Contract No. 4400027689
State Project No. H.014681.6
Federal Aid Project No. H014681
Entity Contract for Nine Mile Point Rd: US 90—LA 18
Jefferson Parish

Dear Consultant Selection Committee,

Royal Engineers and Consultants, L.L.C. (Royal) respectfully requests your review and consideration of the enclosed proposal prepared in response to the Department's advertisement for Engineering and Related Services for the Entity Contract for Nine Mile Point Rd: US 90—LA 18. Since 2005, Royal has delivered multi-discipline professional engineering, construction and program management, and resident inspection services for industry, government, and the private sector across the Gulf Coast and is fully licensed, bonded, and insured to do so. Additionally, Royal has provided construction engineering and inspection for complex roadway programs across Louisiana, totaling more than \$500 million.

With offices in Baton Rouge, New Orleans, and Lafayette, staffed with specialists in roadway design and construction, the Royal Team is positioned to mobilize immediately and perform the requested services within the parameters established. We have strategically partnered with G.E.C., Inc. with whom we have a current working relationship. Through our carefully selected team of professionals, we are committed to providing the Department and Jefferson Parish the full suite of construction engineering and inspection services required, and confident we will surpass expectations. Our proposed team meets or exceeds the specified minimum requirements and is organized to meet the needed services described in Attachment A of the advertisement. The Royal Team's statement of qualifications contained herein is submitted in direct response to the referenced advertisement. It highlights our relevant experience and expertise and articulates our unique capabilities to perform needed services promptly and professionally within budget.

Royal has a long history of service in Jefferson Parish, including the current CE&I project US 90Z Harvey Canal Tunnel Rehabilitation (H.010673) in partnership with G.E.C., Inc.

We appreciate the opportunity to respond and look forward to working with the DOTD and Jefferson Parish. Please direct communication to our Primary Point of Contact, Michael Pugh, by phone at (504) 283-9400 or via email at mpugh@royalengineering.net.

Sincerely,

Michael Pugh, P.E., President

Royal Engineers and Consultants, LLC

DOTD FORM: 24-102

PROPOSAL TO PROVIDE CONSULTANT SERVICES

(Revised January 1, 2023)

Prime consultant shall complete the DOTD Form 24-102 without altering the Form's text; however, the instruction and/or guidance for Sections 12 through 23 can be removed but do not remove Section title and number.

ANY CONSULTANT FAILING TO SUBMIT ANY OF THE INFORMATION REQUIRED ON THE DOTD FORM 24-102, OR PROVIDING INACCURATE INFORMATION ON THE DOTD FORM 24-102, MAY BE CONSIDERED NON-RESPONSIVE.

1.	Contract Name as shown in the advertisement	Entity Contract for Nine Mile Point Rd: US 90—LA 18
2.	Contract Number(s) as shown in the advertisement	4400027689
3.	State Project Number(s), if shown in the advertisement	H.014681.6
4.	Prime consultant name (name must match as registered with the Louisiana Secretary of State where such registration is required by law)	Royal Engineers and Consultants, L.L.C.
5.	Prime consultant license number (as registered with the Louisiana Professional Engineering and Land Surveying Board (LAPELS) if registration is required under Louisiana law)	EF.0003328
6.	Prime consultant mailing address	1501 Religious Street New Orleans, LA 70130
7.	Prime consultant physical address (existing or to be established, if location is used as an evaluation criteria)	1501 Religious Street New Orleans, LA 70130
8.	Name, title, phone number, and email address of prime consultant's contract point of contact	Michael Pugh, P.E., President 504-283-9400 mpugh@royalengineering.net
9.	Name, title, phone number, and email address of the official with signing authority for this proposal	Michael Pugh, P.E., President 504-283-9400 mpugh@royalengineering.net

Prime consultant should enter the firm name in the footer at the bottom of this page. (It will carry over to subsequent pages.)

Signature above shall be the same person listed in Section 9:

Date: October 12, 2023

11. If a Disadvantaged Business Enterprise (DBE) goal has been set for this
advertisement, indicate which firm(s) will be used to meet the DBE goal
and each firm(s)' percentage.

Firm(s): N/A Firm(s)' %: N/A

12. Past Performance Evaluation Discipline Table:

As indicated in the advertisement, insert the completed table here. The percentages for the prime and sub-consultants must total 100% for each past performance evaluation discipline, as well as the overall total percent of the contract.

The **only** past performance evaluation disciplines to be used are: Road, Bridge, Traffic, CE&I/OV, Geotech, Survey, Environmental, Data Collection, Planning, Right-of-Way, CPM, ITS, Appraiser and Other (please specify).

Past Performance Evaluation Discipline(s)	% of Overall Contract	Royal Engineers and Consultants, L.L.C.	G.E.C., Inc.			Each Discipline must total to 100%
CE&I/OV	100%	85%	15%			100%
Identify the percentage of work for the overall contract to be performed by the prime consultant and each sub-consultant.						
Percent of Contract	100%	85%	15%			100%

13. Firm Size:

For all firms that are part of this team, indicate the approximate number of personnel to be committed to this contract, by DOTD Job Classification and the total number of personnel within the firm that could provide support, if needed. If a specialized job classification is required and not included on the DOTD job classification list, specify "Other (please specify)" and include the classification title inside the parentheses.

The DOTD Job Classification(s) to be used can be found at the following link:

28 years of experience	Mr. Pugh has over 28 years of experience in the design of roadway plans and the construction management of roadway and drainage systems. He managed the St. Bernard Parish Roadway Restoration Program which has included the design, bidding, and construction management of 178 roadways with a construction value of nearly \$60M. He is a Registered Professional Engineer in eight states, including Louisiana.				
06/18 - 06/19	Citywide Construction Administration and Resident Inspection Services for Sewerage and Water Board of New Orleans and City of New Orleans DPW Cooperative Agreement – New Orleans, LA Principal in Charge of the team contracted to provide construction management and inspection services for annual maintenance contractors in five (5) maintenance zones, performing repair and restoration of pavement and associated infrastructure, including utility repair and replacement (water, sewer & drainage), sidewalks, ADA-Compliant Ramps, as well as replacement and repair to associated infrastructure., with a monthly total of 30-35 sites per maintenance zone. Responsibilities included team mobilization, including serving as principal engineer.				
11/19 - Ongoing	City of New Orleans Roadway Restoration Program CM and Inspection – New Orleans, LA Principal Engineer on the Royal team contracted by the Department of Public Works (DPW) to provide construction management and resident inspection services for the City of New Orleans Roadway Restoration Program CM and Inspection. This project includes restoration of parish concrete and asphalt roadways and associated infrastructure (i.e., sidewalks, driveways, drainage, sewer, and water) that suffered damage during Hurricane Katrina. Construction services are being performed by multiple contractors under contract by DPW and overseen by Royal. Royal is providing all construction management, data management, reporting, platform deployment, quality assurance, administration, pay applications, resident inspection, and closeout services.				
02/15 - Ongoing	St. Bernard Parish Gove Principal Engineer on tea administration, resident included project governa	rnment Pre-Cas am contracted f inspection, tecl ance, subject ma	t Con-Span Canal Crossings Engineering and CM Services — Sor civil engineering, design, surveying, geotechnical, field layon nical/engineering project close-out, construction managementater expert for design input, and team mobilization for the rathe existing hydraulic capacity of the canal.	St. Bernard, LA out, bidding, construction ent (CM) services. Responsibilities	

03/17 - 05/19	Lafayette Regional Airport, Taxiway F Phase III Enabling Project – Lafayette, LA Civil Engineering Subject Matter Expert on team providing construction management services for the Taxiway Foxtrot Phase III construction project located at the Lafayette Regional Airport which includes the creation of a parallel taxiway for Runway 4L-22R and a connector taxilane to extend Taxilane A to provide access to the new terminal. Responsibilities included performing a project constructability review.
09/19 - 03/20	MaxPave Roadway Program: PM/CM of Utility Rehabilitation – New Orleans, LA Principal Engineer responsible for interagency coordination, project management, contract administration, construction management, assessment, and resident inspection services for the CNO DPW and SWBNO combined utility rehabilitation initiative. The project involves 50 to 75 service cuts weekly to conduct the needed point repairs to the sewer and water infrastructure. Completed on-time and on-budget, Mr. Pugh's primary duties included client service management and civil engineering and utility impacts subject matter expertise.
12/10 - 01/17	Regional Transit Authority Streetcar Expansion Program – Construction Management Plus Principal-in-Charge for this streetcar expansion program, where Royal provided construction management and inspection services, document administration, and change order management. Services also included estimating and review of potential change orders and monitoring differing site conditions encountered during construction. The project consists of 14,400 track feet of continuously welded rail, installation of the half grand union at Canal and N. Rampart, an embedded double cross over at Frenchman & Elysian Fields, refurbishment of over 40 historic light poles to include LED bulbs, overhead catenary system installation, installation of traction powered substation, utility relocation and upgrades, and road milling and repaving. Mr. Pugh's team observed demolition, excavation, utility re- location, concrete, asphalt, earthwork, and track-work to ensure compliance with drawings and specifications.
11/10 - 08/11	Bloski Avenue Extension – Belle Chasse, LA Principal Engineer for this road construction project. Royal worked directly for the Naval Facilities Engineering Command Southeast as the prime contractor. This project consisted of the construction of a 1,300-foot asphalt roadway and included the construction of stormwater drainage, sidewalks, concrete driveways, and solar street lighting. Through value engineering efforts, Mr. Pugh reduced NAVFAC's cost by \$800K and reduced the project schedule by 50 days. Royal was also responsible for the development and maintenance of the Stormwater Pollution Prevention Plan (SWPPP), Environmental Protection Plan (EPP), Health & Safety Plan (HASP), and Accident Prevention Plan (APP).
03/07 - 10/09	Roadway Restoration Project – St. Bernard Parish, LA Lead Design Engineer and Project Principal responsible for engineering, roadway plans/design, and construction management services for the restoration of all concrete and asphalt roadways, including associated infrastructure, including sidewalks, driveways, drainage, sewer, and water systems, that suffered damage during Hurricane Katrina and the recovery process. Mr. Pugh was the engineer in responsible charge for all design and served as the primary technical resource for contractor questions and challenges encountered during construction.
01/98 - 08/00	DOTD: Off System Bridge Program – Iberia Parish, LA Mr. Pugh was responsible for maintaining and supervising all Iberia Parish's Off-System Bridge Program projects. This project included intermediate inspection of bridges, recommendations for repairs, supervised repair work, coordination with DOTD and Parish officials, and maintenance of detailed bridge files.

7 years of experience		Ms. Foreman has 7 years of experience in civil engineering design and construction management on project types including storm drainage systems, asphalt and concrete road design, sidewalks, potable water distribution systems, gravity sewer systems, flood control structures, commercial and residential site design, foundation design, and retaining walls. Her expertise includes familiarity with DOTD design manuals and specifications, ADA requirements, and AASHTO standards and the use of various software packages for H and H design and analysis such as HEC-HMS, HEC-RAS, DOTD HYDR programs, HY8, and Autodesk Storm and Sanitary Analysis. Ms. Foreman has significant experience preparing plans and specifications to in accordance with DOTD standards. Certifications: Traffic Control Supervisor and Traffic Control Technician				
06/23-Ongo	oing	H.015018.5 Entity Contract for Lafayette Parish Non-State Pvmt Markings Project Manager for providing construction contract administration and construction engineering inspection services for the construction related to the nearly 14 miles of restriping of Cajundome Boulevard, East Pinhook Road/Teurilngs Avenue, Kaliste Saloom Road, Mudd Avenue, and Gendarme Road, in Lafayette Parish.				
05/2023 - Ongoing		H.015009 W. Metairie Avenue Over S. Suburban Canal Off System Bridge – Jefferson Parish, LA Project Manager for DOTD Off-System Bridge (OSBR) replacement of an existing slab span bridge located in an urban area of Jefferson Parish. Ms. Foreman's responsibilities include managing all aspects of design and client relations, overseeing plan production in accordance with the Off-System Highway Bridge Program Guidelines, leading the hydraulic analysis and design for all viable alternatives for the bridge replacement in accordance with the DOTD Hydraulics Manual, and coordinating survey efforts. Services provided by Royal include topographic and boundary survey, preliminary plan production, right-of-way agreements and sketches, and environmental services including solicitation of views, categorical exclusion clearance, wetland studies, and other information needed for the Environmental Clearance process.				
08/15 - 01/22		project involving install pedestrian bridges cros interconnectivity of ped	r on team provid ation of RCP dra sing waterways destrian travel. F ration, and engil	ding engineering design and engineering services during cor inage piping within the existing roadside ditches; a 6' wide on on the south side of Iberia St. from School St. to Sugar Mill Responsibilities included design support; performing routing neering support during construction, including utility coordi	concrete sidewalk, inc Pond Subdivision allov e site visits; providing	luding two wing for greater construction

12/17 - 02/22	Civil/Hydraulic Engineer on team providing engineering services to the LCG for the design of a dedicated right-turn lane and second left-turn lane at the intersection of Camellia Boulevard and Settlers Trace Boulevard. Services include preparing plans and specifications for project construction, performing engineering design and analyses for the widening of the concrete roadway, evaluation of the existing drainage infrastructure, and identifying required modifications to the existing drainage system. Responsibilities included design support; performing routine site visits; providing construction management/ administration, and engineering support during construction, including utility coordination, surveyor coordination; schedule coordination with contractor; facilitation set of on-site job shack; client coordination; lab testing coordination; coordination of traffic control operations and compliance with traffic control plan, and overseeing resident inspection services throughout construction.
08/15 - 11/21	Polly Lane Extension – Lafayette, LA Civil/Hydraulic Engineer responsible for performing engineering design services and construction management for the extension and connection of both existing dead-end streets of Polly Lane, inclusive of roadway reconstruction and widening to its existing section at Verot School Road. The approximate length of the new roadway is 1,080 linear feet and the length of improvements to existing roadway is 930 linear feet. The roadway extension/connection consists of a 2-lane asphaltic concrete roadway, a 32 ft diameter reinforced Class A concrete roundabout, curb and gutter and subsurface drainage, a concrete box culvert over Issac Verot Coulee Lateral 7, sidewalks, and lighting. As Engineer Intern, Ms. Foreman was responsible for performing engineering analyses for design of the storm drainage system, preparation of and revisions to construction documents, performing routine site visits, providing construction management/administration, and engineering support during construction, and overseeing resident inspection services throughout construction. As Project Manager, Ms. Foreman was responsible for invoicing, deliverables, scheduling, resourcing, and client coordination.
06/15 - 06/17	Détente Road Rehabilitation – Youngsville, LA Engineer Intern on team providing design, bidding and construction management services for the rehabilitation of Détente Road, consisting of mill & overlay of asphaltic pavement including asphaltic pavement patching. Responsibilities included coordination of testing laboratory requirements and support with change orders and work change directives related to additional locations.
02/15 - Ongoing	Missouri Street at Corinne Canal – St. Bernard Parish, LA Civil/Hydraulic Engineer on the Royal team contracted by St. Bernard Parish Government (SBPG) to provide Engineering Services for repairs, restorations and/or replacement of Parish owned roadway and bridges to their Pre-Katrina condition while preserving the historical value and intent of each facility and Engineering Services for replacement of 6 existing culverts with precast Con-Span structures. PW 19332, Missouri @ Corrine Bridge consisted of a Hazard Mitigation project to replace the preexisting two – 60" corrugated metal pipe culverts with a 26'-0" wide 72'-0" long clear span, precast concrete structure. Ms. Foreman was responsible for hydraulic analysis, site layout and grading, foundation design, wingwall design, and coordinating development of plans. During construction, responsibilities include submittal reviews (pile loads and con-span wingwall).
08/19 - 01/20	Roadway Repairs – St. Gabriel, LA Engineer Intern on team providing engineering design and engineering services during construction to mill and overlay four roadways including associated work to drive aprons and reconstruct one roadway including pavement removal, general excavation, soil cement, class II base course, asphaltic concrete pavement and associated work to drive aprons. Responsibilities included bid tabulation and recommendation for award.

			Design Guide, AISC Steel Construction Manual, ACI 318-11 I				
	Structural Concrete, LAI						

06/12 - 07/17	In-Depth Bridge Inspection of Complex Structures – St. Landry Parish, LA As an Engineering Intern, Mr. Fontenot performed in-depth inspection of the deck, superstructure, and substructure of the approach spans on the Krotz Springs Bridge over the Atchafalaya River. In this role, Mr. Fontenot also coordinated meetings between the inspectors; coordinated equipment rentals and staffed personnel; performed bridge inspections; and provided assessment report of bridges including potential repair plans. Codes used included: PONTIS Inspection Manual.
06/12 - 07/17	H.003182 Inner Harbor Canal Bridge Rehabilitation – Algiers, LA As an Engineering Intern, Mr. Fontenot designed traffic control and signage including detour plans and assisted in quantity checks and details for Final Plans Tasks performed included: used as-built plans and CAD software to layout and design traffic control options and detour paths for temporary lane closure during construction efforts; applied LADOTD Standards for Traffic Management and Signage; and refined and checked rehabilitation details and plans for final submittal. Codes used included: MUTCD, LADOTD Traffic Control Standard Plans, AISC Steel Construction Manual, and ACI 318-11 Building Code Requirements for Structural Concrete.
	I-10 Lake Pontchartrain Bridge Deck Patching & Girder Painting – New Orleans, LA
06/12-07/18	As an Engineering Intern, Mr. Fontenot performed field inspection of all bridges. Created Assessment Report. Designed traffic control and detour plans. Wrote TMP for final submittal. Prepared plans and details for repairs. Tasks performed included: planned for inspection and quantification of bridge deficiencies by preparing traffic control plans and reviewing previous inspection reports; used CAD software to develop detour plans and a TMP for the state's review; performed field inspection; compiled data from the field inspection to create an assessment report; and used as-built plans and current state standards to prepare and detail suggested repairs. Codes used included: MUTCD, LADOTD Traffic Control Standard Plans, AISC Steel Construction Manual, ACI 318-11 Building Code Requirements for Structural Concrete, AASHTO LRFD Bridge Design Specifications, and LADOTD Bridge Design Manual. Yscloskey Vertical Lift Bridge Painting – St. Bernard Parish, LA As a Licensed Engineer, Mr. Fontenot assisted with design and details for a paint containment system, survey and geometric site layout
10/16 - 08/17	of the new operator house foundation, and phasing plans for different construction activities. Tasks Performed included: Site survey and layout using total station and automatic level, designed and detailed support system for paint containment, and coordination of roadway and water-fairing traffic to optimize productivity during construction activities. Codes used included: AISC Steel Construction Manual, ACI 318-11 Building Code Requirements for Structural Concrete, DOTD Bridge Design Manual
12/15 – 07/16	Luling Bridge Deck Overlay and Repairs – St. Charles Parish, LA As an Engineer Intern, Mr. Fontenot revised original traffic control plans and diversion crossovers to expedite construction sequencing and feasibility. Updated drainage plan to match revised traffic control. Tasks Performed: geometric Design of Diversion Crossovers, hydraulic analysis of watershed area for new and existing drainage design, traffic control layout and phasing plans throughout the project, assisted construction efforts in the field using survey data and design plans, design of debris screen for sandblasting operations near adjacent traffic, quality control of final plans, quantification of cut/fill and roadway elements for cost estimates. Codes Used: AASHTO Roadside Design Guide, AISC Steel Construction Manual, ACI 318-11 Building Code Requirements for Structural Concrete, MUTCD, DOTD Traffic Control Standard Plans, AASHTO Guide Design Specifications for Bridge Temporary Works, DOTD Hydraulics Manual

RR004 Bayou St John

As part of a construction administration and resident inspection contract with the City of New Orleans Department of Public Works, Royal provided construction management services for the construction of \$23M FEMA-funded roadway improvements, one of the largest in the City. The project area covers 110 city blocks and construction is estimated to include 29,000 square yards (SY) of asphalt, 18,000 SY of concrete, and will require replacement of roadway pavement, water lines, sewer lines, and drainage. The work also includes modifications to improve consumer mobility as it relates to the Americans with Disabilities Act (ADA).

10/19-Ongoing

Tasked with Construction Administration, Resident Inspection, and Overall Construction Management, Royal is providing field management of the contractor and all construction activities, including conducting progress meetings, resolving resident issues, reviewing and approval of monthly pay estimates, field adjustments and applying knowledge and experience in civil construction to ensure the project remains on schedule and budget. Responsibilities include monitoring construction activities to determine and document the progress of the project and compliance with the construction contract, the City's standards and policies, and with an emphasis on site safety, the timely review of submittals, shop drawings, samples, substitute materials, value engineering proposals, the timely rejection of all non-conforming work and materials, the application of work forces to particular portions of the work, the conformance of the work to the construction contractor's schedule, the timely execution of the work, and conducting required interviews of the Construction Contractor. As Royal's resident inspector, Mr. Dunn documents all construction activities and material quantities in-place as well as assisting in the evaluation of the construction contractor payment requests. He also monitors, tests, and maintains, records for all quality testing, submits daily inspection reports, and observes the jobsite safety program.

	Mr. Monfrey provided construction inspection for the construction of 0.648 miles of roadway which includes 20,516 SY of Portland
	Cement Concrete Pavement with barrier curb, mountable curb and gutter. This project included Class II base course, drainage pipes and
04/19 - 06/20	structures, sanitary sewer and related work, and tie-in to the existing Westbank Expressway on the north end and Lapalco Blvd. on the
	south end. Mr. Monfrey's responsibilities included maintaining all construction field records; making daily entries in the project diary to
	indicate the contractor's personnel and equipment being utilized on the project, the work being accepted, and the acceptability of
	traffic control; and the charging of contract time.
	DOTD SP No. H007271.6: Canal Boulevard (Allen Toussaint Boulevard– Amethyst) (CE&I)
	Mr. Monfrey provided construction inspection to reconstruct an existing four (4) lane divided boulevard. This project included grading,
	drainage structures, milling asphalt pavement, pavement patching, Class II base course, scarifying and compacting roadbed, asphalt
10/18 - 03/20	concrete pavement, Portland Cement Concrete Pavement, cofferdams, stormwater pumping station, pavement striping, sign and
10/10 03/20	legends and symbols. Mr. Monfrey's responsibilities on this project included responding to RFIs, performing periodic site visits,
	considering and negotiating change orders, performing substantial completion inspections, and quickly responding to limit the effect of
	often encountered unforeseen site conditions. The entire construction contract administration and construction engineering and
	inspection for this project was managed through LaDOTD Site Manager.
	Lake Pontchartrain Causeway Bascule Control System Replacement, GNOEC, St. Tammany and Jefferson Parishes, LA
01/11 - 12/15	Mr. Monfrey was the Mechanical Inspector for this project: This project consisted of designing a replacement control system to allow
01/11 12/15	operator control of the bascule bridge system at the North Channel of the Lake Pontchartrain Causeway. Mr. Monfrey performed an
	inspection of the control system to make sure it retained all mechanical interlocks as well as operating procedural interlocks.
	DOTD Bridge Inspections District-wide, LA
06/95 - 08/06	Mr. Monfrey was the lead inspector who supervised a team of inspectors performing the inspection of bridge substructures (piers,
	columns, etc.), superstructure (girders, trusses, etc.) and decking (roadway surface, bridge rails, etc.) and repair and/or replace bridges
	for all fixed and moveable bridges (On & Off Systems) for the entire District 02 area in Louisiana.
10/07 - 02/13	DOTD SP NOS., 006-01-0012, 003-01-0018, 006-01-0021, 006-01-0022: Huey P. Long Bridge Widening, Jefferson Parish, LA
	Mr. Monfrey was a Senior Bridge Inspector assigned to the Huey P. Long Bridge widening projects. He supervised the inspection of
	structural steel erection and bolting, structural concrete construction, embankment and base course construction, concrete paving,
	and asphaltic concrete paving.

		throughout the city while documenting all findings for DPW.				

08/17-08/19	Emergency Catch Basin Cleaning and Repair, New Orleans, LA Project Inspector on the Royal team for the City of New Orleans Department of Public Works (DPW) Emergency Catch Basin Cleaning and Repair Program. Royal provided over 50 inspectors with supporting construction administration personnel to clean more than 15,000 catch basins in 120 calendar days within the City of New Orleans. Mr. Junker performed inspections and condition assessments of catch basin cleaning and repairs and completed all associated documentation of findings. Resident Inspection services included resident construction inspection and oversight. The resident inspection was required at all locations under construction and at all times the contractor was working on critical work items (i.e. pay items, inspect and appropriately track eligible work, ensure work does not adversely affect adjacent areas and/or property, etc.).
05/16-05/19	MaxPave Roadway Program, New Orleans, LA Project Inspector on the Royal team responsible for performing resident inspection services for the CNO DPW and SWBNO combined utility rehabilitation initiative, which involved 50 to 75 service cuts weekly to conduct the needed point repairs to the sewer and water infrastructure. Responsibilities included observation of all construction activities for critical work items; preparation of daily field reports; collection and organization of photographic evidence of documenting work progress; preparing detailed reports; documentation of unforeseen items encountered during construction and corresponding coordination with DPW for these items.
2/10-08/12	Roadway Restoration Program, St. Bernard Parish, LA Project Inspector, Paul Junker, was responsible for oversight of construction contractors, inspection of the construction process and finished product, comparison of the work product to project drawings and specifications, schedule compliance, and site safety. This project included restoration of parish concrete and asphalt roadways and associated infrastructure (i.e. sidewalks, driveways, drainage, sewer, and water) that suffered damage during Hurricane Katrina. Approximately 50 miles of roadway were replaced according to state and federal standards.

As a subconsultant to G.E.C., Inc. Royal is providing construction engineering and inspection services for the complete rehabilitation of the Harvey Canal Tunnel and its approaches along US 90Z in Jefferson Parish. The rehabilitation includes new tile lining, drainage pumps, pavement, electrical and ventilation systems.

It was built in 1957 to go underneath the Harvey Canal on Old Business US 90. The tunnel has a length of 1,079 feet and four traffic lanes and was in critical need of rehabilitation.

Royal assists with construction field records and maintaining the project diary. Resident inspectors check the contractor's construction operations to ensure that all work is performed in accordance

with the plans and specifications and using approved materials.

Royal maintains records of the construction operations, prepares monthly pay estimates, and makes monthly progress reports in conformance with DOTD requirements.

in accordance with DOTD's Standards and Procedures, Royal is providing construction contract administration and construction engineering inspection services for the construction related to the restriping of Cajundome Boulevard, East Pinhook Road/Teurilngs Avenue, Kaliste Saloom Road, Mudd Avenue, and Gendarme Road, in Lafayette Parish.

Royal hosted the preconstruction meeting for the 13.8-mile-long project and assisted DOTD with its public notices for the start of the project. Post preconstruction meeting Royal ensured the proper material submittals were received from the contractor and reviewed in a timely manner. During construction Royal provides onsite full-time resident inspection uploading reports into the department's Headlight and Sitemanager software. As this project progresses Royal manages the pay estimates, change orders, field issues, and correspondence with all project members.

Royal personnel ensures that work is performed according to DOTD plans and specifications and provides progress reports to the DOTD based on daily inspections. After the project, Royal will prepare the 2059 and other required turn-documents.

Royal provided Construction Administration and Resident Inspection Services to rehabilitate the Magnolia Bridge which crosses Bayou St. John at Harding Drive in Orleans Parish. The project was funded by LaDOTD, Regional Planning Commission, and City bond funds and consisted of grading, class II base course, asphalt removal and replacement, steel rehabilitation (cleaning & painting), sheet pile installation, bridge deck replacement, incidental concrete paving and concrete walks, concrete wall repair, and associated work to construct the project according to construction documents. Royal provided construction management (CM) and resident inspection, quality assurance, administration, review of pay applications and closeout services. Staff included on-site and back-office support personnel including qualified Construction Managers and Resident Inspectors.

Back office services included: general CM & administration activities, document control, facilitation of preconstruction conference, bid review/ award recommendations, work order basis, generation of details and quantities and management of work order process, review of pay applications and recommendations for payment, review proposed change orders for scope and cost reasonableness, prepare contract change orders, issue necessary interpretations and clarifications of the contract documents, evaluate and determine acceptability of substitute or "or-equal" materials and equipment, recommend substantial completion and prepare substantial completion documentation, prepare/submit record drawings, assist with claims and disputes arising from construction, obtain warranty documentations and conduct warranty period

Field services included assistance with technical issues arising during construction, assistance in coordination with utilities for relocations, facilitation of progress meetings, preparation of agendas and minutes, monitoring and tracking of construction progress, recommendations of work to be rejected while in progress if not in accordance with contract, collection of field measurements for estimated pay item quantities, preliminary and final walk-throughs, and preparation of punch list.

Resident inspection services included: observation of construction at all times the contractor worked on critical work items; inspection, measurement and tracking of work completed for pay requests; observation of utility impacts; observation of adjacent areas and/or property impacts; preparation of daily field reports; photograph and/or documentation of work progress; coordination with A/E, DPW, and LaDOTD on unforeseen items encountered during construction; coordinate with and monitor work performed by the materials testing agency, utilities, and other on-site visitors; preparation documentation required for field changes; verification of contractor providing adequate traffic control and site safety procedures, and preparation of incident reports.

Royal provided professional engineering design services for the extension and connection of both existing dead-end streets of Polly Lane to provide connectivity

for vehicular and pedestrian traffic across Issac Verot Coulee. The scope of work also included roadway reconstruction and widening of the existing roadway south of Gathright Street to its existing section at Verot School Road and installation of sidewalks on both sides of the road along the entire length of the project. The approximate length of the new roadway is 1,080 linear feet and the length of improvements to existing roadway is 930 linear feet. The roadway extension/ connection consists of a 2-lane asphaltic concrete roadway, concrete sidewalks, subsurface drainage, traffic circle, concrete box culvert in Issac Verot Coulee Lateral 7, articulating block matting for scour protection, ADA ramps, and street lighting. The project also involved installation of a new 8" water main and water and sewer service line adjustments and relocations.

Royal's design phase services included topographical and boundary surveying, all preliminary and final plans, preparation of all necessary right-of-way maps/plats and other governmental staking and inspection authorized on an as-need basis by owner, opinions of probable construction cost, design calculations, utility coordination, site condition assessment and surveying, permitting, and preparation of technical specifications and bid documents. The road was designed in accordance with LCG guidelines and other industry and state standards such as the AASHTO Greenbook and the LADOTD Road Design Manual. The sidewalks were designed in accordance with all LCG standard plans and ADA requirements, and the hydraulic design was in accordance with the 2011 LADOTD Hydraulics Manual. Following the completion of

Preliminary design plans, Royal determined the required extent of right-of-way to construct the new roadway and sidewalks and coordinated with TBS to perform a boundary survey and prepare right-of-way maps, which were provided to LCG to facilitate the acquisition of the required right-of-way. Prior to finalizing and stamping construction plans, Royal produced 95% Advanced Check Prints for review by LCG and relevant utility companies for a final, detailed review of the project.

Construction phase services included pre-construction coordination, contractor submittal review and tracking, shop drawing review and approval, RFI management, on-site progress meetings, construction monitoring, engineering during construction, preliminary and final walk-through, punch list, substantial completion coordination, completion of record drawings and contractor pay request coordination. Royal also provided resident inspection services.

Design and construction of the project were divided into several phases to expedite the construction of the road and provide access to a newly built apartment complex. Phase 1 of the project was completed in July 2019, and construction of Phase 2 was completed in November 2021.

DPW's Westbank Multiuse Path included pavement restoration, utility repair, and replacement (drainage only), sidewalks, ADA- ADA-compliant ramps, and replacement and repair to associated infrastructure. This project was more complex in nature than routine maintenance work, and were single site work orders that are larger in volume than routine maintenance sites. Lawrence Street between Sumner St. - Shirley Dr./Dead End is a two-lane asphalt-surfaced road through a residential neighborhood in New Orleans West Bank. The work consisted of patching, milling and overlaying as well as installing ADA-compliant ramps. All work was successfully completed in accordance with DPW Standard Plans and Specifications. Royal provided construction management, resident inspection, quality assurance, administration, pay applications and closeout services. Staff included on-site and back-office support personnel.

Back Office Services included general vonstruction management snf sdministration sctivities, focument vontrol functions, conducting pre-construction conference, bid review/award recommendation work order basis, platform development and maintenance, developing and producing dashboards and reports, generating details and quantities and managing workd order processes, reviewing pay

applications and recommend payment, review of proposed change orders for scope and cost reasonableness, preparing contract change orders, issueing necessary clarifications of the contract documents, evaluating of substitute or "or-equal" materials and equipment, recommending substantial completion, and preparing substantial completion documentation, preparing/submitting record drawings, assisting with claims/disputes, obtaining warranty documentations, conducting warranty period inspection, preparing and submitting any required permits not the responsibility of the contractor to obtain, reviewing contractor requests, and reviewing and tracking material submittals.

Field Services included assisting with technical issues arising during construction, assisting in coordination with utilities for relocations, conducting progress meetings (bi-weekly), preparing agendas and minutes, monitoring and tracking construction progress, recommending work be rejected while in progress if not in accordance with the contract, obtaining field measurements for estimated pay item quantities, conducting preliminary and final walk-throughs, and preparing punch lists.

Resident Inspection Services included observing construction at all times the contractor is working on critical work items, inspecting, measuring and appropriately tracking (eligible) work completed for pay requests, and ensuring work does not adversely affect utilities, adjacent areas and/or property, etc., preparing daily field reports, and/or field books, documenting work progress, documenting and coordinating with A/E & DPW for unforeseen items encountered during construction, coordinating with and monitor work performed by the material testing agency, utilities, and other on-site visitors as required, preparing memorandums or documentation required for field changes, verifying contractor providing adequate traffic control and site safety procedures, and prepare incident reports

Services completed by this firm (mm/yy) Ongoing Co			Cost of cons	ultant services	s provided by thi	is firm	(\$1,000's)	\$800 Annually	

The project began in 1990 and GEC has been the prime consulting engineer, responsible for construction inspection for all City of Baton Rouge Street Improvements, since 1991. The City passed a renewal of the Sales Tax Street and Road Rehabilitation Program which extended the roadway improvement program for an additional five years with GEC remaining the prime consultant providing inspection services. The contract calls for GEC to provide one project engineer, one senior chief inspector, and two chief inspectors. These inspectors must be certified by LADOTD in both asphalt and concrete construction. In addition, GEC provides between five and six inspectors certified by LADOTD in Asphaltic Concrete Paving, Portland Cement Concrete Paving, or Embankment and Base Course construction. Some are certified in more than one category.

GEC's ability to efficiently collaborate with the City-Parish Program Manager & contractors accelerated twenty-three (23) Program projects, reducing contract time by 404 days.

Construction engineering services include:

- Conducting a pre-construction conference.
- Assist in assessment and development of annual program projects.
- Providing full time inspection by certified inspectors and weekly progress reports.
- Administration of multiple contractors.
- Review and approval of pay estimates.
- Issuing work directives.
- Daily meetings with Program Director and Field Coordinator.
- Prepare a pre-final punch list.
- Conduct final inspection and project closeout.
- Conduct one-year warranty inspection.
- Coordinate and oversee field and plant inspection services by subconsultants.

The Greater New Orleans Expressway Commission (GNOEC) is responsible for operating and maintaining three approach roads on the north shore of Lake Pontchartrain in St. Tammany Parish. The North Approach Road (approximately 1.55 miles in length) connects US 190 and I-12 with the Causeway. The West Approach (approximately 1.95 miles in length) connects LA 22 with the North Approach Road. The East Approach Road (approximately 1.15 miles in length) connects North Approach Road to US 190. All three approaches are four-lane divided facilities and are maintained by GNOEC. GEC designed the rehabilitation of both the East and the West Approach Roads.

GEC's design provided for the removal and replacement of two inches of the existing asphaltic concrete overlay, patching of the Portland Cement Concrete pavement as needed, replacement of the curb in the median as needed, replacement of the striping and pavement markers and any symbols and legends, etc. GEC also designed additional turn lanes and merge lanes where needed. GEC's design of the West Approach included a bike path crossing, relocation of roadway lighting, installation of safety end treatments on existing cross/ side drains, and cleaning of existing drainage system. With daily commuter traffic to and from the Lake Pontchartrain Causeway and the number of schools on the approach roads, maintenance of traffic was very important. Construction was scheduled and sequenced to minimize interruption to the flow of traffic. GEC provided all construction management and resident inspection throughout construction of the two

Key Personnel: Brian Buckel, Traci Billiot

projects.

GEC designed improved drainage, new approach roads, and upgrades to two bridges to meet current standards with increased lifespan. For the project, part of a \$30M Bond Package, GEC completed preliminary and final plans with LRFR as-designed bridge rating for two (2) bridge sites in accordance with the LADOTD Bridge Design and Evaluation Manual on the I-10 Service Rd. in Slidell, Louisiana – one at Reine Canal and one at French Branch.

GEC was responsible for the vertical alignment, proposed length of the bridges, placement of the new bridges, and guardrail design. GEC staff also designed the

new roadway approaches to the new bridge and calculated quantities and estimated construction costs. GEC designed the mill and overlay of the entire roadway, along with calculating the associated quantities. This project included a level 2 Transportation Management Plan (TMP).

In addition, GEC performed a hydrologic and hydraulic analysis, including viable drainage alternates for the site. The design was in compliance with the LADOTD Hydraulics Manual as modified by the LADOTD's Hydraulics Guidelines for Off-System Bridges.

GEC provided all environmental and permitting services for Wetland permits (404 and Nationwide) and Section 10 permits from USACE, in addition to a Coastal Use Permit from the Louisiana Department of Natural Resources.

The USACE New Orleans District approved a preliminary Jurisdictional Determination.

GEC provided construction engineering and inspection services to reconstruct the approach slabs, drainage improvements, and milling and overlay for the roadway between the structures. Construction was completed in summer 2021.

Key Personnel: Brian Buckel, Traci Billiot

18. Approach and Methodology

Nine Mile Point Road from US90—LA 18 is approximately 1.34 miles two lane with shoulders and open ditch. The existing roadway appears to be in good condition for mill and overlay along with associated thermoplastic pavement marking replacement. During our initial site visit the asphalt does appear to require full depth patching in areas prior to mill and overlay.

Royal has ample experience in providing construction engineering inspection services and construction contract administration in accordance with DOTD's Standards and Procedures. Our team has the understanding and field experience necessary to provide crucial project feedback to LaDOTD regarding project milling, overlay, base rehab, drainage structures, ADA requirements, and more. Royal has completed projects ranging in scope from Structural PCCP, Asphalt Mill and Overlay, underground utilities, sidewalks, to ADA-compliant ramps.

Royal has designed and constructed many similar multiuse sidewalk and pedestrian projects in Louisiana, making our team well-experienced, and prepared to manage and inspect the project throughout all construction phases. Our team is led by Carter O'Brien, PE, who brings over 14 years of heavy civil construction management experience. Mr. O'Brien has successfully executed more than 20 projects for LaDOTD.

In addition, our team includes certified Base and Embankment, Asphaltic Concrete, and PCC Pavement certified inspectors. Our construction engineering and inspection team are proficient in SiteManager and Headlight and know LaDOTD procedures and processes.

Based on our understanding of the project, knowledge of LaDOTD's processes and procedures, and experience completing similar pedestrian and ADA projects across the state, we will execute the project in the phases outlined in the figure below.

Why Royal?

Understanding of and proximity to the project

Our offices are located less than an hour from the project site.

Knowledge of LaDOTD's processes and procedures

Our team includes Carter O'Brien and Jeff Monfrey who have worked with LaDOTD for more than 14 years.

Our team has completed more than 100 similar roadway projects in Louisiana

Post Award Pre-Construction **Active Construction Substantial Completion Project Closeout** Design QA/QC plan Host preconstruction meeting Serve as client/contractor liaison Coordinate final walkthrough Assemble required Attend software training Agree upon and issue NTP Conduct daily inspections Develop final punch list turn-in documents Provide testing lab (if needed) Develop detailed inspection reports Obtain final project acceptance Develop QA/QC plan, Submit closeout documents Conduct document · Review project plans and materials testing, & 2059 Submittal sampling/testing special provisions field sampling plan As-builds Review & monitor traffic control Review DOTD provided Review preconstruction submittals plans Review & respond to sampling plan Review submittals preconstruction RFIs Site visit with project Ensure document control Coordinate with stakeholders team to ensure critical Issue monthly pay estimates Site visits will be done to assess items are reviewed in Manage matérials the need for utility relocation, as Coordinate contractor claims field coordinated with Jefferson Conduct QA/QC Parish CONTRACT DAY 1 - 30 CONTRACT DAY 31 - 140

Post Award

To hit the ground running post-award, our team will review LaDOTD's project plans and special provisions and attend any necessary department software training courses such as Headlight or SiteManager. Should the LaDOTD laboratory be unavailable, Royal will contact an independent lab to provide materials testing services throughout the project.

Pre-Construction

We understand the importance of aligning all stakeholders during the pre-construction phase. This phase will begin with a team kick-off meeting to discuss the project Notice to Proceed date, project goals, QA/QC plan, materials testing/field sampling plan, and pre-construction submittals. Before moving into the next phase, we will also confirm compliance, coordinate with utilities, and review and respond to pre-construction RFIs.

Active Construction

During construction, our resident inspector(s) will inspect the contractor's operation daily to confirm that all work is performed in accordance with the specified plans, specifications, and approved materials. We will also review the contractor's traffic control plan(s) daily to confirm it follows MUTCD guidelines and adheres to the project plans confirmed during pre-construction. As this project is within a commercial area with high traffic, and security of the

site is of the utmost importance, our inspectors will perform routine inspections and ensure the contractor addresses any potential hazards open to the public.

To confirm and maintain quality on the project, we will follow the project sampling plan provided during preconstruction. Our resident inspector(s) will confirm that asphalt and/or PCCP lots and Class 2 Base course are sampled and tested according to LaDOTD's specifications. Using SiteManager/Headlight, our team will include detailed documentation and photography of all testing, and will obtain and record all certificates of release, material certificates, Delivery, and necessary field paperwork throughout the project.

During asphalt mill/overlay rehabilitation projects, it is imperative to ensure there are no base or pavement failures before and after milling. Royal's Resident Inspectors and Managers are thoroughly familiar with asphalt pavement and preemptively identifying failed pavement sections to ensure the project has a successful lifespan. Royal will inspect the contractors' grades during layout and before paving to help mitigate any issues before the contractor has paved.

Providing timely responses to the contractor and managing document control is critical to maintaining the project schedule. Royal will manage all project correspondence during active construction, including RFIs, change orders, submittals, releases, monthly pay estimates, and other project documents. Our team intends to answer all RFIs within two business days. We will document all pertinent information and include all RFIs with the final project documents. Similarly, we will review all change orders per LaDOTD's specifications and, once recommended for approval, will send for electronic signatures via SiteManager.

Should there be a claim or dispute, our team will provide detailed records and track time and material information in a force account format. The Royal team is also experienced in providing recommendations regarding constructability issues or scheduling disputes and stand ready to support LaDOTD if required.

Substantial Completion

Once the project reaches substantial completion, our team will conduct a final walkthrough with all stakeholders and develop a final punch list items for the contractor to address. Once addressed, we will coordinate and obtain final project acceptance from all project stakeholders.

Closeout

After the project is complete, our team will assemble and submit all required closeout documents in accordance with LaDOTD standards, including the following:

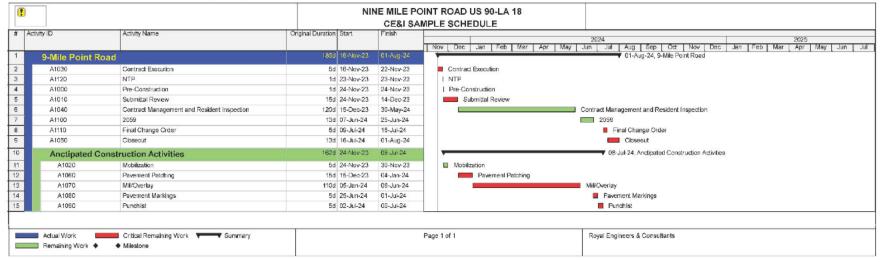

- Final estimate (zero sum)
- Change orders with required signatures
- · Certificates of release
- Correspondence
- RFIs
- Dispute resolution
- Weather and working day report
- Construction layout book
- · As-built plans submitted with final estimate reflecting all changes made from original plans
- Form 2059

Project Schedule

Royal's team includes experienced critical path schedule reviewers who bring first-hand construction field insight to accurately review contractor schedules for compliance and confirm that time requests are justified.

Sample Schedule

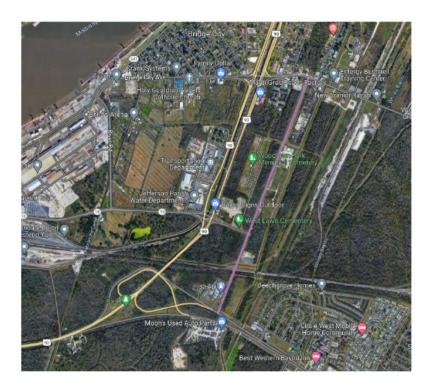

Nine Mile Point Road: US90-LA 18 (CE&I)

Project Location

DOTD Contract No. 4400027689, State Project No. H.014681.6

Project Success

Bloski Avenue Extension, U.S. Department of the Navy, NAVFAC Southeast

- Design-Build of access roadway
- Received CMAA Project Excellence Award "Best Infrastructure Project under \$10 Million"
- Site design and construction roadway, storm water drainage, sidewalks, lighting, signage, and landscaping
- Royal's value engineering efforts reduced the total project price by approximately \$800,000 and reduced the project's duration by 50 days.

Inspector Tools Smart Levels iPads/tablets Our inspectors will follow DOTD supplied sampling plans Measuring devices, and more

19. Workload:

For all contracts where a firm on the team is a prime consultant or sub-consultant and where **a**) the consultant selection was made by DOTD, and **b**) a contract was executed by the consultant and the contracting entity by the date the advertisement for this proposal was posted, list all work meeting the following criteria:

- 1) one of the team's firms is responsible for the performance of the work;
- 2) authorization to perform the work has been provided, as provided in the contract between the consultant and the contracting entity;
- 3) the work has not yet been performed and invoiced; and
- 4) the work is not currently suspended for an indefinite period of time.

For indefinite delivery/indefinite quantity (IDIQ) contracts, list open Task Orders individually.

List only the portion of the fees attributable to firms on the team.

(Add rows as needed)

DO NOT SUM

^{*} The **only** past performance evaluation disciplines to be used are: Road, Bridge, Traffic, CE&I/OV, Geotech, Survey, Environmental, Data Collection, Planning, Right-of-Way, CPM, ITS, Appraiser and Other (please specify). If a firm has more than one past performance evaluation discipline for any single project, the firm can use multiple rows to express the remaining unpaid balance per evaluation discipline.

^{**} Round to the nearest dollar. **Do not** round to the nearest thousands. If there are no active contracts with a remaining unpaid balance, place N/A in the Remaining Unpaid Balance column. NOTE: ALL FIRMS MUST BE REPRESENTED IN THIS TABLE. LEAVING THE "REMAINING UNPAID BALANCE" COLUMN BLANK IS NOT ACCEPTABLE.

20. Certifications/Licenses:

If the advertisement requires submission of licenses and/or certificates, include them here. **Otherwise, leave this section blank**. Royal Engineers and Consultants, L.L.C.

21. **QA/QC Plan**:

If the advertisement requires submission of a QA/QC plan, include it here. **Otherwise, leave this section blank.** If a QA/QC plan is included in this section and was not required by the advertisement, it will be redacted.

22. Sub-consultant information:

If one or more sub-consultants will be used, provide the name, address, point of contact and phone number for each. Otherwise, leave this section blank.

Firm Name (Name must match as registered with Louisiana's Secretary of State)	Address	Point of Contact and email address	Phone Number
G.E.C., Inc.	8282 Goodwood Blvd. Baton Rouge, LA 70806	Brian Buckel, PE bbuckel@gecinc.com	(225) 612-4260

(Add rows as needed)

23. Location:

If location is an evaluation criterion for this advertisement and the prime consultant intends to establish a local presence, describe the plan for doing so. Otherwise, leave this section blank. Any information included in this section will be redacted if not required by the advertisement.
