzed 3-year intersection crash data and developed signal timing for pedestrians to cross the street. From the design study, a set of Traffic Signal Modification Plans were developed to implement the recommended alternative.
06/16 - 09/17	H.004490 Stage 0 Roundabout Studies, (Lafayette Parish, LA) Laurence performed a Stage 0 Feasibility Study for roundabouts at ten intersections in the Lafayette area. The scope was developed based on EDSMs VI.1.1.1 / VI.1.1.5 and DOTD Traffic Engineering Manual Section 20.2. Laurence, along with Brin, collected 7-day, 24-hour counts w/ classification, turning movement counts for peak periods and speed data for mainlines. Once the traffic data was collected, Laurence performed traffic signal warrants analyses, performed a Sidra unsignalized, signalized and roundabout analyses. After the analyses were completed, Laurence developed a report that captured the results.

Firm employed by **Vectura Consulting Services, LLC**

Name	Reece Rodrigue, PE, PTOE		Years of relevant experience with this employer	↻ 3
Title	Project Traffic Engineer		Years of relevant experience with other employer(s)	↻ 7
Degree(s) / Years / Specialization			B.S. / 2013 / Civil Engineering	
Active registration number / state / expiration date			PE.0042074 / LA / 03-31-2026	
Year registered	2017	Discipline	Civil	
Contract role(s) / brief description of responsibilities			TRAFFIC/ROADWAY SUPPORT	

Mr. Rodrigue will serve as a project engineer for the development of traffic signal plans, development of traffic control plans and traffic management plans.

Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).
04/21 - Ongoing	MOVEBR Direct Select for Traffic Signal Design, Baton Rouge, LA. Reece is a project engineer for the design of traffic signal upgrades at 10 intersections. This project included a traffic design report, preliminary and final plans for traffic signals that included traffic signal layout, fiber interconnect layout, fiber splicing diagrams, pedestrian crosswalk layout, and sign layout. The design also included traffic signal synchronization signal timing and pedestrian signal timing.
07/21 - Ongoing	H.007160 - EBR Computerized Traffic Signal, Phase VB, Baton Rouge, LA. Reece is part of the team responsible for Construction Engineering and Inspection . Reece has reviewed the signal mast arm shop drawings to assist the City-Parish of Baton Rouge in accepting the manufactured poles. Reece, with the DOTD, City-Parish and the Contractor conducted field visits to confirm pole foundation locations.
01/21 – 05/21	H.013256 - I-10 ITS Scott to Lake Charles, Lafayette, Acadia, and Jefferson Davis Parishes, LA. Reece was a member of the subconsultant team who was tasked with reviewing the ITS plans for 15 sites along I-10 where CCTV cameras were being installed. Reece was responsible for measuring anticipated construction quantities and producing a cost estimate for said quantities by using DOTD’s Bid Tabulation and Cost Estimating Tool .
09/20 – 12/21	H.011909.5-4 Roundabout: US 171 at Boone St., Vernon Parish, LA. Reece was a Project Engineer , who participated in the production of the temporary signal design associated with the sequence of construction for the roundabout at US 171 at Boone St. He conducted a thorough analysis of the US 171 corridor’s existing allowable movements and identified the movements that would be restricted during the proposed construction process and how it would impact the typical traffic patterns.
09/20 – 12/21	H.010960.5 LA 30 Roundabouts at Tanger I-10, Ascension Parish, LA. Reece was a Project Engineer , who assisted in the production of the temporary signal design associated with the sequence of construction for the roundabouts on LA 30 in Gonzales, LA. This project consists of eight proposed construction phases. He assisted in calculating the temporary pole heights, determining the placement location for the temporary poles for each phase, measuring and calculating clearance intervals. Reece conducted a thorough analysis of the LA 30 corridor’s existing allowable movements and identified the movements that would be restricted during the proposed construction process and how it would impact the typical traffic patterns.
04/20 - Current	H.004791 DOTD Belle Chasse Bridge & Tunnel Replacement Public-Private Partnership Project, Belle Chasse, LA. Reece is the Project Engineer who designed the temporary traffic signal for the intersection of LA 23 at Engineers Rd. The design of the temporary signals is set for eight phases of construction per the anticipated sequence of construction. Temporary pole location and heights were recommended for placement for use for all construction phases. Vehicle clearance interval calculations were conducted for each phase in accordance with DOTD and ITE guidance. Reece is responsible for producing the traffic impact analysis portion of the Traffic Management Plan, which were also used in planning for the permanent and temporary signal timing plans. Reece was also responsible for the production of permanent signal plans for the LA 23 intersections at Engineers Road and at Burmaster Street. He evaluated STOP bar locations, calculated vehicle, and pedestrian clearance intervals, designed the railroad preemption sequence for both at-grade crossings, designed the wiring layout, and developed the interconnect plan. Reece maintains correspondence with the fellow design engineering team for product consistency. In addition, Reece was responsible for reviewing and approving shop drawings that were submitted by the contractor for use in construction.

04/21 - Ongoing	MOVEBR Direct Select for Traffic Signal Design, Baton Rouge, LA. Reece is a project engineer for the design of traffic signal upgrades at 10 intersections. This project included a traffic design report, preliminary and final plans for traffic signals that included traffic signal layout, fiber interconnect layout, fiber splicing diagrams, pedestrian crosswalk layout, and sign layout. The design also included traffic signal synchronization signal timing and pedestrian signal timing.
02/20 – 09/21	College Drive Corridor Enhancement from Perkins Road to I-10, Baton Rouge, LA. Reece was the Task Leader for organizing and formatting the data collection of the College Drive project limits. Tasks included in data collection were 7-day tube counts, intersection turning movement counts, approach tube counts, unmet demand observations, driveway counts, travel time runs, pedestrian / bicycle counts, and weaving counts.
07/19 – 12/19	Burgess Avenue at Duff Road Traffic Signal Design, Walker, LA. Reece was responsible for the design of a fully actuated signalized intersection in the city of Walker, LA. The traffic signal was determined to meet signal warrants upon completion of the Foxglove subdivision in Livingston Parish, LA. Plans included road widening, signal face indication schedule, signal sequence chart, sign schedule, detector schedule, controller timing, wiring diagram, and free operation phasing diagram. Reece met with city officials to discuss the feasibility of constructing a traffic signal as opposed to other alternative measures for improving the intersection.
02/16 – 12/16	H.005733.5 US 190 Superstreet Task Order, St. Tammany Parish, LA. Reece was a team member responsible for the layouts for the US 190 Superstreet signal designs. He created the preliminary plans using CAD software program MicroStation V8i. He aided in the technical design of each intersection. He conducted field inspections to verify locations of existing equipment as well as observing the area for feasible proposed utility locations. He attended project team meetings to discuss the project details as well as the plan-in-hand walk-through.
01/16 – 11/17	Ochsner Main Campus Traffic Signals, Jefferson Parish, LA. Reece served as a Design Engineer for the traffic signal plans for the two Ochsner Main Campus access traffic signals with US 90 (Jefferson Hwy). The goal of the design was to implement updated pedestrian timings as well as optimize progression through the US 90 corridor. He reviewed traffic data and assigned time of day coordination timing parameters for the two intersections so that they may be included in the coordinated system west of the intersections. He used TruTraffic determine the appropriate offset parameters so that vehicles may progress efficiently through the coordinated system. Plans for the two intersections were drafted in the form of DOTD's latest version of the TSI format. He was responsible for estimating construction quantities using DOTD's 2016 Spec Item list.
10/16 – 05/17	Loyola Interchange Modification Request, Kenner, LA. Reece was a team member in the production of an Interchange Modification Report (IMR) for the I-10 at Loyola Dr. Interchange. He was an active member in collecting vehicle travel time data and processing the data. He also aided in collecting vehicle queues at the study intersections. He also assisted in the Vissim model calibration.
02/15 – 12/15	H.011646 Retainer Contract for DOTD District 02 Traffic Signal Inventories - Nola 3. Reece served as the lead engineer in the production of the traffic study for the District 02 Traffic Signal Inventories. The objective was to effectively correct the progression of traffic through the US 90 (Broad St) corridor. He reviewed vehicle crash data at all intersections in the study scope. He conducted travel time runs. He created a model with existing traffic signal timing information using Synchro 8 Software. He recommended traffic signal pedestrian clearance times and yellow and red clearance times for each intersection. He used MicroStation V8i when designing traffic signal plans in DOTD's TSI format.

Firm employed by Vectura Consulting Services, LLC			
Name	Kristen Gahagan Farrington, PE, PTOE	Years of relevant experience with this employer	➡ 3
Title	Project Traffic Engineer	Years of relevant experience with other employer(s)	➡ 7
Degree(s) / Years / Specialization		BS / 2014 / Civil Engineering	
Active registration number / state / expiration date		PE.0042785 / LA / 03-31-2027	
Year registered	2018	Discipline	Civil
Contract role(s) / brief description of responsibilities		TRAFFIC/ROADWAY SUPPORT	
Ms. Farrington will serve as a project engineer for the development of traffic signal plans, development of traffic control plans, traffic management plans, and signing and striping plans.			
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
12/21 – Ongoing	H.012030.5 US 371 KCS RR Overpasses HBI, Webster Parish, LA. Kristen was the project engineer to design permanent pavement marking and signing sheets for the construction plans in MicroStation. She will also participate in the QC of the sequence of construction and detour route.		
04/21 - Ongoing	CP No. 16 CI-US-0032 Bus Rapid Transit (BRT) Improvement Project, Baton Rouge, LA. Kristen a project engineer for a traffic design study and traffic signal design of 19 signals along three corridors: Plank Road, 22nd Street and US 190 (Florida Street). Kristen assisted the prime consultant with the safety analysis as well.		
08/21 – 04/22	H.013267 Downtown to Scotlandville Parkway Trail Safety Enhancement Study, Baton Rouge, LA. Kristen was a project engineer for a design study to evaluate the recommended street crossing treatments of the trail at eight locations. The project consisted of collecting vehicular speed and volume data at the proposed trail crossings. Geometric field checks were also performed to determine if any hazards to pedestrians or cyclists existed. Once the field data was collected and analyzed, appropriate crossing treatments utilizing the FHWA STEP Guide for Improving Pedestrian Safety at Unsignalized Locations were developed that included Rectangular Rapid-Flashing Beacons (RRFB) and Pedestrian Hybrid Beacons (PHB's). Currently, Vectura is developing plans for the PHB's at four locations which will be the first implementation of PHB's in the Baton Rouge area.		
02/20 – 09/21	MOVEBR College Drive Enhancement Project, Baton Rouge, LA. Kristen assisted with the data collection task of the College Drive project limits. Tasks included in data collection were 7-day tube counts, intersection turning movement counts, approach tube counts, unmet demand observations, driveway counts, travel time runs, pedestrian / bicycle counts, and weaving counts.		
6/19 - 2/21	H.013459 US 167 Improvements Stage 0 Elsie Street to Gilbert Street, St. Landry Parish, LA. Kristen served as project manager for a Stage 0 study to evaluate the addition of a third lane to US 167 from Elsie Street south to a point past Gilbert Drive. Environmental impacts and cost estimates were prepared, as well as a benefit-cost analysis of all improvements considered. Civil Engineer responsible for safety analysis including crash rate number method, over-representation, CATScan quality assurance, HSM existing safety analysis, and No-Build Analysis. Designed high-level concept exhibits and comparison matrix to determine best preliminary alternatives moving forward to meet the purpose and need of the project. Compiled meeting agenda materials and minutes.		
6/19 - 2/21	H.013460 US 167 Improvements Stage 0 Enola Street to Ross Road, Evangeline Parish, LA. Kristen served as project manager for a Stage 0 study of a two-lane road to remove a curvilinear section of US 167 from Enola Street near LA 748, southeast for approximately 1.2 miles. The study compared connecting existing property owners to a new roadway with driveways or intersection of old roadway. Environmental impacts and cost estimates were prepared. Civil Engineer responsible for safety analysis including crash rate number method, over-representation, CATScan quality assurance, HSM existing safety analysis, and No-Build Analysis, as well as a benefit-cost analysis. Designed high-level concept exhibits and a comparison matrix to determine best preliminary alternatives moving forward to meet the purpose and need of the project. Compiled meeting agenda materials and minutes.		

06/21 – 02/22	H.013267 Capital Area Pathways Project, Baton Rouge, LA. Kristen was a Project Engineer for a traffic study to evaluate trail crossings at three state routes that required DOTD approval. The traffic design study included traffic data collection, safety analysis, existing conditions analysis and alternative analysis. Laurence used the DOTD Traffic Engineering Manual, MUTCD, and FHWA guidance to develop the most effective trail crossing alternatives.
04/19 – 06/21	H.013817.1 LA 117 Improvements Stage 0, Vernon and Natchitoches Parishes, LA. Kristen served as Project Engineer responsible for a Stage 0 study for 18 miles of two-lane LA 117 from LA 8 to LA 118. The study evaluated the impacts of correcting deficient vertical and horizontal geometry along the corridor, widening for the addition of shoulders, and adding passing lanes and turn lanes at strategic locations along the corridor. Kristen was responsible for performing the safety analysis including crash rate number method, over-representation, CAT Scan quality assurance, HSM existing safety analysis, and No-Build Analysis. Kristen designed high-level concept exhibits, evaluated environmental impacts, and prepared high level cost estimates and comparison matrices to determine which preliminary alternatives best meet the purpose and need of the project. Kristen compiled all findings in the Stage 0 report and coordinated with stakeholders and local agencies to ensure purpose and need of project is met.
03/19 – 11/19	H.012311 LA 429 Connector Stage 0, Ascension Parish, LA. Kristen was the Task Leader for the preparation of a Stage 0 study to evaluate alignments for a limited-access corridor (LA 429) near I-10, between LA 30, LA 73, and US 61. Two alternatives for the widening and reconstruction of LA 429 were evaluated. The scope consisted of stakeholder and public meetings, site visits and data collection, phasing of alternative development for the corridor, scope and budget checklists, and an opinion of probable cost to prepare the Stage 0 Report. Kristen served as the civil engineer responsible for designing high level concept exhibits and comparison matrix to determine best preliminary alternatives moving forward to meet the purpose and need of the project. Compiled meeting agenda materials and minutes, coordinated with interchange study consultants for a cohesive project, and wrote report.
11/18 - 3/21	H.013322 LA 3040 Feasibility / Safety Study Stage 0, Houma, LA. Kristen served as project engineer for a study to identify safety and operational issues along 2.5 miles of Martin Luther King Boulevard (LA 3040) in Houma, LA to evaluate reasonable alternatives to address any deficiencies discovered. Kristen was responsible for compiling a data collection plan for submittal to DOTD, including count locations, determined peak periods, and peak hours. Kristen performed peak period observations in the field and geometric field checks, as well as unmet demand observations and calculations. Kristen prepared TMC figures, as well as performed existing analysis in Vistro. Compiled all data collected into Appendices A and B per the DOTD Traffic Process and Report and wrote Chapter 1 of report. Kristen represented the project at stakeholder meetings to discuss project status.
04/18 – 04/19	H.011243.1 I-49 at US 190 and LA 31 Interchange Improvements Stage 0, St. Landry Parish, LA. Kristen was the Project Engineer responsible for crash and safety analysis, report writing, planning, and designing for this Stage 0 Study to evaluate alternatives to improve traffic operations and safety at the I-49 interchanges with US 190 and LA 31. Crash and safety analysis was performed using the LADOTD CAT Scan tool and IHSDM, and line and grade was prepared to DOTD Design Standards for various corridors, including arterial collectors and freeway ramps. Close coordination with traffic engineer ensured maximum improvement of safety and operations given limited right-of-way and utility conflicts along the corridors.
09/17 – 09/18	H.011160 LA 73 Corridor Study Stage 0 (LA 74 to LA 621), Ascension Parish, LA. Kristen was the Designer responsible for concept development, report writing, and impact analysis for a Stage 0 study. The purpose of the study was to evaluate conceptual alternatives to improve capacity and operations along the LA 73 corridor and its connecting transportation network. The scope included the evaluation of three interchange configurations for the interchange of I-10 at LA 73 in conjunction with two corridor alternatives for LA 73, resulting in six different alternatives for which line and grade, impacts, and high-level cost estimates were prepared.
11/16 – 07/17	H.001271 Cane River Bridge Church Street Route LA 1-X Environmental Assessment. Kristen was the project engineer responsible for assisting with the site visits, data organization, analysis of permanent alternatives and traffic control alternatives, and traffic report to aid in the delivery of an environmental assessment for the Cane River Bridge Replacement

Firm employed by Michael Baker					
Name	T. J. (Thomas) Holliday, III, PWS		Years of relevant experience with this employer		↻ 15
Title	Environmental Planning Manager		Years of relevant experience with other employer(s)		↻ 11
Degree(s) / Years / Specialization		BS / 1998 / Civil Engineering / Delta State University			
Active registration number / state / expiration date		License No.: 2447 / N/A / N/A			
Year registered	2014	Discipline	Professional Wetland Scientist		
Contract role(s) / brief description of responsibilities		ENVIRONMENTAL PROFESSIONAL			
Mr. Holliday will serve as Environmental Professional for the environmental clearance and permitting of projects/task orders that require environmental services.					
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).				
10/22 - Ongoing	H.015338 IJA Off-System Bridges Program – District 07, Louisiana DOTD. Environmental Professional Lead. Oversaw the research by the environmental team for environmental constraints that could serve as a roadblock for the replacement of a bridge structure. The information gathered allowed the engineers to make decisions on which bridges structures should move forward in design based off these environmental constraints. The constraints included but not limited to the following: Archaeological Sites, NRHP, Pre-1971 La HBI, 71-85 NRHP, Tribal Lands, Wetlands, Scenic Stream, Levee Permit, Coastal Zone, T&E Species, Section 4(f) and 6(f) lands, Navigable Waterway, UST or Contaminated Sites, Potential Mitigation Cost, and Additional Environmental Permits. Project includes five parishes in District 07 for the replacement of existing off-system bridges. DOTD broke the project into an Initial Phase and a Final Design Phase. Project priorities were part of the initial phase that started in October 2022 and was finished and submitted in December 2022. District 07 was given \$30.3 million dollars with allocations for each parish				
08/22 - Ongoing	Barksdale AFB Entrance Roads, Bossier Parish, Louisiana NAVAC. Environmental Professional Lead. Responsible for the procurement of environmental permits for the new entrance roads for Barksdale AFB. The project includes a new roundabout at the Air Force Base gates along with new 4-lane divided highway to tie into the new LA 1267 highway constructed by DOTD under the I-20/I-220 Design Build interchange improvements. Additional responsibilities include coordination with the U.S. Army Corps of Engineers and Bossier Parish Engineering Department. The project was broken into two separate construction plans (Rough Grade and Final Design) and required additional coordination with DOTD and USACE. The new roundabout is designed to be a multi-lane roundabout that accommodates the new LA 1267 spur of the I-20/220 interchange.				
05/11 - Ongoing	New Orleans Rail Gateway Environmental Impact Statement, Jefferson and Orleans Parishes, Louisiana. LADOTD. Environmental Specialist. Conducted field studies and documented findings for wetlands and hazardous materials. Michael Baker is providing environmental and engineering services to develop an environmental impact statement for the New Orleans Rail Gateway, the fourth-largest freight and passenger rail gateway in the United States. Michael Baker’s services include project management, review of previous studies, environmental resources investigations, geographic information system development, mapping, rail and roadway travel demand modeling, alternatives analyses, rail and roadway conceptual design, cost estimates, document preparation, stakeholder and agency coordination, and extensive public outreach.				
01/10 – Ongoing	Natural Environment Master for Wetland and Other Waters Assessments and T/E Species Surveys for Roadway and Bridge Improvements, Statewide, Mississippi. MDOT. Environmental Professional Lead. Responsible for environmental studies and reporting. Under three consecutive three-year contracts, Michael Baker has conducted listed species surveys and assessments of potential impacts to wetlands and other waters related to the replacement of bridges and construction of other improvements along various roadways throughout the state. Services include data collection and analysis, site investigations, wetland delineations, and report preparation.				

3/18 – 7/18	Jackson County Bridges Jackson County Road Department. Environmental Professional Lead. Michael Baker assisted the Jackson County Road Department with Section 404 permit coordination for multiple bridge replacement and roadway improvement projects within the County. The project included four sites located along Old Fort Bayou Road, Juniper Drive, and Solomon Road. Michael Baker’s services included data collection and analysis for wetlands and other waters of the U.S. and threatened and endangered species. The projects required coordination with the Mobile District US Army Corps of Engineers (USACE), US Fish and Wildlife Service (USFWS), MS Department of Marine Resources (MDMR), MS Department of Environmental Quality (MDEQ), and the MS Department of Archives and History (MDAH).
01/10 - 04-13	S.R. 16 from S.R. 15 to S.R. 19 Bridge Design, Neshoba County, Mississippi. Mississippi Department of Transportation. Environmental Specialist. Responsible for field surveys to identify wetlands and other waters of the U.S. and preparation of a jurisdictional findings report for 404 permitting process. Michael Baker provided engineering services for improvements to 10 miles of S.R. 16 from S.R. 15 to S.R. 19. Michael Baker’s services included the Phase A preliminary bridge plans for eight bridges, including hydraulic design for three bridges and a railroad crossing bridge, and stream and wetland delineation.
10/08 - 07/15	FM 521 Environmental Assessment, Texas. Texas Department of Transportation. Environmental Specialist. Responsible for completion of the EA document and preparation of the FONSI. Assisted with public involvement activities. Michael Baker performed an environmental assessment (EA) for the reconstructing and widening of FM 521, an existing two-lane rural undivided facility, to a four-lane divided urban arterial from Beltway 8 to FM 2234 (McHard Road). The project also includes improvements on FM 2234 at FM 521 and proposed grade separations at the Union Pacific Railroad (UPRR) crossings on both FM 2234 and FM 521. Michael Baker’s services included wetlands delineation and permitting, public involvement, community impacts assessment, indirect and cumulative impacts assessments, and a Section 4(f) analysis.
02/11 - 06/11	Wetlands Delineation for S.R. 7 and S.R. 8 Bridge Replacements, Marshall, Benton, and Calhoun Counties, Mississippi. Mississippi Department of Transportation. Environmental Specialist. Conducted wetland and other waters assessments for a bridge replacement and road improvements along S.R. 7 in Marshall and Benton Counties and S.R. 8 in Calhoun County. Prepared jurisdictional findings report for submittal to USACE for 404 permit evaluations. Michael Baker performed wetland assessments and delineations for the replacement of the bridges on S.R. 7 in Marshall and Benton counties and S.R. 8 in Calhoun County. Michael Baker’s services included data collection and analysis, field investigations, wetland delineations and assessments, and report preparation.
03/11 - 07/11	Wetland Delineations and Assessments for the S.R. 493, S.R. 19, and I-55 Interchange Bridge Replacements, Kemper, Lauderdale, and Madison Counties, Mississippi. Mississippi Department of Transportation. Environmental Specialist. Conducted field studies and prepared jurisdictional findings report. Michael Baker performed wetland assessments and delineations for the replacement of the bridges on S.R. 493 in Kemper County, S.R. 19 in Lauderdale County, and at the I-55 interchange in Madison County. Michael Baker’s services included data collection and analysis, field investigations, wetland delineations and assessments, and report preparation.
05/10 - 02/13	S.R. 607 Improvements from Texas Flat Road to I-59, Hancock and Pearl River Counties, Mississippi. Mississippi Department of Transportation. Environmental Specialist. Responsible for wetland and other waters of the U.S. delineation and reporting. Michael Baker provided engineering services for the widening of S.R. 607 to four lanes from Texas Flat Road to I-59, including the reconstruction of a bridge over Alligator Branch, the replacement of a bridge over Second Alligator Branch, and the replacement of a bridge over Indian Camp Creek.

11/22 – Ongoing	Runway 31 Approach Obstruction and Acquisition, Hammond, Louisiana City of Hammond, LA. Environmental Scientist. Responsible for environmental services. Michael Baker provided professional services associated with the development and submittal of the necessary NEPA Documentation in the form of a short form Environmental Assessment for the Runway 31 Approach Obstruction Mitigation project at Hammond Northshore Regional Airport.				
11/21 – Ongoing	Heart of Georgia Taxiway A Rehabilitation Categorical Exclusion, Eastman, Georgia Heart of Georgia Regional Airport Authority. Environmental Scientist. Assisted with environmental services. Michael Baker provided engineering and environmental services for the rehabilitation of Taxiway A for Runway 02-20, which has a length of 6,500 feet and a width of 50 feet. Rehabilitation will include milling of the existing surface, crack/joint sealing, placement of new HMA surface, and pavement markings. Michael Baker conducted the technical studies necessary to prepare NEPA documentation, which included a review for wetland impacts.				
03/19 – 01/21	Lemoyne Boulevard Erosion Control, St. Martin, Mississippi. Jackson County Board of Supervisors. Environmental Scientist. Responsible for assisting with environmental services. Michael Baker provided professional services associated with performing a detailed drainage study for new erosion control improvements to an existing open channel drainage way located north of Lemoyne Boulevard in the St. Martin Community. The purpose of the drainage and erosion control study was to provide recommendations to the stormwater drainage channel to address channel re-alignment and implement new erosion control measures to mitigation channel migration and sedimentation of channel banks and bottom.				
08/19 – 09/19	Padgett Switch Road Resurfacing, Restoration, and Rehabilitation (RRR), Mobile County, Alabama. Mobile County Engineering Department. Environmental Scientist. Assisted with environmental services. Michael Baker provided engineering services for the rehabilitation of Padgett Switch Road from Highway 90 to Half Mile Road. Michael Baker's services include design, bidding-phase support, and construction services for grading, drainage, base, and paving of the roads. The project was funded by the 2016 Pay-As-You-Go funding program.				
03/19 – 06/19	Saline and Caddo River Bridges Design Services, Pike, Howard, and Sevier Counties, Arkansas. Arkansas Department of Transportation. Environmental Specialist. Responsible for environmental services. Michael Baker provided roadway and bridge design for the replacement of three bridges in Sevier, Pike, and Howard counties in Arkansas. Individual sites on the project include Highway 70 over the Caddo River, Highway 70 over the Saline River, and Highway 278 over the Saline River. Michael Baker provided plans for the replacement of the bridges and approaches and hydraulic and geotechnical studies and completed the environmental clearance documentation at all locations.				

04/19 – 08/19	<p>Bush Lane and Carol Plantation Road Resurfacing, Restoration, and Rehabilitation, Mobile, Alabama. Mobile County Engineering Department. Environmental Scientist. Responsible for assisting with environmental services. Michael Baker is performing engineering services for a resurfacing, restoration, and rehabilitation project on Bush Lane and Carol Plantation Road. Michael Baker is developing reports, plans, and calculations to support 50%, 90%, and 100% design review submissions. Major items of work include preliminary and final design plans; safety audit; preliminary and final cost estimates; and construction administration.</p>
10/19 – 11/19	<p>S.R. 27 over Big Black River Replacement Project, Warren and Hinds Counties, Mississippi. Mississippi Department of Transportation. Environmental Scientist. Responsible for conducting environmental investigations necessary to prepare the Wetland Delineation in support of the proposed project to replace the existing bridge (Bridge # 117.9) over Big Black River along S.R. 27, in Hinds and Warren County, Mississippi. Michael Baker provided engineering services to assess potential impacts to wetlands and other waters resulting from the replacement of the bridge on S.R. 27 over Big Black River. For the project, Michael Baker reviewed the project plans for the bridge replacement site as well as aerial photography and other mapping of the project area. Michael Baker conducted field investigations in the project area to locate, identify, and delineate wetlands and waters of the United States in accordance with the USACE 1987 Wetland Delineation Manual and 2010 Regional Supplement guidance. It also mapped jurisdictional wetland areas and prepared technical reports.</p>
09/19 – 11/19	<p>S.R. 12 over Moccasin Creek Bridge Replacement Project, Lexington, Mississippi. Mississippi Department of Transportation. Environmental Scientist. Responsible for conducting environmental investigations necessary to prepare the Wetland Delineation in support of the proposed project to replace the existing bridge (Bridge # 69.2) over Moccasin Creek along S.R. 12 in the city of Lexington in Holmes County, Mississippi. Michael Baker provided engineering services to assess potential impacts to wetlands and other waters resulting from the replacement of a bridge over Moccasin Creek on S.R. 12. For the project, Michael Baker reviewed the project plans for the bridge replacement site as well as aerial photography and other mapping of the project area. Michael Baker conducted field investigations in the project area to locate, identify, and delineate wetlands and waters of the United States in accordance with the USACE 1987 Wetland Delineation Manual and 2010 Regional Supplement guidance. Additionally, Michael Baker provided wetland mapping and a technical report.</p>
06/20 – 07/20	<p>S.R. 8 Bridge Replacement Wetland Assessment, Sunflower County, Mississippi. Mississippi Department of Transportation. Environmental Scientist. Responsible for conducting environmental investigations necessary to prepare the Wetland Delineation in support of the proposed project in Sunflower County, Mississippi. Michael Baker provided engineering services to assess potential impacts to wetlands and other waters resulting from the replacement of a bridge over the Quiver River on S.R.8. Michael Baker reviewed the project plans for the bridge replacement site as well as aerial photography and other mapping of the project area. It then conducted a field investigation in the project area to locate, identify, and delineate wetlands and waters of the United States in accordance with the USACE 1987 Wetland Delineation Manual and 2010 Regional Supplement guidance. Michael Baker also performed wetlands mapping and provided a technical report.</p>
07/20 – 08/20	<p>S.R. 28 over Boles Creek Wetland Assessment, Jefferson County, Mississippi. Mississippi Department of Transportation. Environmental Scientist. Responsible for conducting environmental investigations necessary to prepare the Wetland Delineation in support of the proposed project in Jefferson County, Mississippi. Michael Baker provided engineering services to assess potential impacts to wetlands and other waters resulting from the replacement of bridges over an abandoned railroad and over Boles Creek on S.R. 28. Michael Baker compiled and analyzed preliminary information regarding the project sites, including color infrared aerial photography, soil surveys, design plans for the roadway, and other readily available information. It then a performed site investigation to delineate wetlands and other waters of the United States, completed data forms, and took representative photographs of identified resources.</p>
08/20 – 11/20 01/22 – 02/22	<p>S.R. 601 Canal Road Wetlands Assessment, Harrison County, Mississippi. Mississippi Department of Transportation. Environmental Scientist. Responsible for conducting environmental investigations necessary to prepare the Wetland Delineation in support of the proposed project in the City of Gulfport in Harrison County, Mississippi. Michael Baker provided engineering services to assess potential impacts to wetlands and other waters resulting from the construction of a new road to connect southern Gulfport to I-10. For the project, Michael Baker compiled and analyzed preliminary information regarding the project sites, including color infrared aerial photography, soil surveys, design plans for the roadway, and other readily available information. It then performed site investigations to delineate wetlands and other waters of the United States, completed data forms, and took representative photographs of identified resources.</p>

Firm employed by Terracon Consultants, Inc.			
Name	Lynne Roussel, PE	Years of relevant experience with this employer	➡ 20
Title	Geotechnical Department Manager	Years of relevant experience with other employer(s)	➡ 0
Degree(s) / Years / Specialization		M.S. / 2005 /Geotechnical Engineering B.S. / 2003 /Civil Engineering	
Active registration number / state / expiration date		PE 0035152 /Louisiana / 03/31/2026	
Year registered	2009	Discipline	Civil
Contract role(s) / brief description of responsibilities		GEOTECHNICAL SERVICES MANAGER	
Lynne has managed geotechnical projects in Louisiana for 20 years. She has also managed several Geotechnical ID/IQ contracts for DOTD. She has performed engineering analyses using in-house computer resources and commercial software for settlement analysis, deep foundations analysis, pavement design, slope stability analysis, and lateral loading of deep foundations. She also performed analyses for the USACE for limiting pressure analyses for Horizontal Directional Drilling (HDD) projects, seepage analyses, and Method of Planes slope stability. Her software experience includes PCSTABL6, GEOSLOPE, LPILE, DRIVEN, SHAFT, Shoring Suite, and APILE.			
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
12/20 – Ongoing	IDIQ Contracts for Professional Geotechnical Services Statewide Contract No. 4400019014, Statewide, LA: DOTD. Contract Manager and Project Reviewer . Managed the retainer contract for services to perform geotechnical exploration and engineering. The contract value is \$2.5 Million.		
4/1 – 08/20	The Lakes at White Oak Dam and Spillway, Baton Rouge, Louisiana: The Lakes at White Oak HOA. Mrs. Roussel served as project manager for the project. Terracon performed an independent inspection of two weirs, a report of the findings, and a maintenance work scope package.		
11/19 – 04/21	Bayou Lafourche Weir, Thibodaux, Louisiana: Duplantis Design Group. Mrs. Roussel served as a project engineer for the project. Terracon provided the geotechnical field exploration, laboratory testing, and slope stability analysis. Ms. Roussel served as Terracon project manager for this project. She was responsible for coordinating the field exploration and lab testing. She also helped develop the soil model utilized in the stability analysis. She also determined which stability cases (e.g., undrained, drained, stockpiles, etc.) needed to be analyzed based on her understanding of the project requirements.		
01/10– 01/12	H.009187.5 – 23rd Street Bridge over Canal No. 17, Jefferson Parish, Louisiana: DOTD. Mrs. Roussel served as project engineer in the subsurface evaluation and engineering design of this DOTD Off System Bridge project. The bridge at 23rd Street over Canal No. 17 was replaced. DOTD boring logs and LRFD Pile Calculations were provided to the design engineer.		
05/18 – 09/20	H.0051.21 - LA-1 to I-10 Connector, Port Allen, Louisiana: DOTD. Mrs. Roussel served as project manager for the design of a new connector between LA 1 and I-10 near the Intracoastal Canal in West Baton Rouge Parish, Louisiana. The project consisted of a bridge over the Intracoastal Canal, a flyover connector to LA-1 and associated roadway. Soil borings and Cone Penetrometer Test (CPT) probes associated with the bridges and roadway were completed.		
7/19 – 12/21	H.011235.5: I-49 South @ Verot School Road US 90, Lafayette, Louisiana: DOTD. Mrs. Roussel served as project manager . She oversaw the design of the substructure of two bridges and global stability and settlement for several MSE walls to be constructed as part of this design build project. Terracon developed nominal capacity and resistance factors for pile foundations for the bridge substructures and developed driving criteria using WEAP analysis for the proposed pile driving equipment.

Name	Stephen E. Greaber, PE	Years of relevant experience with this employer	☞ 18
Title	Senior Transportation Engineer	Years of relevant experience with other employer(s)	☞ 18
Degree(s) / Years / Specialization		BS / 1989 / Civil Engineering	
Active registration number / state / expiration date		P.E.0026107 / LA / Exp. 09/30/2025	
Year registered	1995	Discipline	Civil
Contract role(s) / brief description of responsibilities		GEOTECHNICAL SERVICES (FIELD LEAD)	
<p>Steve has 36 years of experience working on a wide range of geotechnical projects. He has worked extensively on City-Parish projects as well as for commercial, industrial, transportation, and institutional clients. He is well versed in all aspects of geotechnical engineering and materials quality aspects of construction including earthwork, concrete, masonry, asphalt, and structural steel. Steve has extensive experience in deep foundation analysis, implementation/interpretation of load testing, site modification and improvement techniques including but not limited to dynamic compaction, geotextile reinforced slopes, and wick drains for improvement of consolidation. Other areas of expertise include geotechnical seismic evaluations and liquefaction mitigation.</p>			
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
05/18 – 01/21	H.005967: Nelson Road Extension and Bridge, Lake Charles, LA. DOTD. Authorized Project Reviewer. Reviewed the subsurface evaluation and geotechnical engineering design for the Nelson Road Extension and Bridge Project. Terracon completed the subsurface exploration that included water borings in Contraband Bayou and has provided 90% design of the substructure for the bridge over Contraband Bayou and performed settlement analysis for the planned embankment approaches. The scope also included design support for impact dolphins to be constructed in front of the bridge in the Bayou to protect the bridge superstructure from the impact of possible runaway ocean-going ships from the nearby Port of Lake Charles facility.		
07/18 – 10/21	H.011235.5: I-49 South @ Verot School Road US 90, Lafayette, LA. DOTD. Lead Design Engineer. Terracon provided the design of the substructure of two bridges and global stability and settlement for several MSE walls to be constructed as part of this design-build project. Terracon developed nominal capacity and resistance factors for pile foundations for the bridge substructures and developed driving criteria using WEAP analysis for the proposed pile driving equipment. Dynamic Pile Testing was performed during construction to verify pile capacities. Terracon reviewed the CAPWAP results and provided recommendations for adjustment of the resistance factors to accommodate slight variations in nominal capacity obtained at each bent..		
06/17 – 10/18	H.010006: Bayou Petit Caillou Bridge Improvements, Chauvin, LA. DOTD. Senior Geotechnical Engineer. Provided senior review of the subsurface evaluation and substructure design for upgrades to the existing bridge. The services were performed for Huval and Associates through their Bridge Preservation Contract and included providing pile recommendations for support of a new bridge lift operator building and supports for traffic barriers and fender replacements.		
02/14 – 02/17	H.010620: US 90 (I-49 South) Design Build, Lafayette Parish, LA. C.H. Fenstermaker. Senior Geotechnical Engineer. Provided senior review for the subsurface evaluation and geotechnical engineering design for the US 90 (I-49 South) Design Build Project. Terracon provided the design of the substructure of two bridges and global stability and settlement for several MSE walls to be constructed as part of this design-build project. Terracon developed nominal capacity and resistance factors for pile foundations for the bridge substructures and developed driving criteria using WEAP analysis for the proposed pile driving equipment. Dynamic Pile Testing was performed during construction to verify pile capacities. Terracon reviewed the CAPWAP results and provided recommendations for adjustment of the resistance factors to accommodate slight variations in nominal capacity obtained at each bent.		
07/18 – 12/18	LA-1 to I-10 Connector 30% Design - Port Allen, LA. Volkert/DOTD. Supervising Geotechnical Engineer. Supervised 30% design plans for a proposed new connector between I-10 and LA-1 in West Baton Rouge Parish. The extension included two bridges and two miles of new roadway. Bridges over an existing railroad and the Intracoastal Canal were included. An evaluation of a possible retained earth embankment was included		

Firm employed by Terracon Consultants, Inc.			
Name	Ryan Poindexter, P.E.	Years of relevant experience with this employer	↻ 9
Title	Geotechnical Project Engineer	Years of relevant experience with other employer(s)	↻ 0
Degree(s) / Years / Specialization		BS / 2013 / Civil Engineering	
Active registration number / state / expiration date		P.E.0046285 / LA / Exp. 03/31/2026	
Year registered	2021	Discipline	Civil
Contract role(s) / brief description of responsibilities		GEOTECHNICAL PROJECT MANAGER	
<p>Ryan has 9 years of geotechnical engineering experience working for commercial, industrial, and transportation clients. His experience includes field and office tasks such as drill crew supervision, soil laboratory testing, data quality control, engineering calculations, geotechnical report preparation, and project management. Ryan now focuses on managing full-spectrum geotechnical projects, many of which are for LADOTD through our geotechnical retainer contract.</p> <p>Ryan is TCS Certified.</p>			
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
12/1/20 - Ongoing	IDIQ Contracts for Professional Geotechnical Services Statewide Contract No. 4400019014, Statewide, LA. DOTD Project Manager. Manages projects associated with the retainer contract for services to perform geotechnical exploration and engineering.		
07/21 – 12/21	H.003931: I-10 Lake Charles, Lake Charles, LA. DOTD Project Manager. Coordinated fieldwork and access, including private landowners and government agencies. Coordinated lab testing and QC-checked data. Prepared project deliverables and coordinated engineering review prior to final submittal.		
05/20 – 01/21	H.005121: LA-1 and LA-415 Connector, Port Allen, LA. DOTD Project Manager. Coordinated fieldwork, access, and initial lab testing prior to the project being suspended.		
06/19 – 04/20	H.004100: I-10- Widening East Baton Rouge Parish, Baton Rouge, LA. DOTD Project Manager. The project consisted of providing a site characterization report for future improvements to the existing roadway. The geotechnical field exploration consisted of soil borings adjacent to the existing roadway. Field exploration was completed safely over the course of multiple weeks with up to four land drill crews on site at once. Laboratory testing included consolidation testing, compressive strength testing, and testing for classifying of soil samples collected in accordance with LADOTD standards.		
07/18 – 10/21	H.011235.5: I-49 South @ Verot School Road US 90, Lafayette, LA. DOTD Staff Engineer. Reviewed field logs, samples, and data. Assisted in coordinating lab testing.		
06/18 – 06/21	H.005967.5: Nelson Rd. Extension and Bridges, Calcasieu Parish, LA. DOTD Assistant to Project Manager. The project consisted of providing a site characterization report for the new road and bridge, pile design, and pavement design recommendation. The geotechnical field exploration consisted of soil borings adjacent to the existing roadway, borings in undeveloped land adjacent to the Port of Lake Charles, and borings in Bayou Contraband. Field exploration was completed safely over the course of multiple weeks with up to four land and water drill crews on site at once. Laboratory testing included consolidation testing, compressive strength testing, and testing for classifying of soil samples collected in accordance with LADOTD standards. Terracon provided recommendations for precast concrete piles, pavement design, and site preparation.		
10/18-01/19	H.000133: US 80 Overpass at KCS RR, Simsboro, LA. DOTD Engineering Intern. Assisted with subsurface evaluation and lab testing. All testing was performed in accordance with LADOTD sampling and guidelines. He worked on boring logs and reporting.		
07/18 – 12/18	H.009481: LA 20 Bayou Chevreuil Bridge - St. James Parish, LA. DOTD Assistant to Project Manager. Coordinated field activities and lab testing for this geotechnical characterization for a replacement bridge. The project consisted of soil borings and CPT soundings along the proposed alignment of the replacement. The geotechnical field exploration required extensive use of water boring equipment. Before field operations began, site visits were conducted to determine the safest and most efficient access for drilling equipment around and along. Field exploration was completed safely over the course of multiple days utilizing land, pontoon, and barge-mounted drilling equipment. Laboratory testing included compressive strength testing and testing for classifying soil samples collected in accordance with LADOTD standards.

Title	Engineering and Subsurface Utility Engineering Department Lead	Years of relevant experience with other employer(s)	➤ 25
Degree(s) / Years / Specialization		B.S./ 1995 / Civil Engineering	
Active registration number / state / expiration date		PE.0028547 / Louisiana / 9/30/2025	
Year registered	1999	Discipline	Civil Engineer
Contract role(s) / brief description of responsibilities		SUE SUPPORT	
Ms. Kennedy has 29 years of experience as a licensed civil engineer working in both the municipal and private sectors. Ms. Kennedy has completed infrastructure improvement, site development and subsurface utility engineering (SUE) projects for LA DOTD, MoveBR, and other local entities and private developers. She has a thorough knowledge of the Subsurface Utility Engineering CI/ASCE Standard 38-22.			
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
08/24 – Ongoing	LADOTD Project No. H.003931 Calcasieu River Bridge Public. SJB Group, LLC is providing Utility Coordination for the I-10 Calcasieu River Bridge project LADOTD’s largest to date. Coordination supports utility relocations in a dense industrial corridor, ensuring timely construction and budget compliance throughout project duration.		
04/25 – 06/24	State Project No. H.013029 Control Section No. 454-01 I-12 @ Sherwood Forest Ped/Bike Safety. Engineer of Record . This project consisted of a topographic survey, utility investigation and engineering design for multiuse paths on both sides of S. Sherwood Forest Boulevard extending from S. Harrells Ferry Road northward to Old Hammond Hwy. The project aimed to not only improve pedestrian and bicycle mobility by connecting to the existing bike lanes north of Old Hammond Hwy but also had a goal of improving pedestrian safety especially at the interstate interchanges. Working with MOVEBR and LA DOTD, SJB along with Gresham Smith developed appropriate pedestrian crossings to minimize impact on vehicular traffic, while also greatly enhancing overall safety. The project is the first of its kind for this type of interstate crossing in Baton Rouge and the surrounding regions.		
10/22 – 05/23	City-Parish Project No. 20-CP-US-0099 – MOVEBR Airline Highway, North (Florida Blvd to Interstate I-110). SUE Department Manager/Engineer of Record . SJB Group will complete ASCE 38-02 Quality Level D services for the project as a sub-consultant to Huval & Associates. There is a heavy congestion of utilities within these project limits and identification of utility owners and approximate locations is critical to the preliminary design of the project.		
08/22 – 09/23	LA DOTD Task Order No. H.001820.5-3 – LA 485 Bridges Near Allen Construction Inspection. SUE Project Manager . SJB Group will provide construction coordination and monitoring for the relocation of three water mains in conflict with the project alignments at three bridge locations.		
04/22 – 03/23	City-Parish Project No. 20-CP-US-0100 – MOVEBR Airline Highway, South (Parish Line to Bluebonnet Blvd). SUE Department Manager/Engineer of Record . SJB Group will complete ASCE 38-02 Quality Level D services for the project. There is a heavy congestion of utilities within these project limits and identification of utility owners and approximate locations is critical to the preliminary design of the project.		
04/22 – 06/22	St. Bernard Parish Water Treatment Plants SUE. Project Manager/SUE Engineer . This project involved ASCE 38-02 Quality Level B and Quality Level A services for the St. Bernard Parish Water Treatment Plant expansion. Prior to Quality Level A and B services, extensive Quality Level D records research was completed to aid in the subsequent SUE design. The plant site is heavily congested with existing utilities serving the site. Records provided were out of date and therefore the accurate location of the facilities within the expansion area was critical to avoid disruption of water service or costly relocation costs.		
03/22 – 08/22	D Vickers Hall Renovations and Addition. SUE Engineer of Record . Sub to Holly & Smith Architects. This project involved ASCE 38-02 Quality Level A and B SUE services for all utilities for the proposed D. Vickers Hall Expansion at Southeastern Louisiana University. Locations of the existing utilities are required to determine conflicts with the proposed expansion of D. Vickers Hall, new parking lot, and pedestrian path. Anticipated utilities were water, gas, telephone, cable, and fiber optic. Prior to Quality Level A and B services, extensive Quality Level D records research was completed to aid in the subsequent SUE design.		

01/22 – 06/22	City Parish Project No. 21-DR-LA-0095 – Dawson Creek at Hundred Oaks and Broussard Bridges. SUE Engineer of Record . Sub to Forte & Tablada, Inc. This project involved subsurface utility engineering and utility surveying for the proposed Dawson Creek at Hundred Oaks and Broussard Bridges. This project required ASCE 38-02 Quality Level A and B SUE services for all utilities within the project limits. The accurate location of these facilities was critical for the ultimate design of the bridge infrastructure included in this project.
11/21 – 03/22	Project No. 20-2057 – LA 30 Roundabouts Subsurface Utility Investigation (Tanger Mall and I-10). SUE Engineer of Record . This project involved ASCE 38-02 Quality Level A SUE and utility surveying to identify utility conflicts for all utilities owned by the City of Gonzales and the proposed LA 30 Roundabouts at Tanger Mall and I-10 in Ascension Parish. Prior to Quality Level A services, extensive Quality Level D records research was completed to aid in the subsequent SUE design. This effort required detailed record research, field investigations and data management. The accurate location of these utilities was critical to alleviate disruptions to utility services and conflicts and delays to the construction of the project in this heavily congested area.
10/21 – Ongoing	City/Parish Project No. 20-CP-HC-0044 – MovEBR Widening of Lee Drive (Highland to Perkins). SUE Engineer . This project involved ASCE 38-02 Quality Level C SUE services for all utilities within the project corridor as a sub-consultant. Prior to Quality Level C services, extensive Quality Level D records research was completed to aid in the subsequent SUE design. This corridor is heavily congested with utilities making the accurate location of such a critical part of the ultimate design of the project.
10/21 – Ongoing	Purpera Avenue Drainage Improvements. Project Manager/SUE Engineer of Record . This project involved a Topographic Survey and Subsurface Utility Engineering designating (Quality Level B) and locating services (Quality level A) in accordance with ASCE 38-02 for all utilities owned by the City of Gonzales. Prior to Quality Level A and B services, extensive Quality Level D records research was completed to aid in the subsequent SUE design. The overall efforts established an extensive topographic survey and Quality Level B map with Quality Level A information throughout the project corridor. The accurate location of these utilities was critical to allow for the proper design of the drainage system.
10/21 – 03/22	LA DOTD Project No. – I-110 North to Plank Road. SUE Engineer of Record . Sub to Buchart Horn. This project involved ASCE 38-02 Quality Level C and D SUE services for all utilities on this LA DOTD project in East Baton Rouge Parish. Quality Level C and D services requires extensive records research to aid in the subsequent SUE design.
08/21 – 02/22	LA DOTD Project No. H.012851 – UP RR Corridor (Plaquemine). SUE Engineer of Record . This project involved Quality Level B, C, and D subsurface utility engineering and utility surveying as well as a Topographic Survey for the project located in Iberville Parish along the Union Pacific Railroad Corridor between the intersection of LA 1 and Bayou Road and the intersection of Belleview Drive and Railroad Avenue.
5/21 – Ongoing	City/Parish Project No. 20-CP-HC-0034 – MovEBR Jefferson at Corporate Intersection. SUE Engineer . Sub to Buchart Horn. This project involved a Topographic Survey, Property Survey, Right-of-Way maps, and Quality Level C and Quality Level B SUE services for all utilities of the Jefferson Hwy and Bluebonnet intersection.

Firm employed by SJB Group, LLC			
Name	Austin LaCombe, PE	Years of relevant experience with this employer	➡ 3
Title	Subsurface Utility Engineering Department Manager	Years of relevant experience with other employer(s)	➡ 7
Degree(s) / Years / Specialization		B.S./ 2017 / Civil Engineering	
Active registration number / state / expiration date		PE.0047563 Louisiana 9/30/2025	
Year registered	2023	Discipline	Civil Engineering
Contract role(s) / brief description of responsibilities		SUE SUPPORT	
<p>Mr. LaCombe manages Subsurface Utility Engineering (SUE) projects for SJB Group. He is tasked with managing day to day operations of SUE field crews to include project research, preparation of field packages, supporting field efforts, organization and processing of field data, client coordination, and preparation/QA/QC of project deliverables. Mr. LaCombe has significant experience working on a variety of projects with diverse timelines. He is also responsible for ensuring that all safety guidelines and policies are followed and acts as a branch liaison to the corporate safety director. Mr. LaCombe is also proficient in a variety of software including: Bentley InRoads, OpenRoads, MicroStation, TopoDOT, AutoCAD Civil 3D, and Leica Cyclone.</p>			
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
10/23 – 01/24	<p>H.005121.5 – LA1 – LA415 Connector to Interstate 10. SUE Project Manager. This project involved SUE to update previously designated Quality Level B and Quality Level D information along the new project corridor for the design of a future connector roadway from LA 415 to LA 1. This information was updated by performing additional Quality Level B investigations into industrial pipelines intersecting the new project corridor. All pipeline owners within the new project corridor were identified during the records research phases and then designated in the field to verify their approximate horizontal and vertical locations. The additional information collected from the Quality Level B investigation was augmented with utility information previously collected and used to create a comprehensive SUE plan set depicting the locations and other pertinent information of all pipelines within the additional project limits.</p>		
07/22 – 11/22	<p>LA DOTD Project No. H.013797 – LA 30: EBR PL I-10 Project involved providing Property Surveys, Quality Level “D” Subsurface Utility Engineering, GIS, and LiDAR review services as an addition to a Stage 0 Feasibility Study for the Corridor. There are many industrial pipelines within this corridor making the correct identification of the utilities and owners within this corridor imperative for future stages of this project. In addition to the Quality Level “D” records, this project also involved field investigations to determine the order of the pipelines within the project limits. SUE data was collected using a combination of Ground-Penetrating Radar, air-assisted vacuum excavation, Electromagnetic Pipe and Cable locators, and other non-destructive detection equipment. All surveying was performed to LADOTD Location & Survey Section requirements, and all Subsurface Utility Engineering was completed to ASCE 38-02 standards.</p>		
03/22 – 08/22	<p>LADOTD Project No. H.009300.5 – Hooper Road Widening (LA3034 – LA37). SUE Project Manager. SJB Group performed several iterations of topographic survey and SUE for LA DOTD for the Hooper Road widening project. This submittal included the segment of Hooper Road from Sullivan Road (LA 3034) to Greenwell Springs Road (LA 37). A complete topographic survey including all above ground utilities and utility features, locations of subsurface utilities with approximate depths, all drainage structures, natural ground shots, existing roadways, and finish floor elevations of all buildings that fell within the project limits. Additionally, the creation of a project drainage map was included with the final project deliverables. All information was collected and completed in accordance with the Location and Survey Manual and all currently accepted Location and Survey Automation procedures. The project also required ASCE 38-02 Quality Level B, C, and D services throughout portions of the project limits. Utilities included water, gas, telephone, cable, and fiber optic. This information and the utility records collected were used to create a comprehensive SUE Plan set prepared in accordance with ASCE 38-02 standards.</p>		
11/21 – 03/22	<p>Project No. 20-2057 – LA 30 Roundabouts Subsurface Utility Investigation (Tanger Mall and I-10). SUE Engineer. This project involved ASCE 38-02 Quality Level A SUE and utility surveying to identify utility conflicts for all utilities owned by the City of Gonzales and the proposed LA 30 Roundabouts at Tanger Mall and I-10 in Ascension Parish. Prior to Quality Level A services, extensive Quality Level D records research was completed to aid in the subsequent SUE design. This effort required detailed record research, field investigations and data management. The accurate location of these utilities was critical to alleviate disruptions to</p>		

	utility services and conflicts and delays to the construction of the project in this heavily congested area.
11/22 – 04/23	City Parish Project No. 20-CP-US-0099 – MoveBR – Airline Highway North (Florida Boulevard to I-110) This project involved a Corridor LiDAR Survey and Quality Level “D” Subsurface Utility Engineering services on portions of northbound Airline Highway between Florida Boulevard and I-110 for the proposed improvements of the four-lane divided arterial to increase capacity and safety in the area as well as improve pedestrian movement through the corridor. Mobile LiDAR Data was gathered using a Trimble MX50, LadyBug, NovAtel Positioning, and Velodyne LiDAR. SUE data was collected using a combination of Ground-Penetrating Radar, air-assisted vacuum excavation, Electromagnetic Pipe and Cable locators, and other non-destructive detection equipment. All surveying was performed to LADOTD Location & Survey Section requirements, and all Subsurface Utility Engineering was completed to ASCE 38-02 standards.
08/24 – 12/24	Move Ascension LA 431 at LA 931. Project Manager. SJB Group, LLC performed a topographic survey per LaDOTD standards, covering all approaches from intersections with a minimum 150-foot width and extent as needed for project design. For Subsurface Utility Engineering (SUE), SJB Group, LLC collected Quality Level D utility records within the project limits, identifying utility owners, facilities, and related data from various sources. All utility info gathered was integrated into the Conceptual Layout, including utility type, ownership, status, size, and other relevant details. SJB Group, LLC also implemented Quality Control and Assurance procedures per their QA/QC Manual, available for Parish review after Notice to Proceed. SJB Group, LLC was a subconsultant to Stantec.
11/24 – 02/25	Louisiana State Police Helipad. Project Manager. SJB conducted a topographic survey including roads, driveways, curbing, sidewalks, building faces, drainage structures, above-ground utilities, and significant trees, using robotic total stations with 25'x25' ground shots. Utility markings and features indicating subsurface utilities were surveyed, excluding storm drains and gravity sewer lines, which were investigated using Quality Level D and C methods. Quality Level D involved contacting utility owners and gathering documentation to aid utility identification without geophysical verification. Quality Level C added correlation of utility records with surveyed surface features, resolving discrepancies through professional judgment. Quality Level B included marking underground utilities with geophysical equipment, using electromagnetic and GPR technologies, and providing approximate depths where possible. SJB Group, LLC was a subconsultant to WHLC Architecture.
10/21 – 02/22	LA DOTD Project No. H.009266.5 – I-10: LA 73 - LA30. Project Manager. LA DOTD was preparing plans to widen I-10 from 4 to 6 lanes from LA 73 – to LA 30. This project involved Quality Level B SUE services at the LA73/I-10 interchange as well as Quality Level D services for the remainder of the project limits.
01/20 – 11/20	LA DOTD Project No. H.002868.5 – I-49 South, Ambassador Caffery & US 90 Interchange. Project Manager/QA/QC. This project involved providing designating (Quality Level B) and locating (Quality Level A) SUE services to map the underground utilities within the project limits. In this congested corridor, the first task required mapping subsurface utilities along several mile of the Ambassador Caffery and US 90 right-of-way. After the completion of the Quality Level B investigation, this information was compiled and reviewed to conduct Quality Level A services on critical utilities in an effort to further aid in the design process.
01/18 – 05/20	LA DOTD Project No. H.004100.5 – I-10: LA 415 to Essen Lane on I-10 and I-12. Project Manager / QA/QC. This project involved records research (Quality Level D) and designating (Quality Level B) SUE throughout the 10-mile project corridor were part of this project. The team developed a comprehensive map based on record collection and discussions with utility representatives. The design team used the preliminary utility map for reference to determine larger systems to avoid during preliminary design.
07/15 – 12/21	LA DOTD Project No. H.004273.5 – I-49 Connector (Lafayette Regional Airport to I-10/I-49/US 167 Interchange). Project Manager/QA/QC. This project involved ASCE 38-02 Quality Level A and B services to map the underground utilities within the project limits spanning 7 miles of downtown Lafayette. Prior to Quality Level B activities, an extensive Quality Level D records-based map was created to aid in the preliminary design. This effort required multiple field leaders, detailed field data management, and constant oversight. After compiling the Quality Level B map, Quality Level A portion of the project was started in an effort to establish elevations on critical utility systems as well as unknown utilities found in the Quality Level B mapping. The overall efforts established an extensive Quality Level B map with Quality Level A information throughout the project corridor in combination with the Utility Coordination to keep utility owners aware of the mapping progress.

<p>Mr. Pounds is a utility research specialist with over 25 years in the utility locating and construction industry, and a vast database of utility providers and contacts. He is tasked with records research, supporting field efforts, organization and processing of field data, client coordination, and preparation of project deliverables. He has a thorough knowledge of the Subsurface Utility Engineering CI/ASCE Standard 38-22 Standard Guideline for Investigating and Documenting Existing Utilities.</p>			
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
05/21 – 10/21	H.003931.5, Calcasieu River Bridge (HBI), LADOTD, Calcasieu Parish, LA – Project provided Quality Level B and Quality Level A SUE services as well as Utility Coordination during Design for this project along I-10 in Lake Charles, Louisiana. Utilities included water, gas, telephone, electric, cable, and fiber optic. Topographic survey, geophysical investigation and the utility records were used to complete the drawings prepared in accordance with ASCE 38-02 standards. Engineering judgement was used to correlate records and above ground surveyed features.		
03/21 – 10/21	Plank Road Relocation, City/Parish of East Baton Rouge, Baton Rouge, LA – Project provided Subsurface Utility Engineering (Level B and A) for the relocation of LA 67 (Plank Rd.) around the Runway Safety Area at the end of Runway 31 at the Greater Baton Rouge Airport. Utilities included water, gas, telephone, electric, cable, and fiber optic. Topographic survey, geophysical investigation and the utility records were used to complete the drawings prepared in accordance with ASCE 38-02 standards. Engineering judgement was used to correlate records and above ground surveyed features.		
04/21 – 06/21	MA-18-07, Roddy Road @ 621 Roundabout, Ascension Parish Government, Ascension Parish, LA – Project included desktop site assessments, provided LA One Call services, and coordinated with Survey Crews prior to, and during field operations for the location of underground utilities. Utilities included water, gas, telephone, electric, cable, and fiber optic. Topographic survey, geophysical investigation and the utility records were used to complete the drawings prepared in accordance with ASCE 38-02 standards. Engineering judgement was used to correlate records and above ground surveyed features.		
12/23 – Present	City/Parish Project No. 20-CP-HC-0034 – MovEBR Jefferson at Corporate Intersection Sub to Buchart Horn. Project involved a Topographic Survey, Property Survey, Right-of-Way maps, and Quality Level C and Quality Level B SUE services for all utilities of the Jefferson Hwy and Bluebonnet intersection. Utilities included water, gas, telephone, electric, cable, and fiber optic. Topographic survey, geophysical investigation and the utility records were used to complete the drawings prepared in accordance with ASCE 38-02 standards. Engineering judgement was used to correlate records and above ground surveyed features.		
10/23 – Present	MA-22-04 LA 73 at Cornerview Roundabout. Project included a Property Survey, Topographic Survey, Right-of-Way Mapping, Quality Level “B” Subsurface Utility Engineering, Drainage Design, Quality Level “A” Subsurface Utility Engineering, Geotechnical Investigation, Roundabout Report, Preliminary and Final Design Plans for a proposed roundabout at the intersection. . Utilities included water, gas, telephone, electric, cable, and fiber optic. Topographic survey, geophysical investigation and the utility records were used to complete the drawings prepared in accordance with ASCE 38-02 standards. Engineering judgement was used to correlate records and above ground surveyed features.		
10/23 - Present	MA-23-06 LA 73 at LA 74 Roundabout. Sub to Volkert. This project included a Property Survey, Topographic Survey, Right-of-Way Mapping, Quality Level “B” Subsurface Utility Engineering, and Quality Level “A” Subsurface Utility Engineering, for a proposed roundabout at the intersection. Utilities included water, gas, telephone, electric, cable, and fiber optic. Topographic survey, geophysical investigation and the utility records were used to complete the drawings prepared in accordance with ASCE 38-02 standards. Engineering judgement was used to correlate records and above ground surveyed features.

Ms. Flynn is a local Engineer who will serve as Project Manager for the IDIQ and will serve as one of the Project Engineers on task order. She brings 25 years of experience providing CE&I/OV services, including the last 8 years as PM and Project Engineer on 3 LADOTD CE&I IDIQ contracts, including both full CE&I (8 task orders) and staff augmentation (2 task orders).				
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).			
01/23 - Ongoing	IDIQ Contract for Construction Engineering and Inspection Services Statewide with Majority of Work in District 03. DOTD. Project Manager. As a Project Manager of the IDIQ, Ms. Flynn was responsible for providing job classifications for LADOTD’s Specific Rates of Compensation, developing the QA/QC Plan for the IDIQ, review of engineering drawings and estimates on Falcon for developing consultant fee estimate for labor and direct expenses on each Task Order, and reviewing contract scope from the Project Manager for each Task Order prior to sending to CCS. H.013997.6: Task Order 1: Loc Rd over Barrow Pit (Blind RV BT LNCH), St. James Parish. H.012936.6: Task Order 2: LA 78: US 190-LA 1 H.013458.6: Task Order 3: Manchac Acres & HH Wilson Rd Bridges H.015604.6: Task Order 4: Pear St. at LA 1: Drainage H.012057.6: Task Order 5: LA 431: Villar Canal and Drainage Bridges H.013956.6: Task Order 6: Beamon Rd over Bayou Maringouin H.014319.6: Task Order 7: Ceadercrest Avenue over Wiener Creek H.015944.6: Task Order 8: LA 3125 (LA 70 - LA 3213) H.016026.3: Task Order 9: Grosse Tete Emergency Project H.014088.6: Task Order 10: US 61 Int. Improvements at LA 427			
03/23 - Ongoing	IDIQ Contract for Construction Engineering and Inspection Services and Staff Augmentation (CE&I) District 61. DOTD. Project Manager. As a Project Manager of the IDIQ, Ms. Flynn was responsible for providing job classifications for LADOTD’s Specific Rates of Compensation, developing the QA/QC Plan for the IDIQ, review of engineering drawings and estimates on Falcon for developing consultant fee estimate for labor and direct expenses on each Task Order, and reviewing contract scope from the Project Manager for each Task Order prior to sending to CCS. H.013958.6: Task Order 1: Carpenter’s Bridge Road over Whisky Chitto Creek, Allen Parish. Oversaw construction engineering and inspection services for this off-system bridge replacement project for Allen Parish. The timber Carpenter Bridge over Whiskey Chitto Creek was fully removed and is being replaced with concrete simple span structure, including upgraded roadway approaches H.014415.6: Task Order 2: LA 352 Drainage Improvements, St. Martin Parish. District 03 project. H.009629.6: Task Order 3: US 90: RR JCT – Pinhook, LA 92 – LA 88, Iberia, Lafayette, and St. Martin Parishes. District 03 project. H.005967.6: Task Order 4: Nelson Road Ext & Bridge, Calcasieu Parish. District 07 project done through this contract. H.012174.6: Task Order 5: I-10: JEFF DAV PL-I-49 (OGFC/SLAB REPAIR), Lafayette and Acadia Parishes. District 03 project.			
03/20 – 05/23	IDIQ Contract for Construction Engineering and Inspection Services for Safety Projects (CE&I) District 61, 62, and 02. LADOTD. Project Manager/Project Engineer. As a PM of the IDIQ, Ms. Flynn was responsible for providing job classifications for LADOTD’s Specific Rates of Compensation, developing the QA/QC Plan for the IDIQ, review of engineering drawings and estimates on Falcon for developing consultant fee estimate for labor and direct			

	<p>expenses on each Task Order, and reviewing contract scope from the Project Manager for each Task Order prior to sending to CCS. As Project Engineer, Ms. Flynn is responsible for contract administration/project management, construction engineering, and managing inspection staff for all construction activities under full-service Task Orders (TO). Duties include project and utility coordination, review contractors schedule, manage preconstruction and periodic meetings with contractor, LADOTD, and Entity Responsible Charge, development of TO sampling plan as needed, verifying accuracy of field records and documentation, field inspection audit of work and traffic control, equipping inspection staff appropriately for testing and documentation per needs of TO, verify and approve monthly and final estimates, developing As-Built plans, developing Change Order for LADOTD approval, manage RFI and claims process utilizing LADOTD established forms, disseminating press releases, and performing any other engineering function as requested by the AE.</p> <p>H.013271.6 Task Order 1: Tangipahoa PH Local Road Safety Upgrade, Tangipahoa Parish, Louisiana. The project consists of upgrading signage, refreshing pavement markings, and installation of solar powered flashing beacons, on various local roads in Tangipahoa Parish. Substantially complete.</p> <p>H.013532.6: Task Order 2: Denham Springs Rd Signing & Striping, Livingston Parish, Louisiana. The project consisted of upgrading signage, refreshing pavement markings, closure of two (2) boulevard median turn areas, and related work on various local roads. Project complete.</p> <p>H.012473.6: Task Order 3: Marconi Dr Shared-Use Path, Orleans Parish, Louisiana. The project consisted of, installing a 10' wide shared-use path and raised composite wood boardwalk, striping and signage within New Orleans City Park. Substantially complete.</p> <p>H.009308.6: Task Order 4: New Orleans DPW SRTS Sidewalk Project, Orleans Parish, Louisiana. The project is part of the "Safe Routes to School" program, involving safety upgrades to five schools in the Orleans Parish area. Components include shared-use path, sidewalks, ADA crossings, traffic signalization and related work. Estimated Completion 09/2022.</p> <p>H.012527.6: Task Order 5: Local Road Safety Upgrades (W. Feliciana), West Feliciana Parish, Louisiana. The project consists predominately of replacing outdated and damaged guardrail, signage and striping on 10 routes within the parish. Substantially complete.</p> <p>H.013082.6: Task Order 6: Bootlegger Road Sidewalk Project, St. Tammany Parish, Louisiana. The project consisted of upgrading open ditch in a residential area with CPVC pipe, backfill and sidewalks with ADA compliant ramps. Project is complete.</p>
03/19 – Ongoing	<p>IDIQ Contract for CE&I with Majority of Work in District 07, Statewide, LA. LADOTD. Project Manager. As a Project Manager of the IDIQ, Ms. Flynn was responsible for providing job classifications for LADOTD's Specific Rates of Compensation, developing the QA/QC Plan for the IDIQ, review of engineering drawings and estimates on Falcon for developing consultant fee estimate for labor and direct expenses on each Task Order, and reviewing contract scope from the Project Manager for each Task Order prior to sending to CCS.</p> <p>H.010916.6 Task Order 1: Prien Lake Re-Deck & Safety Improvements, Calcasieu Parish, LA. LADOTD. Project Manager. As part of a Staff Augmentation Services task order, Ms. Flynn was the Project Manager for this re-decking project. Her responsibilities were to provide the LADOTD with certified inspection staff and qualified office management staff to successfully complete the project. Maintained regular communication with the LADOTD Project Engineer to make sure his needs were met. Task order complete</p> <p>H.012018 Task Order 2: Adaptive Traffic Signal Design and Implementation, Lafayette Parish, LA. LADOTD. Project Manager / Project Engineer. As part of a full services CE&I task order, Ms. Flynn was responsible for Project Management and Project Engineering for this ITS Project. Ms. Flynn is responsible for contract administration/project management, construction engineering, and managing inspection staff for all construction activity. Duties include project, utility and local Entity coordination, providing contractor with NTP, manage preconstruction and periodic meetings, development of TO sampling plan, verifying inspectors maintain accurate field records and material documentation within SiteManager, equipping inspection staff appropriately for testing and documentation per needs of TO, verify and approve monthly and final estimate, developing As-Built plans, developing and circulating Change Orders, manage the RFI process utilizing LADOTD established forms, disseminating press releases as needed, verifying traffic control plans are according to MUTCD, and performing any other engineering function as requested by the Area Engineer (AE). Anticipated field work complete 09/2022.</p> <p>H.003184.6 Task Order 3: I-10: Texas State Line – E. of Coone Gully, Calcasieu Parish, LA. LADOTD. Michael Baker Project Manager. As part of a Staff Augmentation Services task order, Ms. Flynn was the MBI Project Manager for this interstate widening project. Her responsibilities were to provide the LADOTD with certified inspection staff for structures, drainage installation, PCC Paving, and electrical work to successfully complete the project. She maintains regular communication with the LADOTD PM and Project Engineer to make sure project needs are met. Anticipate TO completion 03/2024.</p>

Name	Kenny Collins, PE	Years of relevant experience with this employer	↻ 41	
Title	Associate Vice President	Years of relevant experience with other employer(s)	↻ 0	
bDegree(s) / Years / Specialization		BS / 1983 / Civil Engineering		
Active registration number / state / expiration date		PE.0033109 / Louisiana/ 09-30-2027		
Year registered	2007	Discipline	Civil	
Contract role(s) / brief description of responsibilities		MPR 3; ROADWAY QA/QC MANAGER		
Mr. Collins assists the Vice President and Operations Manager in contract administration, scheduling and budgeting, quality assurance and business development activities. He also lends assistance to the Operations Manager in project responsibility and manpower, client satisfaction and general administrative operations. Transportation projects performed within the group typically include a wide variety of services: highway traffic studies, location studies, preparation of NEPA documents, surveys, preliminary roadway and bridge design, right-of-way (ROW) title search, right-of-way plans/plots, legal instruments, field right-of-way staking, preparation of final roadway and bridge plans, contract documents and complete construction management and inspection; airports; ports and wharves; and, railroad National Environmental Policy Act (NEPA) documents and contract plans for railroads and bridges.				
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).			
07/17-12/19	2017 Roadway Design Services IDIQ Master Contract, Statewide, Mississippi. Mississippi Department of Transportation. Project Manager. Responsibilities include overseeing the successful execution of all work assignments issued under this contract. This entails ensuring that all project deliverables meet the MDOT’s standards and are completed within the designated timelines. Additionally, the role involves the strategic delegation of tasks to team members, guaranteeing that each assignment is handled efficiently and effectively, aligning with the client’s objectives and expectations.			
02/19-12/22	2018 Traffic Engineering Services IDIQ, Statewide, Mississippi. Mississippi Department of Transportation. Technical Manager. Responsibilities include the comprehensive administration of the contract, ensuring all terms and conditions are met efficiently. This role also encompasses the Quality Assurance/Quality Control (QA/QC) of all traffic engineering plans, verifying that they adhere to the high standards set by MDOT. Furthermore, the Technical Manager is tasked with coordinating with various stakeholders to facilitate the smooth progression of projects from conception through to completion, maintaining the highest level of quality throughout all phases.			
09/22-Ongoing	2021 Hydraulic Engineering Services IDIQ, Statewide, Mississippi. Mississippi Department of Transportation. Engineering Manager. Responsibilities includes managing the administration of the contract, ensuring that all aspects of the service agreement are executed in accordance with the client’s requirements. Additionally, the Engineering Manager is accountable for the meticulous planning and maintenance of project schedules, making certain that all milestones are met within the set deadlines. The role also demands proactive communication with the MDOT to align project objectives with client expectations, ensuring a seamless workflow and timely delivery of services.			
10/22-Ongoing	2022 Traffic Engineering Services Master, Statewide, Mississippi. Mississippi Department of Transportation. Technical Manager. Responsibilities include the comprehensive administration of the contract, ensuring all terms and conditions are met efficiently. This role also encompasses the Quality Assurance/Quality Control (QA/QC) of all traffic engineering plans, verifying that they adhere to the high standards set by MDOT. Furthermore, the Technical Manager is tasked with coordinating with various stakeholders to facilitate the smooth progression of projects from conception through to completion, maintaining the highest level of quality throughout all phases.			

10/20-03/23	<p>2019 Planning and Environmental Services IDIQ Master, Statewide, Mississippi. Mississippi Department of Transportation. Technical Manager. Responsibilities includes managing the administration of the contract, ensuring that all aspects of the service agreement are executed in accordance with the client's requirements. Additionally, the Engineering Manager is accountable for the meticulous planning and maintenance of project schedules, making certain that all milestones are met within the set deadlines. The role also demands proactive communication with MDOT to align project objectives with client expectations, ensuring a seamless workflow and timely delivery of services.</p>
12/23-Ongoing	<p>2023 Roadway Design Services IDIQ, Statewide, Mississippi. Mississippi Department of Transportation. Project Manager. Responsibilities include overseeing the successful execution of all work assignments issued under this contract. This entails ensuring that all project deliverables meet the MDOT's standards and are completed within the designated timelines. Additionally, the role involves the strategic delegation of tasks to team members, guaranteeing that each assignment is handled efficiently and effectively, aligning with the client's objectives and expectations.</p>
12/19-04/20	<p>2019 On-Call Roadway Services, Statewide, Mississippi. Mississippi Department of Transportation. Project Manager. Responsibilities include administering the contract to ensure all services are delivered in compliance with the terms agreed upon with the Mississippi Department of Transportation. The Project Manager also provides comprehensive oversight of the project, supervising all phases to guarantee that the project objectives are met and align with the client's expectations. Moreover, the position involves coordinating with various teams to facilitate effective communication and the timely completion of all awarded roadway services task orders under the contract.</p>
04/21 -Ongoing	<p>2021 On-Call Services, Statewide, Mississippi. Mississippi Department of Transportation. Technical Manager. Responsibilities involves not only crafting detailed engineering designs but also ensuring that these plans are practical, cost-effective, and compliant with all relevant regulations. The Technical Manager must also collaborate closely with the MDOT, providing expert advice and adjustments to designs to meet the evolving needs of the statewide infrastructure projects and plan development</p>
10/17-11/22	<p>US 49 Florence to Scales Construction Engineering and Inspection, Rankin County, Mississippi. Confidential Client. Technical Manager. Responsible for the management of Phase C services. This includes review of all submittals from the contractor and answering all RFI's from the contractor. This also includes attending all meetings with the contractor. Michael Baker provided engineering services, including field surveys, preliminary through final design, construction phase services, and public relations support, for the construction of U.S. 49 from Florence to the Scales Area. Working as an extension of client staff, Michael Baker provided construction management, Phase C Design (RFI/submittals), utility coordination, scheduling review (Primavera P6), material testing, erosion control, surveying, traffic control, and public relations support, for the construction of U.S. 49 from Florence to the Scale Area</p>
08/12-05/17	<p>US Highway 49 Improvements between Florence and the Scales Area, Rankin County, Mississippi. Mississippi Department of Transportation. Project Manager. Responsible for overall design of roadway and bridge plan preparation. Michael Baker is providing engineering services for roadway and bridge construction on U.S. 49 between Florence and the Scale Area just south of I-20. Michael Baker's services include the development of detailed design plans for bridges and roadway, including lighting, traffic control, signing, signalization, and intelligent transportation systems.</p>
09/10 - 09/11	<p>Replacement of the S.R. 512 Bridge over the Chickasawhay River, Clarke County, MS. Mississippi DOT. Project Manager. Served as project manager for overall design and plan development. Michael Baker provided engineering services for the replacement of the S.R. 512 bridge over the Chickasawhay River. Michael Baker's services included a review of previous design plans, field survey, and the development of final construction plans. Also served as Technical Manager responsible for project oversight for this Phase C project, which included review of shop drawings for the replacement of the bridge.</p>

Firm employed by Vectura Consulting Services, LLC			
Name	Sheelagh Brin Ferlito, PE, PTOE		Years of relevant experience with this employer
Title	Principal		Years of relevant experience with other employer(s)
Degree(s) / Years / Specialization	BS / 1988 / Civil Engineering		
Active registration number / state / expiration date	PE.0025383 / LA 09-30-2025		
Year registered	1993	Discipline	Civil
Contract role(s) / brief description of responsibilities	QA/QC MANAGER		
Ms. Ferlito will serve as QA/QC reviewer for traffic signal plans, traffic control design and for Traffic Management Plans. She brings 34 years experience in traffic engineering to the team.			
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).		
07/21 - Current	H.007160 - EBR Computerized Traffic Signal, Phase VB, Baton Rouge, LA. Brin is the Task Leaders for Vectura for the Construction Engineering and Inspection of 24 traffic signals. Brin oversaw the review of signal mast arm shop drawings to assist the City-Parish of Baton Rouge in accepting the manufactured poles. Brin and Reece, with the DOTD, City-Parish and the Contractor conducted field visits to confirm pole foundation locations.		
07/19 – Current	MOVEBR New Capacity Projects Program Management, Baton Rouge, LA. Brin is the lead traffic engineer for entire the New Capacity Projects program management team. All traffic engineering scope of services, traffic / speed data collection, traffic design studies, safety studies, and traffic signal design plans are reviewed by Brin. She is in constant communication with the Traffic Engineering staff of DOTD and EBR Traffic Engineering Department. She understands the current requirements for all aspects of traffic engineering projects.		
07/19 - Current	H.004791 DOTD Belle Chasse Bridge & Tunnel Replacement PPP, Belle Chasse, LA. Brin is the Project Manager for the temporary and permanent traffic signal plans for the intersections of LA 23 at Burmaster St and at Engineers Rd. She based her traffic signal plans on design year volumes that were developed using growth rates from the New Orleans Regional Planning Commission Travel Demand Model. This project is the first ever Public-Private-Partnership performed by Louisiana DOTD. She coordinated the detour plans based on the sequence of construction as part of the Level 2 Transportation Management Plan (TMP) .		
09/20 – 12/21	H.010960.5 LA 30 Roundabouts at Tanger I-10, Ascension Parish, LA. Brin is the Project Manager for the design of temporary traffic signal plans that will be implemented during the roundabout construction along LA 30 in Gonzales, LA. The project involves replacing three existing signalized intersections with multilane roundabouts along LA 30 at I-10 Interchange ramps and at the Tanger Boulevard. Vectura also developed signal timing plans for each phase of the construction to maintain progression along LA 30.		
02/20 – 11/21	H.010616 DOTD I:20 LA 544 Overpass Replacement, Ruston, LA. Brin is the Project Manager for the Transportation Management Plan (TMP) as part of a design for a bridge replacement and three roundabouts in Ruston, LA. The TMP was a Level 2 and included evaluation of 10 Sequence of Construction Phases. Detours included rerouting traffic to other interchanges at nighttime only, rerouting traffic from I-20 to the off ramp and on ramp at nighttime only, and rerouting traffic to service roads in vicinity of the project. Brin coordinated the queue analysis with DOTD to determine when lane closures would be allowed utilizing 24-hour tube counts. She will also coordinate the development of temporary traffic signal plans for this project as well.		
07/18 – 04/19	LA 1 Pedestrian Crosswalk Study and Traffic / Pedestrian Signal Design, West Baton Rouge Parish, Addis, LA. Brin developed a Pedestrian Crosswalk Study and Traffic Signal Construction Plans for the intersection of LA 1 at LA 990 in Addis, LA. The study was based on DOTD Traffic Engineering Manual Crosswalk Guidelines followed by traffic signal design plans based on DOTD requirements. The study included traffic and pedestrian traffic data collection, a speed study, crash analyses, intersection analyses and progression analyses. The signal plans included pedestrian signal equipment, signal timing parameter calculations, crosswalk striping, signs, DOTD pay items, estimated quantities, and construction cost. Brin also assisted with the Parish with the DOTD Permit Request for Intersection Control Devices on a State Right of Way.		
09/17 – 04/18	US 11 at US 190 Bus. (Fremaux Ave.) Pedestrian Crosswalk Study and Traffic / Pedestrian Signal Equipment Design, Slidell, LA. Brin developed a formal traffic study for a proposed crosswalk with pedestrian traffic signal equipment and pedestrian clearance timings based on DOTD requirements.		

	Brin assisted with vehicle and pedestrian data collection, analyzed 3-year intersection crash data and developed signal timing for pedestrians to cross the street. From the design study, a set of Traffic Signal Modification Plans were developed to implement the recommended alternative.
04/14 – 12/14	H.002301 Signal Design for N. Sherwood Forest Dr. Widening Project, Baton Rouge, LA. As the Project Engineer , Brin designed three signalized intersections as part of a road widening project as per EBR DPW and DOTD requirements. Ms. Ferlito developed the traffic signal equipment, signal timing and communication construction plans, special provision specifications, quantities, and cost estimate. She also performed tasks to develop the striping plans and sequence of construction plans which included temporary signal equipment placement due to lane shifts during construction.
07/12 – 03/14	EBR 03-TS-CI-0026 CE&I for EBR Traffic Signal Systems Jefferson Highway Construction, Baton Rouge, LA. Brin was the Project Resident Engineer on behalf of EBR for performing CE&I services for the construction of 11 traffic signals. She maintained records of the contractor's daily operations, coordinated significant events that affected construction progress including utility issues, reviewed shop drawings, conducted monthly progress meetings, recorded daily installed quantities, developed change orders and monthly contractor pay estimates. She also coordinated with DOTD ITS division for fiber splicing into interstate I-12 fiber backbone and ATM/EOC building. She processed all monthly tasks in EBR formats as well as all items on the EBR project closeout checklist.
07/08 – 09/09	SPN 013-05-0043 CE&I for EBR Traffic Signal Systems Phase IV Construction, Baton Rouge, LA. Brin was the Project Resident Engineer for DOTD and EBR to perform CE&I services for the construction of 21 traffic signals. She developed the project Sample Plan, maintained records of the contractor's daily operations, coordinated significant events that affected construction progress including utility issues, reviewed shop drawings, conducted monthly progress meetings, recorded daily installed quantities, coordinated concrete sampling for DOTD Materials Lab, developed change orders and monthly contractor pay estimates. She also coordinated with DOTD ITS division for fiber splicing into Airline Highway fiber backbone and ATM / EOC building. She processed all monthly tasks electronically in DOTD Site Manager and in EBR required formats as well as all items on the DOTD Project Closeout Checklist including the 2059 Report.
09/13 – 04/14	S.P. 700-99-0477 Jefferson Hwy. Signal Design, Baton Rouge, LA. Ms. Ferlito designed traffic signal plans for 11 intersections along Jefferson Highway between College Drive and the I-12 On Ramp in Baton Rouge. Design included traffic signal layout, fiber interconnect layout, fiber splicing diagrams, pedestrian crosswalk layout, and sign layout. Design also included traffic signal synchronization signal timing and pedestrian signal timing. She prepared estimated quantities, preliminary and final signal construction plans and specifications.
03/05 – 11/05	Airline Hwy Widening SPN 700-99-0332, Baton Rouge, LA. Brin designed 8 traffic signals as part of the Airline Hwy. widening project in Baton Rouge. Her design included traffic signal equipment, signal synchronization timing , fiber communication, storage length calculations based on queues analyses, special provision specifications, quantities, and cost estimate. This project included fiber design to be the first Baton Rouge project to connect video surveillance images and traffic controller information to the ATM / EOC.
02/03 – 01/04	EBR Traffic Signal Systems Phases IV and V SPN 700-17-0172, Baton Rouge, LA. Brin was the Project Engineer for the design of 66 signalized intersections on eight arterials in Baton Rouge which included traffic signal equipment, pedestrian crosswalk equipment, emergency vehicle and railroad preemption equipment, fiber interconnect equipment as well as traffic signal synchronization. Brin prepared traffic signal construction plans, estimated quantities, and specifications.

Firm employed by SJB Group, LLC					
Name	Matthew Estopinal, PE, PLS		Years of relevant experience with this employer		☞ 3
Title	CEO/Principal-in-Charge		Years of relevant experience with other employer(s)		☞ 15
Degree(s) / Years / Specialization		B.S. / 2009 / Civil Engineering B.S. / 1996 / Microbiology			
Active registration number / state / expiration date		PE.0039151 / Louisiana / 3/31/2027 PLS.0004955 / Louisiana / 3/31/2027			
Year registered	2014 (PE); 2006 (PLS)	Discipline	Civil and Land Surveying		
Contract role(s) / brief description of responsibilities		MPR 4. SURVEY QA/QC MANAGER			
Mr. Estopinal has 18 years of experience as a PLS in Louisiana managing transportation and community development related projects for private clients, MoveBR, and LA DOTD. His survey experience includes Boundary, Topographic, As-Built and ALTA Surveys, Right-of-Way Mapping, Construction Layout, and control for aerial survey and mapping.					
Experience dates (mm/yy–mm/yy)	Experience and qualifications relevant to the proposed contract; <i>i.e.</i> , “designed drainage”, “designed girders”, “designed intersection”, etc. Experience dates should cover the time specified in the applicable MPR(s).				
08/24 – Ongoing	LA DOTD Project No. H.003931 – I-10 Calcasieu River Bridge P3 Project. Survey Support/ QA/QC. SJB Group provided an additional Topographic Survey, a Property Survey and Right-of-Way Mapping for this project which is the largest in LADOTD history. This project covers a 5.5 mile stretch of Interstate 10 and includes 15 bridges and 19 ramps. Mr. Estopinal assisted with title research and boundary analysis, overseeing field activities and supervising the preparation of the primary control sketch, property survey and base right-of-way maps, providing QA/QC for all activities.				
08/20 – 04/24	LA DOTD 44-17597 - Rural Bridge Replacement Initiative, Districts 03, 07, 61, 62. QA/QC. SJB Group performed topographic surveying, property surveying, right-of-way maps, and roadway design of 33 bridge replacements in Districts 03, 07, 61, and 62 as a sub-consultant to Burk-Kleinpeter within their contract with LA DOTD. The Surveys were provided in accordance with the current Locations and Survey Manual and Addendum A.				
04/23 – 09/23	LA DOTD Project No. H.017322.5 – Morgan City Sidewalks & Shared Use Path, St. Mary Parish, LA. QA/QC. SJB Group performed as a sub to Digital Engineering to conduct Right-of-Way Mapping, Topographic Survey, and Subsurface Utility Engineering to assist in the installation of sidewalks, handicapped ramps, drainage structures, and other related work in Morgan City. Limits included Everett Street from Front Street to 4th Street, 4th Street from Everett Street to Barrow Street, and Myrtle Street from Youngs Road to Auditorium Drive. In the performance of this contract the existing right-of-way of twenty streets, one state highway right-of-way, and an irregular railroad right-of-way was determined at two crossing locations. All surveying was performed to LADOTD Location & Survey Section requirements.				
03/22 – 08/23	LA DOTD Project No. H.012685.5 – LA 385: Ryan Street Intersection Improvements. QA/QC. The SJB Group team conducted a Topographic Survey in Calcasieu Parish near the intersection of I-210 and LA 385 (Ryan Street) near the campus of McNeese State University. The survey included all utilities, drainage, and finish floor elevations of buildings that fell within the survey limits. The total linear distance was approximately 2.67 miles. LiDAR Data was gathered using a Velodyne Mobile Scanner and Ladybug. Terrestrial Surveying was performed using a Leica TS16 Robotic Total Station and a Leica GS18 T GNSS RTK Rover. Data was processed using OpenRoads Designer TopoDOT and InSuite MicroStation. All surveying was performed to LADOTD Location & Survey Section requirements.				
07/21 – 08/23	LA DOTD Project No. H.004100.5 – I-10: LA 415 to Essen on I-10 and I-12. QA/QC. SJB Group provided a Property Survey and extensive Right-of-Way Mapping for approximately 4 miles of I-10 as well as multiple intersecting streets, for which a property map was created that encompassed the parcels affected by acquisition and accessibility. The project also included the creation of Base Right-of-Way Maps; Final Right-of-Way Map set of original matte films; drawing files; along with a pdf copy of the Full Title Research Report with affected parcel number and an ASCII parcel input file descriptions for approximately 125 parcels.				

07/21 – 02/22	<p>LA DOTD Project No. H.013715.5 – LA 77 Union Pacific Railroad Crossing (Iberville). QA/QC. This project consisted of Property Surveying, Right-of-Way Mapping and Topographic Surveying for a project that included the depiction of a railroad right-of-way, state-maintained highway, and city streets. The project included preparation of a Property Map, Base Right-of-Way Maps, Final Right-of-Way Maps and the creation of a parcel input file for acquisition descriptions of the subject area.</p>
07/21 – 08/22	<p>LA DOTD Project No. H.002176.50 – LA 10 Bridges QA/QC. The LA 10 Bridges project in St. Landry Parish included Property Surveying and Right-of-Way Mapping for three sites. The property survey depicted the affected properties, the existing Right-of-Way for LA Hwy 10, and multiple state-claimed water bodies.</p>
10/23 – 04/25	<p>LA DOTD Project No. H.15487.5 – New Orleans Pedestrian Improvements. QA/QC. SJB Group Conducted Mobile LiDAR scanning for the project which included a Topographic Survey and right-of-way mapping of fifty-five intersections in the downtown area of New Orleans, Louisiana. Additionally, the project included the determination of the existing right-of-way for the specific streets and La DOTD roadways.</p>
07/21 – 05/24	<p>H.012001 LA 339: Canal & Creek Bridges. QA/QC The project required the removal and replacement of bridge structures along LA 339 in Vermillion Parish near the Town of Erath. The project encompassed 3 separate sites that required property surveys including right-of-way determination and property analysis. The property map set was produced in accordance with La DOTD requirements</p>
06/21 – 10/21	<p>LA DOTD Project No. H.007963 – Blackwater Bayou Bridge, East Baton Rouge Parish, LA. Project Manager / QA/QC. Prime contractor. This project required replacement of the Bayou River Bridge and a diversion road during construction along LA Hwy 410 in East Baton Rouge Parish near the City/Town of Central. SJB Group was tasked through Retainer Contract No. 4400016018 to prepare Right-of-Way maps. The initial property survey, right-of-way maps, and title take-offs were done by SJB Group in 2017 under Retainer Contract No.4400009165 with LADOTD. This project went through design changes which halted project progress temporarily and significantly changed the required taking. SJB Group performed title research for each affected parcel to prepare a title take-off consisting of the current deed and any maps, plats, etc. used to locate property lines. SJB Group then prepared a property survey showing property lines for each affected parcel and the existing right-of-way within the project limits.</p>
07/21 – 02/22	<p>LA DOTD Project No. H.012232 – LA 3064 to LA 1428 Phase II. Surveyor of Record/Project Manager. This project in East Baton Rouge Parish included Property Surveying and Right-of- Way Mapping for the proposed Dijon Drive Extension. The proposed right-of-way was utilized to prepare Base Right-of- Way Maps. Final Right-of-Way Maps and parcel input file descriptions for acquisition parcels. All surveying was performed to La DOTD Location & Survey Section requirements. This is one of the projects that Mr. Estopinal qualifies to fulfill the MPR of five (5) years of experience in responsible charge of performing property surveys and preparing right-of-way maps for LaDOTD..</p>

17. FIRM EXPERIENCE

The DOTD will benefit from our firm's project experience, which includes all the relevancies required for this project. We will leverage this experience, along with best practices to mitigate risk to the DOTD, prioritizing traffic control, safety, and schedule.

Michael Baker Projects

Firm name	Michael Baker INTERNATIONAL	Past Performance Evaluation Discipline(s)*	Road, Bridge, Environmental
Project name	Infrastructure Investment and Jobs Act (IIJA) Off-System Bridge Program – District 07 – Initial Services and Additional Services	Firm responsibility (prime or sub?)	Prime
Project number	H.015338	Owner's name	Louisiana Department of Transportation and Development
Project location	District 07 Parishes, Louisiana	Owner's Project Manager	Amanda Ranck, PE
Owner's address, phone, email	1201 Capitol Access Road Baton Rouge, Louisiana 70802 225-379-1338 Amanda.Ranck@LA.GOV		
Services commenced by this firm (mm/yy)	10/22	Total consultant contract cost (\$1,000's)	\$2,450
Services completed by this firm (mm/yy)	Ongoing	Cost of consultant services provided by this firm (\$1,000's)	\$1,450

Michael Baker was selected by DOTD to provide bridge, roadway and environmental services for the replacement of off-system bridges in the five parishes (Allen Parish, Beauregard Parish, Calcasieu Parish, Cameron Parish and Jefferson Davis Parish) located in DOTD District 07. This off-system bridge program is being 100% funded by the recently passed IIJA bill. DOTD allocated \$30.3 million of funding for District 07 for the implementation cost (construction, design, mitigation, right-of-way acquisition and utility relocation) for the replacement of bridges in this district. Structures will be replaced with Culvert(s), Box Culvert(s), or Slab Span Bridges that are available in DOTD Standard Plan catalog.

District 07 currently has 62 bridges classified as in poor condition with another 11 classified as fair condition that qualify for the IIJA funding. Michael Baker's initial scope was to meet all five parish representatives (Parish Engineers or Policy Jury) to determine the bridge replacement priority list. After meeting with Parishes, Michael Baker reviewed each bridge on the priority list against the inspection reports provided in the DOTD Asset Management Portal. The inspection reports were used to determine the type of bridges being replaced and to help determine if additional right-of-way (ROW) would be required and if utilities need relocation.

Two deliverables were required for the initial phase: Preliminary Screening Matrix (PSM) and Recommended Bridge Structure List (RBSL). The Preliminary Screening Matrix took into account a variety of constraints: environmental, design, ROW, and utility relocations. Michael Baker team used available database resources or meeting with agencies to determine the environmental constraints not limited to Archaeological sites, Tribal Lands, Wetlands, T&E Species, Section 4(f) and 6(f) lands, etc. These constraints were used to help determine if bridge priorities needed adjustment. Based on the PSM, the RBSL was developed based on the implementation cost for each structure.

Michael Baker received NTP in May 2023 for Additional Services that includes the construction plan preparation of 12 bridges for District 07. Additional work includes Topographic Surveys, ROW mapping, Stream Hydraulics/Hydrology, determine bridge structure (slab span, box culvert, or culvert) based on hydraulic analysis, Preliminary and Final Plans, along with Environmental Clearance. Program delivery is expected to follow compressed timeline with removal of some of the traditional submittals that will follow very similar to this IDIQ contract.

Firm name	Michael Baker INTERNATIONAL	Past Performance Evaluation Discipline(s)*	Road, Bridge, Environmental
Project name	US 371: KCS RR Overpasses HBI	Firm responsibility (prime or sub?)	Prime
Project number	H.012030	Owner's name	Louisiana Department of Transportation and Development
Project location	Sibley & Minden, Louisiana; Webster Parish, Louisiana	Owner's Project Manager	Hamed Babaizadeh, PE
Owner's address, phone, email	1201 Capitol Access Road Baton Rouge, Louisiana 70802 225-379-1033 Hamed.Babaizadeh@LA.GOV		
Services commenced by this firm (mm/yy)	11/21	Total consultant contract cost (\$1,000's)	\$694
Services completed by this firm (mm/yy)	Ongoing	Cost of consultant services provided by this firm (\$1,000's)	\$630

Michael Baker was selected by DOTD to provide bridge, structural, and transportation services for the replacement of three bridges along US 371 at two locations in Sibley, LA and Minden, LA. All bridges span KCS Railroad at two locations along their rail line. The existing bridge at Sibley, LA was built in 1934 and is currently a three span, steel girder bridge for a total length of 120' resting on concrete substructure. Bridge has sidewalks on both sides of the bridge and ties to existing sidewalks along the route. US 371 is a minor urban arterial with roughly 9% truck traffic along the route. Michael Baker design team is tasked with determining the most efficient and cost-effective bridge to replace the existing structure. A bridge structure report is required to determine if the new bridge will either be concrete or steel girder type. The new structure and road improvements will meet the latest DOTD design guidelines. One of the challenges at this location is the grade difference between the bridge and existing properties with the railroad underneath. Coordination with KCS railroad will help determine the final location of the bridge foundations in relationship with the rail line.

The two bridges at Minden, LA serve as part of the I-20 interchange at US 371. The bridges were built at different times around 1930 and both bridges are three span, steel girder bridges. One bridge is normal skew to the roadway while the other bridge was built on a skew aligning with the rail line. Like the Sibley site, US 371 is considered a minor urban arterial with roughly 9% truck traffic. Similar to the Sibley bridge, the design team will prepare a bridge structure report determining the most efficient and cost-effective bridges while minimizing impact to the local traffic. Being located at an interchange, additional challenges for these bridge replacements is the maintenance of traffic, phase construction, and shifting of traffic. At this location, one bridge will be removed and replaced while reducing travel to one-lane on the other bridge to keep roadway open to existing traffic. Design team is tasked with determining if the new bridge will be concrete or steel girder type while maintaining minimal adjustment to the existing roadway grade to reduce the amount of roadway necessary to tie to existing roadway.

Firm name	Michael Baker INTERNATIONAL		Past Performance Evaluation Discipline(s)*	Road, Environmental
Project name	Barksdale Air Force Base Entrance Roads (Design-Build)		Firm responsibility (prime or sub?)	Prime
Project number	N69450-16-D-0100	Owner's name	NAVFAC SE	
Project location	Bossier Parish		Owner's Project Manager	Sarah Reed
Owner's address, phone, email	334 Davis Avenue West, Suite 105, Barksdale AFB, LA 71110 318-243-3902 sarah.m.reed16.civ@us.navy.mil			
Services commenced by this firm (mm/yy)	08/22	Total consultant contract cost (\$1,000's)	\$2,031	
Services completed by this firm (mm/yy)	05/23	Cost of consultant services provided by this firm (\$1,000's)	\$1,918	

Michael Baker completed in May 2023 an alternative delivery design-build for Barksdale Air Force Base's entrance roads, coordinating with the owner and DOTD as well as obtaining the required project permits.

The Michael Baker design team developed construction plans per DOTD Design Guidelines and Standard Specifications. The beginning of the project is a direct tie to LA 1267 where it terminates after the KCS railroad crossing bridge constructed under the DOTD I-20/I-220 Design Build project. The roadway extension (BAFB Road) will continue as a four-lane divided highway as it enters the base property where it will transition to a new multi-lane roundabout. The roundabout is placed before the new base entrance gates and will allow for motorists that inadvertently exited onto LA 1267 to make a U-turn and return back towards the I-20/I-220 interchange without having to enter the Air Force Base. The new portion of BAFB Road is being built on the base property where a Corporate Endeavor Agreement was developed under the DOTD Design-Build project to allow for the completion of the roadway before entering the gates of the Air Force Base.

The Michael Baker design team has coordinated directly with DOTD I-20/220 Project Manager, Corey Landry, and with DOTD I-20/220 Owner Verification Consultant Project Manager, Gordon Nelson. Additional requirements by the design team were to develop temporary traffic control (TTC) plans since the I-20/220 project was completed before this project was able to be constructed. The TTC plans identified one construction entry point along Ramp "EB-SB" and two construction exit points along Ramps "NB-EB" and the "C-D" road. Additionally, a project permit was prepared and submitted to DOTD District 4 for approval once DOTD gave verification of 100% acceptance of the project design.

RELEVANT TO IDIQ

- Roundabout Design
- Roadway Design
- Hydraulics/Drainage
- Environmental Permitting
- Coordination with DOTD

The Michael Baker Environmental team was responsible for the transfer of the I-20/I-220 USCOE Permit from DOTD to the NAVFAC SE (owner of project). Additional efforts were done by the environmental team in regard to the requirements of the SWPPP, local parish permitting requirements, and coordination with DEQ in regard to water quality permits and requirements.

Firm name	Michael Baker INTERNATIONAL	Past Performance Evaluation Discipline(s)*	Road, Environmental
Project name	LA 30: EBR PL – I-10	Firm responsibility (prime or sub?)	Prime
Project number	H.013797	Owner's name	Louisiana Department of Transportation and Development
Project location	Ascension, Iberville, East Baton Rouge Parish, Louisiana	Owner's Project Manager	Melissa LeBas, PE
Owner's address, phone, email	1201 Capitol Access Road, Baton Rouge, LA 70802 225-379-1039 Melissa.LeBas@LA.GOV		
Services commenced by this firm (mm/yy)	04/22	Total consultant contract cost (\$1,000's)	\$1,054
Services completed by this firm (mm/yy)	Ongoing	Cost of consultant services provided by this firm (\$1,000's)	\$387

Michael Baker was selected to perform the Environmental Assessment for the widening of LA 30 from the East Baton Rouge Parish line to Interstate 10. LA 30 is currently a mixture of two-lane and three-lane roadway with residential, industrial, and commercial developments. LA 30 corridor is experiencing rapid growth in the industrial and retail commercial businesses.

Additionally, DOTD is currently performing an environmental study for the construction of a new Mississippi River Bridge which may tie close or directly with LA 30. Specific coordination between the LA 30 and Mississippi River Environmental teams is crucial to make sure both project progress without major issues. Atlas is currently working on the Mississippi River project and Michael Baker on LA 30 Corridor. Current Coordination and Collaboration between both firms and proximity to LA 429 Connector will provide efficient and seamless development of environmental document.

The environmental study is broken into two Phases: PEL Study Part 1 and PEL Study Part 2. Michael Baker's responsibilities include Traffic Impact Study, Line & Grade, Environmental Field Data Collection, SUE Services, and Environmental Documentation. The Traffic Study portion of the project requires the team to collect existing traffic counts along LA 30 along with turning movements at driveways. Michael Baker team will use the traffic counts to determine recommendations for the required improvements to carry forward during the study phase. Michael Baker team will host public involvement meetings to gather public input for the recommended alternatives. The public comments will be incorporated into the final documentation of the Environmental Assessment Document. The Michael Baker team will conduct SUE services due to the number of industrial pipelines that parallel LA 30 on both sides of the road. As part 2 of the PEL Study, the Michael Baker team will develop the environmental assessment document. An initial document will be created and reviewed during the public involvement process and after finalizing addressing public comment, the final document will be developed and published. Once FHWA finds a record of decision (ROD) and Finding of No Significant Impact (FONSI), the Environmental Assessment document will be published and distributed to the public for final record.

Firm name	Michael Baker INTERNATIONAL		Past Performance Evaluation Discipline(s)*	Road
Project name	SR 15 Pontotoc Feasibility Study		Firm responsibility (prime or sub?)	Prime
Project number	N/A	Owner's name	Mississippi Department of Transportation	
Project location	Pontotoc, Mississippi		Owner's Project Manager	Spencer Robinson
Owner's address, phone, email	401 North West Street, P.O. Box 1850, Jackson, MS 39215 601-359-7682 srobinson@mdot.com			
Services commenced by this firm (mm/yy)	08/23	Total consultant contract cost (\$1,000's)	\$323	
Services completed by this firm (mm/yy)	Ongoing	Cost of consultant services provided by this firm (\$1,000's)	\$323	

This project is a feasibility study for the Mississippi Department of Transportation to identify solutions that will determine the needs for widening of SR 15 from US 278/MS 6 to SR 41/Main Street in Pontotoc, Mississippi to a four-lane boulevard section. The corridor is currently a mix of two-lane, three-lane (with center turn lane), and five-lane (with a center turn lane) sections. The key components of the study include the following:

1. Traffic Analysis including a traffic volume report and future year no-build and build operational analysis
2. Safety Analysis and crash analysis to review crash data and patterns to determine corrections for critical areas.
3. Access management evaluation under a four-lane Boulevard condition to improve safety and mobility of the congested corridor.

The Feasibility study includes desktop and field data collection, traffic analysis, safety analysis, environmental and planning analysis, conceptual traffic engineering, development and high-level design including two build concepts for 26 intersections along the road. It also includes planning level cost estimates, agency coordination, and coordination with the public via a public meeting. The 26 intersections are being studied for traditional signals along with roundabouts at strategic locations that benefit traffic operations. Left turns with bulb-outs (J-turns) are required at certain locations along the corridor to facilitate turn movements and minimize travel times.

Evans-Graves Engineers, Inc. Projects

Firm name	Evans-Graves Engineers, Inc.	Discipline(s)*	Road, Survey
Project name	Retainer Contract for Roadway Design Services, District 03		Firm responsibility (prime or sub?) Prime
Project number	4400024832	Owner's name	LADOTD
Project location	LADOTD District 03	Owner's Project Manager	Lea Smith
Owner's address, phone, email	P.O. Box 94245, Baton Rouge, LA 70804; (337) 262-2375; lea.smith@la.gov		
Services commenced by this firm (mm/yy)	01/23	Total consultant contract cost (\$1,000's)	\$1,211.7
Services completed by this firm (mm/yy)	TBD	Cost of consultant services provided by this firm (\$1,000's)	\$976.9

Project Description:

Starting in January 2023, Evans-Graves has performed engineering and design and survey services for roadway projects under a **retainer contract** with LADOTD for **roadway design services in DOTD District 03**. Under this five (5) year IDIQ contract, Evans-Graves has received three (3) task orders from DOTD to date:

RELEVANT TO IDIQ

- DOTD Retainer Contract for As-Needed Projects
- DOTD Roadway Design Services
- Topographic Survey

TASK ORDER NO. 1 – H.012618.5 – LA 347 DRAINAGE IMPROVEMENTS, ST. MARTIN PARISH: Preparation of preliminary and final plans for the mill and overlay of LA 347, including patching of the failed base course, along with drainage improvements to remediate and/or supplement the sub-surface drainage to alleviate flooding along the route. Pavement design was provided by DOTD. EG Fee: \$372.2K

TASK ORDER NO. 2 – H.014767.5 – LA 182 @ DUCHAMP INTERSECTION IMP, ST. MARTIN PARISH: Preparation of preliminary and final plans for the addition of a northbound and southbound left turn lane from LA 182 onto Duchamp Road and related work, including milling and overlaying LA 182 within the project limits (See EG Project #5 included with this proposal for more information). EG Fee: \$290.5K

TASK ORDER NO. 3 – H.014483.5 – US 90: SCOTT C/L – (FORMER) LA 182, LAFAYETTE PARISH: Preparation of preliminary and final plans for the mill and overlay of the existing roadway and shoulders with drainage and intersection improvements. EG Fee: \$314.2K

Firm's Role:

EG, as the Prime, has performed:

- Topographic survey** (in accordance with DOTD Location and Survey Manual)
- Preliminary plans** (in accordance with all applicable DOTD and Louisiana Design Guidelines and Manuals)
- Final plans** (in accordance with all applicable DOTD and Louisiana Design Guidelines and Manuals)

Notably, EG's use of its experienced in-house survey crews expedited the performance of Task Order 2 due to efficiencies and communication between the survey and engineering and design processes.

Project location	Statewide, LA	Owner's Project Manager	Josh Harrouch
Owner's address, phone, email	P.O. Box 94245, Baton Rouge, LA 70804, (225) 242-4620, josh.harrouch@la.gov		
Services commenced by this firm (mm/yy)	05/14	Total consultant contract cost (\$1,000's)	\$996.7
Services completed by this firm (mm/yy)	03/18	Cost of consultant services provided by this firm (\$1,000's)	\$408.7

Project Description:

Evans-Graves performed engineering and design for roadway projects under a **retainer contract** with LADOTD to provide engineering services for **roadway design statewide**. EG performed these services under three (3) separate task orders.

Firm's Role:

Task Orders completed under this retainer contract included:

RELEVANT TO IDIQ

- DOTD Retainer Contract for As-Needed Projects
- DOTD Roadway Design Services
- Survey

LA 1026: Roundabout at Buddy Ellis Road, Livingston Parish, LA – An **urban two-lane roundabout** in Livingston Parish. Project includes **mill and overlay** in conjunction with an **“asphalt wedge”** to slightly change the vertical profile of Buddy Ellis Rd. Evans-Graves produced **preliminary** and **final plans** for the project. Design included **typical roadway sections; pavement structure details** (designed by LADOTD) to comply with designated Roadway Classification; establishment of **roadway** and **intersection horizontal geometry** and **vertical profile; drainage design**; and **sequence of construction planning** and **design**. Additional work included **boundary surveys, cost estimates** and **engineering support during construction**.

LA 182: Roundabout at Hollywood Road, Terrebonne Parish, LA - A **single lane rural roundabout** in Terrebonne Parish. EG produced **preliminary** and **final plans** for the project, including **drainage design, cost estimates, and sequence of construction design**.

US 190 Superstreet, St. Tammany Parish, LA - Conversion of a 6 lane urban arterial on US 190 from Rogers Lane to I-12 in St. Tammany Parish into a **Superstreet**. Project served as a **road diet** of approximately 3 miles of existing urban roadway. Evans-Graves **redesigned multiple intersections** along the three mile corridor converting them from traditional median openings to **signalized R-Cut type intersections**. Additionally, **J turns** were implemented between the existing intersections to **restrict left turn movements** and thereby **reduce the number of conflict points for motorists**.

Project Description:

Evans-Graves, under an IDIQ contract for roadway design services within LADOTD District 03, was tasked by LADOTD to perform engineering and related services for the **design of improvements** to the **LA 182 @ Duchamp Intersection** in St. Martin Parish, Louisiana. The project involves all design necessary for the addition of a northbound and southbound **left turn lane** from LA 182 onto Duchamp Road and related work, including **milling** and **overlaying** LA 182 within the project limits.

As part of this work, Evans-Graves is performing a **topographic survey** of the approximately 4,100 ft. corridor in accordance with **DOTD Location and Survey Manual** requirements and **LADOTD Topographic Survey Guidelines**. All features in the field are being located to produce a **complete topographic survey** and **digital terrain model** of the project corridor, including **structure types** and **top elevations**, **storm drain pipe sizes and materials**, and **invert elevations** within the survey limits. **Horizontal** and **vertical controls** were set using **DOTD-required GPS methods**. Final survey submittal will include **.pdf files of notes, reports, tabulations, and verifications**. All submitted drawings will be generated in **MicroStation** in accordance with **LADOTD's preferred Styles and Settings**. Additional work to be performed by Evans-Graves includes **preliminary** and **final plans** for construction.

Vectura Consulting Services, LLC Projects

Firm name	Vectura Consulting Services, LLC		Past Performance Evaluation Discipline(s)*	Traffic
Project name	Stage 0 Feasibility Study – US 190/Fremaux Avenue Sidewalk Study		Firm responsibility (prime or sub?)	Sub
Project number	H.972462.1		Owner's name	New Orleans Regional Planning Commission
Project location	Slidell, LA		Owner's Project Manager	Nelson Hollings
Owner's address, phone, email	10 Veterans Boulevard, New Orleans, LA 70124; 504-483-8523; nhollings@norpc.org			
Services commenced by this firm (mm/yy)	01/21	Total consultant contract cost (\$1,000's)		\$65
Services completed by this firm (mm/yy)	03/21	Cost of consultant services provided by this firm (\$1,000's)		\$30

Vectura prepared a formal traffic study to determine the feasibility of constructing a sidewalk along US 190 in Slidell, LA. The traffic study examined concepts that improved the safety and efficiency for bicyclists and pedestrians consistent with the latest DOTD policies related to access management and complete streets.

RELEVANT TO IDIQ

- Traffic Study

Task 1 Data Collection: Vectura collected the following traffic data for 10 intersections:

- Seven-day (mainlines) and two-day (side streets) 24-hour tube counts with vehicle classification
- Seven-day pedestrian counts
- Turning movement counts for morning and evening peak periods
- 15-minute driveway counts
- Traffic signal warrants, radar speed studies and sight distance evaluation
- Developed growth rate methodology and AM and PM peak forecast traffic volumes using TransCAD data

Task 2 Traffic Study: This task included the following elements:

- Performed Synchro analyses for existing conditions
- Performed Synchro analyses for implementation and design years
- Developed draft traffic study report

Task 3 Safety Analyses:

- Developed three-year crash analyses report as per DOTD standards

Vectura was hired as a sub-consultant to the prime consultant to perform a traffic study for the City of Slidell as part of improvements to the intersection of US 11 (Front St.) at US 190 Bus. (Fremaux Ave.). The goal of the study was to determine if a pedestrian crossing and pedestrian traffic signal heads were warranted. To conduct the pedestrian study, the following tasks were performed by Vectura:

Data Collection:

- AM and PM peak hour turning movement counts for five intersections
- AM / PM peak 15-minute turning movement counts for 10 driveways on Fremaux Ave.
- 24-hour traffic approach volumes, speed data, crash history and sight distance for the intersection of US 190 Bus. (Fremaux Ave.) @ US 11 (Front St).
- Weekday and weekend pedestrian counts for the intersection of US 190 Bus. (Fremaux Ave.) @ US 11 (Front St).

Draft Traffic Study: This task included a Crosswalk Traffic Study for US 190 Bus. (Fremaux Ave.) @ US 11 (Front St.). As Per DTOE, Traffic Engineering Manual (TEM) Section 3B.2.9, Section 20.2 & EDSM VI.3.1.6 Section 6, this task included the following elements:

- Developed three-year crash analyses
- Performed pedestrian crosswalk warrants as per TEM Section 3B.2.9
- Performed Vistro and HCS analyses for AM and PM Peak existing conditions, Implementation and design year conditions. The analyses included intersection and segment levels of service as well as signal timing and progression for the five intersections.
- Developed traffic study and electronic files. The Study documented how traffic will be routed with the proposed median on Fremaux Ave., the impacts to Front St., and conflict analysis for the crosswalks and pedestrian heads.

Project location	Port Allen, West Baton Rouge Parish, Louisiana	Owner's Project Manager	Jonathan Herrod
Owner's address, phone, email	1201 Capitol Access Road, Baton Rouge, LA 70802 225-379-1105 Jonathan.herrod@la.gov		
Services commenced by this firm (mm/yy)	10/23	Total consultant contract cost (\$1,000's)	\$1,117
Services completed by this firm (mm/yy)	Ongoing	Cost of consultant services provided by this firm (\$1,000's)	\$1,117

SJB Group was contract by LA DOTD in October 2023 to provide field data for the final design of a roadway to connect LA 1 to LA 415 which was a supplement to previously performed surveying in 2019 for realignment due to recent development and construction. Erick Kidder served as Party Chief for this effort under the direction of Elvis Nguyen who served as Field Crew Manager for the duration of the project. Limits included a 2.9-mile corridor beginning approximately 0.2 miles north of the intersection of I-10 and LA 415 and continuing in a southeasterly direction along the extension of LA 415 across the intercoastal canal, industrial areas, and agriculture field to the intersection of LA. Also included was an approximate 1.8-mile corridor along LA 1 that extends from the roadway into residential, commercial, and retail areas. The SJB Group team collected data of the current conditions within the project limits and merged the current data with the previous survey data and updated any observed condition changes. The collection of field data is completed through the utilization of conventional survey methods with survey total stations and global positioning systems (GPS). Mobile LiDAR Specialist, Phillip Dowden led Mobile LiDaR methods utilized for the collection of data along the high traffic segments of LA 1, Interstate 10 ramps, and LA 415. The data was processed through Trimble Business Center, with data extraction performed through TopoDot. The survey is being conducted according to the Louisiana Department of Transportation and Development Location and Survey Manual.

Led by Project Manager, Charles “Tim” Brewer, SJB Group, LLC served as the prime consultant providing property surveying services along a 4.4-mile stretch of Interstate 10 from St. Joseph St. to College Dr. in East Baton Rouge Parish, Louisiana for the Louisiana Department of Transportation and Development’s widening project. To begin, the SJB Group team conducted extensive title research to acquire the necessary existing surveys and deeds (in addition to the substantial amount of review of the title research reports supplied to SJB by LADOTD). Field work was led by Elvis Nguyen with Erick Kidder serving as party chief to survey and map more than one hundred parcels along the project corridor, which range in size from small urban residential lots to large commercial tracts. Additionally, the SJB Group team also surveyed and mapped extensive existing drainage servitudes, a railroad right-of-way, and numerous side streets in the heart of Baton Rouge. Principal & CEO, Matthew Estopinal, served as lead QA/QC for the project.

Led by Matthew Estopinal and Karen Kennedy, SJB Group provided provide Property Surveys, GIS, LiDAR Scanning, and Subsurface Utility Engineering (SUE) as a sub-consultant to Michael Baker to further the feasibility studies of the LA 30 corridor from the East Baton Rouge Parish Line to I-10 in Gonzales. This corridor is a key industrial corridor for rail and freight traffic and is in need of significant additional roadway capacity. Careful planning is required to ensure a successful project addressing all potential impacts including existing utilities which is often times the driving factor in the design of a project.

Austin LaCombe supported this project by providing required ASCE 38-02 Quality Level "D" services throughout the entire project limits. Due to the significant number of pipelines within the corridor, SJB Group also conducted field observations to determine the order of the pipelines within the right-of-way. These field observations of pipeline markers resulted in several additional pipelines being identified beyond the records that were received.

SJB Group developed the property boundary maps by obtaining parcel shape files and converting them to State Plane Coordinates. SJB Group also reviewed the LIDAR data provided by LA DOTD to confirm that accurate and sufficient data was provided as necessary for the development of design alternatives.

Terracon Consultants, Inc. Projects

Firm name	Terracon Consultants, Inc.		Past Performance Evaluation Discipline(s)*	Geotech
Project name	Infrastructure Investment and Jobs Act (IIJA) Off-System Bridge Program – District 07		Firm responsibility (prime or sub?)	Sub
Project number	H.015338, H.015493, H.015494, H.015495		Owner's name	Louisiana Department of Transportation and Development
Project location	Cameron and Jefferson Davis Parishes, LA		Owner's Project Manager	Kurt Brauner, PE
Owner's address, phone, email	1201 Capitol Access Road, Baton Rouge, LA 70802 (225) 379-1933 Kurt.Brauner@la.gov			
Services commenced by this firm (mm/yy)	08/23	Total consultant contract cost (\$1,000's)		\$180
Services completed by this firm (mm/yy)	Ongoing	Cost of consultant services provided by this firm (\$1,000's)		\$180

Terracon provided geotechnical drilling, laboratory testing, and engineering support for several bridges designated for replacement under the Louisiana Department of Transportation and Development Off-System Bridge Program in Cameron, LA. The project consisted of soil borings and CPT soundings along the proposed alignment of the replacement. The geotechnical field exploration required extensive use of water boring equipment. Before field operations began, site visits were conducted to determine the safest and most efficient access for drilling equipment around and along. Field exploration was completed safely over the course of multiple days utilizing land, pontoon, and barge-mounted drilling equipment. Laboratory testing included compressive strength testing and testing for classifying soil samples collected in accordance with LADOTD standards.

Off-system bridge projects for this project on include:

- Ardoin Cove Road Bridges
- Muria Road over Little Chenier Bayou
- Lyons Road over E Grand Marais Ditch
- Pecan Orchard Rd & Payton Rd Bridges

Terracon performed a comprehensive geotechnical investigation for the IIJA Off-System Bridge Program project located at Cutts Road over Hemphill Creek in Otis, Louisiana. Services included subsurface exploration, laboratory testing, engineering analysis, and reporting to support the design and construction of a proposed bridge or box culvert replacement. The scope involved advancing a 122-foot soil boring at the bridge site using flight auger and mud rotary drilling techniques, collecting soil samples at regular intervals, and conducting tests such as moisture content, Atterberg limits, dry unit weight, grain size analysis, and undrained unconsolidated compression. Terracon characterized the site's surface geology as Holocene and Pleistocene alluvial deposits and identified subsurface layers of clayey sands, poorly graded sands, lean clays, and silts. Groundwater was encountered at approximately 8 feet below the surface. Based on soil properties, the site was classified as Seismic Site Class D. The report also included recommendations for earthwork, foundations, floor slabs, and pavements

18. APPROACH AND METHODOLOGY

PROJECT UNDERSTANDING

The Michael Baker Team understands that one of DOTD's most important contract vehicles at their disposal is through an Indefinite Delivery/Indefinite Quantity (IDIQ) contract. These contracts allow DOTD to fast-track projects that may become emergency, time sensitive, or financially constrained.

Michael Baker Team recognizes that task orders will be assigned for a variety of different projects ranging from intersection improvements (traditional/roundabout), drainage/hydraulic improvements, bridge replacement, and road widening/turn lane additions. Even though DOTD plans to handle all the traffic assignments in-house, we have teamed with Vectura Consulting Services that specialized in traffic engineering for DOTD for many years. If a task order allows, our team can assist and help mitigate the workload for DOTD staff.

Our team has a strong working relationship with District 61 from our current CE&I IDIQ contract, LA 30 Widening, and Pecue Lane Interchange. Our staff has worked together with local district staff and has assisted in overseeing the construction of various types of projects that range from off system bridges, ITS, adaptive traffic signal installations, pavement leveling/panel replacement, interstate improvements and overlay, and major bridge decks replacement. Our design team collaborates with our construction staff during the design process to identify possible construction means and method issues with construction plans.

Michael Baker (MBI) is currently working on LA 30 Widening environmental study from Brightside Road to I-10. Through this contract our staff is preparing the environmental clearance for the widening of LA 30 from a 2-lane roadway to potentially a 4-lane divided highway. Michael Baker staff have previously conducted stakeholder meetings to coordinate the project with East Baton Rouge, Ascension and Iberville Parishes. Project is a major corridor through the 3 parishes and with the anticipated connection of the new Mississippi River Bridge along LA 30 in Iberville Parish. Our staff have been involved in coordination of this tie-in with DOTD HQ staff in the critical projects section. SJB is a teaming partner on this project for the SUE services for the difficult utility coordination required based on the number of pipelines paralleling this corridor.

Our team was responsible for the bridge design of the Pecue Lane diverging diamond interchange in East Baton Rouge Parish. The bridge was designed to DOTD standard and to accommodate the geometric layout for this type of interchange which is only the second one built in Louisiana. Both Daniel Thornhill (PIC/Contract Manager) and Brandon Pitre (Project Manager) were involved in the construction support for both Phase II and Phase III Construction. Phase II Construction wrapped up at end of 2022 and Phase III Construction is currently ongoing.

Current and Past projects for District 61 are shown below:

- » Pecue Lane Interchange over I-10
- » LA 30 Widening
- » 12 IDIQ CE&I Task Orders for District 61 (Includes drainage improvements, bridge replacements, overlay projects, etc..)
- » Local Road Safety Upgrades (West Feliciana)- Safety CE&I IDIQ

APPROACH

The Michael Baker Team will rely on our 85+ years working for DOTs, along with our working relationships with our neighboring state agencies for quality project delivery in the IDIQ process. Michael Baker has assembled qualified team partners for their long-standing working relationship with DOTD and their abilities to deliver successful projects. Once the NTP is issued, our team will hit the ground running and move the project forward. We take pride in making sure

we assign qualified staff that are knowledgeable in the DOTD project delivery process, while our senior level technical specialists lead the QA/QC review of construction plans. We assign qualified staff that is knowledgeable in the DOTD project delivery process, while our senior level technical specialists lead the QA/QC review of construction plans.

Meeting DOTD Needs

As demonstrated in Section 14, Michael Baker has assembled our team that can deliver to meet DOTD's needs. Our team is set up with multiple design teams ready to be assigned to multiple task orders. **As per the advertisement, it is anticipated that 5 task orders will be on-going at the same time. Michael Baker will have assigned a PM, Brandon Pitre, for all 5 task orders with 2 design teams with dedicated team leader for each.** Our management team understands based on the project's scope and required efforts on which staff to assign to projects, and **if single task orders are assigned, only the necessary resources** to minimize impacts to project budgets will be implemented. Michael Baker, in conjunction with Evans-Graves (E-G), will provide roadway/drainage/general design experience to this project. Both firms have resources to provide multiple task leads. Vectura will assist both firms during design and provide maintenance of traffic, striping, signing support, and traffic analysis, if necessary. E-G in conjunction with SJB Group (SJB) will handle topographic surveys and right-of-way mapping. Both firms can run multiple survey crews as the need arises. Both companies' years of providing survey and right-of-way mapping support provides a fiscal benefit and efficiency to DOTD. Additionally, SJB provides SUE services and their expertise in this field can be leaned on if the project needs arises.

Managing the Budget

Our team understands the current DOTD backlog of projects and that every penny counts for delivery of projects to the citizens of Louisiana. Through our project manager, Brandon Pitre, and deputy project manager, Eric Erikson, both will work directly with Daniel Thornhill (PIC/Contract Manager) to develop the manhours and minimize the necessary resources for each assigned task order. Our management team will rely on our QA/QC and Construction staff to help mitigate project risk that could arise during construction from change orders and project overruns.

Stakeholders

Project buy-in is crucial for the delivery of projects. Task Orders may require that local municipalities or other stakeholders be brought into coordination for the projects. Identifying key stakeholders early in the process is imperative to a successful project. Local input on sensitive measures such as closing roads, detours, lane closures, etc. and what impact it would have on local schools and local commerce are 2 examples. These issues will be a priority for the Michael Baker Team.

METHODOLOGY

Timely Execution of Task Orders

Our team recognizes that the use of IDIQ contracts is to help streamline the delivery process of projects. Through Daniel Thornhill, Contract Manager, and Brandon Pitre, Project Manager, our mission is to coordinate as quickly as possible with the DOTD Project Manager to identify the project scope and develop the manhour estimates accurately and in a timely manner. We will submit manhours to DOTD PM and collaborate as needed to negotiate the task order. DOTD is now utilizing digital signatures that have sped up the executing process of contracts and task orders.

Contract Management

IDIQ Roadway Design Services Contract | Award Within 10 days of award notification, Michael Baker will provide the DOTD Project Manager with our teams' QA/QC Plan. The QA/QC Plan will be customized around the type of services to be provided and will include at a minimum below:

- The design team key personnel and their responsibilities

- Procedures for the design work, establishing the manuals and guidelines that will be followed during project implementation.
- Checklist submitted with each milestone.

Additionally, the MBI Project Manager will provide a list of all key personnel for each job classification that align with the “Specific Rates of Compensation” list signed off by Daniel Thornhill, Contract Manager, that will be used for the duration of the IDIQ. Task Order compensation will vary based on the type of project. Compensation is expected to be either lump sum, specific rates, or not-to-exceed and should be negotiated within ninety-days (90). Michael Baker’s project management staff will make all efforts to have contract manhours developed, submitted, and negotiated within thirty (30) calendar days, if not sooner.

Development of Task Order Scope | Initial project scope will be provided by DOTD PM. Michael Baker team will review the scope and limits of work to determine if adequate scope of work is provided, or if there should be recommendations of adjustment of scope.

The Team will: Establish a scope with the DOTD Project Manager for the Task Order.

- Develop a work hour proposal, identifying specific positions and anticipated hours to perform the scope, and all direct expenses anticipated.
- Break down scope and fee by prime and subconsultant labor and direct expenses, as required by DOTD Construction Contract Services (CCS).
- DOTD will provide a copy of the Notice of Task Order Execution (NOTOE) for review prior to requiring signature and insurance documentation.
- DOTD PM will set up task order folder on Projectwise to begin exchange of existing data and coordination with DOTD.
- Design Team will develop a CPM schedule for each task order and provide monthly updates with invoices. Some task orders may have short durations and coordination with the DOTD PM will determine if weekly or bi-weekly update meetings may be necessary
- Design Team will make site visits of project locations to identify visible design constraints that would need to be addressed in the scoping phase of the project.

Stage 3: Design

Notice To Proceed of Each Task Order | Michael Baker team will become familiar with the scope of work and note any special project requirements (design exceptions, design constraints, potential required of right-of-way acquisition). The Michael Baker team will:

- Upon NTP, additional site visits may be necessary to confirm that the scope has been properly identified, and no physical site changes have occurred.
- Review and finalize design criteria based on project scope and type.
- Determine and utilize the required DOTD design manuals/specifications/standards and the required minimum project guidelines.

Kickoff Meeting | Mr. Brandon Pitre will coordinate, schedule, and conduct the kickoff meeting

with DOTD and necessary Michael Baker team members before work begins on each task order. The kickoff meeting will be used to:

- Verify project design criteria based on project type (road, bridge, drainage, intersection improvements, i.e.).
- Finalized frequency of design coordination progress meetings and submittal milestones.
- Request data that was identified in advertisement to be provided by DOTD (As-builts, traffic studies, feasibility studies, etc.)

Design team will review the data provided to make sure the design team does not have any additional questions regarding the project requirements or to determine if any additional field data collection is necessary.

Every project identified in the task order may involve a single or multiple design service. At a minimum it is anticipated that the workflow shown at the bottom of the page will be used for each project.

Topographic Surveys | Both E-G and SJB will provide surveying services for the duration of this IDIQ contract. When a task order is issued, it will be determined by MBI which firm will provide this service. If a task order issued by DOTD has an existing survey, either E-G or SJB along with design team will review the existing survey to make sure there is adequate coverage for the design of the project. If additional survey is required, a request form will be created and submitted to DOTD PM to provide DOTD’s Location and Survey department of the additional needs. If survey is not available, either E-G or SJB will create survey limits of work for approval by the DOTD PM. Once approved, either firm will set control and provide the required control sketches for approval before commencing the field work for collecting the topographic survey.

All surveys will meet DOTD Location and Survey manual requirements along with meeting DOTD CAD standards. A topographic field role will be provided to DOTD for final approval before the design team begins the Preliminary Design phase of the task order. DOTD Location and Survey section has alerted the consultant community that survey deliverables after July 1, 2025, will be required to submit in Open Roads Designer (ORD) format. Both E-G and SJB attended the necessary training in October 2024 and will have begun using ORD on projects before the selection of this project. Furthermore, Michael Baker staff have been using ORD on workshare projects for neighboring DOTs. Our staff will be ready to use ORD for plan production, if DOTD has all required resources available for use.

Each task order is anticipated to have a condensed schedule; however, the design team will determine early if LiDAR, either provided by DOTD or collected from LSU Atlas mappings services, can be utilized while topographic survey is being collected. Both E-G or SJB have the capabilities to capture mobile LiDAR if it is determined to be useful for the project schedule and delivery. The design team will update design plans when collected topographic surveys have been reviewed and signed off by Michael Baker. Michael Baker will provide an acceptance letter of approval to DOTD PM for both the control and topographic survey.

Property Surveys | SJB will carry out field and office investigations of survey data and utilized title work provided by DOTD to prepare a Base ROW Map determining the existing right-of-way.

This workflow may vary based on the type of project.

Property surveys will tie to the same survey control established by SJB. The Base ROW Map will show all surveyed property lines and the existing ROW with geometric ties to the Project Centerline. Michael Baker Design team will utilize the Base ROW maps to finalize taking lines. SJB will then use these final taking lines to develop the ROW maps to be used to acquire any necessary ROW.

SUE Services | It is anticipated that SUE services may not be required or may be provided by DOTD (if available); however, if the project does not have SUE services already performed, SJB has staff ready to deploy to collect underground utility information. SJB will rely on their senior staff and their history of providing DOTD with SUE Services for the last ten (10) years. Brandon Pitre will coordinate with DOTD PM to determine if SUE services are required for the assigned project and which level of SUE services will be required. Karen Kennedy and/or Austin LaCombe will be task leads, and the SUE services will be performed in accordance with Standard 38-22 Standard Guideline for the Investigating and Documenting Existing Utilities. SJB is familiar with DOTD policies and procedures and will conduct all work in accordance with these standards. SJB staff will utilize industry-leading subsurface utility locating equipment, such as ground penetrating radar, air-assisted vacuum excavation, pipe and cable locators, and other nondestructive detection equipment to designate size, type, and depth of utilities. Each piece of equipment has specific benefits, and our experienced staff know which equipment to use in certain situations to designate the size, type and depth of utilities. SJB can provide SUE for all Quality Levels. They also have vast experience in performing utility coordination during design, preconstruction, and construction phases for DOTD projects.

Environmental Permitting | DOTD projects require environmental clearance along with environmental permitting. If DOTD does not already have environmental clearance, Michael Baker team through TJ Holliday (Task Lead) has environmental professionals that can provide necessary field work and preparation of environmental permits and documents. The Michael Baker design team will support the environmental pros on preparing the necessary permit sketches. It is assumed that most of the projects issued by task order would fall under categorical exclusions (CE); however, if there is a need for NEPA clearance, TJ Holliday and Elizabeth Brock would provide this service. Michael Baker has been providing Environmental Clearance documentation for DOTD either through an EA or EIS for the last 20+ years.

Projects will not be allowed to move forward into the Final Design phase until all environmental clearances are completed and approved through DOTD Environmental Section.

Hydraulics / Drainage | Eric Erikson (task lead) and design team will address the hydraulics/hydrology design during early submittals of the preliminary design phase of the projects. Hydraulic/hydrology calculations/methodology will be based on the type of project per task order. The design team will delineate drainage areas or review drainage maps provided by DOTD for existing topographic surveys. The hydraulics team will use DOTD Hydraulics Manual and HYDRWIN software to develop the hydraulic flows based off required design storm frequencies for the required type of drainage feature or structure. If project requires roadway drainage, it is anticipated that most of the hydraulic analysis will be done using HYDRWIN. If the project deals with streams or channels, the hydraulics team will determine if USGS or NRCS method along with building a hydrology model in HEC-RAS to determine the correct size of required drainage structure: a box culvert, cross drain, or bridge. Michael Baker's hydraulic staff has successfully performed hydraulic analysis and scour analysis for the 12 IJA bridges sites in District 07. Additionally, our hydraulics team has developed HEC-RAS Models for the Louisiana Watershed Initiative, which covers a portion of the district boundaries.

Traffic Management Plan | DOTD requires most of their construction projects to have the design teams develop a Traffic Management Plan (TMP). Our team assumes most of the projects

would mainly fall under a Level 1 or Level 2 TMP; however, some projects may require the need for either a Level 3 or Level 4 TMP. Laurence Lambert (MOT Task Lead) and Vectura staff will provide this service for the Michael Baker team. Their staff has many years of experience providing DOTD with the required TMPs especially on complex projects such as the on-going Belle Chasse P3. Vectura will provide TMPs that follow the existing DOTD policy to get approval from DOTD Traffic Engineering Section.

Geotech Services | MBI will utilize Terracon for Geotechnical Services required for task orders that may vary for analysis for bridge foundations, assist DOTD pavement section with determination of pavement thickness and requirements for foundation/bedding for major cross drain crossings. Terracon will rely on their years of experience especially through their current IDIQs providing geotechnical services through DOTD Geotech section.

PRELIMINARY PLANS AND FINAL PLANS

Michael Baker team was selected for its experience with DOTD's project delivery process. **Our team members have developed designs for DOTD projects for many years, following the latest roadway/bridge requirements as set in the minimum design guidelines, roadway and bridge design manuals, EDSMs, hydraulics manual, DOTD standard plans/specifications and other pertinent design manuals/guidelines. Recently DOTD alerted the consultant community that projects let January 1, 2026, will follow the updated 2026 DOTD Standard Specifications. All full size and letter size (pavement preservation) plans will adhere to these specifications and revised standards/special details. Michael Baker team understands this IDIQ is for both traditional and pavement preservation plan development.**

The Michael Baker design team's focus is meeting deadlines for DOTD funding requirements, and we also embrace the latest design technology to expedite project delivery. Our design team will continue to follow the DOTD Electronic Delivery Process and ensure plans have been approved through the CADConform process. As stated earlier and where applicable, and in

coordination with the DOTD PM, we will apply our in-depth knowledge of ORD. By using ORD to expedite project delivery for other neighboring DOTs, our staff has firsthand experience with the benefits of developing plans using this platform. Designing 3D proposed surfaces with Inroads SS2 can be time consuming; in contrast, ORD creates 3D surfaces on alignment intelligence that update instantaneously as changes are made. Having designed roundabouts/ intersection/ roadways with both SS2 and ORD, our staff and our clients can speak to the benefits of seeing

the 3D modeling of the project in real time as changes are made and templates are assigned. All surfaces created through ORD can be saved into a format compatible with Inroads SS2.

QA/QC | Michael Baker will provide our design teams with a QA/QC manual. This manual will be the basis of our team's quality control and quality assurance for each submittal milestone; however, we will supplement this manual with all required DOTD checklists for the different milestones. Each task order will provide a QA/QC manual that aligns with scope of work (Roadway, Bridges, Hydraulics, etc.) Our team will also perform independent technical design reviews at all submittal milestones by team members who are not directly associated with the progression of the project. These reviewers will check the construction plans for accuracy and compare them to the roadway design calculations and design guidelines. Our team will coordinate these reviews with our company document control specialist personnel for record keeping of correspondence between the Michael Baker PM, Brandon Pitre, and the assigned DOTD PM, including DOTD review comments, Michael Baker design team's response to comments, design calculations, and analyses.

STAGE 5: CONSTRUCTION

Once a contractor is awarded the project, the Michael Baker construction support lead, Mary Flynn, and through Michael Baker PM, Brandon Pitre, will assist the DOTD PM in coordination of receiving and documenting Requests for Information (RFIs) and Shop Drawings from the CE&I Field Engineer. Once RFIs and Shop Drawings are logged, Mary Flynn's construction support team will submit the RFI and/or Shop Drawing to the Michael Baker PM, Brandon Pitre, to be distributed to our design team for review and approval regarding conformance to the construction plans, 2026 DOTD Standard Specifications, and DOTD Roadway Design Guidelines. Michael Baker will assist in any RFIs if the contractor needs additional clarification of the intent of the construction plans before they are able to proceed. Responses to RFIs and Shop Drawings will be made in a timely manner as to not incur any additional delays for the contractor which can lead to requests for change orders for additional compensation.

WORK ZONE TRAINING REQUIREMENTS (WZTR) | As an ongoing commitment to work zone safety, it is required by DOTD that consultants providing services have personnel that

deal with traffic control and flagging be certified as Flaggers, Traffic Control Technicians (TCT), Traffic Control Supervisor (TCS) and/or combination of all team members. Michael Baker, Evans-Graves, Vectura, Terracon Consulting, Inc. and SJB key personnel have received this training. As designers, all team members have personnel that have been trained in all three WZTR. Certificates can be provided at request from DOTD.

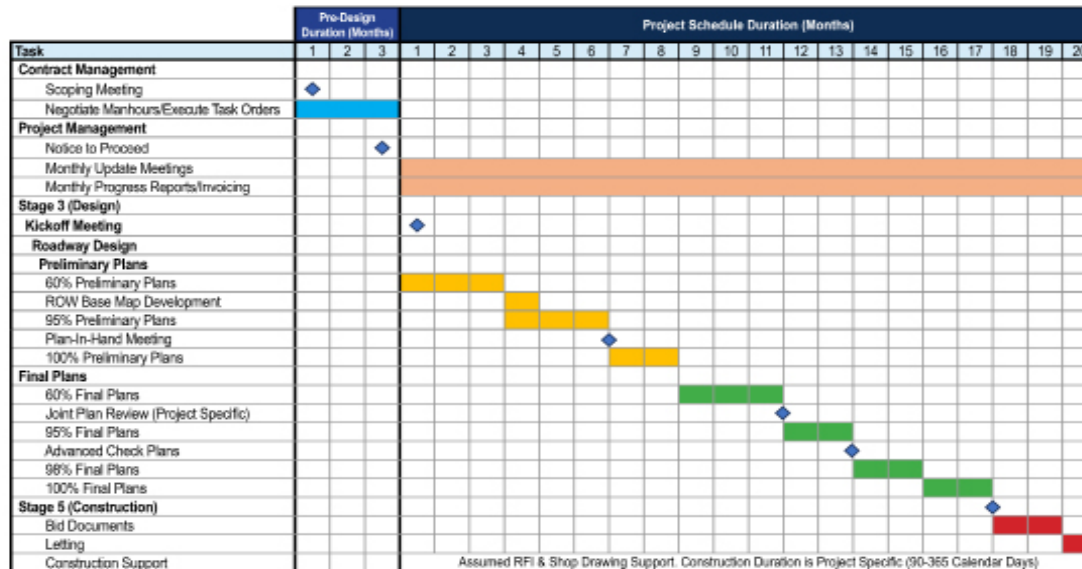

WHY MICHAEL BAKER?

We Understand the Requirements. As demonstrated by our relevant project examples, the Michael Baker team has knowledge and experience with DOTD projects. Our local clients, teaming partners, and office are located within both districts, giving our staff an advantage and accessibility to required task orders.

A Collaborative Approach. Our team has proudly served District 61 along with East Baton Rouge City/Parish government, West Feliciana, Point Coupee, Iberville, and Ascension parishes. We have a proven track record of stakeholder engagements between not only DOTD but the local parishes and municipalities and Project Manager, Brandon Pitre, PE, PTOE, RSP1, and his dynamic team bring essential knowledge and understanding of the organization, operations, policies, and related requirements of the many agencies that will be involved in this contract.

Capacity to Perform the Work. With Michael Baker engineers and support staff across our project team's four Louisiana offices, we have the capacity and resources necessary to effectively accomplish the IDIQ task orders within your required schedule and budget. A PURPOSE-BUILT TEAM. This design task orders will be led by a team of highly skilled local professionals and backed by a robust nationwide team of experience and resources needed to successfully complete any project. Our team is comprised of the most qualified subconsultant firms with proven track records of success completing similar efforts for DOTD. As the prime consultant, MBI will be responsible for managing all aspects of the project and will serve as the single point of contact for DOTD. Along with our subconsultants, E-G, Vectura, Terracon, and SJB, our team has a clear understanding of the scope, along with the multi-tasking capabilities required for successful project completion. Our top-tier firms have a proven reputation for providing excellent support services for our design efforts.

TYPICAL SCHEDULE - Schedule duration shown will vary depending on the type of task order.

Schedule is independent of DOTD Reviews

Assumed RFI & Shop Drawing Support. Construction Duration is Project Specific (90-365 Calendar Days)

Vectura Consulting Services, LLC
Attn: Sheelagh Brin Ferlito
PO Box 14269
Baton Rouge, LA 70898

Dear Sheelagh Brin Ferlito,

The Louisiana Department of Transportation and Development (LADOTD) Compliance Programs Section has received your firm's Disadvantaged Business Enterprise (DBE) and Small Business Element (SBE) Declaration of Eligibility. Based on the information, which you provided, it has been confirmed that your firm continues to meet the eligibility requirements of our program and remains certified for only the following specific work categories that fall under the listed NAICS codes:

- NC488490 – Other Support Activities for Road Transportation
 - C14-Transportation Planning
 - C33-Traffic Counting and Data Collection
 - C74-Construction Management
- NC541330-Engineering Services
 - C09-Engineering Services
 - C96-Traffic and Transportation Engineering
- NC541340-Drafting Services
 - C43-Computer Assisted Drafting

Please note that per the federal regulations, suppliers only receive 60% goal credit towards the materials they provide. Also, note that any contractor performing work in excess of \$50,000 with the exception of electrical, mechanical and plumbing requires A Louisiana Contractor's License, which are required to have a license if work is in excess of \$10,000. You may contact the State Licensing Board for Contractors at (225) 765-2301 for more information. All participants of the Louisiana Unified Certification Program will recognize your firm's certification. This includes all entities receiving federal transportation funding within the boundaries of our state.

You will be required to submit a Declaration of Eligibility with Gross receipts (i.e. all income-related portions of signed federal tax returns, audited financial statements or a CPA's signed attestation of correctness and completeness) stating your firm continues to meet the eligibility requirements of the program. An email informing you to submit the necessary documentation will be forwarded to you approximately six (6) weeks prior to your anniversary date of **June 30, 2026**. However, should you not receive notification from this office for your Declaration of Eligibility, it is your responsibility to contact us. Additionally, you must notify our office immediately regarding any changes, which affect the social and economic disadvantage, size, ownership or control of your firm.

Vectura Consulting Services, LLC

The LADOTD has contracted SJB Group, LLC to provide DBE Supportive Services to all certified DBEs, in the LAUCP, at no cost to you. This consultant can offer your firm assistance and guidance on areas such as marketing, estimating, bidding, financial preparations, etc. Feel free to contact SJB Group, LLC at (225) 769-3400 for any assistance needed to grow your organization.

The Louisiana UCP certifying entity reserves the right to withdraw this certification, if at any time, it is determined that DBE and SBE certifications was knowingly obtained by the submission of false, misleading or incorrect data. The Louisiana UCP certifying entity also reserves the right to request additional information and/or conduct an on-site visit at any time during your certification period.

We are pleased to have you as a participant in the LAUCP and wish you much success.

If you have any questions regarding the content of this letter, contact the LADOTD DBE Certification Unit at (225) 379-1382.

Respectfully,

Paula Roddy
Compliance Programs Director
Enclosure (Certificate)

LOUISIANA UNIFIED CERTIFICATION PROGRAM

Disadvantaged Business Enterprise Program (DBE)

Small Business Element (SBE)

This is to certify that under Title 49, Part 26 of the Code of Federal Regulations & under the State of Louisiana Unified Certification Program (LAUCP)

Vectura Consulting Services, LLC

Is a Certified Disadvantaged Business Enterprise (DBE) & Small Business Element (SBE) in the following specialties:

NC488490, NC541330, NC541340

NOTE: There may be other approved NAICS Codes. The online DBE Directory includes a complete list of approved codes.

Certificate Eligibility: June 2025 to June 2026

This certificate is valid through the above date provided. This firm meets the on-going programmatic standard and fulfills the annual update requirement to remain in good standing as a DBE. This certification is subject to annual verification and suspension or revocation based upon reasonable cause to believe that the firm is ineligible.

Paula Roddy, Compliance Programs Director
Louisiana Department of Transportation & Development
