DOTD FORM: 24-102

PROPOSAL TO PROVIDE CONSULTANT SERVICES

(Revised December 12, 2024)

Prime consultant shall complete the DOTD Form 24-102 without altering the Form's text; however, the instruction and/or guidance for Sections 12 through 23 can be removed but do not remove Section title and number.

ANY CONSULTANT FAILING TO SUBMIT ANY OF THE INFORMATION REQUIRED ON THE DOTD FORM 24-102, OR PROVIDING INACCURATE INFORMATION ON THE DOTD FORM 24-102, MAY BE CONSIDERED NON-RESPONSIVE.

| 1. | Contract Name as shown in the advertisement | MOFFET RD OVER CHAUVIN BAYOU |
|----|---|---|
| | | TERREBONNE PARISH |
| 2. | Contract Number(s) as shown in the advertisement | 4400030633 |

| | | |

10. This is to certify that all information contained herein is accurate and true, and that the team presently has sufficient staff to perform these services within the designated time frame. By submitting this proposal, proposer certifies that it is not engaged in a boycott of Israel and it will, for the duration of its contract obligations, refrain from a boycott of Israel. Proposer also certifies and agrees that the following information is correct: In preparing its response, the proposer has considered all proposals submitted from qualified, potential subcontractors and suppliers, and has not, in the solicitation, selection, or commercial treatment of any subcontractor or supplier, refused to transact or terminated business activities, or taken other actions intended to limit commercial relations, with a person or entity that is engaging in commercial transactions in Israel or Israeli-controlled territories, with the specific intent to accomplish a boycott or divestment of Israel. The proposer also has not retaliated against any person or other entity for reporting such refusal, termination, or commercially limiting actions. DOTD reserves the right to reject the response of the bidder or proposer if this certification is subsequently determined to be false, and to terminate any contract awarded based on such a false response.

Signature above shall be the same person listed in Section 9:

Date: January 15, 2025

Pursuant to Act No. 581 of the 2024 Louisiana Legislature Regular Session, proposer further certifies that it does not have a practice, policy, guidance, or directive that discriminates against a firearm entity or firearm trade association based solely on the entity's or association's status as a firearm entity or firearm trade association. In addition, proposer certifies it will not discriminate against a firearm entity or firearm trade association during the term of the contract based solely on the entity's or association's status as a firearm entity or firearm trade association.

11. If a Disadvantaged Business Enterprise (DBE) goal has been set for this advertisement, indicate which firm(s) will be used to meet the DBE goal and each firm(s)' percentage.

Firm(s):

Firm(s):

Firm(s):
Firm(s)' %:
Not applicable

12. Discipline Table:

As indicated in the advertisement, insert a completed table here. The percentages for the prime and sub-consultants must total 100% for each discipline, as well as the overall total percent of the contract.

The **only** disciplines to be used are listed in the drop down in each row (Appraiser, Bridge, CE&I/OV, CPM, Data Collection, Environmental, Geotech, ITS, Other (must specify), Planning, Right-of-Way, Road, Survey, and Traffic). **Remove rows as needed.**

| Disciplines | % of Overall Contract | Prime TriCoeur Services, LLC | Firm B Landsource, Inc. | Firm C ECS SOUTHEAST, LLP | | Each Discipline must total to 100% |
|--|--------------------------|---------------------------------|----------------------------|------------------------------|--|------------------------------------|
| Bridge | 63.3% | 100% | | | | 100% |
| Survey | 28.1% | 10% | 90% | | | 100% |
| Environmental | 8.6% | 4% | | 96% | | 100% |
| Identify the percentage of work for the <u>overall contract</u> to be performed by the prime consultant and each sub-consultant. | | | | | | |
| Percent of Contract | 100% | 66.4% | 25.3% | 8.3% | | |

13. Firm Size:

For all firms that are part of this team, indicate the approximate number of personnel to be committed to this contract, by DOTD Job Classification and the total number of personnel within the firm that could provide support, if needed. If a specialized job classification is required and not included on the DOTD job classification list, specify "Other (must specify)" and include the classification title inside the parentheses.

The DOTD Job Classification(s) to be used can be found at the following link:

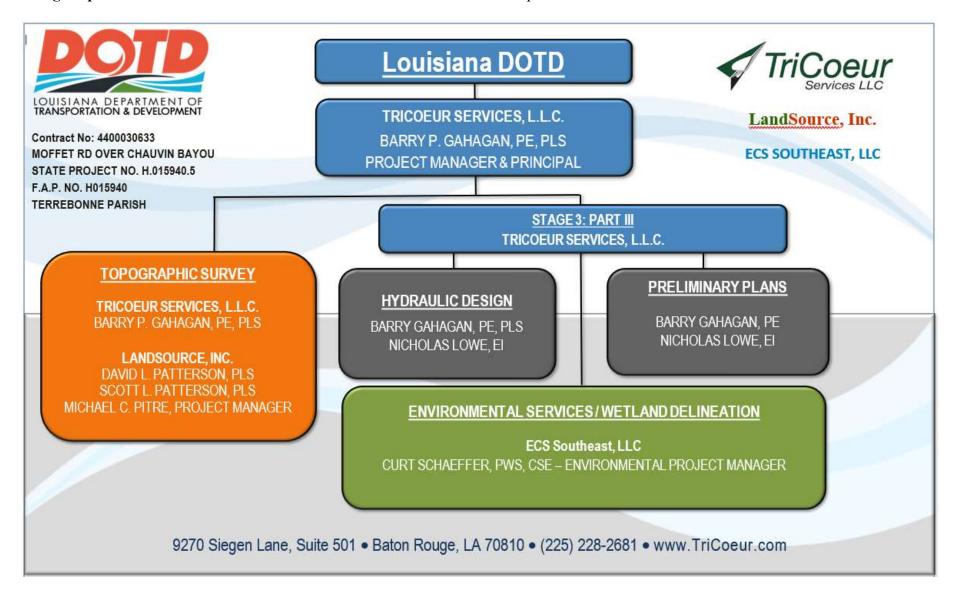

http://wwwsp.dotd.la.gov/Inside LaDOTD/Divisions/Engineering/CCS/Job Qualification/Job%20Classifications%20with%20Descriptions.pdf

| Firm name | DOTD Job Classification | Number of personnel committed to this contract | Total number of personnel available in this DOTD Job Classification (if needed) |
|---------------------------|-------------------------|--|---|
| TriCoeur Services, L.L.C. | Engineer | 1 | 5 |
| | Engineer – Intern | 1 | 1 |
| | CADD Drafter | 1 | 1 |
| | Party Chief | 0 | 1 |
| LandSource, Inc. | Surveyor | 2 | 2 |
| , | CADD Technician | 2 | 3 |
| | Clerical | 1 | 1 |
| | Administrative | 2 | 2 |
| | Party Chief | 2 | 4 |
| | Technician | 1 | 1 |
| ECS SOUTHEAST, LLC | Environmental Pro | 1 | 2 |
| | Supervisor - Other | 1 | 1 |

14. Organizational Chart:

Provide an organizational chart showing ALL relevant prime consultant and sub-consultant (if applicable) personnel assigned to the contract, area of project responsibility for each, and reporting lines for the purposes of this contract. An individual's role does not necessarily have to match their DOTD job classification identified in Section 13. If applicable, identify all personnel performing traffic engineering analysis and/or QC of traffic engineering analysis by placing an asterisk next to their name. Include the certificates required by the Traffic Engineering Process and Report Training Requirements article of the Advertisement in Section 20. It is acceptable to use an 11x17 format for Section 14.

15. Minimum Personnel Requirements:

Use the table below to identify both prime consultant and sub-consultant staff designated to work on this contract meeting the Minimum Personnel Requirements (MPRs) specified in the advertisement. Ensure the résumé reflects the required experience stated in the MPR. Make sure the P.E. discipline is also listed (highlighted in table) that is meeting the MPR; e.g. professional civil engineer should show the discipline of the license as civil if meeting that MPR.

| MPR No. Do not insert wording from ad | Personnel being used to meet the MPR (Individual(s) may not satisfy more than one MPR unless specifically allowed by Attachment B of the advertisement) | Firm employed by | Type of license / certification & number | State of license | License / certification expiration date |

16. Staff Experience:

Résumés shall be provided for all prime and sub-consultant personnel listed in Sections 14 and/or 15 of the proposal. Résumés of personnel not identified in Section 14 or Section 15 of the proposal should not be included and will not be evaluated. Résumés are **limited to 2 pages per person**. Any certificates required by the advertisement are to be placed in Section 20.

| | provided Verification Services - USACE/Georgia Environmental Protection Division (GA EPD). |

Identify the team's project experience most relevant to the scope in the advertisement. The projects*** should be limited to a total of 20, with no more than 5 projects being represented by the prime consultant and with no more than 3 projects represented by each sub-consultant on the team. If more than 5 projects are identified for the prime consultant, all projects identified after the first 5 will not be evaluated. If more than 3 projects are identified for a single sub-consultant, all projects identified after the first 3 from that sub-consultant will not be evaluated. Include no more than one page per project. Projects identified shall only include work performed by firms on the team. The projects identified do not necessarily need to have been DOTD projects.

As Prime Consultant, conducted Project Kickoff meeting with the Parish, coordinated Environmental and Topographic survey efforts, prepared preliminary bridge replacement plans for this rural local roadway and hydraulic analyses of the drainage canal crossing (pumped drainage/polder system), designed horizontal and vertical geometrics for the approach roadway levee crossing and bridge span configuration with emphasis on providing safe travel while minimizing impact to adjacent residents. All current members of the TriCoeur OSB Team have been involved in this project and performed in Louisiana. All current members of the TriCoeur staff were involved in this project and 100% performed in Louisiana.

ECS performed a wetland delineation study at the proposed Martin Lane Bridge Site located at Martin Lane, Happy Jack, Plaquemines, Louisiana. The site consisted of an approximate one-acre portion of a larger parcel under joint ownership between the state of Louisiana and the Federal Government (drainage canal and protective federal levee). The site consisted of a drainage canal and associated bridge, maintained fields, wooded land, Martin Lane and coastal marsh. ECS prepared a report detailing the findings of the WOUS delineation.

ECS performed a wetland delineation and listed species assessment for a proposed solar project at a 1,089-acre site in eastern Mississippi. The JD, cultural investigations and permitting tasks are currently on hold. The state and federal (USFWS IPaC) listed species databases were reviewed and preliminary surveys were performed for potential listed species that may occur onsite. Findings were documented in a formal report.

18. Approach and Methodology:

INTRODUCTION

The professional staff provided by the TriCoeur Services, L.L.C. (TriCoeur) team offer over 4 decades of LADOTD design experience including Off-System Bridge Replacement (OSBR) experience with a proven record of project delivery for the OSBR program since our Firm's inception 12 years ago. Our Team has worked together providing topographic surveys, environmental / wetland delineations, and plan preparations for OSBR projects involving both standard plan and (frequent) non-standard structures while working to maintain close accord with current LADOTD procedures, design criteria, reference manuals, guidelines and checklists.

TriCoeur's team is led by **Barry Gahagan**, **PE**, **PLS** with over 40 years of design experience primarily in service to LADOTD. Since TriCoeur's inception in 2010 Barry has served as project manager on **9 LADOTD bridge replacements**, **as well as 5 Parish bridge replacements in general conformance with OSBR** coordinating with other federal funding sources. **Barry's design and project management experience** includes both On and Off-System bridges ranging from very low volume rural to major arterial / Interstate interchange structures. TriCoeur's survey subconsultant LandSource is led by David Patterson, PLS with over **80 LADOTD bridge replacements**. TriCoeur's team includes **ECS Southeast** who has a significant history of performing environmental (SOV, JD, &Wetland Delineation) services for LADOTD.

PROJECT UNDERSTANDING, SITE VISIT, & EXPECTED CHALLENGES

TriCoeur is familiar with the **Moffet Road** bridge site located in southeastern Houma traversing through industrial park between Grand Caillou Road (LA 57) and Bayou Terrebonne. We are familiar with project challenges, utility, and traffic maintenance and access concerns.

KICKOFF MEETINGS

Following the NTP, TriCoeur will meet with the OSBR Program Manager and staff to discuss the project, review the schedule, receive LADOTD field books, review any program guideline changes, invoice requirements, and establish communication protocols. Our project schedule will be based on critical path items with concurrent items being utilized to **expedite project delivery**.

TriCoeur will also meet onsite with **Parish** representatives prior to the start of topographic surveys consistent with the OSBR Guidelines. Additional items such as planned corridor improvements, hydraulics, structure preferences and corridor users will be discussed. Previous 5-years crash history will also be requested at this meeting. Meeting minutes for both meetings will be provided within 3 days of the meeting for review.

TOPOGRAPHIC SURVEY

TriCoeur's engineering staff will work closely with survey staff during this phase to ensure that all required data is collected, completed, and reported in accordance with LADOTD Off-System Bridge Guidelines. GPS control will be established using at minimum four (4) control points set in concrete with digital levels run with horizontal and vertical closure verified by conventional methods. Initial field data including existing bridge limits, channel and roadway limits will be shared with Engineering to facilitate existing alignment geometrics enabling stabling and alignment stakeouts in advance of roadway cross sectioning. Bridge sketches will be prepared, and the channel traverses shown on the field roll. Channel sections will be of appropriate location and number sufficient both for accurate digital terrain modelling and for hydraulic modelling/analysis.

Survey data will undergo thorough QC/QA with review by both the surveyor, party chief and engineering project manager for completeness and accuracy prior to review submittal.

TriCoeur Services LLC

PRELIMINARY PLAN PHASE DEVELOPMENT

50% STATUS & HYDRAULICS ANALYSIS

Hydrologic analysis will begin once site confirmation and channel / debris flow / design water surface / overtopping characteristics can be determined. Hydraulic analysis will follow with LADOTD authorization to proceed and in preparation of 50% Preliminary Plans.

-Design Criteria

TriCoeur will review the 5-year crash history of the site provided by the Parish to determine the roadway's performance. The roadway is a dead-end service primarily to boat camps. Alternative travel paths are apparent which may facilitate crossing closure for replacement construction. Traffic maintenance alternatives will be confirmed with Parish representatives at kickoff. Anticipated design criteria and LADOTD Design Report will be submitted for review and approval, guiding the remainder of plan development.

-Hydraulics & Scour Analysis

TriCoeur will begin the hydraulics and scour analysis by reviewing additional data including topographic maps, FEMA Firm maps, USGS Quadrangle maps and LiDAR to delineate the site's drainage characteristics. Peak discharges for this site are expected to based upon coastal flowing conditions. Surface elevations will be generally developed using conventional software including LADOTD's HYDR1130 and HECRAS. Hydraulic design will be conducted in accordance with the LADOTD Hydraulics Manual; as applicable, with results reported; including the Hydraulic Data table. In this coastal site the bridge hydraulics are not anticipated to affect existing land use.

-Bridge Type Considerations

The bridge Type, Size and Location which will determine the appropriate bridge length, revetment slopes and hydraulic opening will be developed at the start of the hydraulics analysis. An RCB may be analyzed as a potential replacement structure option. If needed, TriCoeur's staff has the experience and design tools to perform non-standard bridge structure designs per LRFD methodology although none are anticipated for this site.

-50% Preliminary Plans

Once hydraulic analysis and reporting is complete, the remainder of the 50% PP will be developed including the roadway design horizontal and vertical geometry, guardrail, roadside drainage considerations, cross-sectional geometrics and transitions. The roadway will be modeled to determine the limits of construction. Plans will be developed in accordance with LADOTD plan preparation and OSBR Guidelines. Should Design Exceptions or Waivers be recommended, Draft forms will be submitted for DOTD and Parish consideration.

75% STATUS (PRE-PIH) & SOLICITATION OF VIEWS (SOV's)

Following the 50% Preliminary Plan review, TriCoeur will address all comments and will; unless otherwise directed, advance plans to a Pre-PIH review status. Should this project's scope clarity be confirmed at the 50% status this proceed to Plan in Hand without the submittal of Pre-PIH plans, aiding in project delivery. Upon approval of the replacement structure, TriCoeur and ELOS Environmental will prepare the Solicitation of Views (SOVs), receive LADOTD approval thereof and mail these to the recipient list provided by LADOTD Environmental Section. Responses will be logged and loops closed to all SOV responses.

95% STATUS (PLAN IN HAND)

Comments from the preceding review(s) will be addressed in the Plan in Hand submittal. The roadway model, typical sections, plan & profiles, general notes, general bridge plan, summary of estimated quantities, and construction signing will be developed from the previous plan submittal(s). No superelevation is anticipated for this tangent alignment. Standard Plan lists, cost estimate and the Constructability & Biddability Review form will be provided. TriCoeur will

attend the Plan in Hand meeting onsite with LADOTD and Parish representatives. Meeting notes will be provided within one week of receipt of compiled participating stakeholder comments.

100% STATUS (POST PLAN-IN-HAND PRINTS)

Plan development will continue to progress as comments are addressed and major design elements are completed. Items discussed at the PIH meeting will be addressed and added to the plans per the PIH Meeting Memorandum.

-Environmental

The wetland delineation will be initiated upon authorization and will be conducted onsite. A wetland findings report prepared in accordance with US Army Corps of Engineers (USACE) guidelines. A Preliminary Jurisdictional Determination (PJD) will be requested from the USACE upon report completion. Permit sketches sized 8.5"x11" will be prepared to accompany the wetlands report, SOV packet, and Environmental Determination Checklist.

-R/W Sketches & Other Documents

TriCoeur will prepare the Right of Way Sketch per OSBR guidelines showing any required taking lines and anticipated parcels affected along with a draft of the R/W agreements. A draft utility conflict assessment will be provided to the Parish to aid in required utility relocations. In addition to the 100% Preliminary Plans, environmental package and R/W sketches, the Design Report forms will be finalized and sealed by TriCoeur's project manager. Checklists will be prepared and submitted. Pile length requests with all supporting documentation will be submitted at this stage for use by the geotechnical engineer.

FINAL PLAN DEVELOPMENT

60% FP STATUS (PRE-ADVANCED CHECK PRINTS)

Following the environmental approval and receipt of the Notice to Proceed for Final Plans, TriCoeur will promptly develop detailed plan sheets including embankment widening details, geometric layouts (if required), erosion control plans, quantity summary sheets, Pile Data & Bent Elevation, and concrete surface finish. All bridge structure and pile cutoff elevations will be finalized. Any special design superstructure or substructure bridge elements or special approach slabs will be fully detailed and placed on bridge sheets. Bridge railing, joint and bearing details will also be completed. Should nonstandard structure /component be required for the site, a draft of the bridge calculations and Load Resistance and Factor Rating (LRFR) will be prepared at this stage to ensure adequacy of reviews.

95% & 98% FP STATUS (ADVANCED CHECK PRINTS)

Comments from the Pre-ACP submittal will be reviewed with LADOTD and resolved/addressed. Additional details, notes or changes will be added to the plans and quantities will be completed. The ACP Plans will be provided to the Plan Quality Unit (PQU), if necessary. If necessary, an ACP review meeting will be held to ensure all comments are addressed. Upon resolution, 98% Final Plan plans will be prepared for review by the Chief Engineer and for use by General Files to prepare the proposal. TriCoeur will work with LADOTD staff to input pay items and quantities into AASHTOWARE and generate final cost estimates.

100% FP STATUS (TRACINGS)

TriCoeur will provide the 100% Final Plans (Tracings) as per OSBR Guidelines with the Title Sheet on Mylar for Chief Engineer signature. This submittal will be prepared once all comments are addressed from task managers, PQU and/ or the Chief Engineer. Parish granted Design Exceptions will be noted on the Title Sheet. A bound calculations book will be prepared and submitted with the original field books and an electronic copy of the Hydraulics Report.

QUALITY CONTROL AND QUALITY ASSURANCE (QC/QA)

Each submittal will be accompanied by LADOTD QC/QA certification forms. Design and plan comments, along with their resolutions will be documented in TriCoeur's Design Comment Review forms.

LETTING

TriCoeur will be available to assist LADOTD during letting including responses to Falcon questions. Upon receiving the bid results and tabulations, TriCoeur can; upon request, provide additional information to LADOTD as needed regarding contract award, etc.

STAGE 5: CONSTRUCTION

TriCoeur's staff will be available to assist LADOTD with Construction Support

(if necessary) including RFI responses, attending meetings, and reviews of shop drawings, design review of construction modifications, and other such contractor submittals.

19. Workload:

For all contracts where a firm on the team is a prime consultant or sub-consultant and where **a**) the consultant selection was made by DOTD, and **b**) a contract was executed by the consultant and the contracting entity by the date the advertisement for this proposal was posted, list all work meeting the following criteria:

- 1) one of the team's firms is responsible for the performance of the work;
- 2) authorization to perform the work has been provided, as provided in the contract between the consultant and the contracting entity;
- 3) the work has not yet been performed and invoiced; and
- 4) the work is not currently suspended for an indefinite period of time.

For indefinite delivery/indefinite quantity (IDIQ) contracts, list open Task Orders individually.

List only the portion of the fees attributable to firms on the team.

| Firm(s) ALL FIRMS MUST BE REPRESENTED IN THIS TABLE | Discipline(s) * | Contract Number and State Project Number | Project Name | Remaining Unpaid Balance** |
|--|---------------------------|--|-------------------------------------|----------------------------------|
| TriCoeur Services, L.L.C. | Bridge | 4400025191/H.015051.5 | Martin Lane over Drainage Canal | \$17,320 |
| TriCoeur Services, L.L.C. | Other (Value Engineering) | 4400024148 | IDIQ for Value Engineering Services | N/A |
| TriCoeur Services, L.L.C. | Other (Value Engineering) | 4400027920 | IDIQ for Value Engineering Services | N/A |
| TriCoeur Services, L.L.C. | Bridge | 4400013405/H.013098.5 | Vernon Parish | \$9,228 |
| TriCoeur Services, L.L.C. | Bridge | 4400013386/H.013122.5 | Ouachita Parish | \$41,300 |
| Landsource | Survey | N/A | | N/A |
| ECS SOUTHEAST, LLC | Geotech | 4400024657/H.014267.5 | Savanne Road over Hanson Canal | \$2,931 |
| ECS SOUTHEAST, LLC | Geotech | 4400024657/H.014259.5 | Hubs Bayou and Sand Creek Bridges | \$35,423 |

DO NOT SUM

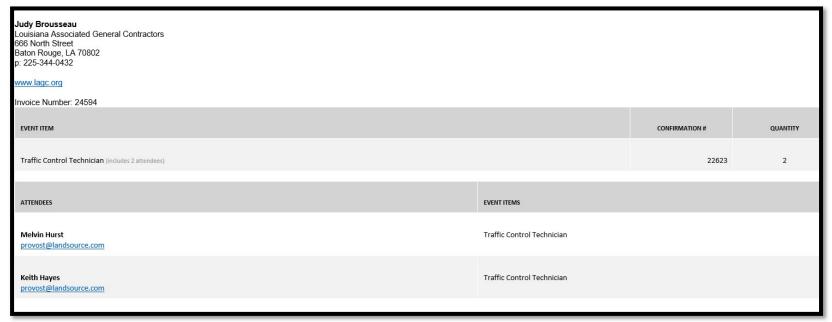

^{*} The only disciplines to be used are: Appraiser, Bridge, CE&I/OV, CPM, Data Collection, Environmental, Geotech, ITS, Other (must specify), Planning, Right-of-Way, Road, Survey, and Traffic. If a firm has more than one discipline for any single project, the firm can use multiple rows to express the remaining unpaid balance per discipline.

^{**} Round to the nearest dollar. **<u>Do not</u>** round to the nearest thousands. If there are no active contracts with a remaining unpaid balance, place N/A in the Remaining Unpaid Balance column. **NOTE: <u>ALL</u> FIRMS MUST BE REPRESENTED IN THIS TABLE.** LEAVING THE "REMAINING UNPAID BALANCE" COLUMN BLANK IS NOT ACCEPTABLE.

20. Certifications/Licenses:

If the advertisement requires submission of licenses and/or certificates, include them here. Otherwise, leave this section blank.

Landsource, Inc. - Traffic Control Technician registration

Louisiana Secretary of State Registrations

21. QA/QC Plan:

If the advertisement requires submission of a QA/QC plan, include it here. Otherwise, leave this section blank. If a QA/QC plan is included in this section and was not required by the advertisement, it will be redacted.

QC procedures shall assure:

- 1) A supervisor or team leader is responsible for determining the necessary technical knowledge and experience of the designer/checker for that specific design; Designers & checkers are assigned to bridge projects by matching experience to project complexity.
- 2) All bridge plan sheets shall include the names or initials and dates of the appropriate designer and checker, and may include their signatures. Including the names or initials of the drafter and reviewer where appropriate. Sealing of the bridge plans by the engineer in responsible charge of the work will follow state requirements.
- 3) All relevant special provisions shall be identified by the appropriate author in responsible charge. Sealing of special provisions will conform with State requirements.
- 4) Design calculations, check calculations, hydraulic and geotechnical reports, review comments/resolutions and related documents as discussed (above) shall be retained in the permanent bridge design file with QC checklist, and cost estimates if prepared in the design file.
- 5) A documented program which details the procedures, standards, and policies to be used in the oversight of bridge design.

QA procedures shall include:

- 1) Independent check of design calculations with depth and extent of this review commensurate with design feature size, complexity, and level of risk.
- 2) Participation in field engineering reviews during design, and when requested, during construction and in-service.

Design Criteria:

- 1) Louisiana Department of Transportation and Development Off System Highway Bridge Program Guidelines Latest Edition
- 2) Reference Project Advertisement (Pg 5) Dated (December 2024)

Design Checklists:

Louisiana Department of Transportation and Development - Off System Highway Bridge Program Guidelines - Latest Edition

- 1) Topographic Survey Checklist
- 2) Plan-in-Hand checklist
- 3) Design Report
- 4) Constructability/Biddability checklist

PLAN / CONSTRUCTABILITY / BIDDABILITY REVIEW

(ADOPTED FROM LADOTD WITH MODIFICATIONS)

Purpose:

- To provide information to assist in producing quality plans.
- To provide a history of information that is easily accessible.
- To provide questions to stimulate discussion of potentially problematic areas.
- To provide questions to stimulate checking details and items required to complete the project.
- To provide aid during design for QA/QC
- To provide primary discussion for the plan-in-hand meeting

Instructions for completing the form

- The Design Review portion of the form shall be filled out by the designer during design and prior to PIH submittals.
- The form may be filled out by any district person (ADA, Area Engineer, Lab Engineer, etc.) but the Project Engineer must sign the signature sheet that he concurs with the comments. It is encouraged that the Area Engineer and the Project Engineer both review the plans.
- The Project Engineer and any District personnel designated by the Project Engineer are responsible for reviewing the plans and filling out the review form. The Project Engineer and all reviewers must sign the signature sheet at the back of the form. The Area Engineer is also encouraged to review the plans.
- If answer to the question is in blue box (or lightly shaded if in black and white), a comment is **NOT** required.
- Most questions are designed that a "NO" answer will require comments on what is missing or needed.
- Most questions are designed that a "YES" answer means the plans meet the project needs or a follow up question is required.
- Comments should be shown by reference number on notes page for easy reference. (Example III-2)
- Constructability and Plan-in-Hand questions shall be answered prior to the Plan-in-Hand. The plans should provide enough detail to construct the work required.
- ACP and PS&E / Biddability submittal shall have copies of the completed PIH review attached. If missing contact the Project Manager for a copy. The plans and specifications should provide the details and pay items to bid the project.
- Project Managers are required to respond to all comments and copy all reviewers.
- Each review is considered complete when all comments are addressed
- If question is answered N/A, question is not applicable to project.
- 95% Final Plan reviews (ACP) shall have the completed 95% Preliminary Plan (PIH) review attached. It may be helpful to reference the PIH plan set during the ACP review.
- Comments may be required for certain checklist items. Comments are to be written at the back of the form along with reference numbers for the plan section and checklist item number.

Project managers shall collect all review forms, insert responses to any comments, and copy all reviewers.

| 3. Are deck joint details shown? | | | | | | | | | | |
| 4. Are drains removed over railroads, roadways, and revetments? | | | | | | | | | | |
| 5. Are girder connection details shown? | | | | | | | | | | |
| 6. Is adequate information provided for the fabrication of girders, cross frames, and diaphragms? | | | | | | | | | | |
| 7. Has the pouring sequence been specified? | | | | | | | | | | |
| -APPROACH SLABS | | | | | | | | | | |
| Are the drainage details for the approach slab adequately shown? | | | | | | | | | | |
| -NAVIGABLE WATERWAYS (Not anticipated for this Project) | | | | | | | | | | |
| Are details for clearance gauges shown? | | | | | | | | | | |
| Are details for navigation lighting provided? | | | | | | | | | | |
| 3. Has pier protection been addressed? | | | | | | | | | | |
| -MOVABLE BRIDGES (Not for this Project) | | | | | | | | | | |
| 1. Are all required Special Details included (End Drains, fencing, etc.) ? | | | | | | | | | | |
| 2. Has operator's house been located? | | | | | | | | | | |
| 3. Has adequate parking and access been provided for operators house? | | | | | | | | | | |
| -As-Builts | | | | | | | | | | |
| Are As-built drawings required for this project? | | | | | | | | | | |
| 2. Would As-built drawings be helpful for bidding and/or construction? | | | | | | | | | | |
| 3. Are As-built drawings included with these plans? | | | | | | | | | | |
| -Permitting Issues | | | | | | | | | | |
| Are utility permit requests adequately addressed? | | | | | | | | | | |
| 2. Are there any special requirements that need to be addressed in the plans for | | | | | | | | | | |
| the construction of a bridge over a navigable water way or roadway? (These | | | | | | | | | | |
| requirements may be related to agreements with the USCG, COE or for | | | | | | | | | | |
| purposes of maintenance of traffic) | | | | | | | | | | |

| 3. | Are there any access issues that may affect the contractors' construction of the bridge or demolition of the existing bridge that have not been addressed in the plans? | | | | | | | | | | |
| 4. | Is the water depth at the site of sufficient depth to float barges? | | | | | | | | | | |
| | Will barges obstruct navigation? | | | | | | | | | | |
| 6. | Are all environmental commitments being met by the proposed construction methods? (These commitments should be noted in the General Notes section of the plans) | | | | | | | | | | |
| 7. | Has the removal of the existing bridge been adequately coordinated with the permitting agencies and any special requirements covered in the plans? | | | | | | | | | | |
| -Const | ruction Site Access | | | | | | | | | | |
| 1. | Are there any access issues the contractor may have for the delivery of materials to the project site? (Posted bridges) | | | | | | | | | | |
| 2. | Are there any driveways or property entrances that will have to be maintained during construction, relocated and / or reconstructed? | | | | | | | | | | |
| 3. | Will any work bridges or haul roads be required for the construction of the bridge? | | | | | | | | | | |
| 4. | Is there sufficient right of way to construct the bridge structures? | | | | | | | | | | |
| 5. | Are there any other construction related issues that will affect the constructability of the project that needs to be accounted for in the construction estimate? | | | | | | | | | | |
| 6. | Are there any utilities supported on the structure that need to be addressed in the plans? | | | | | | | | | | |
| -Maint | enance of Traffic | | | | | | | | | | |
| 1. | For navigational traffic, have channel alignment and clearance issues been addressed? | | | | | | | | | | |
| 2. | If the project is to be constructed utilizing phased construction, will the construction scheme facilitate maintenance of traffic? | | | | | | | | | | |
| -Genei | al Constructability and Biddability | | | | | | | | | | |
| | Are there adequate staging areas for the contractor? | | | | | | | | | | |
| 2. | Are all required work items covered under proper pay items? | | | | | | | | | | |
